Business, Though Gaining Slowly, Shows a

CAUSES WHICH ARE KEEPING IT BACK

Marked Improvement.

Good Showing Made in View of the Recent Great Financial Depression-Condition of the Great Industries-Last Week's Failures.

NEW YORK, Nov. 17. -R. G. Dun & Co.'s

weekly review says: Business is gaining, but there is a constant complaint that the improvement is slow. This is because very few realize how heavy a load business has to drag after it in climbing up again. Legislative uncertainties weigh heavily, but the past depression with trading and manufacturing failures, involving more than \$205, 000,000 in nine months, besides banking failures of enormous liabilities and failures of railway and other corporations having heavy indebteduess to individuals and firms, involves continual embarrassments which men are prone to forget. There has been great encouragement during the past week in the fact that November payments are far more satisfactory than was expected, and yet the extensions of the month would have seemed alarming other years. Merchants who colect part of the amount due are rejoiced, but their buying power is not as large as usual. The extraordinary shrinkage in purchases for consumption, if lessening, has still made it impossible for many firms to go on as betore, and the largest failure of the past week, that of the Thurber-Whyland com-pany, illustrates embarrassments which cannot be terminated in a week or a month.

Not Leaning on the Treasury.

Monetary difficulties no longer binder. is true the treasury cash has fallen to \$98, 338,955, of which only \$85,400,801 was gold, but there is no such alarm as there was when the gold reserve alone went below \$100,000,000. Business is not leaning on the treasury and it is well that it is not. ceipts for the month thus far are about \$5,000,000 less than expenses and the imports in October decreased about \$20,000 partly because of inflated valuation of goods imported last year. Weekly imports at

New York decreased in part from the same The condition of industries improves, but they wisely wait the revival of purchases by the consumer. Twenty-four works of all kinds have wholly or in part resumed against fourteen closing. Yet less than half the iron working power is active, and out of ninety-nine woolen works in the east only ten are working full time, while forty-five were shut up November 1, the production for four months in men's woolens being 14, 343,431 yards, against 25,554,305 last year. A factory inspector reports that out of 90,-000 persons formerly employed in textile mills in Philadelphia only 17,500 are now at

he decrease in the volume of business though the clearing house continues about the same, for the past week, is 18.8 per cent. The failures during the week have been 349 in the United States, against 205 inst year, and twenty-six in Canada, against thirty-five last year. Besides one bank in Ohio and the Thurber failure there were four with liabilities over \$100,000 and sixty eight others over \$5,000. The volume of in-debtedness of hrms failing in the previous week was \$3,727,467, against \$3,467,346 the week before, being larger east than south.

WALL STREET FOR A WEEK.

Professional Traders Again Have the Mar

ker All to Themselves.

New York, Nov. 17.—Bradstreet's review

of Wall street tomorrow will say: Incidents have differed during the present week, but the stock market as a whole presents little or no change of characteristics. There continues to be an absence of public interest or foreign participation, and activity has again foreign participation, and activity has again depended entirely upon the professional traders. The course of prices has therefore been subject to the sudden change which ascendancy of such elements invariably produces on a narrow volume of trade. Easier money appears to offer no stimulation to speculation in view of anticipated loss of railroad carnings and the marrivity of general business.

down values of both railroad and in-dustrial stocks, followed by covering of the short contracts thus created with a corresponding hardening ten-dency in prices. General tendencies were lacking, although the covering of shorts was a little more pronounced on Thursday than on any previous day. The explanation was a regress that the departure explanation was a rumor that the departure for Europe of Mr Jordan, the assistant treasurer of the United States at New York, is for the purpose of negotiating the sale of a government band issue. The fact that the president visited New York the previous day is also alleged to have some ennection with the matter, and although denials are forthcoming, bears showed in-creased timidity and bought stocks to an extent which temperarily advanced the market. It was, however, noticeable that there was no effective bull leadership, the largest operators being apparently unwilling to take any decided steps in that direction in the face of existing uncertainties.

BRADSTREET'S REVIEW OF TRADE.

from the Centers of Business, NEW YORK, Nov. 17 .- Bradstreet's tomorrow will say: General trade has been irregular without actual increase in volume. At the south improvement in demand is noted. In leading Tennessee and Texas counties heavy sales of southern pig iron and the breaking of the drouth in the southwest are

features. Demand for rails is checked because of the cut from \$20 to \$21 in price and there is an

outlook for further reduction. At eastern cities there is a more hopeful feeling, but no improvement in demand, except within a day or two for clothing, woolens and shoes.
