Decision Reached by the Union Pacific Men Late Last Night.

PRESIDENT CLARK'S ANSWER RECEIVED

He Endorsed Manager Dickinson's Position and the Men Take Decisive Action-Serious Turn of the Situation-Noon Today the Time.

There are flying rumors that the Union Pacific telegraph operators will strike if not granted the increased scale of wages demanded, but interviews with leaders in the Order of Railway Telegraphers force the conclusion that there is no propability of such a disturbance. Excitable men here and there talk strike, perhaps, but the responsible representatives of the organization admit that the railway officials have treated them with marked courtesy and made important concessions. They are hopeful of a further concession in the matter of wages and deprecate the talk of strike as uncalled for. It was expected yesterday that a response would be received from General Manager Clark in

time to hold another conference. "I do not think there is any danger of a strike," said Superintendent Korty of the Union Pacific telegraph department yesterday morning, "the company has granted changes in the system of working operators that will make a substantial increase in the remuneration of the force, and when the boys come to make a careful comparison with the salaries paid on other roads I believe they will conclude they are treated fairly.

'The grievance committee submitted schedule that would have raised the pay of every operator on the system, regardless of what he is getting at the present time. The aggregate increase for the year would have run up to nearly \$200,000. Then they revised their schedule, and now they are asking advances aggregating over \$60,000. As a matter of fact our operators are receiving better wages, all things considered, than those of road in the United States, with but two exceptions. Those are the Denver & Rio Grande and the Southern Pacific, two roads that are earning enough to pay dividends. Our scale is higher even than that of the Santa Fe, whose operators had to force their schedule out of that com-

pany.
"The standard rate for good operators on our line is \$75 a month, and the managers get as high as \$105. The average for the whole avertem, even including the lowest, is over \$60 a month.

"The Union Pacific is not opposed to organized labor, and the operators will be treated with fairness. On the other railway systems their order has had to fight for recognition, white our company has conceded their right to organize and present grievances. The officers of the order have held passes over our system for two years, and our officers are disposed to make every concession that is reasonable and just to the stock owners. The road has not carned a dividend since 1883.

The demands of the telegraphers outside the matter of wages have virtually been con-coded. We have agreed to a set of rules for the regulation of the service. Perhaps the most important is that concerning over time. Heretofore it has been customary to call on operators whenever needed. Under the new rule in offices having one or two men twelve hours will constitute a day's work, and in larger offices it will be ten s. The men will hereafter receive pay for all time in excess of regular hours, and if called out in the night they will be paid whether used or not. This item of overtime will make a considerable increase in the cost of the service and in the remuneration of the men. Another rule provides that, other things being equal, promotions shall be governed by length of service.

We are willing to raise the minimum of the scale to that of the Santa Fe schedule which is \$45 a month, but it would p result in the closing of a number of offices, We have three places paying \$30 and about twenty paying \$35. These are located on branches which are not earning expenses lines that the company would gladly standon if it were not under an obligalion to keep them open for the benefit of the people who have settled along them. The telegraph business is so small that there is no profit in maintaing the offices even at the present rate of wages Mr. Dickenson has also offered to hear and investigate individual complaints of inequalities, but the finances of the company will not permit a general advance in

### REACHED THE STRIKE POINT.

Unless Their Demands Are Granted the Telegraphers Will Quit. The differences between the Union Pacific and its telegraph operators came to a sudden and threatening issue last night. When Assistant General Manager Dickinson refused to grant the increase of wages demanded the grievance committee asked that it be referred to President Clark, who has been in Idaho with Jay Gould for summer recreation. Mr. Clark's response was received yesterday, and the committee had another ference with Mr. Dickinson.

The message was read to the telegraphers and the situation was discussed for two hours. Mr. Clark took the same position as Mr. Dickinson, explaining that the road was not earning enough to warrant any in-Crease in operating expenses, assuring the men of his kindliest feelings for them and asking them to accept the concessions already agreed. The consideration of the letter and the argument which followed re suited in no advantage for either side, and the committee retired to their rooms at the Served with Formal Notice.

Last evening Grand Chief Ramsey of the Order of Railway Telegraphers notified Mr. Dickinson that the operators had decided on an ultimatum. They gave him notice that if the demands of the telegraphers were not granted by noon today a general strike all over the system would be ordered, to take effect at once. Mr. Dickinson had no authority to give the increase demanded, and after consultation with Mr. Clark by wire the matter was referred to the board of directors, whose headquarters are in Boston. "Yes," said Mr. Dick uson in response to a reportorial inquiry last night, "it is true that the operators threaten to strike. They had the pins set for a strike tonight, but concluded to postpone it till tomorrow. The matter at ssue now is the scale of wages. The telegraphers demand that the minimum shall be 50 a month on all divisions. We are will-

mg to accede \$45. The matter has been referred to the board of directors, who may consider it tomorrow morning." Dodging the Question.

"There is something in it." said Chief Ramsey when asked as to the truth of the rumor, but he was very evasive when it came to giving definite information. "I'h e company has cenceded the rules we want and the only thing at issue is that of wages.
There is only a difference of \$2,000 or \$3,000 between us, and I think the company will grant that by tomorrow."
When asked who would order the strike

if it were determined upon, he suddenly knew very little. He "guessed" the mem-bers of the committee would notify their constituents of the failure of their mission to Omaha and the telegraphers might quit. It was suggested that that was a haphazard way of doing pusiness and might result in the men on one division going out while others continued at work. He thought there was no danger of a lack of concerted and ananimous action, but he immediately took in absorbing interest in the stained glass of the Millard rotunds and did not hear the re-quest for an explanation of this wonderful psychic power of the Union Pacific operator.

Chairman Birthauser of the Boad of Public Works, who exams property along the line of the streets, is of the opinion that macadam will become the pavement for all of the driving streets. This morning he said that he had thoroughly investigated the subject both in this country and in Germany and was satisfied that macadam would seen be popular in Omahs.

In speaking of the cost the chairman said that six inches of broken stone could be laid at 25 cents per square vard, four inches of gravel at 15 cents and the putting on of the material would cost 10 cents, making a total of 50 cents per square yard. The chairman said that if the macadam was properly tamped and rolled it would make a street as hard and soild as stone. He thought that macadam would be the proper thing for Sherman avenue. On that street there was a concrete base and if the macadam was laid on crete base and if the macadam was laid on top of this Sherman avenue could be made the finest driving street in the city and at a
