KANSAS CROP REPORT THE DAY'S FEATURE

Reductions in that State Nearly Fifty Per-Cent, Being the Greatest Drop for a Single Month Ever Reported.

CHICAGO, June 6 .-- Wheat rushed up at a dizzy gait today, finishing with 3%c gain. Extremely bull sh crop reports scared shorts, and their frantic endeavors to cover resulted

and their frantic endeavors to cover resulted in an unusually active trade. Corn closed % c higher, onts 2% c higher and provisions at a slight advance. Wheat was strong and excited almost from start to finish. Opening trades were at from % c to le advance, and after selling up % c declined % c, rallied % c, reacted % c, changed some and closed strong. The sen-sational feature was the Kansas crop report, which showed reductions for the state of from 35 to 45 per cent, being the greatest drop for a single month ever reported. The participation of the state of from 55 to 45 per cent, being the greatest drop for a single month ever reported. The drop for a single month ever reported. The various weekly weather bulletins were, as a rule, unfavorable, reaching the past week the worst since the season opened. There was a general scramble by anxious "shorts" and room traders at the start to purchase, and at the advance 'long' wheat came out, but it was readily taken, and the market again showed an upward tendency. The better cables helped the advance. Toward the last hour of the session the market was very excited under an active demand and

limited offerings. Corn was firm on the cold, dry weather, and the light movement in the interior. The range for the day was  $\frac{1}{2}c$  and the close near the top.

Oats were excited and strong, covering 2½c range and closing at the top. The strength resulted from unfavorable crop re-ports and the advance in other grains. Provisions were dull but steady, helped

by the strength in wheat. The market was a narrow one. Compared with last night July pork is 5c higher. July lard 21/2c higher and July ribs 212c higher. Freight rates steady at 1%c for corn to

Will Fight the Board of Trade: CHICAGO, June 6.—The hig sievator men have declared war con the Board of Trade because of the recent adoption of an amendment pro-hibiting regular elevator owneds from trading in grain on 'change. A manifesto has been is-sued signed by the Armours and other big firms announcing that they refuse to submit and de-claring they will find another way to make their receipts available for delivery. The ware-house men will deal in grain with predicers, consumers and investors, they say, and the system of grain dealing will be changed. There is much talk among clerator people about start-ing a rival board to crush out the present one.

## Volume of Business on 'Change Was

Greater Than on Tuesday. NEW YORK, June 6 .- The volume of business on the Stock exchange today was greater than yesterday and transactions were widely distributed throughout the list, Sugar, however, receiving the largest share of speculative attention. At the opening there was considerable excitement in the Sugar crowd, and the trade was so furious that the first report that came from the stock ticker was that Sugar opened at from 106 to 107. the first price being 1¼ per cent above yesterday's close. The shorts, who were anxious to cover, were the main buyers in the morning. There were, however, numerous selling orders on the board from holders, who saw a handsome profit and desired to realize, and for a while these counter movements, being about equal in force, held the stock between the figures given above. About noon the buying became less pronounced and prices took a lower range, and during and prices took a lower range, and during the next hour the fluctuations were between 1 106½ and 108%. About 1:30 o'clock 106% was touched, at which time brisk buying was encountered, causing a rally to 107%, but in the final dealings a reaction of ½ per cent was made, leaving a gain of ½ per cent on the day. Sugar preferred rose 1% per cent, but lost ¾ per cent in the final trading. Of the other industrials, Chicago was most active, and after an early decline was most active, and after an early decline of 1½ per cent sold up 1½ per cent, and held the advance to the close, Distilling receding a small fraction in the morning, but in the afternoon, on free buying, partly by Wash-Ington houses, recorded an improvement of 1½ per cent, and closed within ½ per cent of the best price of the day. The trading in the rest of this group was light. The railway list was by no means neglected, and despite the fact that there were occasional reactions, the undertone of the market was

trong throughout the day. The s

in wheat stimulated purchases of the grangers and also helped the rest of the list. St. Paul closed 1½ per cent higher, Rock Island rose 1% per cent, Burlington 1½ per cent and Northwest % per cent, the last being the highest price of the day in each case, bond market was firm to strong all day, The The Evening Post says: While railway shares advanced, opportunity was taken to get rid of some holdings of the industrials. In Sugar this was done on the usual plan, the stock being marked up 1% per cent, to 108, on the first transaction, after which the price fell slowly back to 1061/2. The conclusion of the senate incident was chosen for the declaration of quarterly dividends at the regular annual rates of 19 per cent. The Evening Post's London cable says: The Derby race half emptied the exchange today. The tone was dull, except for Americans, which presented a distinctly better appearance. The progress of the tariff bill frightens the bears here. Stocks were very scarce. Eries were bought quite largely on the idea that the opposition to the re-organization scheme will be withdrawn or break down. St. Paul has risen to 62, Prices closed strong at the best. The Inbreak down. dian council sold five lakhs of runees up to 13 pence. The weekly amount offered was reduced to 45 lakhs. Another statement of the Bank of England's return is expected to morrow. ing to introduce tobacco growing into the state that it will pay the farmer to raise it even if they do not raise the very finest article the first few years. The greater yield per acre of the coarser and lower grades will compensate for the difference in price. It will require several years to get the industry established, as the farmers will need buildings especially constructed and a large amount of experience. If a farmer can raise 1,500 pounds per acre of fair tobacco, as has been done in Nebruska, and can get even the low price of 8 cents per pound, it will amount to \$120 per acre. Ne-braska is conveniently located for supply-ing a large section of country to the west, and if the industry could be knowed into the state it would undoubtedly add greatly to its wealth.
