

INDUCTING CLEVELAND AND STEVE

Plans and Specifications for the Ongoing Restoration of the Bourbons.

SIMPLICITY OF THE OFFICIAL CEREMONY

Pomp and Circumstance of Glorious Pageantry—The Crush of Crowds, the Crash of Cannon, the Fumes of Red Fire, and the Hall.

Judged by the enthusiastic reports of Washington newspapers, the inauguration of Grover Cleveland and Adlai Stevenson next Saturday, will be the most imposing affair of the sort that has been witnessed in the national capitol in recent years.

The merely official part of the inauguration of the new government will not take very long, nor is the ceremony very impressive, but an immense crowd will be present at the capitol, and the disappointment of those who cannot get in the building to witness it will be great.

On either side of the court will be erected a high archway of white and gold, measuring 10,000 square yards of material, and 35,000 feet of rope will be required to hoist it in position.

The president's reception rooms will be elaborately decorated in white as a background for a handsome floral display, comprising orchids, asparagus, maldenian ferns, and all kinds of ferns and flowering plants.

The Fifty-second congress will be in existence and in session until 12 o'clock on the 4th day of March, but constructively it will be the 53rd up to that hour.

The outgoing and the incoming presidents and the cabinet will occupy the president's room, and Mr. Morton and Mr. Stevenson will occupy the vice president's room.

The inauguration of the new president will be followed, take a recess, and the chief justice will deliver his inaugural address.

Banker Clews Reviews the Situation and Discusses the Cause and Effects—What the Banks Sought to Obtain—The Foreign Situation.

New York, Feb. 25.—Banker Henry Clews, in his weekly Wall street review, says concerning the late gold flurry:

"The disagreement between the doctors of finance as to the proper treatment of the monetary disease has attracted a good deal of attention and excited some acrimonious criticism; but the frankness of opinion which does not appear to have aggravated the malady, which seems destined to run its course and cure itself, the doctors seem to have disagreed mainly because each side had its special purpose to serve—the purpose perhaps being in each case allowable, but in neither legitimately all-controlling.

The secretary of the treasury for declining to sell bonds to augment his gold reserve were not without force, but probably unexpected, but most real cause was the unwillingness of the administration to signalize the close of its term by what might be construed as an indirect admission that the gold reserve had been exhausted.
