TALES ABOUT "THE FALL." Some of the Accidents, Tragedies

and Mysteries of Ningara.

Correspondence of New York Times. I have lately seen affidavits by those who saw the Falls "run dry" for hours on March 31, 1848. A wind had driven in an unusually large volume of water from the lake down the river. Then it had changed suddenly and diminished the downward current. At the same time an ice-dam obstructed the flow. So it happened that a man and his daughter were enabled to walk dry-shod nearly one-third

across the lip over which the waters plunge. The point of the reminiscence is this—the channel was far from clear. It was full of enormous and jagged rocks, such horrid needles of projecting flint that the reporter shuddered to think he had sailed over them in the Maid of the "The Falls" have been "written up"-
