#### HURRYING THE PENSIONS.

Secretary Noble Taking Steps to Expedite Business in His Office. Washington, Feb. L -- Secretary Noble is taking active measures to expedite the judi-cious of claims in the pension bureau, particular attention being given to those cases which are not represented by attorneys and to cases which, for some reason, have been in the bureau for a long time. In this matter the secretary is receiving the earnest co-operation and assistance of General Raum.
The examination of the records of
the pension bureau discloses the
fact that there are only about
12,000 cases on file which are not represented by attorneys. These will be taken up by the board appointed for the purpose and will procood to a final determination. This board is required to use every care that could be taken by an attorney and to fully consider and give just weight to every favorable fact disclosed in the records of these cases. In other words, full and complete justice is to be done in every instance, and technicalities of con-struction or presentation of these cases are not to be taken advantage of. The claimants are to be assisted and not hindered. These reforms have already been started in their

#### course, and it is expected they will result in good to all concerned. Wiedom's Funeral.

Washington, Feb. 1 .- All arrangements for the funeral of Mr. Windom have been completed. Private services will take place at the house at 11 o'clock tomorrow. The president and cabinet and members of the family will attend the services. From the house they will proceed to the church. The members of the cabinet will be honorary pall bearers and a number of treasury department employes will act as body bearers. A large number of callers viewed the remains today, among them the president and Mrs. Har-.

#### O'Connor's Views.

Washington, Feb. 1.-T. P. O'Connor is at the Arhington. He said tonight that there is every prospect of satisfactory conclusion of the Boulogne conference, so far as home rule is concerned. The cause may have received a temporary backset, but it is sure to triumph in the end. He will sail for Europe In a few days.

#### ACCIDENTALLY POISONED.

The Daughter of a Wealthy New York Family Takes Morphine.

w York, Feb. 1.-Miss Helen Potts daughter of George H. Potts, the wealthy railroad and mine owner, who lives at Asbury Park, died suddenly this morning in a private boarding school from morphine poisoning. She had been troubled with nervousness and insomna for some time, and last night took a capsule supposed to contain twenty-five grains of quinine and one grain of morphine which had been prescribed by Carlyle W. Harris, a medical student and a warm friend of herself and family. Soon after returning her room-mate was awakened by heavy breathing, and Miss Petts was found almost unconscious. Medical aid was summoned and she was restored by 30'clock and thought to be out of all danger, but when sid was again summoned a couple of hours later at a reoccurrence of the attacks all efforts were found magnifing and she died at 11 o'clock this morning. There are several theories as to her death An inexperienced prescription clerk may have substituted morphine for quinine; a grain of morphine might have got into one capsule or the girl may have had the prescription renewed and died of the cumulative action of a large num ber of capsules. A thorough investigation will be made. The family is connected with the most prominent families of Pennsylvania and New Jersey.

#### Not the First Time.

MEMPHIS, Tenn., Feb. 1.-Robert Galloway, one of the owners of the mines at Carbon hill, said to the Associated Press reportertonight in regard to the reported troubles at the mines: "These outrages are the work of the ele-

ment that knows no law; that has terrorized \$10,000 of the money that had been paid in by that part of Walker county for the past three years and have no regard for human life. The powers of the county officials seem limited, but the time has come for the state of Alabama to crash out this class. That the house in which the negroes were sleeping was riddled with bullets is a fact and one of them was wounded None were killed James Cutterey, a negro, was killed and one wounded, but this is not the time in the last few nights such things have happened in this county and the guilty parties are supposed to be well known. This last case of lawlessness, while unjustifiable in every way, was brought about by unfortunate circumstances. On Tuesday a strange ate circumstances. On Tuesday a strange white man was killed near Eldridge, six miles from Carbon hill, by a negro. On Weinesday a negro employed to hunt up some negroes who formerly worked at the mines, picked up some strange negroes and took them to Galloway. negroes and took them to Galloway On the way over they got a drink or two and the leader talked in a way to excite the crowd, who took the law in their own hands with the result as stated. The house was raided. They evidently did not intend to kill any other negroes, as there were thirty or forty quartered within 300 yards of this place who were not touched."

### The Habeas Corpus Suspended,

LISHON, Feb. 1.-A decree is published suspending the habeas corpus act and authorizing the suppression throughout the country of the journals prejudicial to the state. The republican papers, Patria and Gebates, have already been suppressed. The council of state is about to assemble to discuss the application of military law to the civilian insurgents who will be brought here on board the transport In-dian. It transpires that the insurgents counted upon a simultaneous rising at Coimba, Braga and Vizen and were only waiting for the departure of the troops to attack the capital, but it appears that a dissension revealed at the recent republican conferences upset their plans. It is stated that the Eigh-teenth regiment will be transferred to Braga and that the Ninth chasseurs and Tenth in-fantry, which were concerned in the revolt, will be disbanded.

Cannot Make it. Bennin, Feb. 1 .- Prof. Koch, who is about to start for Egypt, gave a farewell reception to his laboratory assistants today. The professor says he will probably be absent from Berlin about three months. He explains that he has only partially disclosed the method of production of the curative lymph because he desired to stop the rush of docters to Berlin. If he had described the method of manufacture more fully, he says, he would have been more worried about de tails. Great discontent prevails regarding the published account of the method of manufacturing the lymph. They made num-berless attempts to produce the lymph, but they find Prof. Koch's description totally inadequate to enable them to make it.

#### At Germania Hall.

The era of German theatres has been revived in Omaha and bids fair to become popular. Germania hall on Harney street has been enlarged and remodeled, and hereafter each Sunday night it will be occupied by a German theatrical company. Lastnight "The Golden Cross" was presented by a very ex-cellent company of amateurs with Miss Lia Cordt, recently of the Karl Schult theatre of Hamburg, as the star. A large audience was in attendance and the play was well received.

There is no danger of a cold resulting in pneumonia when Chamberlain's Cough Rem-edy is used as directed "for a severe cold." It effectually counteracts and arrests any tendency of a cold to result in pneumonia. This fact was fully proven in thousands of cases during the epidemic of influenza last winter. ### CONVICTED OF WIFE MURDER.

The Prisoner Breaks Down on the

Announcement of the Verdict. LEAVENWORTS, Kan., Feb. 1.- The trial of David E. Davis for the murder of his wife, that has been going on for over a week in the the case to go to the jury after the county attorney made an opening address. The jury was only out ten minutes when they re turned with a verdict of murder in the first degree. When this verdict was announced Davis seemed to lose his self-control and was taken into an anti-room of the court, where broke down completely, mosned and bed, and bewalled his hard fate. sobbed. His atterneys made a motion for a new trini that will be argued on Febru-ary 9. In the meantime Davis will be confined in the county all and closely watched, to prevent his committing suicide. As Davis' now rests he will be sentenced to death. but this it Kansas means a life tenure in the penitentiary. Davishus served four years in that institution for horse stealing, and he does not mind prison confinement much. Notwithstanding Davis' bad record, there is considerable sympathy expressed for him, and there is great surprise at the jury convicting him so quickly.

#### PEFFER FOR PRESIDENT. Kansas Alliance Members Talk of Kim

for the Position. TOPERA, Kan., Feb. 1.- Special Telegram to THE BEE. |-Kausas alliance leaders are beginning to talk of Senator-elect Peffer as the alliance candidate for the presidency in 1892. Speaker pro-tempore Matchett remarked today that such a thing would not be at all out of the question. Said be:

"Kansas is going to be the leader in the alliance movement. The election of a United States senator and five congressmen before the party is a year old is a greater victory than was ever attained by a new party in any state. It puts Kansas in the front in this great movement and this state may be called upon to furnish a presidential candi-date. If Kansas names the leader in 1892, it is not at all improbable that it would be the new United States senator."

A movement started here today to unite the free silver republicans of the west in de-mand for the appointment of a western man for Secretary Windom's place. Resolutions will tomorrow be passed by the senate asking the president to appoint a man whose views are in accord with the views of the people of the west on the monetary question.

Leon S. Gordon, who has just returned to Kansas City from a trip in New Mexico, where he has been engaged in constructing a telegraph line from Las Vegas to Silver City, relates a strange story of a discovery made by his gang of men as they were working through the country.

For miles they would work without seeing ahuman being and the houses were principally old ruins which had long been abandoned. It was the custom of the men to utilize these ruins for temporary camping quarters, and it was while thus occupying a house that the discovery was made that was at once startling and romantic. The party camped at a place called by the Mexicans Los Ojos de la Muerte, or the Springs of Death. The springs were of pure water, but the place was so named from the fact that several murders had been committed at the house.

One Sunday while the men were resting after their week's work, two of the men began an examination of the place, and in their rambles became imbued with the idea that there was a concealed room in the building. The walls were sounded, and at last they came to a place where they thought a different sound was given out, and they began to work a hole through. They found that their surmises were correct, and soon had an opening into a room. They procured lights and entered. Lying on the floor, they found two skeletons, the bones of the wrists encircled with iron bands, which were rivited on and connected with chains, showing that the unfortunates had been chained together and left to die a lingering death.

From the appearance of the skeletons, it was readily perceived that they were those of a man and woman. Inquiry was made in the neighborhood, but for a long time nothing could be learned that would solve the mystery. One day an old Mexican came to the house and on being told of the discovery, said that it explained the disappearance of the wife of the man who owned the place. It was generally supposed through the country that she had eloped with a young American with whom she had been unduly intimate.

### Clock 150 Years Old-Never Repaired

The glory of Mrs. Rebecca Essex's home at Tauguanuk, Richmond, R. t., is a great old grandfather's clock that was built by a Mr. Stillman 150 years ago and has been running without an interruption ever since, says the New York Sun. The clock is eight feet high and very bandsome, and a clockmaker recently said that its works are still as perfect as when they are made. The clock belonged to Mrs. Essex's grand-father, and has never been out of the possession of the Essex family. lady, who is eighty-two years old says it has always kept perfect time and never needed to be repaired.

### Chicago Yields the Palm.

Chicago is unfustly called the city divorces, writes Eugene Field. Yet Chicago is not wholly given over to the divorce industry; it is not so infamous a divorce center as the little city of Indianapolis is. Last year the number of divorces in Indianopolis was equal one-fifth the number of marriages. This percentage largely exceeds the showing made in Chicago. The showing here in-dicates that one in every forty marriages is a failure.

#### YOUNG GIRL STRANGLED.

The Mystery Which is Agitating a Michigan Village. LANSING, Mich., Feb. 1.-The body of an unknown girl, not more than fourteen years old of slight form and diminutive stature, district court, was concluded yesterday lies in a little undertaking establishment and he was found guilty. The trial came at Dimondale, an Eaten county vilto rather an abrupt termination and lage, seven miles south of this city, ended several days sooner than expected. awaiting identification. The short brown This was owing to the attorney for Davis hair, large eyes of the same color waiving argument in his behalf and allowing and handsome forehead all indicate that the corpse is that of a beautiful child. The neck is marred by the marks of fingers, as though the victim had been strangled, and the teeth had been forced through the lower lip. These are the only marks of violence on the body which bears evidence of having been the wrapped in a sheet or quitt. The body found in Grand river last evening, about dusk, by Solomon and Clifton Dorr, two farmers who were crossing the river on the ice. They had reached the further shore when the son. Clifton, looking backward caught sight of a curious looking object lodged in the branches of a tree which had fallen across the river. Closer examination revealed the entirely nucle body of the young girl, which had evidently been carried to the spot and thrown through an opening in the

#### Tanbeneck Exonerated.

SPRINGFIELD, Ill., Feb. 1.—Representative Moore of one committee who went to Columbus to investigate the Tanbeneck-Rogers matter returned today. He said he had nothing to say in regard to the investigation further than that it was satisfactorily proven beyond a doubt that Tanbeneck was not Rogers, the forger, and further that Tanbeneck had never been an inmate of the penitentiary." The report of the committee will probably be made to the house Tuesday morning and will be substantially the result of evidence pro duced before the committees, closing with the statement that the senate committee recommends the public exoneration of Tan-beneck of all the charges that have been either published in the newspapers or made against him by any one.

The Laving Hen. Hens differ individually, and they differ as breeds. Knowledge of their individual characteristics can only be gained by constant association them and careful observation of their traits. The laying hen is one that is active and busy. A good scratching hen—one that is never idle—is, as a rule, a good laver, for the reason that her active habits keep her in the proper condition for laying. Hence we may ad vise, says an exchange, that in selecting, the busy, active hen be retained. A bright red comb, bright wastles, and a happy disposition are indicated, while bright eyes and clean feathers also point to success. All hens have bright red combs when beginning to lay, but it is before the hens begin that more information is desired. The best method is to breed for good for good layers. Select the best layers every year and mate them with a male from good laying strain or breed, and the shortest road will at once be taken When one finds a lot of drones in a flock, get rid of them and breed from those "like begets like" holds good with poultry as with anything else, and should lead to the production of better stock; but it is important that the male begiven some consideration when selecting breeding stock, his influence on the future progeny is greater than any female in the flock, he is sire of all instead of
