Wy ming's Recent Tragedies Due to Trouble Among Stockman. BUFFALO PATROLLED BY ARMED COWBOYS Further Bloodshed Feared as a Result of the Intense Excitement

Existing in That Immediate Vicinity.

CHEYENNE, Wyo., Dec. 5.- [Special Telegram to THE BEE.]-The excitement in Buffalo over the two recent assassinations of ranchmen has somewhat subsided, but trouble is still confidently looked for. Last night the town was patrolled by a party of fifty armed cowboys, who had come in from Powder river in the behef that the work of extermination had been commenced against men who were alleged to be rustlers. Trouble was looked for at any moment and it was with general relief that the law-abiding people awoke this morning to discover that no acts of violence had been committed during the night. There was recently started in Buffalo an organization known as the Johnson County Farmers and Stockmen's Protective asso-

two men who were assassiaated were commonly reputed to be rustlers, although this has been denied in the case of Jones, but both men belonged to the new association. When the news of their murder was carried abroad it was generally believed by their riends that the work of retaliation on the art of the big stockmen had been com-menced and it was necessary for the self protection of all of them to gather together and

display their strength. A man named Bash heard the sho's which killed the two horses owned by Tiadale and the supposed murderer ride away, although at this time he did not suspect that any foul work had been done. This man afterward in attempting to describe the murderer, said he role a horse which closely re-sembled one owned by Frans M. Canton, who is a well known ranchinan and deputy United States marshal for that district. The news rapidly went from mouth to mouth, and soon it was stated positively that Canton himself was the murderer. In the excited condition of things the only

wonder is that more bloody work did not follow. Cooler counsel fortunately provailed. An interview took place today between Can-An interview took place today between Can-ton and Fred Hesse, a big cattle man, and the rangers from Powder river. The latter were completely satisfied that neither of the two gentlemen could have been concerned in the bloody deeds. Two men, one of whom is the president of the association, were reported missing and were consequently believed to have been murdered, but both have turned up all right. There are only one or two very large right. There are only one or two very large cattle owners living in Johnson county now. Several of the large herds still found there are owned by men living outside of the state. Cattle rustlers have become strongly in-trenched in that section. All sus-pected ones have been, during the past summer, excluded from the sus-the

regular round-ups. This has created a good deal of feeling which has been greatly in-tensified by the fact that any of their cattle sold east are considered as estrays and the money realized from them sent to the secretary of the State Stock commission. The have lately grown so bold that they will no oven permit an inspector to go through their herds to examine the brands. Every one of them goes constantly armed and in such a condition of affairs the spilling of blood was but a natural consequence.
