

AT THE OLD HOURS AND WAGES

Smaller Workmen Give up Their Fight and Are Taken Back.

TWO HUNDRED MEN AT THEIR PLACES.

Others Will Be Put to Work as Rapidly as Possible—Some Trouble Experienced at a Meeting Held Under the Bridge.

The strikers returned to work yesterday, and the clouds of smoke rolling from the tall chimneys of the smelters silently proclaimed to the city that the difficulty was over.

The men began assembling as early as 6 o'clock and as soon as there were from 400 to 500 in front of the gates at the foot of Douglas street. Many of them had their dinner pails and nearly all wore their working clothes.

Others were waiting for the men to be put to work as rapidly as possible. Some trouble was experienced at a meeting held under the bridge.

Mr. Barton's ultimatum had come to see what he would do. "We have come to the conclusion," said Mr. Barton, "that we will receive no more committees and entertain no more propositions."

positively the condition of affairs prevailing in these smelters. The wages paid here are 10 per cent higher than in Kansas City, and 15 per cent higher than in St. Louis.

He said that at the Kansas City smelter two men on a furnace, the feeder and tapper, work eight hours and get \$2 a day. The others work ten hours. In the aggregate, however, the Kansas City wages are above stated, are 10 per cent lower than here.

tion, while the other made his way into the works by himself. Neither man was hurt, but the one with Bacon said he was satisfied with the terms and wanted to go to work. Bacon took him by the arm and escorted him to the gate in safety.

By this time about twenty-five policemen had arrived on the scene and the crowd were flying in all directions. It was found that in the matter the company found that to place the men here on eight-hour shifts at \$2 a day would mean an increase in expenses of \$50,000 a year.

Although now paying more than other smelters were asked to still further increase our pay roll. We cannot do this and compete with other works.

The company is trying to devise a plan that will do away with the twenty-four hour shifts that have heretofore been necessary.

The agreement to take back Bacon was not entered into by any of the men, who said several days ago that he did not believe that the company would take him back.

A number of the men expressed the belief that Bacon would not go back to work. Mr. Barton stated to the committee that inasmuch as Bacon had told Rev. Mr. Barton that he would not go back to work, the company would not be outdone in magnanimity by Bacon, and would therefore refuse to take him back.

It will take some time to get the ore diverted in other ways back here, as the company does not feel like shutting down the plant. Work had progressed so far that it is believed that it will be necessary to make arrangements to take it off their hands, but it is believed in a week all the men will be at work, and the plant running full blast in every department.

At 7 o'clock as many night men as could be utilized were at work, and it was necessary to refuse the services of about twenty-five of the men who came in a body at that hour.

Early in the afternoon handbills were scattered broadcast throughout the city, calling a mass meeting under the Douglas street bridge at 4:30 o'clock.

The circular was headed "Barton's Treachery," and called upon "all friends of justice, honor and fair play" to attend and take part in the meeting.

BANDIED STRONG EPITHETS.

Omaha's Aldermanic Body Has a Row With the Executive Department.

DR. GAPEN CALLED MR. LOWRY A LIAR.

Discussion of the Board of Health Rules Led to a Personal Diff—The Rules Were Rejected.

It might have been caused by the excessive heat and again it might have been caused by the atmosphere of the room, but whatever the cause might have been, last night, the board of health, sitting in the executive department, followed by Dr. Gapen, climbed the steps to the basement of the court house, where in time gone by the chairman of the board and various contractors have settled their differences in a Sullivan.

It would have been better for Dr. Gapen if he had not followed the crowd, for by so doing he had incurred the wrath of the board. The officials were on the edge of the board, and the official axe will fall upon his jugular if the council can have its way.

It is not believed that there will be any further trouble, as last night was regarded as the critical point. The board of health, however, is not so easily satisfied, and the reopening of the works are now fairly well established, but a moment of weakness last night would have thrown back everything that was accomplished.

Bacon's course was a surprise, and to his efficient work is largely due the suppression of the turbulent crowd without serious trouble and possibly bloodshed.

It is not believed that there will be any more trouble in changing shifts, but to avert anything unpleasant police protection will be maintained and the crowd will be kept away from the plant.

HOWA CENTRAL'S CONDITION.

Tonnage of the Line Affected by the Coal Miners' Strike.

Chicago, Aug. 17.—The annual meeting of the stockholders of the Iowa Central railroad company will be held in this city September 4. The report to be submitted at the meeting, covering the operations of the road for the fiscal year ending June 30, 1891, has been prepared and shows the following details:

Operating expenses, \$1,223,889, an increase of \$47,583; net earnings, \$476,361, an increase of \$47,583. The total tonnage during the year was 1,131,338, against 1,042,136 for the previous year and 886,868 for 1889.

As soon as President Lowry ascended the throne, Messrs. Bechtel, Blumer, Bruner, Bush, Chaffee, Cooper, Coway, Donnelly, Ellasser, McLoarie, Martin, Osthoff, Specht and Tuttle responded to their names.

A moment later Secretary Nason of the board of trade appeared upon the scene and requested the council to vacate, stating that the board of trade wanted the room. Where to go was the question, and after some debate Chairman Birkhauser of the board of public works proposed he use his room.

It would have been better for Dr. Gapen if he had not followed the crowd, for by so doing he had incurred the wrath of the board. The officials were on the edge of the board, and the official axe will fall upon his jugular if the council can have its way.

It is not believed that there will be any further trouble, as last night was regarded as the critical point.
