

ASSUMING A SERIOUS PHASE

Judge Scott's Trouble with the Bar Not Easily Adjusted.

UPHOLDING THE DIGNITY OF THE COURT

He Defends His Actions in the Peterson Case—Omaha Attorneys Call a Meeting to Take Some Action in the Matter.

TERREHAR, Neb., Oct. 13.—[Special Telegram to The Bee.]—A member of the bar applied this morning for a suspension of the judgment entered yesterday by Judge Scott against Attorney E. W. Peterson for contempt of court. The application was granted and the matter will be taken up by the supreme court at its next term, if not sooner. A recognition of \$500 was required and will be given, and the attorney will continue his practice as heretofore.

Judge Scott States the Case. Judge Scott, when interviewed, said that he deplored the matter very much; that he had realized a crisis was sure to come sooner or later on account of what he considered an organized and fixed purpose on the part of the various attorneys to defy the will of the court. He stated that he was only doing his duty by insisting that cases come to trial unless there appeared good and substantial reasons for the continuance. He further stated that to the best of his knowledge and belief there was an understanding on the part of the various attorneys that they would not let any case come to trial before him if they could help it. He also said he had no feeling in the Peterson matter and offered to null the record if Peterson would agree to obey the order of the court and apologize to the demurrer and apologize for the language used.

Will Be Examined Tonight. The Board of Insanity met at 6 o'clock tonight and a amended complaint regarding the case of Judge Scott was filed and Judge Scott was ordered to report before the Board of Insanity for examination tomorrow evening at 7 o'clock. Attorney E. W. Peterson, who has been from Omaha this evening and in reference to the report that application would be made by him to Judge Scott for a stay of execution of the contempt proceedings, says he has been denied by Judge Scott's jurisdiction and denies absolutely that he will make any application to go before the court unless the judge grants the fine and removes the contempt from the record.

Omaha Attorneys Intervene. Members of the Local Bar Will Take Some Action in the Case. The members of the Douglas county bar propose to have a hand in the discussion of the trouble growing out of Judge Scott's experience with the Tekamah lawyers. A meeting was held yesterday afternoon at which it was decided to call a general meeting of the bar for tomorrow afternoon. The following call has been issued for the meeting:

- OMAHA, Oct. 13.—To the Members of the Bar of the Fourth Judicial District, Nebraska: Whereas, Grave wrongs are being inflicted on the maintenance of justice in this district of the Fourth Judicial District, in the Fourth Judicial District, in the Douglas county court room, No. 1, at 2 o'clock p. m., on Saturday, October 13, 1892, for the purpose of making such investigation and taking such action as may be necessary to preserve and protect the fair reputation of our judges and to secure the proper administration of justice:

RECEIVED NO SATISFACTION.

Burt County Attorneys Fail to Secure Judge Scott's Recall. The execution of Judge Scott at Tekamah, Wednesday afternoon was the topic of discussion around the court house yesterday. Some of the lawyers thought that he had acted wisely, though, perhaps, with undue haste. It was conceded by all that a judge could be a despot if he saw fit and no person had a right to question his motives. He had supreme power over his court, and the records thereof and if he felt so disposed he could force any case to trial after the issue had been once joined by the parties. The matter was wholly within the discretion of the court as to whether the cases should be continued. If the interested parties and their attorneys wanted a continuance, they should have been in no wise bound to grant the order, though in such instances it was usually granted as an accommodation.

AFTER MUCKLE FOR TREASON.

Warrant sworn out for the Arrest of the Burgess of Homestead. YOUNGSTOWN, O., Oct. 13.—E. O. Christy, in the employ of the Carnegie company, Pittsburg, tonight swore out a warrant before Mayor Gilcock, charging Burgess M. Luckie of Homestead with treason and with being a fugitive from justice. The affidavit sworn to by Christy was made in accordance with the warrant in his possession for the arrest of Muckie signed by J. G. Donnelly of Pittsburg. The warrant was placed in the hands of Chief of Police Cantwell, but at a late hour last night Muckie had not been arrested. It is stated that Muckie will stubbornly continue the attempt to extricate himself, and the case if necessary will be carried through to the supreme court of Ohio.

THE MAYOR AND PARK COMMISSIONERS COME TO A DEFINITE UNDERSTANDING.

Mayor Bemis and Mr. Livingston, Mr. Kilpatrick and Judge Lake of the park commission held a consultation yesterday over the disputed Bemis park improvements. After a full discussion of the points at difference, the mayor asked the commissioners to submit a plan showing exactly where and to what extent the board desired to depart from the original plan in making the boulevard and park way through the grounds donated. When this is done then the mayor can give the board a definite answer as to whether he will agree to the proposition to let the commissioners take part of the sidewalk space off the ends of the lots adjoining the park instead of leaving enough ground for that purpose outside of the driveway. The commissioners think that they can get along with the donation of sidewalk space only a part of the way through the park where the ravine comes closest to the line of the ground donated. It looks now as though

WORK OF COUNTERFEITERS

Omaha Reported to Be Flooded with Bogus Silver Dollars.

NOT CONFIRMED AT HEADQUARTERS

Secret Service Officials Not Informed of the Subject—No Change in Mrs. Harrison's Condition—Other Interesting Washington News Notes.

WASHINGTON BUREAU OF THE BEE, 315 FOURTEENTH STREET, WASHINGTON, D. C., Oct. 13.—A dispatch was published here yesterday under an Omaha date line, saying that that city had been flooded with counterfeit silver dollars. At the office of the chief of the secret service today nothing had been heard of this matter, although the agent of the department in whose district Omaha is situated reported to the department under the date of the seventh from Council Bluffs. It is possible that he had already investigated the matter and the facts did not warrant any report on it. This is purely a speculation, however, on the part of the secret service office here. The agent's report dated the tenth is expected tomorrow and possibly it will contain some information on this subject.

No Change at the White House. Mrs. Harrison rested comfortably today, and if any shade of a difference could be noted in her condition tonight it was for the better. The president went out walking this afternoon, but Mrs. Harrison was kept in the sick room. Dr. Gardner confirmed in an interview this morning the statement that there was no danger in Mrs. Harrison's case, although he admitted what has been stated in these dispatches that her condition is very serious. Mrs. Harrison's condition is very serious. The president's condition is very serious. The president's condition is very serious.

Astronomical Science Assisted. Prof. Fargis and His Photo-Chronograph for the Transit of Venus. WASHINGTON, D. C., Oct. 13.—The young Jesuit astronomer, Prof. George A. Fargis of Georgetown college, some time ago invented the photo-chronograph for measuring star transits and made a novel and, it is claimed, very valuable application of his discovery. By it he has also been able to determine latitude and longitude. Rev. J. C. Steiner, S. J., the director-in-chief of the Georgetown observatory, says on the subject: "The determination of latitudes, and in particular their periodic variations, by means of photography has repeatedly been pronounced feasible and highly desirable, yet a practical method that would afford all the advantages of the transit method and at the same time publish the whole record graphically on a plate has never been suggested. Early in 1891 the plan was so far advanced that the principle was adopted. Yet it remained incomplete until Prof. Fargis suggested the application of the photo-chronograph. The photo-chronograph used in latitude determination consists of several lenses from the one used in transit work. Both are the invention of Prof. Fargis. It will not be too much to say that the photo-chronograph in its various shapes has succeeded in solving the double problem of determining by way of photography the co-ordinates of observation—latitude and longitude."

Prof. Fargis himself says: "It is desirable to state here that results are not declared final, because the determinations will have to be carefully scrutinized when the material is more abundant and by reason of the defective construction of the microscope. Two conditions, however, may be drawn from these results—first, that the photographic method is as applicable to latitude determinations as it is to those of longitude. In both cases fewer stars, indeed, can be observed in a given time than by the usual methods, but this disadvantage seems amply compensated by the accuracy of the single result."

FOOLING THE NEGRO.

Serious Charge Against Judge Albion Tourgee—An Outbound Society of Blacks. JACKSON, Miss., Oct. 13.—Mr. R. H. Wildberger of Clarksville, Miss., is in the city and brings late details of the recently reported race riot and trouble in Coahoma county, which went abroad as a bloody war between the blacks and whites. It develops, Mr. Wildberger says, that the trouble had its origin in a secret society organized among the blacks by the famous Judge Albion W. Tourgee of Mayville, N. Y., who in consideration of \$2 cash in hand directed the negroes to organize a secret society. The society was organized in Coahoma county and gave away the whole plan, which, Mr. Wildberger asserts, is simply to get all the money possible out of the negroes and to involve them in trouble for political effect. The grand jury of Coahoma county is investigating the society now, which has a large membership in both black counties and serious indictments will likely follow.

DeWitt's Sarsaparilla is reliable. "THE MAN IN GREY." Mayor Miller's Companion Was His Friend and Lived in South Omaha. The police of Omaha and South Omaha were very active yesterday in looking for the tall man in grey clothes who was seen with the late C. P. Miller of South Omaha just a short time before the death by the ex-mayor was found near Deering's warehouse in this city. It was the general impression that when the man was found a clue to the murderer of Mr. Miller would be gained, and the coroner's jury has been waiting for the man to be brought to the city.

SUCCESSFUL BUSINESS MEN.

George J. Paul is one of the young men of Omaha who has built up a business through his own efforts. He was thirteen years of age in 1879 when George P. Bemis, now Omaha's mayor, gave him a position in his real estate office. Paul did his work so well that he was enabled to start in the real estate business on his own account, and he has since become a successful business man.

MYSTERIOUS DEATH AT DORCHESTER.

DORCHESTER, Neb., Oct. 13.—[Special Telegram to The Bee.]—J. L. Armstrong, an implement man, died here. He was found lying beside the road, dead, four miles south of town this evening about 7 o'clock. The cause of his death is not yet known. The coroner has been notified. Armstrong is a single man, about 50 years of age, of temperate habits, and was apparently well at noon when he left town.

THE LATEST NEWS.

PAPELLION, Neb., Oct. 13.—[Special to The Bee.]—Charles F. Hagerson and Miss Jennie Siphred were married today at the residence of the bride's parents at this place.

THE CONTRACTING PARTIES ARE WELL KNOWN.

Both being the children of wealthy and respected families in the city.

PREBYTERIAN SYNOD PROCEEDINGS.

BEATRICE, Neb., Oct. 13.—[Special Telegram to The Bee.]—The third day's session of the Presbyterian synod was greeted with an increased attendance. Today's session has been largely devoted to the reception of reports on college and home and foreign missionary work. On motion an invitation from the synod to hold its meeting there next year was unanimously accepted. An interesting meeting was held at the Second Presbyterian church, where the subject of "Evangelistic Services" was discussed by Rev. H. O. Scott of Hastings, J. D. Conterman, D. D., of York and others. Rev. Dr. Green, late missionary to Mexico, also delivered an interesting address on "Roman Catholic Evangelization."

THE BURNING OF THE BEE. The torch was on the ground and attempted to put out the fire by jumping on it. His trousers got saturated with oil and took fire, and he was rescued by the firemen. The fellow is lame and will get around again in a few days.
