THE CONDITION OF TRADE,

No Especially Interesting Features Developed in the Money Market.

WAITING THE OUTCOME OF THE CROPS.

Trade quiet as Usual at This Time of the Year But About Up to the Average of Previous Seasons.

The past week has witnessed very little whange in financial or business affairs in Omata. As noted before, the usual midsummer duliness is now on and until trace experiences the reviving influences of the approsching fall there is not likely to be much change in the situation.

It is still too early in this state for the money market to feel the effects of the move ment of crops, as harvest is not yet con pleted, but farther south this movement a money westward has already set in to quit

THE WHOLESALE TRADE of Omaha is fair for the season and while I some lines it may be a little less, generall speaking the volume of business is about u to the average of previous seasons.

In hardware there is not much activ ty and prices remain practically unchanged. Dealers generally are anticipating a good full trade. As against the close of last week there is no change of a noteworthy character apparent on the general market at eastern points. Demand is moderately active; some operators think i accommodation required in matter of stock and assortment, and generally at about former cost. There is frequent reference to curtailment of trade builders' hardware, especially on local account. Export order are occasionally fair. Nalls meet with about usual demand of late prevailing, and develop no really new or important features. Stocks are held so as not to appear obtrusive, but would come to the front more freely if there

would come to the front more freely if there was a place for them.

Omaha grocer's resort no marked change in values in any line and the general trace is inclined to be quiet. New York jobbers in groceries claim that it has been a first rate month thus, far with apparent chances for continuation, but operators contend that even should trade fall away they can stand it very well after the success of late secured. Pretty much every parcel of stock moved has gone into actual consumption, or at least started in that direction and what is left can be taken care of without what is left can be taken care of without strain or trouble, especially as no important or annoying amounts are expected to follow. Certain speculative contingencies it is Certain speculative contingencies it is thought may force the cost of coffee to a triffe higher level, but there is an impres-sion that ruling rates are now full enough to make some contraction of actual consump-tion, and here and there may be noted a tendency to meet all legitimate calls promptly. Other staple articles rarely come under serious complaint on account of cost, and when buyers withdraw it is only be-cause they have secured a supply for present wants, and propose to wait until new neces-

There is very little to say about the local There is very little to say about the local trade in dry goods excepting in a general way. Trade is quiet but parhais no more so than was to be anticipated for the summer mouths. The New York Bulletin notes that the situation in the dry goods trade presents the anomalous features of urgency on the part of buyers for goods already purchased and an unusually slow opening of the fall demand for leading stapies. This cannot be explained by any occurt as This cannot be explained by any escent ac-tivity on the part of buyers, as the market has been of a dragging nature for a considerable time past, nor by unfavorable fall prospects. In the southern states trade is indifpects. In the southern states trade is indifferent, but in the west and northwest everything is of a highly promising character. The present situation seems to imply a change in the policy of the trade, for this season at all events, as there is an unmistakable disposition to meet requirements only as they arise. Bysiness may at the reference of the season and the season are season. Business may not, therefore, be so active just now as in previous years, but it is more likely to be well sustained during usually quiet months. This change ought not to be disagreeable to either manufacturers, agents or trading basis, and the probable diminution of the 'extra dating' and other evils which are a fruftful cause of complaint.

COUNTRY PRODUCE. The produce market has been comparativele even during the six days under review. The most noticeable change has been in the poultry market which broke toward the latter part of the week under the influence of largely increased receipts. The gam in receipts was mostly from near by points, bucksters bringing in a large amount of poultry which was sold direct to the retail trade thus interfering with the sale of the regular ar rivals from shippers. Dealers in most cases found it slow work to move consignments and they were forced to offer stocks at less money as an inducement to buy,

The butter market also weakened the decline

amounting to \(\frac{1}{2}\)c. A very considerable proportion of the country butter arriving a present time goes through the hands of the packers, where it is reworked and put i shape for the cily trade.

Eggs bave sold all the week right around

Lie. The receipts have not been heavy, but about equal to the demand. The potato market has been flat. The amount of home grown thrown upon the mar ket by local producers has weakened prices until there is almost no demand for round

lots shipped in from the country. OMAHA LIFE STOCK.

OMANIA. July 25, 1891.

CATTLE—Official receipts of cattle. L985 as compared with 1.522, yesterday and 1.327 Saturday of last week. The market was slow and weak. Frime beeves would sell at about Bleady prices. Good beeves were slow at the resent decline of 15c to 25c, and 25c to 46c on fairly good ones. Butchers stock was active and firm at a 3c to 56c decline from hist week. Feeders were slow and and with little doing. The receipts during the week were 1.405 as compared with 8.164 the week were 1.405 as compared with 8.164 the week prior. Of receipts 7.407 were slaughtered in local packing houses.

copts 5.40, were staughtered in local packing houses.

House-Official recents of hogs, 4.445, as combared with 5.20 yesterday and 6.50 Saturday of lost week. The market was slow and steady on light hoes, and weak and to to be lower on he avy hors, Nearly all were sold. The range of the prices paid was \$5.105.50, the bulk so ling at \$5.205.55, light, \$5.105, 6.40, heavy, \$5.1505.51, mixed, \$5.206.55. The average of the prices paid was \$5.205.as compared with \$5.2 yesterday and \$5.155. Saturday of last week. The receipts of hogs were \$5.201 as compared with \$5.2 yesterday and \$5.155. Saturday of last week. The receipts of hogs were \$5.201 as compared with \$5.250 were staughtered in local receipts (2,13) were slaughtered in local

Of receipts (2,139 were staughtered in compacting houses.
Single-Official receipts of sheep 1,237, as compared with 125 yesterday and 1,0 Saturday of last week. The market was active and firm, with good mattons in demand. Natives, \$4,25 (2,5,00) westerns. \$4,00(4,75) common and grassers. \$5,00(2),50; good 60 to 70-10. Lambs, \$1,50(2),75. The receipts during the week were \$7,71 as commared with 771 the week. or, Of receipts 1,3/3 were staughtered in local packing houses.

Chicago Live Stock Market.

Chicago July 25.—(Special Telegram, to The Bee.)—Unfortunately for the selects the fresh receipts of entitledid not comprise the day's supply. Pens were fairly well filled with the leavings of the day before, which included not only a lerge causalty of "rubbish," but many good cattle. Most outlets were choked up and only a few cattle were wanted, consequently the sellers were again at the mercy of the buyers. Vaines were greatly unsettled and trastworthy quotations were out of the question. Nominally prices were \$1.256,3.00 for inferior to endee cows helfers and buils; \$1.756,3.40 for stockers and feeders; \$6.966,2.5 for common to faincy shipping steers, and \$1.556,3.00 for fire and to fine with those rating at the close of last week shows a stricking in values ranging from 15 and 25c in choice to extra grades to 50 and 55c in poor to good qualities. For this change there was no other reason than that of increase in receipts. There was quite an unusual demand from different worress. Exingters and eastern local hayers were all operating on a nore or less liberal scale. But the legitimate demand was seale. But the legitimate demand was Chicago Live Stock Market.

numbers as were dumped into the yards and the prices had to suffer. The decline full most heavily upon Texas cattle and that class of natives that must self in competition with them. Of Texas cattle alone there were

with them. Of Texas cattle alone there were 25.52. and a very large portion of the natives were equally common.

Perhaps never before—certainly not at this time of the year—were so many half-fatted cattle put on the market within the space of one week. Buyers were therefore in a position to make prices. They availed themselves of the opportunity, and with disastrous results to sellers, the loss of not a few of whom were appailing. There was not an oversupply of choice beeves but they felt the depression in the lower grades and cased off 15222c in sympathy. Of 78,000 head on sale, there were not more than 550 head sold above 55.5, though extra grades were saleable at \$5.00 (55.35). Dressed beef men filled their store-houses largely at \$2.30,51.00 for Texas and at \$3.50,000 for natives, while canners and local batchers loaded up principally at \$1.75,52.5. It is doubtful that they will again for some years to come be able to supply their wants at as 10% an average price. As a result of the present week's decline, greatly decreased receipts for next week near wafely be counted upon, and the recovery of prices mast be slow, as the channels of consumption are filled to repletion.

Today's hog market was without a quotable change. Good qualities, of no matter what weight, commanded Friday's prices, and the poorer grades, while still weak and unsettled, were not to be had at any appreciable decline. The offer high the formulation and at \$5.50, for heavy weights, \$1.76,55,50 for heavy weights, \$1.76,55,50 for heavy weights, \$1.76,55,50 for heavy weights are then the weakness has been most pronunced. The highest prices of the season were reached on Thesday, when choice heavy and inselium weights touched \$5.55,55,50 and fancy light consider to \$5.56,50 for heavy weights, \$1.76,55,50 for heavy weights and inselium weights and to fixe \$100 more from \$1.50 to \$4.50, and there were sales of the weakness has been most pronunced. The highest prices of the season were reached on Thesday, when choice heavy and medium weights and ment of eastern orders. The decline in pro-visions was a result rather than a cause of the shrinkage in the value of live animals. shrinkage in the value of live animals.

Had a Bulge. There were just three families in the "future great city" of Dakota, says M. Quad, and each had a sharty. On the one occupied by the founder of the town was painted, in large letters: million dollars to loan on bond and This struck me as rather mortgage. odd and I asked the man for an explana-

"Well, you see it's for the looks of the thing, to help the town along," he

But suppose some one should ask for a loan? "Can't be done; only three of us here, you see. One of 'em couldn't put up a bond for 3 cents, and the other hasn't got a blamed thing to mortgage!

"Can any one tell me the therapeuti-cal value of fasting spittle?" asked a quiet man: "I know that old wives, as the saying is, take great stock in it for warts, birthmarks, corns, bruises and even small cuts. Indeed old nurses seem to believe that their saliva in the morning before taking food is a panacea for every kind of skin complaint. But did you ever hear of the map of an old beaver or silk hat being used as a styptie? You will find it a capital one, and for burns or scalds. If placed over the wound in sufficient quantity to keep out the air, it will draw out the heat rap-

idly, as many hat makers will vouch. "We are getting off the track," said one, "when we talk of fasting spittle; deep sea fishermen and fishmongers generally hold that nothing is better than a piece of fish skin. Eel skins are commonly useds to cure rheumatism, and are considered infallible by some. negro minstrel once told me that noth ing stopped bleeding and assisted nacork. Thus every trade and profession has its own emergency remedies, as the doctor called them just now, and doubtless the list might be extended to every trade known.

DeWitt's Little Early Risers; only pill to cure sick headache and regulate the be raci

A Pat's Record. Mr. William Hester of Spring Hill, in Pennsylvania, has a carrier bat, in other words, he has trained a common bat to bear messages in the manner of homing pigeons. It is said, though not sertion, that his flitter mouse flew a mile the other day in less than twenty-eight took wing never made such time as that.

THE SPECULATIVE MARKETS.

Wheat Receipts Largely Below the Estimates With Encouraging Cables,

LIGHT OFFERINGS AND SHORT DEMAND.

Continued Cool Weather and Rumors of Frost Cause Much Strength in Corn-Stocks and Bonds.

CHICAGO, July 25.-Wheat showed a good leal of strength during the early part of the session the news having a decidedly bullish coloring. The receipts of No. 2 were largely below the estimate and cables generally re ported a better tone abroad. A private dispatch from Antwerp said "The market is stronger on incessant rains."

Rain was also reported throughout the porthwest. Counselman had a dispatch from New York saying that all offers of wheat yes-torday were accepted by foreigners and that 119 boat leads were sold for export by the outports yesterday. Minneapolis' reported large sales of flour for export and Bradstreet's reperfed the wheat and flour exports from both coasts last week at 2.230.000 bushels, against ,400,000 bushels for the same week last year. There was also some talk of probable frosts in the northwest which also neiped to develop strength.
A cable from Liverpool brought the core

trivie news estimate of the supply and resuing season, making the wants 420,-00,000 bushers and the supply, alowing 152,000,000 bushels from America, at 388,-01.000 bushels, leaving a deficiency of 32,000,000 ushels. The shortage in the Russian rye crop Bestimated at 25.0 0.000 business, and that of Germany 75.0 0.00 short. All of these gave a strong turn to prices, and with light offerings and a good short demand, becember said from sayessize to some. It held about 850 for a line when there was free-selling by helland. Byten and White. This checked the advance and then came the estimate of 850 cars for Moniay, when the weakness set in and the price went off to 854c and closed at 884c. At 80 to 804c Perfiringe and closed at 884c. At 80 to 804c Perfiringe bought a little whent openly, but it was generally thought that he was solling heavily through brokers. At any rate he was a very good buyer on the subsequent break.

Corn was strong chiely on the continued cold weather and talk of frest; there was a little freeze last night at st. Chon. Minn., but without Jamuge. Shorts were nervous and while offerings were light prices were bid up from the start. September opened at 544c, sold up irregular to 554c, then on the estimate of 510 cars for Monday broke to 554c and 66c for No.2 yellow, and everything was sold readily. Hately Brothers bought a good deal of corn. Baldwin & Farnum were also buyers, and Pardridge was credited with covering a good line of shorts through Brosseau.

Outs were quiet but generally easy with very narrow fluctuations. Hos products were strong and higher. Live hogs receipts, 8,000.

The strength is corn strengthened provisions. The Anglo-American packing company bought lind, while Wright and Ryan bought ribs. The general crowd also seemed on the buying side, probably everin short sales. September pork started at \$1.45. touched \$11.50, advanced to \$10.00. Buse. is estimated at 250,00,000 business, and that of Germany 75,00,000 short. All of these gave a

STOCKS AND BONDS.

New York, July 25.—The stock market tobull and stagment for the remainder of the session, but closed at the lowest prices of the day and in many cases of the week. The opening was steady and dull, but the bear manipulation in Burlington was renewed Immediately and in the most open manner, and that stock was soon off a material amount. Pressure was afterward brought on the Rich-Pressure was afterward brought on the Richmond & West Point securities, and the common stock and the bonds suffered severely, while the preferred stock which has not been dealt in during the week sold down over 8 per cent from its last previous sale.

In addition to these declines Jersey Central was also unaccountably weak, losing 2 per cent, which affected the rest of the list unfavorably, and small losses were sustained all

atong the line.

The bank statement, however, unexpectedly showed a material gain in the surplus reserve and the downward movement was checked except in the stock most directly affected by the manipulations. Aside from that the dual dealings were devoid of feature or interest. The market closed dull and barely steady for the general list, but in most cases at the lowest prices of the day. The final changes were generally instantificant losses, but Jersey Central is down 1/2c. Burlington 1/2c, and Richmond & West Point 1/2c.

Raifrond bonds displayed the usual dullness, the sales for the session amounting to 251,000, but the tone was weak, and while the active bonds were only slightly changed as a rule the Richmond & West Point lost 6/3c.

The following are the closing quotations for the leading stocks on the New York stock exchange today: long the line. The bank statement, however, unexpectedly

New York Mining Quotations. NEW YORK, July 25.—The following are the closing mining stock quotations:

St. Louis Mining Quotations. Sr. Louis, Mo., July 25—The mining market was inactive today and prices were generally medianyist. The following bids were made on call: Impton & Quin y was the only conspicuous stock on the list this morning and it so do of rapidly under the hammering of the bear clique by a combination enusually well organized and managed by one of the most adroit bear manipulators in Wall street. It will not be assist to state frankly the legitimate arguments employed against this stock. First, the company owns a heavy load of bonds, issued hirtely on extensions which last now yield little or no profit. Second, the corn crop, on which it relies to recompe itself for such losses, will be late this year, and, consequently, to some extensions maperilled by the chances of unfavorable weather. Had this year's crop failed in the face of the present reductance of investors to take new bonds the outlook would have been dispail. But the crop will not be a failure, nor will the new extensions when the company's managers have hat time to complete their plans. Some interest was aroused by the decline of Louisville during the morning below the price at which the new stock is offered to shareholders for subscription. It need not be inferred, however, that the \$1.50.000 stock will not be subscribed for at 70 per cent.

Altitle more than a month ago, in commenting on the sales of Louisville at that the country holdings of stock to cover in July by the new Louisville stock taken under subscription. The secons to be exactly what hashappened. The price of Louisville at that time was 50c, so that there has been a fair profit in the transaction. May he of what was sooit was subpend from Louisville at that time was 50c, so that there has been a fair profit in the transaction. May he of what was sooit was subpended from Louisville at that time was 50c, so that there has been a fair profit in the transaction. May he of what was sooit was subpended only in the proportion of 10 per cent to actual holdings. But this has been easily solved by the purchase of the rights in open market. Today, for instance, aprivilege to subscript for ten shares of Sew Louisville stock at the purchase of

McShane & Condon, INVESTMENT BANKERS, 300 S. 13th at., First National Bank Build-

ing, Omaha, Neb. Deal in stocks, bonds, securities, commercial pa-per etc. Negatible loans on improved Omaha real estate. Short time loans, on bank stock, or on all approved en laugus security.

sympathy with wheat, partly in covering of shorts and partly on lighter receipts than expected. The future is almost alto other dependent on the weather. Outs were steady within an exceedingly narrow range. Local scapers in provisions took advantage of the mail innerlet and of the firmness in grain to apply the prize.

New Yone, July 25.—Konnett, Hopkins & Co. to S. A. McWherter: The stock market has been heavy with further evidences of liquidation of Chicago, Burlington & Quincy and Richmond Ferminal of the latter it is said, a provinced house soid quite a large line of speculative holdings. The Richmond Terminal lends and preferred stock are weak at the deciline of 20 percent today. The sciling of Chicago, Rurlington & Quincy seems to be of the same nature as for some days past, and it is rimored that the company is a need of money, and finding itself unable to sell bonds, is a Boarower. Deleware, Lackwanna & Western has been pressed for sale today. It is reported that all coal trade is at a standstill as far as new transactions are concerned since it was discovered the Delaware, Lackwanna & Western was cutting prices, buyers having withdrawn from the market. No attempt is being made to get the July circular prices for cost. The bank statement was better than expected. The increase in the reserve of \$1,-20,00 was occasioned by the decrease in deposits of \$2,000,000 and unexpected in cash \$700,000. The stock market of \$2,000,000 and unexpected in cash \$700,000. The stock market of \$2,000,000 and unexpected in cash \$700,000. The stock market condition in the northwest were the basis of foliay's strength in wheat. The early firmness might be bushed by head of the carried and the morthwest were the basis of foliay's strength in wheat. The early firmness might be bushed and weather. Hopkins & Co. to S. A. McWhorter: Large engagements for expected, the incorthwest were the basis of foliay's strength in wheat. The early firmids had not

ben's liberal buyer at sinsest the top prices. This checked the afferings, but the crowd was beartish and predict lower prices. Manday If the large lot estimates are realized. The apprehension of frost had much to do with today's advance in corn. A good many traders are failing on after a conjectored deal in September. Some days ago it was given out that it was centered in Waitstreet, and now the duke of Mariborough and his English friends are in it according to a Londen special Speciation may put prices his her temporarity, but it is believed there is pleuty of oil corn in the country and it may be worked as oil oats. At one time this year the latter were soid at fact to arrive and now they can't be soid at half that price to arrive. Present sellers had the oats when 600 arrive. Present sellers had the oats were 600 arrive. Present sellers had the oats when 600 arrive. Present sellers had the oats when 600 arrive. Present selle one and repeats itself with exasperating frequency, but the farmers seldem profit by it. They are now holding on to corn, for which they are hid big prices, and the chances are that they will finally sell at about two-thirds of what they are now offered, unless some disaster overtakes the growing crop. Provisions were firm in sympathy with corn and estimates of only 90,00 ho s next week. Ribs were especially strong, a leading packer buying them freely. The bulls are certainly manualing their campaign with great shrowdness, considering the enormous stocks which at one time were thought to be an effectual bartom advance in prices for some months.

Chicago, July 25.—Logan & Co. to Toneray & Bryan; Reports of the growing spring crop are on the whole favorable, but two weeks later than last season. Receipts of winter wheat centime heavy. The demand, however, is good. One healthy feature is freight engagements from this port have been made for thirty days aboad and the demand for tonnace is said rood. Cables are firm. One or two of our heaviest shorts were buyers today. Until the growing crop of spring is secured we favor buying on weak markets. Corn strong, Crou reports are less favorable, this, with

Total amount of transferS \$139.417 Charley Jefferson as a Life Saver.

One day this week, says a correspond ent of the Boston Globe; Mr. Charles B. Jefferson, eldest son of "Rip Van Winkle," did an heroic and mest timely act. Two young ladies, guests at the Jefferson with, were in bathing at Buttermilk bay. One of the ladies got out beyond her depth, and went down, not being a swmmer. Her companion atwater, with which she was not familiar. The first young lady sunk a second time before assistance was attracted to her, and she was about to go down for the last time when Mr. Jefferson dove in and he alded the second young lady ashore. Restoratives were applied to the lady who had narrowly escaped drowning.

and she was gradually brought to: No grapping, no nausea, no pain when DeWitt's Little Early Risers are taken.
