Harrison Advance Guards.

FIFTY-THREE HOURS A WEEK

Union Pacific Shopmen Ask for More Hours at the Same Pay Per Hour.

REACHED A SATISFACTORY AGREEMENT

Request of the Men Will Be Granted as Soon as the Force Has Been Reduced by Natural Causes to the Required Number.

The Union Pacific officials have received another committee of employes with a grievance and sent its members home with a satisfactory adjustment of the matters complained of. This time it was the machinists, blacksmiths and boilermakers in the company's shops all over the system.

For some time past these employes have been getting in only fifty hours a week, five on Saturday and nine on each other work day. They asked the company to allow them to work eight on Saturday and nine each other day, a total of fifty-three, and to pay them for fifty-four, it having been a custom for many years to allow shopmen to quitan hour earlier on Saturday and yet pay them for full time.

At first the committee asked the company to reduce its force by discharge, in order to permit the increased time for the remainder. The officials called the committee's attention to an old agreement, under which, in the event of lack of work, the reduction was to be made in the hours of labor and not by dis-charging employes. After further confer-ence a very fair and satisfactory solution of the difficulty was agreed upon.

What Men Are Offered.

The Union Pacific has about 2,300 employes in the three classes concerned, and if that force were reduced 200 the work in hand would give the fitty-three hours em-ployment per week to the rest of the men. It was determined that the pres-ent status shall continue until the force is reduced by natural causes sufficiently to permit the increase in hours, when the time will be increased and the men will be allowed pay, for the off hour on Saturday.

It is not known definitely when this will

bring about the desired change, but it will probably be within the next two or three months. Men are constantly dropping out, and there is quite a large class which works in the north during the hot months and goes south for the winter. As soon as these men quit it is thought the necessary reduction viii have been made.

It was also agreed that if work becomes dull, requiring a reduction from the nine-hour system, the time shall be cut down until it averages eight hours per day, and if that is not sufficient some of the men shall then be let out. It is not believed that this latter alternative will be necessary, but it was made for an emergency.

The machinists of the Union Pacific average about 32 cents per hour and the boiler-makers about the same. There is a greater variation in the wages of the blacksmiths. Some of them get as high as 36 cents an hour and others engaged at common work get as low as 30, but the majority are paid from 32

In presenting their case to the officials they asserted that it had been the practice, when men dropped out, to hire others to fill their places. This kept the force full and shortened the hours. The committee argued that this was unfair to the steady employes, be-caute they were made to suffer for the bene-fit of transients. The force of this argument was conceded, and the officials readily as-sented to correct the alleged injustice as soon as it can be done without injury to those new in the company's employ.

What the Local Shops Are Doing,

Omaha people hardty realize the splendid work being done at the Union Pacific shops under the direction of Superintendent Me-Connell of the motive power department, but railroad men are keenly alive to it, and some of the leading railroad journals of the east are illustrating and writing-up the products of these works as results noteworthy in the business.

The mammoth locomotive, 1700, which weighs 254,000 pounds with her load of coal and water, has proven a great success, and is doing the work of two engines in bauling passenger trains over the big hill west of Plaus have been made for 170e, which will be of the same pattern, but somewhat heavier.

In the past fourteen months the Union Pacific has turned out eleven fine locomotives of an improved type: No. 850, finished a few days ago, is doing splendid service on the fast mail run between Denver and Sterling: Nos. 841 and 842 are well under way and one of them will be out next week.

It is asserted that the Union Pacific can

manufacture these locomotives as cheapiv as the factories east and saves the percentage which the latter have to add for interest on their plant, because the railroad company would have to maintain its plant in any event for repair work. The 1,700, for example was built for \$2,000 less than it would have cost

Superintendent McConnell is recognized as one of the ablest men in his line in the country, and he is demonstrating it in many ways. Among other notable achievements of his is the discovery of a means for altering some of the eastern made locomotives of his road in such a manner that their power will be increased about 20 per cent. The Union Pacific has 100 of these engines, and they are being modified as circumstances permit. They are being fitted with driving wheels which lower the weight, and with other at-tachments that increase their steaming ca-Have You Read

NEBRASKA SMALL GRAIN.

Inspector Thompson Tells of Praises His Chief Grain Inspector Thompson took advantage of a temporary full in the movement of grain at Omaha to visit the leading grain markets of the country. He spent a day in Kansas City, three days in St. Louis and two days in Chicago, and carried with him

samples of wheat, oats, rye and barley of the Neoraska erop of 1892 which he exhibited on the various boards of trade.

At Kansas City he found the market brisk for the quality of winter wheat raised in 1892 in Neoraska. Mr. Thompson, speaking of his trip said. of his trip, said:

of his trip, said:

"Kansas Uity, through its southern connections, has developed into one of the very best markets in the west, and during my stay was 114 cents better than St. Louis on hard winter wheat.

"By a combined effort among the grain.

men at Kansas City they have secured such ratiroad rates as Omaha wanted, and have railroad rates as Omaha wanted, and have built up a fine sample and commission trade. Kansas City will be a competitor for Nebraska wheat. All of the commission men were surprised and highly compilmentary of the quality of the winter wheat raised in Nebraska as compared with the stuff grows in previous years, and they thought Nebraska farmers must have profited from experience.

perience,
"The information which I gathered from talks with the best commission men was that the Turkish hard winter wheat is the coming wheat in this country. It is hardy, a superior milling grain where the machinery is adapted to it, and is growing in demand for export. There have even been inquiries for seed from Missouri points, where they have never grown anything but the Amber or Fulz varieties.

"There is one objection found by millers to the quality of hard winter wheat that we have in Nebraska and that is the red, plump Russian berry that predominates in this wheat. This Russian berry was brought here about lifteen years ago by a colony of Russian Mennonites and I have seen it pure in ear lots. I would like to impress upon the farmers the importance of securing for their next year's seed the long, dark, flinty berry which is the Turkish variety pure and avoid as far as possible the Russian mixture. By growing a crop freer of the red berry the wheat will be more desirable in the market. "The Missouri crop of Fulz wheat is of a

very inferior quality and as spring wheat and hard winter wheat are neither specula-tive stock at St. Louis we are not in touch with the market in wheat, although one of the largest exporters on the floor told me that he was getting in shape to handle great

quantities of the Neoraska crop.

"St. Louis looks to Neoraska almost exclusively for its oats supply and the two days that I was on the floor Neoraska oats constituted almost the entire receipts. "The grain men were all surprised at the excellent quality of our new rye crop. They have a very stringent inspection on rye at St. Louis. There was no bariey trade at all while I was there. I exhibited a sample of No. 3 fall barley, but there was absolutely no

sale for it.
"I found the inspection of grain at Chicago the most regular, efficient and uniform of any place I visited. I went onto the floor and examined 100 samples of inspection of all the cereals. The great trouble with the inspec-tion of grain is the lack of uniformity. Where so many men do so much work and the different grades merge so close to each other it is rather remarkable that they have such efficient inspection in Chicago. In-spection there is freer from personal and political influence than at any other market in the world."

Saved His Child's Life. A. N. Differbough, York, Neb., says: "The other day I came home and found my little boy down with cholera morbus, my wife scared, not knowing what to do. I went straight way and got a 25-cent bottle of Chamberlain's Colle, Cholera and Diarrhona emedy and gave it according to directions You never saw such a change in a child. His limbs and body were cold. I rubbed his limbs and body with my hands, and after I had given him the second dose he went to sleep, and, as my wife says, 'from a death-bed he was up plaving in three hours.' It saved me a doctor bill of about \$3, and what is better, it saved my child. I can recom-mend it with a clear conscience."

OMAHA'S SCHOOL YEAR.

Effort to Shorten It Was Not Properly Supported and Drops Through. The Omaha public schools will open this fall as usual on the first Tuesday in September, not withstanding the resolution passed by the board last Monday night to open the

schools on the second Tuesday in September.

The trouble with the resolution is that it

was passed by an affirmative vote of only six members and as it involved a change in the rules it required a two-thirds vote of all the members of the board to make it legal. Mr. Gibson called President Spaiding's attention to this fact at the time the resolution was declared adopted, but Mr. Spalding held that a majority vote of a quorum present was sufficient. President Spalding has looked into the matter more carefully since and now sees his mistake. He will announce at the next meeting of the board that the resolution was not adopted, recall-ing his former decision upon the question. It is now so near the time when the schools must open and as several members of the board are opposed to the proposed change it is

hardly probable that any further effort will be made to shorten the school year. The teachers are being informed that school will begin as usual on the first Tues-day in September.

A Recommendation rom litinois.

Wilmington, Ill., April 11, 1891.—I would say that I can recommend Chamber-lain's Remedies as a number one set of family medicines such as every home should be provided with. You can rely upon their being as near what they are recommended as new medicine soid in this part of the courty. any medicine sold in this part of the country, Especially would I recovemend Chamber-lain's Choile, Cholera and Dearthona Revedy as having no equal for cholera morbus, colic or diarrhœa. Having used these medicines moself and soid them for several years, I know their value and have so hesitancy in recommending them. -Levi B. Dgi.L.

Don't Get Married

to an idea. Don't make up your mind that there's only one man that can make your clothes, or one make of shirt that fit you, or one doctor that can cure you, or one man that's fit to be President of the United States. There's more than one good tailor, more than one good make of shirt, more than one good doctor, and there's a "whole lot of us" that would make good presidential timber. Some men get it into their heads that in order to get a decent pair of shoes they must go to some swell shoe store and pay from seven to eight dollars.

Is there any reason why we can't sell just as good a shoe as anybody? Not that anybody knows of. We've shown a whole lot of men the "error of their ways" about shoes. Have you learned yet? We sell you for four dollars and fifty cents a pair of either hand welt French kangaroo, or French cordovan shoes, in any of the new fall shapes, in any toe, plain or tipped, in any size. These shoes we will guarantee to be as good as any shoe you can buy outside of our store for six fifty or seven dollars. In a few "very katosh" places they even reach eight dollars. For two dollars and seventy-five cents, we will sell you a genuine Goodyear welt shoe, made of kangaroo calf (with the grain outside). These shoes we guarantee in every way. We guarantee the price a dollar and a quarter under the shoe man's; we guarantee the stock perfect; the stitching not to rip; the hanger not to pull out, and our guarantee means new shoes free or your money back if the shoes don't wear as they should. Our full lines of fall shoes are here now, from the well known dollar twenty-five shoe to the hand made five fifty French calf. It's a good time to try "Nebraska's" shoes.

Youth's shoes, to to 2, 8oc. Boys' shoes 21/2 to 5, 90c. They'll wear.

During July and August we close at 6:30 p. m. Saturdays, 10 p. m.
