

PROCTOR READS THE PAPERS.

Information Which the Honorable Secretary of War is Possessed Of.

HIS FOUR MINUTE STAY IN OMAHA.

Short Interview in Which He Says He's Not a Candidate and Declines to Discuss War.

Gen. Redfield Proctor was a visitor in this city for about four minutes yesterday evening.

A party consisting of General Brooke, commander of the department of the Platte; Colonel Hughes, chief quartermaster of the department, and Lieutenant Roe, aide-camp to the staff of General Brooke, went to North Platte to meet the secretary. This party accompanied Secretary Proctor as far as Omaha.

The secretary was quartered in the elegant Wagner palace car Marquita, which was attached to Union Pacific train No. 4, the fast mail.

The mail train was two hours and fifteen minutes late and consequently arrived here at 5:35 p. m. At the depot was quite a crowd, some drawn by curiosity. Others were army officers from the fort.

As the secretary stepped from the car a crowd of army officers, newspaper men and old-time friends of Mr. Proctor gathered about.

The representative was fortunate in securing a moment's interview, considering the crowd and the short stop here. In response to questions, the secretary said: "I know positively nothing about the talk of my succeeding Senator Edmunds since his resignation. All I know about it is what I have read in the papers."

Continuing, Secretary Proctor said: "I am not a candidate for senator from Vermont. All this gossip about me is that connection is without my knowledge."

When asked his opinion in regard to the recent Italian trouble the secretary said: "I really must excuse me from any utterance on that subject. I know absolutely nothing about it, save what I have seen in the papers."

When asked if the army of the United States and its dependencies, the militia, were in good shape for the secretary replied: "I would prefer not to express any opinion. I am not a military man."

When asked if he had any changes in the plans for the new Fort Cook in view, the secretary said he had not, but expected the work to go on as already planned.

Mr. Proctor said that he was greatly pleased with the condition of the frontier forts which he had visited on this trip. He said that these posts were all well kept, well officered and manned, and in shape to combat any hostile demonstration on the part of restless Indians.

The secretary is particularly pleased with the means of quick transportation for troops from almost any military post in the west to the east of the Rocky mountains.

When asked if he had any changes in the plans for the new Fort Cook in view, the secretary said he had not, but expected the work to go on as already planned.

RULES FOR MEAT INSPECTION.

Full Text of the Regulations Prescribed by Secretary Rusk.

THE DUTIES OF THE INSPECTORS.

Packing Houses to be Numbered and All Their Products Labeled and Stamped When Intended for Interstate Shipment.

The following additional rules and regulations have been prescribed by Secretary Rusk for the inspection of live cattle, hogs, and their carcasses under the provisions of the act of congress providing for the inspection of live cattle, hogs, and products thereof which are the subjects of interstate commerce:

1. The order and regulations providing for the inspection of export cattle and sheep, made October 20, 1890, under the provisions of section 19 of the act of congress approved August 20, 1890, are continued in full force and effect, inasmuch as they are made under the provisions of the act of March 3, 1891, and all exporters, to secure clearance for their shipments of cattle, must comply strictly with the said regulations.

2. The provisions of slaughter houses, canning, salting, packing or rendering establishments, engaged in the slaughter of sheep or products of which are to become subjects of interstate or foreign commerce, will make application to the secretary of agriculture for inspection of animals and their products.

3. The application must be in writing, addressed to the secretary of agriculture, Washington, D. C., and shall specify the location and address of the slaughter house or other establishment, the kind of animals slaughtered, the estimated number of animals slaughtered per week, and the character and quantity of products to go into the interstate or foreign commerce from the establishment; and the applicant in his application agrees to conform strictly with all regulations or orders that may be made by the secretary of agriculture for carrying out inspection.

4. The secretary of agriculture upon receipt of the application and after consideration thereof, will give the establishment approval, if the establishment is inspected and products will thereafter be known, and this number will be used both by inspectors of the department of agriculture, and by the owners of the establishment, to mark the products of the establishment.

5. The secretary of agriculture will appoint and designate a veterinary inspector in charge of the examination and inspection of animals and their products for each establishment which has been officially numbered, and will detail to each establishment such assistants or other employes as may be necessary to properly carry on the work of inspection at the establishment. The inspector appointed, and the assistants under his direction shall have full and free access at all times to all parts of the buildings used in the slaughter of animals, and the conversion of their carcasses into food products.

6. The veterinary inspector in charge of the establishment will carefully inspect all animals in the pen of the establishment about to be slaughtered, and no animal shall be allowed to pass to the body of the establishment until it has been so inspected. Whenever any animal is found on inspection to be diseased the animal shall be condemned by the inspector, and the carcass thereof shall be disposed of in such manner as may be provided by the laws of the state in which said animal is located.

7. The veterinary inspector or his assistant shall carefully inspect at time of slaughter animals slaughtered at the establishment, and make a post-mortem report of the same to the department. Should the carcass of any animal, on post-mortem examination, be found to be diseased for human consumption, the carcass shall at once be removed from the establishment under the supervision of the inspector, and disposed of in the manner provided by the laws of the state where slaughtered. Any owner of any establishment in which inspections are being made under the provisions of the act of March 3, 1891, who shall willfully cause or permit any animal which, upon inspection, has been found to be diseased for human consumption, to be removed from the establishment, shall be liable to prosecution under the penalty clause of section 4, of the act of March 3, 1891.

8. Each and every package of food products made from the carcasses of animals inspected and labeled or marked in accordance with the provisions of the act of March 3, 1891, shall be stamped with a numbered stamp issued by the department of agriculture, and a record of the same will be sent to the department at Washington.

9. Each and every article of food products made from the carcasses of animals inspected and labeled or marked in accordance with the provisions of the act of March 3, 1891, shall be stamped with a numbered stamp issued by the department of agriculture, and a record of the same will be sent to the department at Washington.

10. The letters and figures in the above print shall be of the following dimensions: The letters in the words "for export" or the words "interstate trade" shall not be less than four-fourths of an inch in length, and the other letters and figures not less than one-half inch in length. The letters and figures affixed to said package shall be legible and shall be in such position as to be of such color as the inspector of the department of agriculture may designate.

11. The inspector of the department of agriculture in charge of the inspection, when being satisfied that the articles in the packages came from animals inspected by him, and that they are wholesome, and are fit for human food, shall affix to the top of the packages meat inspection stamps to be furnished by the department of agriculture, the stamps bearing serial numbers and the inspector shall write on the stamps the date of inspection.

12. The stamp must be securely fixed by paste and tacks in such a way as to be easily read when the package is standing on its bottom. Not less than five tacks shall be driven through each stamp, one at each corner and one in the middle of the stamp.

13. The stamp having been affixed it must be immediately concealed. For this purpose the stamp may be concealed in a hole in the copper, in which shall be cut five parallel wires long enough to extend beyond the sides of the stamp on the back of the package. At the top of the stencil will be cut the name of the inspector and at the bottom of the stencil will be cut the district in which inspection is made. The stamp being printed from this plate must be covered with blacking or other durable material, and across the stamp a stencil must be made in such a manner as not to deface the reading matter on the stamp, that is, so as not to dab and make it illegible. The stamp having been affixed and concealed, it must be covered with a coating of transparent varnish or other substance. Orders for stamps must be made by the inspector on the chief of the bureau of animal industry.

14. Whenever any package of meat products bearing the stamp of inspection shall have been opened, and the contents thereof found to be adulterated, the stamp must be obliterated and the package destroyed.

15. Reports of the work of inspection carried on in every establishment will be forwarded to the department by the inspector in charge, on such blank forms and in such manner as will be specified in "Instructions to Inspectors of Slaughter Establishments."

16. The inspection of swine for export or interstate trade will be conducted in the same manner as prescribed in the foregoing rules, with the addition, however, that a microscopic examination for trichina will be required for all swine products.

17. When the slaughtered hog is passed into the cooling room of the establishment, the veterinary inspector in charge, or his assistants, will take from each hog two samples of muscle, one from the "pillar of the diaphragm" and the other from another part of the body, and the samples will be put in a self-locking tin box and a numbered tag will be placed upon the hog from which the samples have been taken. A duplicate number of the tag will be placed in a duplicate number of the box containing the samples from the hog in the cooling room, so tagged, will be taken to the microscopist for the establishment, who shall thereupon make a microscopic examination of each box containing samples, and shall furnish a written report to the inspector in charge of the cooling room, giving the result of the microscopic examination, together with the numbers of the hog from which samples have been examined.

18. All hogs reported by the microscopist to the inspector in charge of the cooling room to be affected with trichina will at once be removed from the cooling room of the establishment into the supervised of the inspector or one of his deputies, and be disposed of by the owner in such manner as may be required by the laws of the state where the factory is situated.

19. The inspector in charge of the slaughtering or other establishment will issue a certificate of inspection for all carcasses of animals to be exported into foreign countries, which certificate will cite the number of the factory, will be taken to the microscopist for the same, the date of inspection, and the name of the consignee and country to which the articles are to be exported. This certificate will attach to the articles to be exported. One certificate only will be issued for each consignment. The certificate will be issued in serial numbers and in triplicate form. One copy thereof will be delivered to the consignee of such shipment, one copy will be attached to the invoice or shipping bill to accompany the same and be delivered by the transportation companies to the chief officer of the vessel upon which the consignment is to be transported, and the third copy will be forwarded to the department of agriculture for filing therein.

20. The inspector in charge of the slaughtering or other establishment will issue a certificate of inspection for all carcasses of animals to be exported into foreign countries, which certificate will cite the number of the factory, will be taken to the microscopist for the same, the date of inspection, and the name of the consignee and country to which the articles are to be exported. This certificate will attach to the articles to be exported. One certificate only will be issued for each consignment. The certificate will be issued in serial numbers and in triplicate form. One copy thereof will be delivered to the consignee of such shipment, one copy will be attached to the invoice or shipping bill to accompany the same and be delivered by the transportation companies to the chief officer of the vessel upon which the consignment is to be transported, and the third copy will be forwarded to the department of agriculture for filing therein.

21. The inspector in charge of the slaughtering or other establishment will issue a certificate of inspection for all carcasses of animals to be exported into foreign countries, which certificate will cite the number of the factory, will be taken to the microscopist for the same, the date of inspection, and the name of the consignee and country to which the articles are to be exported. This certificate will attach to the articles to be exported. One certificate only will be issued for each consignment. The certificate will be issued in serial numbers and in triplicate form. One copy thereof will be delivered to the consignee of such shipment, one copy will be attached to the invoice or shipping bill to accompany the same and be delivered by the transportation companies to the chief officer of the vessel upon which the consignment is to be transported, and the third copy will be forwarded to the department of agriculture for filing therein.

22. The inspector in charge of the slaughtering or other establishment will issue a certificate of inspection for all carcasses of animals to be exported into foreign countries, which certificate will cite the number of the factory, will be taken to the microscopist for the same, the date of inspection, and the name of the consignee and country to which the articles are to be exported. This certificate will attach to the articles to be exported. One certificate only will be issued for each consignment. The certificate will be issued in serial numbers and in triplicate form. One copy thereof will be delivered to the consignee of such shipment, one copy will be attached to the invoice or shipping bill to accompany the same and be delivered by the transportation companies to the chief officer of the vessel upon which the consignment is to be transported, and the third copy will be forwarded to the department of agriculture for filing therein.

23. The inspector in charge of the slaughtering or other establishment will issue a certificate of inspection for all carcasses of animals to be exported into foreign countries, which certificate will cite the number of the factory, will be taken to the microscopist for the same, the date of inspection, and the name of the consignee and country to which the articles are to be exported. This certificate will attach to the articles to be exported. One certificate only will be issued for each consignment. The certificate will be issued in serial numbers and in triplicate form. One copy thereof will be delivered to the consignee of such shipment, one copy will be attached to the invoice or shipping bill to accompany the same and be delivered by the transportation companies to the chief officer of the vessel upon which the consignment is to be transported, and the third copy will be forwarded to the department of agriculture for filing therein.

24. The inspector in charge of the slaughtering or other establishment will issue a certificate of inspection for all carcasses of animals to be exported into foreign countries, which certificate will cite the number of the factory, will be taken to the microscopist for the same, the date of inspection, and the name of the consignee and country to which the articles are to be exported. This certificate will attach to the articles to be exported. One certificate only will be issued for each consignment. The certificate will be issued in serial numbers and in triplicate form. One copy thereof will be delivered to the consignee of such shipment, one copy will be attached to the invoice or shipping bill to accompany the same and be delivered by the transportation companies to the chief officer of the vessel upon which the consignment is to be transported, and the third copy will be forwarded to the department of agriculture for filing therein.

25. The inspector in charge of the slaughtering or other establishment will issue a certificate of inspection for all carcasses of animals to be exported into foreign countries, which certificate will cite the number of the factory, will be taken to the microscopist for the same, the date of inspection, and the name of the consignee and country to which the articles are to be exported. The inspector in charge of the slaughtering or other establishment will issue a certificate of inspection for all carcasses of animals to be exported into foreign countries, which certificate will cite the number of the factory, will be taken to the microscopist for the same, the date of inspection, and the name of the consignee and country to which the articles are to be exported. This certificate will attach to the articles to be exported. One certificate only will be issued for each consignment. The certificate will be issued in serial numbers and in triplicate form. One copy thereof will be delivered to the consignee of such shipment, one copy will be attached to the invoice or shipping bill to accompany the same and be delivered by the transportation companies to the chief officer of the vessel upon which the consignment is to be transported, and the third copy will be forwarded to the department of agriculture for filing therein.

35. The inspector in charge of the slaughtering or other establishment will issue a certificate of inspection for all carcasses of animals to be exported into foreign countries, which certificate will cite the number of the factory, will be taken to the microscopist for the same, the date of inspection, and the name of the consignee and country to which the articles are to be exported. This certificate will attach to the articles to be exported. One certificate only will be issued for each consignment. The certificate will be issued in serial numbers and in triplicate form. One copy thereof will be delivered to the consignee of such shipment, one copy will be attached to the invoice or shipping bill to accompany the same and be delivered by the transportation companies to the chief officer of the vessel upon which the consignment is to be transported, and the third copy will be forwarded to the department of agriculture for filing therein.

36. The inspector in charge of the slaughtering or other establishment will issue a certificate of inspection for all carcasses of animals to be exported into foreign countries, which certificate will cite the number of the factory, will be taken to the microscopist for the same, the date
