CLEVELAND AND THE STRIKE

According to the most reliable reports from Washington, President Cleveland, with his customary self-assurance, has himself personally assumed the conduct of the federal forces that have been summoned to cope with the pending strike.

One of the most important duties imposed upon the president by the constitution is contained in the clause which reads that "he shall from time to time give to the congress information of the state of the union and recommend to their consideration such measures as he shall judge necessary and expedient."

On the assembling of congress in regular session he gave a review of the foreign and internal relations of the United States since his return to the presidential chair and imparted much sage advice on topics of common interest, although without specific suggestions on any important point.

Later, after he had become hopelessly entangled in the meshes of his Hawaiian policy, he endeavored to relieve himself of his unpopular task by referring the whole matter to congress and leaving further action to be guided by its pleasure in the matter.

Richard Croker and Mayor Gilroy, two of Tammany's richest beneficiaries, appear on the new tax list of New York, each as owning no taxable property whatever.

When the canal promoters and the citizens committee shall have agreed upon a satisfactory bond proposition, so that the people will know what they are asked to do, there will be plenty of discussion on that subject.

The Chicago Record, which is admiring the audacity of the warden of the Kansas state penitentiary in acknowledging that he has added five members of his family upon the public in positions within his gift, ought to be furnished with the list of Omaha ward assessors and their deputies.

An amusing case of mistaken identity is found in an article going the rounds of the press which had its origin in the New York Sun, purporting to tell about the Americans who carry the largest life insurance policies.

The dedication of the soldiers' and sailors' monument at Cleveland was fittingly performed on the anniversary of Independence day. The soldiers and sailors in command were the largest life insurance companies.

The principals of the various schools are not very enthusiastic over the suggestion that they be required to teach at least one class in addition to performing the other duties pertaining to their positions.

THE OMAHA DAILY BEE

On their way to the interior of the continent. The trouble with Mr. Sovereign is that he deals in florid fiction and catchy phrases rather than in substantial facts and sound argument.

A congress of conference of very considerable importance is being held in Ottawa, the capital of Canada. It is composed of delegates from colonies of Great Britain, and its object is to promote intercolonial trade and to bring these colonies into closer commercial relations with the mother country.

Nothing connected with the management of the tariff bill in the senate has been so noticeable and noted as the remarkable retirement of Senator Voorhees from active participation in the proceedings.

The canon creeker established its reputation as an armless contrivance. So far Coxeley has cost the government \$52,000. Several good roads could have been made with this money.

William Walsh, the last but one of those who were called the "old time" colored men in 1814, is dead. He was 14 years old at the time, and was pressed into service to maul bullets.

There may be a phase of the question, however, that may cause the British government to hesitate before coming to the aid of the colonies discriminating power in tariff matters, even as regards intercolonial trade.

Should it be successful Canada will care less even than now about reciprocity with the United States, and may go farther than she has done in imposing discriminating duties against the manufactured products of this country.

The annual report of the statistician of the Interstate Commerce commission, giving statistics of the railroads of the country for the year ended June 30, 1891, is of rather more than ordinary interest at this time.

It was really too bad that Congressman Bryan could not be in attendance at the Fourth of July celebration at Nebraska City. He might have explained why he and Secretary Morton did not make their pilgrimages to the shrine of Jefferson at Monticello together.

Adial is letting no grass grow beneath his feet. It is as hard for him to decline an invitation to make a public address as it is to play the figure-head presiding over the upper house of congress.

The vigorous manner in which Senator Sherman has been attacking the tariff bill has given the impression that he has not given up all hopes of the presidency.

Enough and to spare. Kansas City Star. The analysis of the senate vote on the tariff bill is a study in the highest degree. It is a study in the highest degree.

THE OMAHA DAILY BEE

Denver Republican: It appears that a better feeling between Germany and France is developing. It has been stimulated by news connected with the assassination of Carnot. It is possible that the two nations will again become friends and that the wounds caused by the war and the political and social chaos will be healed.

New York Tribune: The blow which has fallen upon France has been felt with sympathy by the European nations in general and by the American people in particular.

Nothing connected with the management of the tariff bill in the senate has been so noticeable and noted as the remarkable retirement of Senator Voorhees from active participation in the proceedings.

The canon creeker established its reputation as an armless contrivance. So far Coxeley has cost the government \$52,000. Several good roads could have been made with this money.

interference should not be by a legal quibble. The tariff of gold act frankly and straightforwardly and accept the full consequences of the position it assumes.

The Whisky Trust. The sugar scandal has lately monopolized public attention to such an extent that another trust not less odious than the Ragsdale trust has felt pretty safe of securing without the deserved public condemnation an enactment as abominably corrupt as the Ragsdale trust and its scheme to have the tax on whisky increased.

New York World: The liberation of the two French spies by the German emperor was an expression of sympathy awakened by the case of a young girl who had been held in the republic and the empire. The emperor has done a graceful thing at the right moment.

Nothing connected with the management of the tariff bill in the senate has been so noticeable and noted as the remarkable retirement of Senator Voorhees from active participation in the proceedings.

The canon creeker established its reputation as an armless contrivance. So far Coxeley has cost the government \$52,000. Several good roads could have been made with this money.
