HON. WM. F. CODY.

" Buffalo Bill." Many are familiar with the famous "Buffalo Bill's" wonderful wild west show. Prior to his venture abroad, Mr. Cody exhibited at Staten Island, in New York Harbor, where he became afflicted with Malaria Knowing the virtues of Kickapoe Indian Sagwa, Mr. Cody sent to the agents for this wonderful Indian remedy, and after using a few bottles was permanently cured.

few bottles was permanently cured.

"It is a remarkable medicine," said Mr. Cody, "and I have known of its virtues a long time. You may use my name and say that for what it claims to do it has no equal, and for malaria and chills it is far superior to quinine in many ways."

This, from the leading plainsman in American history, a man whose integrity is unquestioned, should prove beyond a shadow of doubt that Kickapeo Indian Sagwa is just what is claimed for it: an honest medicine of superior curative qualities, combining the best of the vegetable kingdom gathered from the forests and gardans of cature. from the forests and gardens of eature.

## TWO BLACK HILLS PROJECTS

Tin Mining and Railroad Building Are Showing Considerable Activity.

HARNEY FEAK AFFAIRS PROSPERING

Shipment of Black Tin Soon to Commence-Developing Asbestos Quarries Near Casper Sheridan on the Boom-Hum of Western Life.

Mr. William T. Coad, president of the Dakota, Wyoming & Missouri River Railroad company of Rapid City, S. D., was seen at the Paxton, where he is stopping while in the city on business connected with the further building of his road. On being asked by a Beg man about his road, he said the management is constructing a railroad in the Black Hills to run from Rapid City due west through the lumber and mining districts to the coal fields of Wyoming, a distance of about eighty-five miles. The first section of this road is from Rapid City on the Fremont, Elkhorn & Missouri Valley railroad-a part of the Northwestern system -to Mystic, a station on the Grand Island & Wyoming Central railroada part of the Chicago, Burlington & Quincy system-a distance of thirty-three miles. This part of the road is practically graded bridged and tied, ready for the steel rails, five and one-half miles being already in operation, and five miles more of rails now being on the road to that country for laying

The eastern branch of this road will, in all probability, run down Rapid river, cross the Cheyenne river and follow White river across the recently ceded Sioux reservation to a point on the Missouri river at or near Chamberlain, where connections will be made with the Chicago, Milwaukee & St.

The reporter asked Mr. Coad about the tin districts of the Black Hills, and he re-

plied: "Within the next three or four months the American people will be convinced that the tin industry of this country is a complete success in every way.
The Harney Peak company, composed of New York and English capitalists, has invested in the neighborhood of \$5,000,000 in its properties, while the railroad companies in building spurs to the various mines have expended hundreds of thousands of dollars. It is safe to say that these capitalists and business men understand thoroughly what they are doing, and now that the 250-ton mill at Hill City has been started. American tin will, I am sure, be placed upon the American market in com-mercial paying quantities. This will mean the sending of \$20,000,000 to the Black Hills tin districts annually, instead of sending it to foreign places, for block tin to be used in the tin plate mills and other concerns of this

country.

'The tin ore mined in this country, I un derstand, is about twice as rich as that mined in Cornwall and other foreign mines, It is only too true that the eastern American public has been skeptical about this tin business because it has not been placed on the American market within the last six years. This is easily answered by any one familiar with the mining countries and minng properties and enterprises. It is a sad thing to to say, but nevertheless it is true that in all mining districts there exists men that are ready to back-bite and blackmail these enterprises by addressing the applications for patent to a good piece of mining property. To avoid this the New York and English stockholders have quietly performed all necessary re-quirements under the United States mining laws and have consequently acquired patents from the government through the land office at Rapid City for their best claims, and for hundreds at that Now that they have a fee simple title to their properties they will demonstrate to the American and English peoples that the Black Hills can and will supply this nation with all the tin desired in paying and commercial quantities. Their is no question in my mind that with proper management the tin industry will be on a paying basis long before the expiration of the year 1893.

#### ASBESTOS MINING.

Progress of a New Industry That is Building Up at Casper.

Casper, Wyo., Dec. 28.—[Special to The Bee.]—Casper, the headquarters for the sheep industry of the state, has advanced materially in the last year and is now the third town in the state in a commercial sense of the word, and is the fourth in point of population. During the past year a new jail, costing over \$6,000, has been built, a new church is under course of construction, and before spring a wool warehouse, costing over \$4,000, will be ready for use. During the year some twenty-five new dwelling houses were erected. The largest shearing pen in the western country has been erected here by the Northwestern railway, with a capacity of 6,000 sheep per day. The business frontage of the town has increased to a wonderful degree, and the merchants are all doing a very encouraging business. One general store here during the year sold \$175,000 worth of goods. There has not been a failure in business, and every man doing business in the town has a good bank account.

Digging for Asbestos. Casper is essentially a grazing and mining town, and is sustained by these industries. To the south of the town nine miles is Casper mountain with untold wealth of asbestos per mountain which ancold wealth of asolestos and copper, which are no longer mere pros-pects, but are a reality. Asbestos is only found as a commercial product at Thetford, Can., and on Casper mountain on the west-ern continent. It is worth all the way from \$100 per ton to \$500, according to length of fiber and quality. Asbestos is a mineral containing slicate of magnesia, occurring in minute fibers and filaments, and is undefiled by fire, is very elastic and of a white color and when ready for use looks like cotton. It lies in the rock like a hone y-comb in a common limestone quarry. It is mined in an open quarry. The rock is then run through a crusher and out over sieves. The rock dust falling through the sieves and the asbestos going on over. This is called cobbing. The asbetos is then put in ore sacks and sent to the factory.

No industry in the United States has made such rapid strides in the past few years as such rapid strides in the past few years as
the asbsetos industry. It is a new business
and as much capital is going into
it as there is going into the manufacture of electrical machinery. The
United States is the largest consumer
of asbestos in the world. It is used for packing, to make firemen's clothes, to plaster
fireproof buildings, to cover steam pipes and
for play other articles requiring fiverroof for many other articles requiring freproof fiber. The asbestos on Casper mountain is equal to any found in the world. It was disequal to any found in the world. It was discovered here three years ago. The McConnell Asbestos company was the first to go ahead and do any good work. It put \$19,000 into claims and has a shaft down fifty feet, all the way in asbestos, and the material taken out has more than paid for development work. The shaft, sunk for the purpose of demonstrating the quantity, will be sunk probably seventy-five feet deeper. The company will then commence the opening of an open quarry and put in machinery to work the asbestos on an extensive scale.

William Butts of Omnha sunk a shaft fifty feet deep on another part of the mountain and found a similar good quality of asbestos. There are about sixty men working in the mines at the present time. The showing of asbestos is satisfactory to all concerned. The first shipment of asbestos will be made from here this week to Pittsburg. It will consist

here this week to Pittsburg. It will consist

here this week to Pittsburg. It will consist of 20,000 pounds.

Copper is looking up again. After Prof. Zahn had forfeited his options not much attention was paid to it, but lately the locators of the copper claims have made some sales of ascestos lands and now have some six men at work sinking the shaft Zahn started. It locks wall. It is green carbonates of cop-It looks well. It is green carbonates of cop-per and all admit that the prospects are very flattering. They have sunk at this date twenty feet on it and have not got through

Getting Rich in Wool. There will be 300,000 head of sheep sheared here next spring. The country is alive with

sheep, but there is room for more. There seems to be no end to the money a person can make in the range sheep business. Say you have 2,500 ewes to start on; they represent at \$3 a head \$7,500. Now let us see what you are worth at the end of three years: They will shear on an average nine pounds per head and the wool will not you 14 cents per pound. You will, if you have any luck at all, raise 95 per cent of lumbs for the three years. Your sheep are nearly doubled at the end of the first year. Each sheep will cest you about 60 cents to run it a year. You can easily see that the wool alone will pay for running the sheep and pay a good interest on the amount invested. With little or no labor at the end of three years you are a rich man and well on to the road to be a milliomaire. The success of our sheepmen is proverbial, and I do not think I am saying too much when I assert that our sheepmen have made may begitting to more am saying too much when I assert that our sheepmen have made more legitimate money in the past year than a like number of men engaged in any other business. our most prosperous men started out leasing sheep. The terms are very reasonable, and sheep. The terms are very reasonable, and for time invested pays more than any other

Range cattle are looking up, and the selling range price is now \$20 per head, against

In population, central Wyoming got a pretty black eye last season. The cattle-men's raid knocked things silly and scared away all immigration, but things are changing, and people are beginning to come into the country again. There are good homes to be had bereabouts, and it may be encourage ing to some one who is looking for a home to say that our homestenders as a class are say that our homestenders as a class are very prosperous and are raising very good crops and getting along finely and are contented with the outlook. We have no panpers, and such a thing as a destitute family is not heard of here. The people are prosperous, and when the outside world learns of our ability to produce cereals that will compare with the finest in the world, I have no doubt that settlers will flock here.

Casper is on the eye of a boom. Real

Casper is on the eve of a boom. Real cstate is getting stiff and considerable property is changing hands. The Pioneer Town Site company has withdrawn all its unsold business lots from sale. Senator Carey has laid out a large addition to the Carey has laid out a large addition to the town, but as yet will not dispose of any lots in the new addition. Everything looks as though the railway would move out of here in the spring, and if it does Casper will be the liveliest place on earth and will be a town of 5,000 people before snow flies next fall. Casper is sure to be a division on the Elkhorn, and as it is the last point on a large stream of water until the railway gets 300 stream of water until the railway gets 200 miles west, it has, indeed, a very happy future before it.

Assessos.

SHERIDAN'S GROWTH.

How the Latest Burlington Town is Bound.

ing Toward Prosperity.
Sheridan, Wyo., Dec. 30.—[Special to Tur. Bez. |-While this is not a very good season of the year for building operations, yet Sheridan's mechanics are all busy and many people are starting new buildings, hoping to get them inclosed before real winter sets in. So far beautiful weather for this time of year has prevailed. There are about three inches of snow on the ground at presentinches of snow on the ground at present—the most there has been this season. There have been heavy stories in the mountains, however, laying up a beautiful supply of water for next summer. Everything is bustle and life in Sheridan, and business of all kinds is good. Merchants all report trade excellent. New tirms are coming in some of them carrying large stocks. C. W. Morganedge & Co. have just opened a fine niture establishment. They purchased the stock in Omaha

The merchants seem to "catch on" to the spirit of the times and are stocking and fitting up their places of business in accord with the new order of things. For instance, the drag firm of Eggleston, Smith & Co. Their stock and fixtures would

Smith & Co. Their stock and fixtures would do credit to Farnam street in Omaha.

The Sheridan Land company's new hotel is progressing nicely, the stone foundation being nearly completed. The fine freight and passenger depot of the Burlington is also well under way and the road is building side tracks to different points, one of which runs to the large three-story brick grist mill, which will be in operation in a few days.

Mr. Thomas F. Hull of Omaha has been here for the past ten days looking up timber sites for a large saw mill plant. He and his associates were out last week the mountains and found large bodies of very fine timber. They were out again this week. The lumber business bids fair to be one of the industries of this county.

Strangers are coming in daily and letters are received asking for information, which

has gone abroad. The First National bank has been com-pelled to build an addition to the bank, and add an increased force in the office. The Sheridan Post will in a few days move into elegant quarters next to the bank. A letter from the Fortunatus Mining and Milling company of Bald Mountain says that operations will be begun early, and the result of last fall was entirely satisfactory to the board of managers. This company spent over \$50,000 this year, and did not get

goes to show that the fame of the young city

started until it was so late that they only run the machinery about three weeks. The Continental Oil company will creet a storage warehouse here and make this a dis-tributing point. The toll road over the mountains will be

the means of opening up what is known as the Big Horn basin, a country that has millions of acres awaiting industrious settlers. Trouble with the Hoboes. The railroad people and the city authorities are in a quandary as to what must be done with the gangs of unemployed workmen, stranded by the completion of the railroad.

The railroad wants \$10 per head to ship them

to Omaha, but so far as the hoboes are con-cerned it might just as well have been \$100, for they were all dead broke. The men are hired by employment agencies in Chicago, Omaha, St. Louis, Kansas City, St. Paul and Minneapolis. Upon the payment of a fee of \$2 to the agency they are given free transportation to "the front" with the understanding that they are to have a return ticket when the senson's work is fin-ished. Many of them, of course, come to see the country, and never do a day's work for the company. I fact, not more than 25 per cent of them ever do thirty days work. The contractors urge that no transportation should be furnished to men who do no work and that many such have asked to be passed free. But the fact remains Sheridan will have to feed them or pay for transportation

to some eastern point. Happenings in the West.

The assessment roll of Portland, Ore., mounts to \$45,432,825.

Creditors of the defunct Cheyenne Na-tional bank are about to receive another

divvy, aggregating \$42,000. Hot Springs, S. D., voted \$22,000 bonds for a new school house last week, and a day or two after the election the bonds were sold at par.

age of \$12,000. The property realized \$9,000, leaving the county \$3,000 in the hole. During the year just closing North Da-kota has enjoyed the greatest growth in any twelve months since 1882. Countless new farms have been opened up, numerous new industries established, and a healthy growth

in population and wealth is the result.

Never before has there been such a demand for California olives and olive oil as this season and every one in Pomona valley who has in any way engaged in growing olives or olive nursery stock or in making olive oil or shipping the fruit this year is making unusual profit.

making unusual profit.

A dispatch from Los Angeles announces that the city council passed an ordinance granting to the Cudahy Packing company of Omaha the right to erect a packing house in that city. The plant will have a capacity of 500 hogs and 150 cattle daily, and when running in full capacity will give employment to from 250 to 300 men.

Lister States commissioners having in

United States commissioners having in charge the negotiation of a treaty with the Nez Perces Indians for the purchase of the mailotted land in their reservation in Idaho have not been successful. Although they have not been successful. Although they raised the first offer of \$2.50 per acre to \$3 per acre the council of the tribe refused to accept it and gave out that they would not part with their land at any price. The commissioners think that parties who are desirous of leasing the lands from the Indians have been at work. Another meeting will be held.

E. A. Flynn, the defaulting treasurer of Custor county, S. D., was tried and acquitted. Flynn's offense consisted of turning over property invoiced at \$20,000 to cover a short-
