

GOSSIP ABOUT THE SENATORS.

Watson C. Squire of Washington and His Curious Ways

ONE OF DAKOTA'S BRAINY MEN

How Judge Moody Came Into Prominence—Stanford and Squire—Senator Manderson's Magnificent Turnout.

Pen Pictures from Washington.

The senate has a new millionaire this season in the person of Watson C. Squire, of Washington. Senator Squire is worth \$1,000,000. He can spend \$50,000 a month. He can spend \$50,000 a month in Washington and not miss it, and I am told that his entertainments will be frequent and liberal. He will live at the Arlington hotel, and his family will be among the leading figures in Washington society. Senator Squire was born in Ohio, but lived in New York, and has made his fortune in Washington territory. He married into the family of the Remingtons, the noted gun and type-writer people, and it was some years ago that he moved to Seattle and began to speculate in real estate. He now owns houses and lands and his property increases in value every year. He looks more like a New York club man than one of the newest of the western senators. He has the tastes of a club man, too, and his well-filled out front will not be out of place among the fat gold bags of the senatorial chamber. He is a good rider and a man of ability. I asked an Indian congressman who knows him well tonight what kind of man Squire is. He replied, "Well, he is a man of a few dollars. He is full of good nature, has the accomplishments of a man-about-town, is a good storyteller, and is a combination of generosity and the reverse. He will be highly with you as to the difference of a quarter, and will spend \$25 in champagne in explaining the senatorial code. My dear friend, will introduce you to my friend Watson C. Squire. You will find him a hog in little things and a prince in big things."

My dear friend, will introduce you to my friend Watson C. Squire. You will find him a hog in little things and a prince in big things.

Another bright senator from the north pole, is the late Senator Moody of Idaho. Moody's home is at Deadwood in the heart of the Black Hills. He is the leading lawyer of his state, and a good deal of the metals that come out of this mineral region drop into his pocket in the way of fees. I am told that his income is at least \$100,000 a year. He goes on an expedition for the king of Korea, and in all probability intends to counter the efforts of Prince Min Yui Ho, who has been living for some time away from the Korean capital and at Hong Kong. This prince is a friend of the king, and there must be trouble brewing in Korea or Secretary Allen would not be so busy. Secretary Allen would like to see a journey which his services are needed here. Korea has its factions, and the relations of China and Japan to the country through its sharp walled eyes, and the various intrigues of the Korean court are impudent even to the king himself. It is in his majesty's name that the American minister, Mr. Allen, has also the advice of our minister, Mr. Allen, who is a very close to the throne. Secretary Allen has more weight in Korea than any other man in the world, starting out to China as a missionary doctor, he has developed into one of the shrewdest diplomats of the east.

Speaking of Korea, I learn that the American general is now getting along very nicely, and that the army is slowly but surely being put upon a modern basis. General Dyer proposes to stay here for some years yet, and it is not improbable that his family, who are now living in Washington, will go out to visit him. Mr. Wade Hampton (Gibbs) is no longer postmaster at Columbia, S. C., and Senator Hampton and Postmaster General Wauwampsee continue not to smile as they pass by. The trouble formed the subject of what among the senators not long ago, and while the most of them criticized Senator Wade Hampton for advising the postmaster general that he could give an appropriate lecture to his Sunday school pupils on the instructive story of Ananias and Sapphira, Senator Voorhees appeared in the chamber and said that he could give an appropriate lecture to his Sunday school pupils on the instructive story of Ananias and Sapphira, Senator Voorhees appeared in the chamber and said that he could give an appropriate lecture to his Sunday school pupils on the instructive story of Ananias and Sapphira.

The lovers of horses among the statesmen of the capitol have spent considerable time in the cloak rooms of the house and senate this week in talking about Senator Stanford's great trotter, which he lately sold to Robert Hooper. No stock is taken in the state of the horse. Senator Stanford offered Stanford \$200,000 for the horse after sale was made to Hooper, and the probability is that the price paid for it was \$200,000. This afternoon, Stockbridge has one of the finest breeding farms in the northwest. One of his horses, the first yearling in the Chicago horse fair this year, and he is a man who makes money out of his horses. Speaking of horses, he said:

Stanford naturally feels very proud of the work of Squire, especially so as he is the result of his theory of breeding which he holds in opposition to the theory of Senator Stanford. Stanford believes that the best strains of thoroughbred blood ought to be crossed with the best of the trotting stock to produce the great trotter of the future, and this is one evidence that he is right. Robert Hooper will have to be very careful of Squire, and his partner, who are the best posted men on the breeding of horses. Squire says that he ought not to be pushed for a year or two at least. He ought to be allowed to jog along and keep in good training, and at the end of that time he would probably reduce his record to 2:30 or 2:40.

"No," replied Senator Stockbridge, "I sold him, I paid \$200,000 to Senator Stanford for him, and sold him for \$25,000. He was lately sold again at a horse auction in Kentucky and brought \$100,000 to the owner."

Among the finest trotters seen in Washington this winter will be that of Senator Manderson of Nebraska. Manderson is a great horse lover, and he has brought from his farm near Omaha a couple of high stepping chestnut mares. These are the result of careful breeding for more than twelve years. They are Hambletonians, and they can trot easily in three minutes. They are thoroughly broken, but so spirited and graceful that they will make an owner of the average. Senator Manderson brought a high bred colt along with them, and it is likely that he will be the hands of Mr. Morrow. The horse was trained at Brightwood. His pony Comanche which he rode last year is also in the trainer's hands. This colt is of the best blood of the plains, being from a fine mare of the American wild horse species crossed by Gold Dust. It has all the gifts of all well trained riding horses, and the Napoleonic figure of Manderson will be seen upon it galloping along the country roads near Washington.

Senator Stockbridge has brought four magnificent black horses to Washington, and McMillan has a fine turnout, which will drive him this winter. I saw Senator Sherman's rig trotting along Pennsylvania avenue the other day. He has two well made horses, both of which are high stoppers, but which are of different colors, one being a bright sorrel and the other bay. Senator Sherman takes a drive every afternoon when the weather is fine. Senator Sherman's rig trotting along Pennsylvania avenue the other day. He has two well made horses, both of which are high stoppers, but which are of different colors, one being a bright sorrel and the other bay. Senator Sherman takes a drive every afternoon when the weather is fine.

know that he possessed such stock himself as he has here this winter. He was asked the other day why he had not mentioned to the fact that he had also had fine horses. He replied, "Thank it, I did but Palmer was so wrapped up in his own stock raising that he paid no attention to my remarks."

Senator Palmer will be remembered, went his farm manager, Mr. Cottrell, a couple of years ago to Turkey to buy some of the Arabian stallions. Palmer has an idea that the finest horse in the world can be produced by crossing the Percheron with pure Arabian blood. His manager went to Jerusalem but the result of his investigations showed that half of the Arabian steeds were unimpaired. Senator Palmer has a great deal of Arabian blood in his horses, and he has a permit from the sultan before he could take an Arabian horse out of the country. He got this permit and succeeded in bringing back a pair of Arabian stallions to the United States, but this, I am told, has recently died.

Senator Palmer has six fine Percheron horses on his farm near Detroit, and he has nothing in the west better than them. He is farming in his \$12,000 log cabin. He has a fine farm near Detroit, and he has a fine farm near Detroit, and he has a fine farm near Detroit. He has a fine farm near Detroit, and he has a fine farm near Detroit, and he has a fine farm near Detroit.

Secretary Allen of the Korean legation is now on his way back to his office in Hong Kong, where he expects to spend some time. He goes on an expedition for the king of Korea, and in all probability intends to counter the efforts of Prince Min Yui Ho, who has been living for some time away from the Korean capital and at Hong Kong. This prince is a friend of the king, and there must be trouble brewing in Korea or Secretary Allen would not be so busy. Secretary Allen would like to see a journey which his services are needed here. Korea has its factions, and the relations of China and Japan to the country through its sharp walled eyes, and the various intrigues of the Korean court are impudent even to the king himself.

that time Senator Hampton and Sherman had had nothing to do with one another since the business of the senate requires it. They had not spoken, and the only time that Senator Hampton had addressed Senator Sherman was while the latter was president pro tem of the senate, and he had to do so. As Senator Sherman is now treated Senator Hampton with the greatest of courtesy and I don't believe that he has any particular grudge against him, it is not surprising that he is so friendly to him. Senator Sherman is now treated Senator Hampton with the greatest of courtesy and I don't believe that he has any particular grudge against him, it is not surprising that he is so friendly to him.

PLAIN WORDS ABOUT WOMEN.

Grant Allen's Blunt Discussion of a Living Issue.

THE FUTURE OF THE RACE.

If Man is to Hold the Earth and Subdue it Woman Must Accept the Divine Duty of Motherhood.

Women and the Race.

If any species or race desires a continued existence, then above all things it is necessary that a woman or woman should go on reproducing itself. Let us look briefly at the social conditions under which alone the human race can go on reproducing itself. If every woman married, and every woman had four children, population would remain just stationary. Or rather, if every woman had two children, and every man had two children, population would remain just stationary. Let us look briefly at the social conditions under which alone the human race can go on reproducing itself. If every woman married, and every woman had four children, population would remain just stationary. Or rather, if every woman had two children, and every man had two children, population would remain just stationary.

A CARD

FROM MAX MEYER & BRO.

The auction sale which is now in progress at our store has caused so many inquiries that we take this method to answer the inquiries and inform the public at the same time. The object of the sale is not, as some have asserted, to get rid of our old stock for the best of reasons, we have none. Nor is it a holiday scheme to get the trade—but it is advertised, to close the retail department of our jewelry business which we have been desirous of doing for many months, and having failed to find a customer to purchase the stock entire, and to put the stock into our wholesale department not being feasible, we have determined upon an auction sale of our entire stock of diamonds, fancy goods, art goods, and all. Without limit or reserve of one single article. We invite all to attend these sales, which will be held daily for the next thirty days (if not disposed of before) and see if this statement is not a fact. MAX MEYER & BRO.

A FULL SET OF TEETH ON RUBBER For Five Dollars. DR. R. W. BAILEY, Dentist, Paxton Block, 16th and Farnam Streets.

We Are Here to Stay and having within the past two work room, are now better prepared to turn out the best class of work, and much more rapidly than heretofore. We make a full set of teeth on rubber for FIVE DOLLARS, guaranteed to be as well made as plates sent out of any dental office in this country. Do not let others influence you not to come, but make us a call and see for yourself. Teeth extracted WITHOUT PAIN, and without using chloroform, ether or electricity. Filling at lowest rates. Remember the location. DR. BAILEY, Dentist, Paxton Block. 16th and Farnam. Open evenings until 8 o'clock. Take elevator on 16th street.

HIMELBAUGH & TAYLOR Hardware and Scales. A Large Assortment of BOYS' AND MEN'S TOOL CHESTS, A FULL LINE OF ICE TOOLS AT BOTTOM PRICES. SEND FOR CATALOGUE. 1405 Douglas Street, - Omaha.

L. M. PICCARD, WHOLESALE & RETAIL PRACTICAL OPTICIAN. Spectacles and Eye Glasses accurately prescribed and adjusted. Bullseye, pince-nez, eye-rings and most modern styles. Artistic Eye. Best stock of Optical Goods in the West. Repairing of same neatly done. L. M. Piccard, - Room 322 Range, Block, Omaha, Neb.

WILLIMANTIC SPOOL SIX-CORD COTTON. For Sale by all Leading Dealers. 34 Union Square, New York City, Aug. 31st, 1889.
