Three Interesting Facts. It has been calculated that a railway rain, at a continuous speed of forty miles an hour, would pass from the earth to the sun in about 260 years. This is an interesting fact, and is al most as important, so far as one's needs are concerned, as the knowledge that in about 600 years the entire coal supply of this planet will have been exhausted There is, however, another fact which

is much easier of remembrance than either of the above, and which is certainly of much greater utility to all, and that is, that the "Burlington" is the route from Nebraska points to Chicago and all eastern cities.

The "Burlington" has three daily trains connecting Omaha and Chicago These trains leave the union depot

Omaha, at 9:50 a. m., 4:30 p. m. and 9:20 p. m. and run through solid to Chicago, arriving there at 6:45 a. m., 8:00 a. m. and 1:00 p. m. Their make-up, particularly that of the "Burlington Flyer," leaving here at 4:30 p. m. is unsurpassed For time tables, tickets and any information, apply to W. F. Vaill, 1223 Farnam street.
