The Chicago Shoot.

CHICAGO, March 7,- | Special Telegram to THE BEE. |- The shoot has come to an end and the visiting team won by the small majority of four birds. The day was fine, and all passed off pleasantly from the start to the finish. There was not a jar or disagreement. The day was fine, being still, with the sun shining, yet the glare from the snow made white birds hard to get on to, especially with Riley of Kansas City, who lost

white ones excusively.

The shoot began at II a. m., with Kansas City one in the lead. J. B. Porter of Kansas City was pitted against W. M. McFarland, and they shot a splendid race, Porter making some sharp kills with the second barrel. Porter got 43 to McFarland's 43, and the score was a tie. The next team was A. E. Thomas of Kansas City, who went against W. E. Payson, a good shot. Thomas pulled the Kansas Citys out three ahead by getting 42 to Payson's 39. J. K. Guinotte started in to beat Henry Kilmman, but met the hardest man put up by Chicago, as he killed 47 and won the gold medal offered by Pollock Brothers of Kansas City for the best score, while Gunette fell down and got but 35, and Kansas City stock went down like McGinty and put Chicago ahead. The next race was a surprise to all. A. W. Reeves killed but 55 to J. A. R. Elliott's 45, and Kansas City was again on top. The last race was be-tween the two rivals, R. B. Organ and J. E. Riley. The race was close and all excitement. Riley Killed 44 to Organ's 42, and Kansas City had the match by four birds. Messrs Organ and Riley shot at another hundred birds, with a total of 88 for Riley

and S7 for Organ.

Tonight the victors and their many friends are being royally entertained at the Sherman house by a grand banquet. Tomorrow a number of private matches will be shot. There is money up on at least five at this time, one of them being a race between Chouteau of Kansas City and Henry Klineman of this city, fifty birds, for \$100. J. Underwood goes against Mr. Wilcox of Chicago, and others will be arranged tonight. The Chicago men will have a return match at Kansas City within the next two

Shortstop Hallman's Case.

PHILADELPHIA, Pa. March 7.-The pro ceedings of the Philadelphia ball club against Shortstop Hailman to restrain him from playing with other than the Philadelphia club came up today before Judges Arnold and Thayer. Counsel for both sides argued the matter and the court held the matter under advisement. In the course of the argument Judge Thayer, who had been reading a copy of the National league contract, interrupted with the remark: "I see by the contract that a club can discharge a player within ten days, but a player is compelled to play with the club as long as it may see fit."

The Brotherhood in St. Louis. St. Louis, Mo., March 7 .- | Special Telegram to THE BEE. [-The first real move toward placing a brotherhood club in St. Louis was made today, when Al Spink, editor of the Sporting News, closed a five-year lease for Amateur park. He admits that he is at work in the interest of the brotherhood. He says that Mr. George Munson, who is looking after St. Louis brotherhood interests in Chicago, has already closed a contract by which the Chicago brotherhood club is to play here from March 30 to April 17. During its stay here it will play games with visiting brotherhood clubs. Amateur park is a fine plot of ground in the southwestern part of the city and is reached by cable and electric railways. Ten thousand dollars is to be expended in equipping it for baseball purposes. liminary to the placing of a brotherhood club in St. Louis permanently.

CLEVELAND, O., March 7 .- | Special Tele gram to THE BEE. |-Al Johnson, the brotherhood magnate, is tickled over the league schedule.

"Can't you see," said he, "that this is only a stupendous bluff! They never intended playing ten clubs. The ten club idea is a fake. I have a private telegram in my pocket that explains why they didn't sell out Indianapolis. Glasscock and the rest clubbed together and refused to be sold. If it hadn't been for that the league circuit would have consisted of only eight clubs. You can de-pend on that. I have mingled freely with pend on that. I have imagical freely with the delegates for the last three days, and I know that they are only trying to pull the wool over the eyes of the people. There is no likelihood of their going on with ten clubs. You can say for me that the brotherhood stock is way above par ! What about St. Louis and Detroit coming

into the players' league?" Well, they are both good cities and may me in. I am not saying they wont. I only know that the league will never play a ten-ciub schedule. You can quote Ai Johnson as saying that."

The "Parson" Tells All About it. CLEVELAND, O., March 7 .- [Special Telegram to Tue Bee. |-Peter Jackson, the colored pugilist, arrived here Friday morning, accompanied by Jack Ashton, Sam Fitzpatrick and "Parson" Davies. Jackson denied the truth of the report that he came near being knocked out by Gus Lambert at Troy N, Y., the other night. "Do you know who Lambert is?" "Parson" Davies, who acts as Jackson's spokesman, asked. "Why, he's a professional wrestler and weighs 240 pounds. He had trained two weeks because I had offered \$100 to any man in Troy who would stand up before Jackson four rounds. Lambert wanted the money and he got it. He did not stand up, but he wasn't knocked He did not stand up, but he wasn't knocked out. In the first place he would not agree to anybody but a Trey saloonkeeper for referee, and after we let him have his own way in that he wanted eight ounce gioves. What could you expect anybody to do with pillows on his hands! Why, you might stand before Jackson or any one else for twelve rounds with such cloves. There for twelve rounds with such gloves. There would be no possibility of knocking a man out that way. When time was called Lambert rushed right in and grabbed Peter around the waist and tried to throw him. Jackson didn't go in for a rough and tumble around. He obsert the rules and such as the state of the s scrap. He obeyed the rules and called for a foul. But Lambert's friend, the referee refused to allow it, and the same tactics were repeated over and over again. In fact, all that Lambert did was to run around the stage trying to keep away from Jackson, and when he failed in that he would duck his head, rush in, and eatch Peter around the waist. LOTTERY BRIBERY.

Attorney General Goodwin of North Dakota Makes Bold Charges. BISMARCK, N. D., March 7 .- A private let-

ter written by Attorney General Goodwin to friends in Lisbon, N. D., was read in the legislature yesterday. The letter states that the lottery people are paying from \$200 to \$500 down to members to support their bill, with the understanding that the amount would be doubled when the measure was passed. It says that the attorney general's rival is holding out for \$10,000. As a blan to fight the lottery scheme it was proposed to let it ripen and permit the members who fa-vored it to go on record, and then, by rousing public opinion, to defeat its pessage over the governor's veto. It is said an attempt will be made to impeach Goodwin.

Goodwin's letter is still the talk of the capital city and the feeling in the matter was aggravated by the sensational outcome of the publication of the latter. Today while Goodwin was talking with another gentleman in a corridor of the capitol Representative Walsh approached and asked by what authority his name had been used in the letter. After a few words had passed between the two Walsh suddenly seized Goodwin by the nose, The latter freeing himself, turned and walked away. Goodwin weighs 125 pounds, while Walsh is more than twice as large. The attorney general was urged by friends to take legal action against Walsh, but so far he has refused.

Terrible Wreck of an Express on the Lake Shore.

A LOADED COACH TELESCOPED

Two Pullm us Crash Through a Car Filled with Passengers-Complete List of the Dead and Wounded.

The Train Broke in Two.

BUFFALO, N. Y., March 7 .- A train on the Lake Shore from the west due at Buffalo at 10:30 p. m. broke in two near Hamburg last night. The front part of the train, consisting of an engine, tender, smoker and two day coaches was quickly brought to a stand-The rear half, composed of five heavy Pullmans, came on the down grade and crashed into the second day coach. The Pullmans being heavier lifted the day coach into the air and they now lie on top of the others, both having telescoped the first day coach. Both the day coaches and the Pullmans were full of passengers. Six persons were killed and ten injured,

one of them fatally. The following is the J. SWAN, colored porter, killed. JOHN W. FLYNN, Canton, O., killed. JOHN E. POWERS, Pittsfield, Mass.,

chin badly cut. REV. THOMAS A. HALL, Buffalo, leg badly F. A. Coomes, New York, head and chin

cut, both legs sprained. Julia Hallner, Boston, cut in breast, over left eye and head.

GEORGE E. ALLEN, Buffalo, ankle sprained. JOSEPH D. BARNES and wife, Boston, the man not much hurt, the woman fatally. This morning the bodies of the silled were brought into the Central depot, where the

coroner took charge of them and conveyed four of them to the morgue. That of Mrs. Balucus was sent to her home. A special train will take the jury to the wreck.

A passenger says the coupling was defective. It broke precisely in the same place as the train was leaving Cleveland. At 12:30 o'clock a relief train was made up and ten of the most seriously injured were brought to the Fitch institute at Buffalo. The forward portion of the train was stopped by Conduc-tor Houghtaing, who pulled the bell rope. Most of those in the last day coach were warned of their peril in time to leave the no warning and were in the car when it telescoped one coach and was buried under an

J. E. Minnie, who had his arm cut off, was placed on the engine, which started at once for Buffalo to bring relief. It was two hours and a half before the physicians arrived, but a wrecking train came sooner and began the work of extricating the victims. The bodies

taken out were placed in a baggage car.
There were many sad incidents connected with the wreck. One of the saddest was the killing of Mrs. Joseph Baucus of Saratoga. She and her husband were on their wedding trip, having been married about a week The husband was terribly injured, but hi physical suffering was nothing compared with his mental agony. He acted in a dis-tracted manner, calling upon the doctors to save her, and raving over her broken and

bruised body. Mr. and Mrs. J. E. Stewart of Rochester were killed instantly, while their eighteenmonths old girl in its mother's arms did not receive a scratch.

Superintendent Couch of the Lake Shore road discovered the break and went into three different cars pulling the automatic brake cords to stop the rear section, but they would not work.

They are generally reliable. When asked why the engineer with the front part of the train did not run away from the rear section. He said the breaks occurred on the down grade and that gave increased speed to the rear section. The engineer claims that the brakes on his

part of the train became set and he could not get away from the rear part in time. He did not discover the break when it occurred, his attention being necessarily directed ahead most of the time. Mr. Haupt, a well known lawyer of this city, who was in the first section, in an interview tonight said: "The truth is the

INDIANAPOLIS, Ind., March 7 .- A special from Evansviile says: An explosion occurred at noon in the shaving or dust room of the Armstrong furniture factory and resuited in a fire, which completed the wreck. Three boys, Fred Sachs, Willie Cheatham and George Crawford, in the room eating dinner, were burned to death. Charles Snelby, engineer, had both legs broken.

Satisfactory. NEW YORK, March 7.—[Special Telegram to THE BEE.]—R. G. Dun & Co.'s weekly review of trade says:

The state of trade has not materially al tered during the past week, though the change of weather has produced much temporary improvement in some things and in others trade is rather less satisfactory than a week ago.

The monetary situation is much more satisfactory, notwithstanding the fact that the cash actually held by the treasury is \$3,200,000 more than last week.

Rates on call here have declined from 5 to 31/4 per cent and foreign exchange has risen from \$4.85% to 4.86%. The interior money markets are generally steady, but on the whole rather more easy.

At Boston there is still and is expected to be, some pressure until April, but the feeling is better and commercial paper commands about 6 per cent.

At Philadelphia the situation is substan tially the same, but there appears to be more stringency Money is unchanged at Chicago, fairly ac-

tive at 6 to 7, at St. Louis and Pittsburg rather abundant, though the demand is large at Cieveland, easy at St. Paul and Omaha in good demand at Detroit at 7, and steady at that rate at Milwaukee, the demand at Kansas City being only moderate. The decrease in the actual circulation out-

was \$10,376,963, and this, with the further absorption this month by the treasury, indicates a less active commercial demand. The aspect of foreign trade does not change, as exports at New York still exceed

alde the treasury in the month of February

these of last year a little, while the imports have not of late shown an increase. The volume of domestic trade appears well

In the iron trade also the situation has not

materially improved and at Pittsburg prices

are again lower.

The window glass trade is active and a

fourth advance in prices within three months has been ordered, but the flint glass works at Pittsburg are curtailing production.

The coal trade is not better and entirely in buyers' favor, while copper and tin have

been rather weaker and lead in scanty sup-

ply and stronger. Little can be said of the market for bread

stuffs for, notwithstanding a spasm of activity one day in wheat, raising the sales here for the week to \$50,000,000 bushels the price

is but 1/2 cent lower than a week ago.

Corn is unchanged but oats 13/2 cents

The general course of prices for commodi-ties has been upward, and the average ad-

vance for the week has been nearly half of 1 per cent, but the range is so low that a fur-ther movement in the same direction before

the coming of spring would not be surpris-ing. The stock market has not changed dur

ing the past week in any material respect, the average of prices being substantially the

same, though there was a stronger tone on

The removal of fears concerning the possible exports of gold, the rapid rise of foreign exchange, the indications that purchases on foreign account

now exceed sales of securities, all tend to make the absorption of money be the treasury less observed.

It may be added that the decrease in activity of trade throughout the country

tends to release larger amounts than have

been expected to return to this center at present. But with bank reserves remarka-

ELEVEN MILES OF RAILROAD,

All That is Needed to Make This City the Market for a Region Rich in Agricultural Resources.

What Niobrara Wants.

good trade in lumber.

The woolien manufacture does not appear to have changed much in condition or prospects, though better sales of heavy weights are noted at Boston, while lighter goods are quiet. Sales of wool there are larger, being 2,585,600, for the week with prices unchanged, and its bottom has been touched. Prices are depressed at Philadelphia, and the early expectations of new and large supplies lead holders to make concessions. A representative of THE BER met the Niobrara delegation at the Paxton hotel last evening and was given a statement which ! cannot fail to win the wide and deep attention of the business men and people generally of Omaha. The statement points out whereby Omaha by a little effort just at the present time may assure herself positively of a vast and increasing commercial gain during all the years that Omaha shall be a city. It is specially and most vitally important to the business men of Omaha. The statement as made by a leading mem-

ber of the delegation is this: ' "There are 5,000 quarter sections of land in the Sioux reservation, in Nebraska, which has just been opened to settlement These 5,000 quarter sections each represent a farm of 160 acres, and as this land is between the Missouri and Niobrara rivers, and is cut in two by the Ponca river, it must necessarily be good farming land. This is all tributary to Niobrara. The settlers will flow into this magnificent tract in the spring and Niobrara is the point at which they must purchase their lumber and other supplies. The splendid from bridge across the Niobrara, at Niobrara, is the only one between the Missouri river and Valentine. What is needed in order for Omaha to get the big trade of the Niobrara country that is already established, and the vast business just at hand and which will come as sure as the opening of spring, is to get eleven miles of railroad built from Verdigris to Niobrara. That will give a fine railroad connection between Omaha and Niobrara by the Norfolk branch of the Fremont, Elkhorn & Missouri Vallay road.

by the Northik Branch of the Fremont, Elk-horn & Missouri Valley road.

"As it is now, the merchants of Niebrara purchase their goods in Sioux City and Chi-cago, ship them to Scotland, S. D., transfer-ring them there by ferry to Niobrara at an expense of \$7 to \$12 per load. The right of way for this eleven miles of railroad is all graded, so that all that is now necessary is to do perhaps a little repairing of the grade.

"What we want of the business men of Omaha is for them to lend their united and solid influence to emphasize the request next Tuesday we shall make in person of the president of the Fremont, Elkhorn & Missouri Valley railroad to build the elever miles referred to.

"This little extension would give Omaha not only direct communication with Nio-brara and the new country just opened in brara and the new country just opened in the Sioux reservation but would also furnish her with connection at Nioorara with the Milwaukee line to the Jim river valley. The one reason which the Fremont & Elkhorn officials have given for not building up this little strip of road has been the feeling manifested in the state some time are against any more realstate some time ago against any more rail-

road building.
"The business which would come to Omaha were this cleven miles of road built would, during the first year thereafter, greatly exceed \$100,000, and would continue to increase every year following. In the matter of shipment of nogs alone Omaha would gain absolutely the entire product of the Niobrara country, which any man who is posted at all will tell you is a vast item in itself. And all-other farm products would itself. And all-other farm products would just as certainly follow. To the great volumes of business which would come from the Niobrara and reservation countries would be added that of South Dakota, which in itself would repay, many times over, the little effort we are here asking the business men of Omaha to make in our behalf—not more in our behalf, however, than in their own—just. in the most bewitching directoire costumes of bink, and from the other door appeared eight more young ladies in similar costumes of white; each of the ladies bore a small our behalf, however, than in their own-just at the present time. A failure to act now means the diverting of all the great trade round tray which-later in the evening, was used as a means of luring the ducats from the pockets of the spectators. The real estate exchange and the board of trade propose holding a great mass meeting Tuesday evening in the interest of securing a hearty endorsement of the wishes of the Niebrara delegation.

AMUSEMENTS.

The Bostonians never gave a more de-

lightful performance in Omana than that of last night at Boyd's. They presented their newest and, in some respects, brightest opera, "Suzette," with Marie Stone in the title role, which she sustained most admirably. At no previous time had the fact been clearly demonstrated here that this lady is an actress of superior merit as well as a vo-calist, but that fact was forcibly impressed upon the minds of those who were fortunate enough to witness her efforts last night. The part is an excellent one, offers umple scope for stage work, and Miss Stone handled it in a manner that pleased the large audience very much. Her treatment of the character was not only highly appreciated from an acting standpoint, but was greatly enjoyed and frequently applauded. In her little byplays and general artistic business she was captivating, charming and clever. It is also gratifying to note that Miss Stone's gratifying to note that Miss Stone's splendid voice retains its strength, parity and sweetness. The opera is not so strong, musically, as aramatically, though some of the concerted numbers are tuneful, lively and pretty. A duet and quartette in the first act were encored, but beyond these the music aroused to the content of the conten very little enthusiasm. Interest was nearly all centered on the acting except when Jessie Bartlett Davis sang, and her splendid voice, as it always does, elicited the warmest ex-pressions of approval. As the Marchioness she was very fascinating and entertaining. W H. Macdonald as the Marquis, George Frothiagham in the comedy role of Cap-tain Vienbrech, and Edwin W. 110ff, the tenor, as Renee, played and sang their respective parts well, so that all in all the per foramnce was one of the best and most thoroughly pleasing seen in this city for a long time. As a whole it surpassed Thursday night's representation, notwith-standing every one present then considered that almost the acme of excellence, chorus, costumes and orchestra are notably strong features of this superb organization.

Orville M. Remington, representing A Possible Case company, which comes to the Boyd soon, arrived last evening.

My wife was so badly afflicted with rheumatism as to be unable to move in bed without assistance. Our druggist, Mr. Laddamus, recommended Chamberlain's Pain Balm, which greatly relieved her. Mr. Chase Thinks His Discharge Fully Illustrates It.

Horace R. Chase, the Indian agent at Genoa, who was fined \$1,500 and costs January 29 by Judge Dundy for misappropriating funds of the government, appeared before the United States commissioner yesterday to hear the result of Thursday's petition for dismissal from imprisonment because of his inability to pay the fine imbosed.

Commissioner Dundy said that there was but one course to pursue in the matter, as the law provided that when a person fixed by the United States judge made affidavit that he couldn't pay the flue he could thereby secure a release. Dundy therefore declared that the prisoner was released from further

## MALIGNANT ECZEMA

#### The Terribla Suffering of an Omaha Boy.

Adults who suffer from sait rheam, or eczema, find language inadequate to describe the agonizing itch and pain caused by this disease. Is it any wonder than, that when parents finally find relief for a suffering child, they feel auxious to let others know what has wrought si o'i gratifying results?
