specific in typinoi lover. Iceland is Not a Land of Ice. If the name of this island means land of ice, as no doubt is the case, then the name is misleasing; for, excepting the great ice streamy in the interior of the isle called glucibrs, there is otherwise very little ice init. The harbors are open nearly the, whole year, and the climate is midder than that of Norway. Sometimes the northern and castern coasts are blocked up with ice which has drifted before the wind from Green-land, but this haipens only about once every ter years.
