WHEN reading Chilian news take your choice of reports. One will invariably contradict the other.

THE republican party detects and convicts its own thieves. No malfeasance in office is ever winked at or excused by the rank and file of the party.

COLLUSION between purchasing agents of public institutions and contractors for supplies is a common source of corruption. The peculiar fluctuations of prices shown in Hastings' asylum contracts clearly indicate that there is some unlerstanding between bidders and purchasing agent at that institution.

A FACTION of Moqui Indians is fighting against the inroads of civilization. It is the last struggle of the snake dancers against the progressive Moquis who are willing to come down from the rocky mesas to the valley farms. A detachment of troops on the ground will probably demonstrate to the recalcitrants that the government will not brook opposition to schools and farms, but will force the foolish savages to accept the benefits tendered.

THE APPROPRIATIONS ISSUE. One of the strongest answers made to the democratic criticisms upon the appropriations of the last congress was that of Secretary Foster before the Ohio republican convention. The secrotary does not defend all of the appropriations. He frankly says there were some that should not have been made, but all of this character were supported as much by democrats as by republicans. With respect to the others he maintains that they are justified by sound policy and are defensible upon grounds of the public good. Secretary Foster reminds the democ-

ency that this is a growing country, and for the republicans than for Hill to run again, but if he names the candidate. that the appropriations must necesand undoubtedly he will do this, that sarily increase from year to year. He pertinently observes that the receipts of ought to be almost as favorable to rethe postoffice department are no doubt publican success. It is to be presumed there are thousands of democrats in New the best attainable test of the growth of York who would be no more disposed to the country, and he presents figures to accept Hill's creature than Hill himprove that the increase in these receipts shows a greater percentage than the inself. crease of the appropriations by the Fifty-The democratic situation in New York as it now appears is favorable to repubfirst congress, demonstrating that if the lican success, but the chances of the latlatter had been increased at the same rate as the postal receipts they would be ter party winning depend upon its abil-

crats fall to get any comfort from his earnest defense of the increase in pensions. Secretary Foster does not believe it to be the duty of the government to put no limit upon its pension policy, but he holds that a too liberal provision has not been made for the men who preserved the union, and that the policy should be maintained until every old soldier having just claims shall come within the folds of the pension laws of the country. The secretary proceeds to argue that the increased appropriations for the postal service, for the navy, for

showing in favor of their city. the agricultural department, for river Omaha cannot afford longer to remain and harbor improvements, were urginactive. The proper time for action is ently demanded for the good of the country. Every farmer in the land, he remarks, has felt the revivilying influence of the proper application of the large appropriations for the agricultural department, and with equal cogency and force he points out the good effects, realized or certain of real-

ization, of the liberal appropriations of the last congress. The effort of the democratic press to make the appropriations of the fifty-first congress a live issue, and to create political capital for the democracy by the charge of extravagance, has thus far faited. It will not succeed. The American people are practical, and they will not believe that an honest expenditure for the enlargement and improvement of mail facilities, for increasing the navy so that it shall be capable of defending our seaports, for adding to the ability of the agricultural department to benefit the farmers of the land, and for improving the harbors and waterways of the country so that they shall be of service to our internal and foreign commerce, is wrong. Nobody justifies extravagance in public expenditures, and on the other

A CROWD in Omaha is always well behaved. Although ten policemen were on duty at the grounds all day while the circus was in progress not a single arrest was made. Aside from the Sunday fracas between circus employes there were no misdemeanors of any character chargeable to the show. This speaks well for the good sense of the people and the efficiency of the police.

THE continental congress of surgery and medicine, now in session in this city, deserves some courtesies at the hands of our business associations. Everything practicable should be done to make its members recall their visit to Omaha with pleasure.

this may be somewhat difficult.

Omaha will naturally and logically fall heir to the prize on account of her central location, her railway facilities, her political importance in this particular campaign and her good name throughout the union.

ACCORDING to the June report of the department of agriculture, the area of wheat has apparently increased about 8.7 per cent over that which was har-

Committees are already at work soliciting subscriptions for the entertainment of the crowd, and newspapers, leaders in local affairs and politicians are moving heaven and earth, figuratively speaking, to make a good

MANY an old citizen of Omaha and Nebraska will read with regret that Hon. B. E. B. Kennedy, the father of the fish commission, one of its original members and a most enthusiastic devotee to pisciculture has been deposed by Governor Thayer. No man in Nebraska has done more for the distribution of fish in Nebraska waters. He and Lou May of Fremont have formed a team which will never be improved upon for this department. They are both democrats, but the fish have not in any instance given evidence of apostacy.

THE people of South Dakota have an excellent opportunity of proving to the eastern philanthropists that western people are not the enemies of the peaceable Indian they have been represented to be. The trial of the murderers of Few Tails, a friendly Indian, presents the occasion. If the case is made clear against the accused it is to be hoped the jury will not allow the Plenty Horses fiasco to influence their verdict. The killing of Few Tails was an atrocious murder. The culprits should be made to suffer. It will do South Dakota's reputation great harm to acquit them if the evidence shows them guilty.

UTAH democrats have very little voice in the national convention, but such influence as one vote can exercise will probably be against Grover Cleveland. The Utah straw is a triffe lonesome but it shows nevertheless that there is a slight breeze blowing against the fleshy lawyer who wants another four years in white house. The breeze promises to be a regular Washoe zephyr in Nevada and the west and it will be no slight storm in many other sections of the union. History repeats itself and the ex-president will be voted out of public life permanently again for an indiscreet utterance upon an important economic topic.

IT is quite too common an occurence for the purchasing agent of a state institution to quietly inform a friendly contractor exactly what supplies are on hand in abundance and what will be needed for the next quarter. The contractor therefore puts in extremely low bids on the goods which will not be required and names remunerative prices republican chances would be greatly imfor those which he knows will proved.

In case some other bidder than the particular friend is successful in spite of these manipulations, the shrewd purchasing agent whose "rake-off" is not promising proceeds deliberately to deprive the successful bidder of reasonable profits by making very large orders for goods in which there is little or no profit and very small orders on such as will not the bidder good returns. Reorganize the Party. Burwell Enterprise.

If the republican party would retain its ower it must relegate to the rear some of its cosses and put the corporation gang out of its camp. This can best be done by calling county mass conventions and reorgalizing the party.
