THE SPECULATIVE MARKETS.

Wheat Wesk and Lower on Account of Cable News.

WEATHER IN ENGLAND HOT AND FORCING.

Oats Followed the Course of Major Cereals, Being Off Easy, and Strong Later in the Day's Trading.

Curcago, Ill., Sept. 10.—Wheat opened weak and lower this morning. The prime cause was the weak tone of cables. Liverpool was reported depressed, with anxious sellers, at 2 ence decline. The receipts here were nearly 00 ears under the estimates, but the foreign demands were light and the crops in the northwest were heavy. The weather in Eng-land was hot and forcing, and the government crop report was expected to be bearish. There bulls had bought at considerably higher prices and were averse to running the risk of the further loss which appeared to threaten them and the other class of longs, the size of whose lines was altorether dispropertionate to their margins, were free seilers at

the opening of the market.

The shorts felt at that time so secure in their position that they stood aside while the bulls referred to offered their holdings from 95% down to 94% before they thought well enough of the price to cover to any great extent. The trading then became heavy for about lifteen minutes during which it surgeil up and down between the figures already given. Then a curious change in sentiment occurred. The bears began to reach the con clusion that a drop of Me in the price of wheat within three weeks was enough to justify a reaction and to consider a

within three weeks was enough to justify a reaction and to consider a weak market overloaded with bear news and with apparently no friends as furnishing a rare opportunity for a turn. The number who reached this conclusion at about the same time here and elsewhere, as shown by the buying orders, reversed the tone of the market and started prices upward.

Foreigners who had sold out on the excitement which existed here when December wheat sold as high as \$1.15, sent in considerable buying orders. Many of these are said, to come from Parls, from a house there which recently received a check for about \$2.0,000 from its commission men as profit on a heavy line of long wheat sold out on the excited bulge of three weeks ago. This foreign buying resulted, with the aid of shorts, in an advance and drew wheat to 00% cabout an hour after the opening and following that, the business started up and the fluctuations for the most part were confined between 05% cand 9%. The price worked up to around 16% again, when a dispatch from New York reported the failure of the London grain house of Alexander & Son for about \$10,000,000 and that caused a sudden break to 95%. Alexander & Son failed some weeks ago and today's ulspatch merely gives the total amount of their indebtedness at the time of the suspension.

The decline was at once recovered from upon the receipt of above explanation. The reaction was a ded by reports of foreign buying which came from New York, St. Louis, Duluth and Minneapolis, together with what was going on of a like character here, and the active demand by shippers for vessel room. The advance culminated at 97% and the close at 97% c, against 95% at the close yesterday.

Convergy to expectation the bears did not make a further raid on contacted on the close setterday.

Contrary to expectation the bears did not

Contrary to expectation the bears did not make a further raid on corn today. The clique apparently had the market well in hand and under cover of the strength of wheat, put the price of the ruling option up 1%c above the clostar price of yesterday. October opened at from 54%c to 56c, advanced 57%a and closed at 57c against 55%c at the close yesterday.

Oats followed the course of the major cerals, being weak early and strong later, and closing near the top figures of the day.

The provision market was irregular, opening weak and closing strong, and in that respect it merely responded to the action of the grain market. The packers were bidding for the October option and selling the January. This feeling growing out of the product for January is shown in the fact of the decline in the premium previously existing for that month, more especially in lard and ribs. There is an actual discount of 12%c in January compared with October ribs. January pork still maintains good premium from the fact of its superiority in a speculative sonse, but today it gained only 15c on yesterday's closing price white October advanced 27%c. One cause of the strength in provisions today was the report of the stocks of out meats in the country, showing a decrease of 186,000,000 pounds since July 1.

The lean az futures ranged as follows:

STOCKS AND BONDS.

Naw York, Sept. 10.-The stock market today exhibited during most of the session a carked decrease in the amount of business done, while the speculation had a hesitating one, which clearly reflected the attitude of operators at present, pending the determina-tion of the attitude of the Gould party in the market. The general view is still decidedly bullish. The new strength displayed by the Vanderblits is a strong supporting element on the market, Lake Shore sold at the highest price it has reached in years, touching 119 per cent, and while it reacted sharply for a time, it was well held late in the day, and Chicago, Columbus, Cincinnati & St. Louis was the strong point in the list, but the movements in the Nickel Plate and the Chesapeake & Ohlo gave signs of having reached their limits for the present. The Villards were stronger, but made no marked advances while specialties made no marked advances while specialties like New England were remarkably quiet and no movement among the industrial scored except a partial recovery in Cordage after its sharp decline of yesterday.

The market opened generally fractionally higher than last night's figures, but bear pressure knocked Cordage down over 1 per cent farther, while Missouri Pacific and Rock Isiand exhibited special weakness for a short time. The effect on the latter was in all probability due to the general expectation that the government crop report would show a lower average for corn than last month and this factor entered into the course of all the granzers. The demand, however, soon chanced the temper of the specu ation and the Vanderbilts, and especially Chicago, Co umbus, C neinnati & St, Louis and Lake Shore led an upward movement which lasted during the forenoon and piaced most of the active stocks at large fractions above their first prices. The buying power fell away after that time and a heavy failure in London added its influence to the bear pressure and prices receded all along the line, Lake Shore being one of the weakest on small transactions, though as a rule the Gould shares led the list, The decline was not checked until the last few minutes, when a feeble raily occurred, closing the market firm but near the lowest of the day. The final changes are generally small fractional losses but Lake Shore is 15 per cent lower and Lackawanna 1 per cent, while Cordage is up 1 per cent.

Covernment bonds dull and easy. United States 4s registered, 116 per cent; like New England were remarkably quiet and

Financial Review.

Financial Review.

New York, Sept. 10.—The Postsays: It is a curious incident in the present very curious financial situation that the London newspapers and London dispatches are unanimous in their assertion that London is considered bearlsh on the general security market by its dread of an advance in the interest rates, whereas the time money rate in that city, after its advance of a fortnight ago, is settled back to its old figures. Lenders of three months' money cannot get more than 2 percent, and the Bank of England, despite its apprehensions regarding the gold movement, has been unable to raise its own minimum discount rate above the low 2% per cent level. This certainly suggests that the present reluctance of Englishmen to buy our stocks on a large scale is due toother causes than a lack of money to loan at reasonable rates.

Homestake 100 Yeilow Jacket St. Louis Mining Quotations. Sr. Louis, Mo., Sept 10.—Mining stocks were very quiet, and outside of Elizabeth and M. Breen met with few orders either to buy or sell. Closing bids were:

Minneapolis Flour Market. MINNEAPOLIS, Minn., Sept. 10.—The North-western Miller says: The idieness of the Minneapolis, Minn. Sept. 10.—The Northwestern Miller says: The idieness of the
Pillsbury and one or two other mills made a
big hole in last week's flour output. Where
the production for the week ending August 29
was 188,305 barrels, that of the last week was
only 130,505 barrels—averaging 21,772 barrels
daily, against 16,925 barrels for the correspending time in 1890 and 134,080 barrels
in 1896. But these mills are going again
the present week and though low
water is troubling a good feal, the
output promises to attain pretty high figures.
There were sixteen mills in motion Wednesday, and they were prinding at the rate of
about 27,500 barrels daily. The water
power dropped off very suddenly yesterday and commencing today the sixteen hour clause of power leases is
being enforced. This has cut off two moderate
sized mills that would be running were there
pienty of water. Steam is being largely employed by six mills, as against only two a
week ago.

There continues to be more or less variety

size i falls that would be running were there pienty of water. Steam is being largely employed by six mills, as against only two a week ago.

There continues to be more or less variety to the descriptions given of the flour market. Some of the heav est firms here report sales in excess of their production for a week back, while others claim to have done comparatively a light business. The domestic trade consists of scattering orders of varying size from all quarters and a particular featere seems to be that buyers want the flour soon after pincing their orders. No very large lots are sold and middlemen show no inclination to stock up. Some of the local millers have sold agood deal for export and in fact the foreign trade is the best part of the market. Considerable patents have been worked, one 2,000 barrel lot being placed yesterday for irish markets.

The weakness in wheat today made the call for flour less active. Prices of the latter are from 10c to 15c per barrel lower than a week ago. The export shipments for the week were 72.75 barrels against 78.80 barrels for the preceding week. London quotations for 281 lbs c. 1. f. are: patents, 23 56d to 35 5 bakers, 28 56d to 35 36; low grades, 18 5 to 26s.

The Northwestern Miller says editorially: During the crop year of 1891 ending August 31. Minneapolis produced 7,434,98 barrels of flour. In 189 her output was 6,83,915 barrels, a gain during the last year of over 500,-000 barrels. The nearest approach to last year's output was in 1888 when the mills of Minneapolis turned out 7,244,910 barrels. Last year's run casily beats the record. Ten years ago the output was 244,972 barrels. Thus in a comparatively short time Minneapolis for the last crop year amounted to 2,576,545 barrels against 2,001,215 barrels for the previous year, a gain of nearly 500,000 barrels.

Havana yarkets.

\$8,000,000 and assets less than 5 per cent of the sum. Up to the close of change the scaboard had not reported a night taken for export. There seemed to be jad demand for wheat except to fill shorts and the receipts at primaries were agale large. If the short interest has covered as freely is appearances indicate we shall probably see Jower prices tomorrow. Corn and cats exhibit is substantial recovery from yesterday's westeness, doubtiess due to covering by shorts. Corn acts rather heavy and many think the clique would be glad to be fid of their loads. The screws may be spijed again tomorrow if the government report should be ballish. Provisions opened on the bottom and closed at the top. Stocks of meats in this country were reduced over 48 per cent in July and August. Pork decreased 50,000 barrels in the same time and lard 45,000 barrels in the same time and lard 45,000 barrels in the same time and lard abroad. Everything points to a better price not far off.

Chicago, Ill. Sept. 10.—Swartz. Dupee & McCormick to F. C. Swartz & Co.: Wheat opened weak on lower cables, liberal receipts and good weather. There was very free covering by shorts during most of the session, which was influenced probably by the appearance of the government report which will be made public this evening. There were some sensational war dispatches from abroad, which was also a bullish influence. Liverpool, Paris, Antwerp, London and Berlin all closed lower. Minneapolis and Dolath received 840 cars. Seaboard clearances were light and the new export business reported was small. Corn opened weak but closed very strong. The weather throughout the corn bet is perfect. Charters were made for 80,000 bushels. Provisions were firm in sympathy with the grain markets. The Cineinnati Price Current esti-

visions were firm in sympathy with the grain markets. The Cheimonti Price Current esti-mates that the stock of meats in the west has decreased in sixty days 186,000,000 pounds. OMAHA LIVE STOCK MARKETS.

CONDITION OF CROPS.

Corn Somewhat Damaged and in Canger-Wheat all Right. WASHINGTON, D. C., Sept. 10.-Statistician Dodge reports the September averages as follows: Corn, 91.1: wheat, 96.8; rye, 95.1; oats.

90.7; tobacco, 87.4.

lows: Corn, 91.1: wheat, 96.8; rye, 95.1; oats, 90.7; tobacco, 87.4.

The condition of corn is twenty-one points higher than in September of last year, and has been exceeded only three times in the past ten years. The state averages are high. The lowest are those of Michigan and Wisconsin, Minnesota and North Dakota coming next, while South Dakota, Nebraska and Kansas make fitures under the general average. In the eastern and middle states the crop is well grown, is generally earing well, but a little late and the recent cool nights present rapid advancement, yet the frost has not as yet done any damage. The crop is in a fine condition in the southern states. It is not so much injured by the heavy rains as was cotton. In some cotton lands water has caused material injury, while on the uplands the crop is remarkably good. It was somewhat late but is now beyond the reach of frost. A fine yield has been made west of the Mississippi, though in western Texas it was a little reduced by drought. It is a crop decidedly above the medium throughout the south as a whole. Many correspondents refer to it as the best in years. In the Ohio valiey corn is heavy in stalk, somewhat late in earing from the cool nights, and in some places has been blown down by heavy winds, yet it is generally very promising. Local drouths are mentioned at a few points as one cause of deterioration, without producing very serious loss. The correspondent in Franklin county, Ohio claims the heaving. Local drouths are mentioned at a few points as one cause of deterioration, without producing very serious loss. The correspondent in Franklin county, Ohlo, claims the heaviest crop in forty years. In Indiana and Illinois there was more injury from the drouth in July and early in August, which has been partially repaired by recent rains. If frost holds off ten days nothing but the latest planting will be injured. Absolute immunity from loss would require exemption through September, yet most of the breadth is already safe. In Michigan there has been considerable injury from frost in late planted corn. Wisconsin reports damage from the frosts of August 22 to 28, and in some cases still earlier. Some areas have been cut up for fodder in this latitude. Many Minnesota correspondents promise a good crop if the frost holds off. In the vailey lands and more northern sections it has already done considerable damage. There are returns of injury from frost in the Dakotas. In lowa and Nebruska the crop is late and would be injured by frost prior to September 20 and needs the entire month for the ripening of the late planted. In Missouri heavy rains in June, the drouth in July and the heavy rain and windstorms recently have been unfavorable to the highest conditions. On well cultivated and drained land corn is heavy and its condition variable. In Kansas the western districts are suffering from drouth, while the eastern countles have abundant moisture and a heavy crop.

The condition of wheat is very high, considering both winter and spring varieties. In soils, latitude and elevations so wide by differ-The condition of wheat is very high, considering both winter and spring varieties. In soils, latitude and elevations so widely differing, the general average has only been exceeded twice since 1879, in 1882 and 1884. The state average are quite uniform, but ten failing below 95, and three below 99. The lowest being 83, for South Carolina and 84 for North Carolina. The figures for the principal wheat growing states are as follows: Ohio, 98; Michigan, 98; Indiana, 10; Himois, 190; Wisconsin, 99; Minnesota, 100; Iowa, 90; Missouri, 93; South Dakota, 99; California, 98; North Dakota, 99; California, 98; Orgon, 92; Washington, 96. East of the Aliegnany mountains: New York, 99; Pennsylvania, 99; Maryland, 97; Virginia, 95. In the southwest: Texas, 97. In the middle states wheat was generally well filed and harvested in good condition, yielding well in threshing. In a few counties in Pennsylvania and in parts of Maryland and Virginia there has been some injury in the shock. The Texas crop was unusually fine, and was harvested in May and June, and is now mostly marketed. In one county a yield of twenty to twenty-three bushels per acre is reported and in another eighteen boshels is reported. In Kentacky some claim for wheat one of those exceptionally fine crops that occur at long intervals. Others make sanguline statements with variable returns. In Ohlo and Michigan the tenor of remarks as to quality quantity and condition are very favorable. In Indiana, Illinois, and Missouri threshing grain yields better than was expected, with some exceptions the largest ever harvested, in one instance thirty bushels per acre. The remarks concerning quantity and quality of spring wheat in Minnesous are extremely favorable, with very slight drawbacks from frost and wet, and the Dakots. The extremely coost and wet, and the Dakots. The extremely coost has been injured by the hot and blighting weather. ering both winter and spring varieties. I soils, latitude and elevations so widely differ
