Suage Maxwell Issues a Restraining Order In the Case-One of the Fugitive Smallpox Patients Captured -Lincoln News.

LINCOLN, Neb., Aug. 18 .- | Special to THE BEE. |-The Globe Investment company of Omaha was made the party to a suit in the supreme court today, the plaintiff being G. W. Goodell, receiver for the banking house of Kleman & Arnold at Broken Bow, Mr. Goodeli was appointed receiver of this bank on November 19, 1891, and is still in charge of the institution. The Globe Investment company of Omaha secured from the district court in and for Custer county an order of attachment upon the property of the bank. Mr. Goodell undertook to have it dissolved, but his motion was denied by the Custer county clerk and the property duly levied upon and an order of sale issued by the court. The property was advertised for sate the 22d inst. Mr. Goodell yesterday applied to Chief Justice Maxwell for a restraining order to prevent the sale, representing to him that if the Omaha company were permitted to take the property in question the Jured. Judge Maxwell therefore issued the following order:

"It satisfactorily appearing from the pe-tation that the attachment in the case was in all probability wrongfully and unlawfully levied upon the property in question and that a sale thereunder would tend to defraud ereditors of the banking house of Kioman & Arnola of their just dues, a restraining order is therefore granted against the defendants and each of them, enjoining them from sell-ing or disposing of said property or any part thereof or otherwise interfering with the possession of the receiver in said cause. This order to continue in force until September 22, 1893, unless sooner medified o

Must Cut Down Expenses.

Under the exceedingly low assessment made this spring the city government of Lincoln finds it necessary to cut down expenses even at the risk of crippling some of the departments. According to a statement of City Clerk Van Duvn it will be necessary to very materially cut down the police force. The present force consists of twenty-two patrolmen and it may be necessary to reduce this number to fourteen. It will also be necessary to reduce the membership of be necessary to reduce the membership of the fire department, which at present con-sists of twenty-nine men. The new salary ordinance now pending provides for the expenditure of about \$10,000 more than will be available for this purpose. The necessity for this rigid economy lies entirely in the low assessment of the city property. The levy will be from 38 to 40 mills.

Held Up and Robbed.

H. L. Converse, a B. & M. telegraph operator, had a somewhat exciting experience white returning to his home from the depot at about 1 o'clock this morning. When he arrived at the corner of Fourteenth and Q streets he was confronted by two men who thrust a couple of ugly looking revolvers in his face and commanded him to throw up his hands. He was entirely unarmed and compality with their complied with their peremptory request with minerity. They went through his pockets and took from him the sum of \$4, all the money he happened to have with him at the time. They then wished him a pleasant good evening and disappeared in the darkgood evening and disappeared in the dark-ness. Although he reported the robbery to the police he was unable to give a descrip-tion of his assailants and the probabilities of their apprehension are exceedingly remote.

Jacob Steinberg is in trouble, all because he was thoughtless enough to dispose of a stock of cigars and tobaccos which had been mortgaged to almost their full value. He was the owner of a cigar store at Thirteenth and O streets, and, becoming involved in financial difficulties, sold out to W. C. Pomfret, a traveling salesman for Raymon Bros., in this city. He claimed to Pomfrei that, although he had given a chattel mort gage upon the stock, the mortgage had never been recorded and was therefore not worth the paper it was written upon. The mort-gage was held by N. T. Frisbee, who, as soon as he learned that Steinberg had disposed of the stock, swore out a warrant for his arrest on the charge of disposing of mortgaged property. TIN IN THE BLACK HILLS.

Enough of the White Metal to Supply the World's Demands.

DEADWOOD, S. D., Aug. 15.-To the Editor of THE BEE: We are often asked. can the United States produce enough tin to justify the present tariff on that article? We answer, ves; there is enough tin in the Black Hills alone to supply the world. The Black Hills are situated in the western part of South Dakota and eastern Wyoming. They cover quite an area of country and tin ore is found in many places throughout the whole but the lodes or ledges that have been most extensively prospected are in the naighborhood of Hill City, Pennington county, S. D. The Harney Peak Tin Mining company, composed of American and English capitalists, is operating there. The English stock holders are men who have large tin interests in other parts of the world, and consequently have had a great deal of practical experience in the production of tin, and they are fully satisfied that the mines of the Black Hills can be made to pay reasonable interest on their capital or it is not at all likely that they would have invested several millions of dollars in the enterprise. They brought an expert from Cornwall, England, to examine and report on the mines. He made a thorough examination, and I undergrand that the second or the second of stand that he was highly pleased, and said that they show as well, if not better, than the celebrated Dolcouth tin mine of Cornwall did at the same depth. The Har-ney Peak company owns something like 1,100 claims, and a claim comprises about twenty acres. They have sunk shafts on several of them to the depth of 400 to 600 feet and the ledges are improving in size and the quality of the ore is also improving as they go down. The company has built reduction works with a capacity of 250 tons per day and will have them in operation in a short time. Plenty of ore is on the dump at the mines, but as the mines are several mile from the reduction works the ore will b taken from the mines to the works by rail-roads which the B. & M. has agreed to build: that is, it will put in spurs or switches from its main line. The one to the works (about two miles) is completed and the others will be soon. If nothing happens the company will probably be producing tin in about twenty days.

Why do we want a tariff on tin! Simply

because we are satisfied that there is plenty of tin at home to supply the home consumers, and because in the fills the company has to pay from \$1.50 to \$3.50 per hand for daily labor, while the labor on the for-eign production is fully two-thirds less. Since farm produce cannot be raised with-in many miles of here everything has to be freighted in, hence all articles are much higher than eisewhere out of a mountainous country. These wages, however, we think will meet the necessities and allow each man, These wages, however, we think in time, to secure for himself and family a nice home and the comforts of life. There are miners who have labored faithfully here for several years past and now enjoy cheer-ful and cozy homes in Hull City. But with-out this tariff wages must necessarily be lower. The miner's life is so hard and peril-ous that the labor part, if not all, of it is shorter than in most other branches of labor and one needs pay enough to provide a home in the carly part of life lest he become an object of charity later on. Hence it is hoped that the American people at the coming presidential election will be liberal enough to vote for the party that will give us pro-tection on tin for a few years, at least, until we can get our American mines on a paying we can get our American mines on a paying basis and when the cost of our production is fully determined. Then they can reduce the tariff if necessary. Should congress repeal the McKinley bill I am satisfied it would have a serious and damaging effect on the tin industry of this country. It would simply kill it in its infancy; at least, that is the writer's opinion.

Will cure You, is a true statement of the action of AVER'S Sarsaparilla, when taken for diseases originating in impure blood: but, while this assertion is true of AYER'S Sarsaparilla, as thousands can attest, it cannot be truthfully applied to other preparations, which un; rincipled dealers will recommend, and try to impose upon you, as "just as good as Ayer's." Take Ayer's Sarsaparilla and Ayer's only, if you need a blood-purifier and would be benefited permanently. This medicine, for nearly fifty years, has enjoyed a reputation, and made a record for cures, that has never been equaled by other preparations. AYER'S Sarsaparilla eradicates the taint of hereditary scrofula and other blood diseases from the system, and it has, deser-

the relief I have obtained from the use of AYER'S Sarsaparilla. I was afflicted with kidney troubles for about six months, suffering greatly with pains in the small of my back. In addition to this, my body was covered with pimply eruptions. The remedies prescribed failed to help me. I then began to take AYER'S Sarsaparilla, and, in a short time, the pains ceased and the pimples disappeared. I advise every young man or woman, in case of sickness resulting from impure blood, no matter how long standing the case may be, to take AYER'S Sarsaparilla."-H. L.
