What a horrible thing jealousy is! If this riper of suspicion had not found a lodging place in the breast of Perry Montgomery he and his wife, Silvia, would be alive today, and possibly happy, instead of lying dead at the morgue, disfigured with bullets and covered with their own blood—subjects of idle conversation and of universal condemnation.

Perry Montgomery was a familiar figure to the habitués of the saloons and kindred resorts of Omaha. He was a colored man and in many of these places during the past few years he had served in the capacity of porter and general assistant. He, together with his wife, a comely quadroon, and their young daughter, Blanche, came to Omaha several years ago from St. Joseph. Montgomery found employment in a saloon and his wife went to work as chambermaid in a boarding house.

For a time the affairs of the Montgomery family flourished. Montgomery worked steadily and was never without employment. But about a year ago he was changed. The man took to drinking and gambling and became dissolute generally. His employer became disgusted and discharged him from his position. His wife, however, remained at her work, and the young daughter, Blanche, came to Omaha several years ago from St. Joseph.

He gave no specific reason for this alteration of conduct, but it was known that he was living with a woman who was not his wife. This woman was engaged in the trouble with Perry, was arrested, tried and acquitted on the charge of murder. She was sent to the penitentiary for a term of years. Her husband, however, was not arrested, and she was released on her own recognizance.

Now, fellow citizens, I appeal to you to go to the ballot box in November, and vote for the man who will protect you from the influence of emotional insanity, but with the calm, clear judgment of men who have to determine a grave question for themselves, whether you vote for a state and national constitution to the constitution, which is sure to result here as it has in all other states.

WASHINGTON BUREAU OF THE OMAHA BEE, 313 FOURTEENTH STREET, WASHINGTON, D. C., July 9. As stated in these dispatches, it is being made by the democrats in both houses of congress to force the republicans to postpone action on the elections bill until the next session. The democratic newspapers throughout the east and west contain dispatches this morning from Washington to the effect that a tacit understanding has been reached whereby the democrats in the senate are to permit the tariff bill to go through without factious opposition and the free coinage republicans as a compensation are to lead a fight in the caucus tomorrow night which will result in the postponement of the elections bill. These dispatches are simply part of the concerted movement of the democrats to defeat the final elections bill before November, as they fear the operation of the measure should it become a law and take effect at the coming elections. Your correspondent today talked with Senators Teller, Plumb, Stewart, Pettigrew, Allen and other free coinage republicans and was assured by each one of them that there is no truth whatever in the statements that any kind of an understanding has been reached and no promises were made prior to yesterday to the vote on the silver bill two weeks ago, whereby the elections and money bill were postponed until the next session and the elections were held in the caucus which was to take place on the 10th of July immediately after the tariff bill is passed. Senator Sherman is very emphatic in his statement that, if the republicans are consistent with the declarations they have made on this subject, in their conventions and in the platform they have adopted, they will take the elections bill up at this session, and they will especially do that if they intended to take the elections bill up at this session, as a postscript to the elections bill, as a postscript to the elections bill, as a postscript to the elections bill.
