RIVERTON,

Cosily Nestled By a Beautiful Wooded Brook

With Paved Streets and Superior Graded Schools, Presents Exceptional Attractions.

Reported, Notwithstanding the Severe Drouth.

RIVERTON, Neb., August 8 .-The architectural styles of the average Western Nebraska towns are not gorgeous with oriental'splendor, grand with the gloomy magnificence of the characteristic of the Queen Anne style. Truth to tell the streets of the averprairie remind me of a row of dry goods boxes in front of a cross road ciple was made to the useful arts, ex-

ception. Its buildings are compact, exposed to moist situations. It soon and painted neatly, and many of them very tastefully. The town does not time contained in hides could be renstruggle over the whole prairie, like dered insoluble by this process as well sis of this city, has carefully examined a squad of new recruits that can't as glue, which is simply gelatine ex- the material for its contained chrom keep in ranks, but, like wheeling columns of old veterans, the buildings "touch elbows" and "dress on the centre." Shade trees are not formally as glue, which is simply gelatine extended from hides and other portions ium, so far as it can be dissolved ings "touch elbows" and "dress on the centre." Shade trees are not theory. By soaking a hide deprived during periods rauging from twelve the streets are novel of the heir in a diluted solution of hours up to six days, and he finds

prairies, but cosily it nestles by a could not be rendered soft by the use beautiful little wooded brook at the base of a hill that wards off the northern blizzard. The people are of the the refinements and culture of the

THE CROPS. On the high divide north of the valley there is an extraordinary yield,

showers that did not visit this locality, and the same is true of the high divide and the same is true of the high divide passing readily to the in-where the heavy crops are reported, terior portions of the skin. On this timate such a valuable quality. At Nevertheless, wheat gives a fair yield, account a very long time is required to first chromate leather had an odor of

The good farmers are, however, reasonably sure of a crop at all seasons for, with thorough cultivation, drouth loses more than half its terrors. This is a region where weeds are wonderfully scarce, and hence many farmers can't see the necessity for plowing alum, smoke and crosste as well as dues a nerfect finish. In consequence that the second corn more than once or twice. Nor

vitality or conquor disease.

their wealth of moisture and mud to new process domestic tanneries may the thirsty soil by means of irrigation spring up again. then this valley will be the most fertile in the world. A Colorado farmer tilling deserts of

practical desert destroyers will come out and show these people some tricks permanent footing. Certainly the on farming that will astonish the valleyites of to-day. There is too little enterprise and too little experimenting on the part of perimental tannery, have been very those who are competent to do so, and last, but not least, there are too many who wer did work and never will. Of course there are many very good farmers in this region, as bounteous harves one residence and profitable results conclusively show, and still there are perhaps an undue proportion of the former classes, that were attracted to the country by the game, the opportunity of getting a free farm from Uncle Sam and the excellent chances of picking up money they have read, seen or heard of the Heinzerling process, the essential feature of which is the substitution of a ture of which is the substitution of a from freighting or cow punching.

There is nothing like being independent of rain. The most profitable farms in the United States are those farms in the United States are those rials which have been in use from a very remote period in history; and tion is the sole dependence for water supply.

There is a good time coming for all leather manufacture. For economy this valley. It is wonderful the strides as to the ordinary cost of production, as to the ordinary cost of production, with which it has made in the past, but they are nothing to what the future will show.

Its crops now are superior to any in-Its crops now are superior to any in this new mineral tannage threatens to the surrounding states and yet I ex-pect to see the time when thirty, and leave all competition behind, whether proposals for STATIONARY we compare it with the cost of Brit. pect to see the time when thirty, and even forty bushels of wheat to the ish mixed tannages or with the cheap acre will be a common yield, and hemlock-bark manufactures of Amer-

miliar features that we had known time, which is such a marked feature fifteen years ago, but there were in the new process, it is well to consubtle indefinable somethings that resider how the tanning operation vealed the identity that wrinkles tried | which is almost, if not quite, exclufilling the post of danger.

An Extraordinary Yield of Crops keeps the postoffice, my thanks are tained chromic acid at once does its
