A Golden Wedding.

On September 11, 1840, Robert McConnell and Anna Wardell, were united in marriage in Philadelphia, and afterfifty years of peaceful and sereme married life, they guth-

afornoon and celebrated their golden wed-ding anniversary at the corner of Eighteenth and Grace streets.

Fifty years married! It is rare that two people are permitted to live so long together in loving companionship. Death usually steps in and takes away one or the other, or both, long before the half-century period of both, long before the half-century period of wedded life is renched. Or what is still more deplorable, they find out that the companionship which opened so beautifully is all adelu-sion and then come quarrels and disagree-ments and the courts are called upon to

break the marriage contract.

Not so with Mr. and Mrs. McConnell.

They have lived to see their children happily married with children of their own to com-

for them.

Mr. McConnell has had a very active life during the fifty years past. From 180 to 1850 he was continuously engaged in railroad affairs, being one of the oldest if not the oldest engineer in the country. In 1852 he was made master mechanic of the New York Central railway and in 1867 left the cast for Smann to take a similar position with the Union Pacific. For twenty years he outlin-ued in the service of the Union Pacific and resigned in 1887 on account of advancing years. For thirty-five years engaged in the anisous work of a master nechanic is cer-

tainly amost remarkable record. Nine children have been born to Mr. and Mrs. McConnell, eight of whom are living. and seven of them were present Thursday to assist in celebrating the golden auniversary of their parents' marriage. They gathered about a calcotheat was decomted with fifty candles and they made merry over the good candles and they made merry over the good things which had been provided. Grand children comped about the house and it was a happy time for everybody. There were present Mr. and Mrs. J. M. Underwood of Marquette, Kan., R. J. McConnell, H. W. McConnell, Charles McConnell, Mr. and Mrs. Fred McConnell andenildren and Miss Cally McConnell.

A July Swimming Party.

Old-Time and Military Telegraphers to Meet in Kansir City.

THE OBJECTS OF BOTH ORGANIZATIONS.

Omaha Sends a Large Delegation to the Meetings of the Societies-Important Basiness to Be

Transacted.

Two of the most important associations of telegraphers are to meet is an nual convention at Kansas City on Monday and Tuesday next. These are the Society of the United States military telegraphers and the Old-Time telegraphers' association,

The first of these is composed entirely of operators who served in the military telegraph corps during the civil war. It was formed a number of years ago for two purposes, fraternal greeting and the securing from congress of some recognition of their services. This latter effort was made for the reason that, while many of the military telegraphers did most valiant service during the rebellion, there is no official record of their work. Most of them were volunteers, were never mustered in or out of the service. This matter has been urged by the society for a number of years and a bill has passed the lower house of congress recognizing the services of the members of the society and

ranking them.
Closely allied to this society is the Old-Time telegraphers association, composed of operators who were in active work at their calling prior to 1867. This association has many of the members of the military telegraphers society.

graphers society.

At the coming meeting the constitution of this association will probably be changed to admit all operators who have been twenty-one years in active service.

Mr. L. H. Korty, superintendent of telegraph of the Union Pacific and Mr. E. Rosewater, editor of Tun Ban, are two of Omaha's nembers of the Military telegraphers' society, while there is a large number of receivers. ety, while there is a large number of mem-bers of the Old-time telegraphers association n the city, many of whom are not now engaged in active telegraph work. Among these are: L. M. Rheem manager of the American district telegraph. Byron Reed, who was an operator before many of the old-timers were born; John A. Creighton, who was manager of the Helena office in the early days; Frank Lehmer, now with S. P. Morse; M. C. Nichols, of Nichols Brothers & Hall; C. B. Havens, coal dealer; E. I. Nason, another prominent shot and follower of field sports, are perfecting arrangements for a grand trup shooting tournament to be held at the fair grounds in this city on October 22, and 23 and 24. They are both gentlemen of experience and wide acquaintind will have many of the most famous shots n the country here. There will be from \$500 to \$500 added money to the various purses, something that has never been done at any of the tournaments here and something that is absolutely necessary to induce the attendance of shooters from a long distance. A fine lot, embracing several thous-and, of live pigeons have been engaged, and while there will be any quantity of tar-get shooting, live birds will furnish the bulk of the sport. A State Coarsing Meet.

A number of local enthusiasts, together with several members of the American Coursing association, are contemplating the holding of a state coursing meet somewhere in the interior. Dr. Lrwin Royce of Topoka, Kan., writes Tun Bun "that there is a suffident number of en thusiastic greyhound men throughout the eastern portion of the state alone to make an undoubted success of the enterprise with very triffing expense. Their are dozens of good, fast greyhounds and undreds and hundreds of jactes."

The project is a workey one and certainly easy of a complishment. A meeting should be called for some central point, organization effected and a committee suppointed and sent out to secure the grounds. There should be a truct of several sections of pasture lands, adjacent to some good to was and easily necessible by rail. The land owners permission to raise the bottom wire of the larrh fences, and to open gaps at reconstitution distances. should then be secured, and all that would remain to be done would be to get up your acks, slip your dogs, and let them go doctor thinks arrangenigits could be made within thirty days, and a fleeting fixed for a bout October 12, and urres; Omaha gentlemen who are interested in the sport to communicate with him at Toroica without delay.

Many men are puzzled by our

\$5 to \$8 Trousers. Those who don't know us better, think there is a trade secretabout it, but there isn't.

It's simply this (we're glad to have you know it, the wider it's known the better for us.) Here is the secret; it's taken 25 years of hard labor to develop it, you can dothesame if you're young enough and strong

1. We have built up as you have doubtless heard large and busy tailor stores in nearly e very principal city in America

2. We buy shrewdly, for cash, in the best home and foreign marts, of the best low and high grade materials, and an unusual variety required to supply onr many stores.

3. Our prices are regulated by the lowest possible cost, and based upon a big business, spot cash, and a small profit. 4. We put the best tailoring in this country at your service at saving prices,

There's no secret in it.

It's simply 25 years of labor in the right direction.
