THERE WAS MUCH BULLISH INFLUENCE

Dron Was Generally Firm Within a Brief Range, the Action of Wheat and the Visible Supply Reduction Causing the Strength.

CHICAGO, July 9 .- General bullish news firmed wheat up today, and September closed 14c higher. Corn closed 14c higher. Oats were unchanged and provisions higher all around.

Wheat opened at from 1/2 to 1/4 advance, and after selling down %c advanced steady. The decrease of the amount on ocean passage of 966,000 bu., the firmer cables and unsettled weather in England, all acted as bullish influences. The liberal short interest here and the large withdrawals from store also had the same tendency.

Corn was generally firm within %c range. The action of wheat and the reduction of the visible supply caused the strength. the visible supply caused the strength.

Oats were firm early with wheat and
corn, weakening later on sales, the range

or September being %c.
Provisions were dull but firm on the compared with Saturday night September pork is 17½c higher, September lard 5c higher and September ribs 7½c higher.

Freight rates steady at 1c for wheat and september lard september lard september ribs 7½c higher.

corn for Buffalo. Estimated receipts for tomorrow: Wheat, none; corn, 4 cars; oats, 1 car; hogs, none. The leading futures ranged as follows:

OMAHA GENERAL MARKETS.

Condition of Tride and Quotations on Staple and Fancy Produce. The week opens rather quiet in produce. The receipts in most lines are only moderate, and the market is lacking in life and strength. The railroad blockade has destroyed all the shipping business, which is really the life of a market, and all that is left is the local trade.

country last week, as noted at the time, and yes terday morning they started out offering lower prices here. The railroad situation is responsible from 1/2c to %c, eased back from 1/2c to for the weak feeling. No one con predict with 1/2c, rallied again, changed some, and closed any degree of certainty how long the present labor troubles will last, and packers do not care to load up too heavily with the prospect that there will be a large accumulation of stock to to load up too heavily with the prospect that there will be a large accumulation of stock to be thrown upon the market when the transportation lines are open, which would be apt to result in much lower prices.

The easy market did not show much change. The supply and demant continue about equal.

Foulty was also steady; in fact, there was no change in the market on country produce of any importance, except in the case of butter.

It is claimed that there are at present 60,000 tubs of butter in storage at Chicago. It is also estimated that about half as much more will be put away before the close of the season, making about 80,000 tubs all told. This is considerably more than was stored last year. For 1803 Boston is estimated to have stored 108,000 packages, being peoprized as the greatest market for late held butter in the country.

The hay market here remains about steady, and is without important feature. The condition of the hay crop in the country is becoming a matter of great interest, as it is possible that there may be an export demand in the near future. Last year was the first in which American hay and foruse crops were exported in large quantities to Europe. The drouth there made imported hay an expensive necessity, and a great deal was shipped abroad. From Zurich, Switzerland, a State department report says that the drouth prevailing last year in western Europe is apt to repeat itself. People in Switzerland, a part of y season, and should this prove true there is a chance for American farmers to place considerable hay in Switzerland, A large quantity of American hay found its way into Switzerland age quantities and distributed it among the packed, there is not a few packed, the poorer classes.

BUTTER-Packing stock, 7@Sc; good to choice wavely 195120 creament sold uncked. Helle:

HAY-Upland hay, \$8.50; midland, \$8; lowland, \$7.50; rye straw, \$6. Demand fair; supply fair. Color makes the best price on hay. Light bales sell the best. Only top grades bring top prices.

PIGEONS-Old birds, per doz., \$1. VEGETABLES.

PIGEONS—Old birds, per doz., \$1.

VEGETABLES.

The arrival of several cars of potatoes all in a bunch and the difficulty of shipping them out caused the market to weaken somewhat. There is a good demand for potatoes and all the houses report a liberal receipt of shipping orders, but the trouble is to get the stock out to the points required without there being too great loss from delays on the road. Some potatoes have been shipped out by express in urgent cases.

Tomatoes are also a little lower, owing to the very liberal supply.

Potato crop conditions are much improved in Missouri and they are growing well in Kansas. Late showers benefited the crop greatly in South Dakota. Michigan reports prospects good, excepting that bugs are troublesome. The prospects have improved in Ohio and the crop is making good progress in Indiana and in Illinois is fair. The potatoes are generally good in West Virginia. Many parts of lowa report prospects very promising, as the rains came in time to save them from the bad effects of the drouth in the "setting" period. Nebraska also received rain in time to save potatoes, although the growth was small before it. Most parts of Minnesota say the crop promises well. No general complaint of this crop-is made anywhere and the presumption of a good crop for the country seems supported by the appearance in all large sections. There are small parts of many states where dry weather has retarded growth, but these are too restricted to diminish greatly the present condition. Even South Dakota, where the drouth was so severe, reports potatoes growing well since the rains, and in localities where the drouth was so severe, reports potatoes growing well since the rains, and in localities where wheat, oats and barley scarcely survived potatoes are looked to for fair results. POTATOES—Good stock, \$20.00,92.00.

CANTALOUPES—Cantaloupes are arriving on the market. On orders, \$1.50 per doz.

on orders.

CUCUMBERS-On orders, 40@50c per doz.

FRUITS.

The fruit market yeaterday was very quiet and it seemed almost like a Sunday. Practically all the California fruit available for shipping out on orders will be cleaned up by tonight and quotations will be only nominal. At the present time it looks as if the market would be bare for some time to come. There is no fruit on the way and even if the strike were to be declared off today it would be close to ten days before any fruit could be expected to arrive from the coast.

Hiackberries are plenty and of good quality. The market yesterday was the lowest that it has been.

There is no important change in prices, which on some lines cannot be considered as any more than nominal. FRUITS. on some mark than nominal.

STRAWBERRIES-None reported received.

CHERRIES-California choice stock, 11.

New York exchange, commercial, \$1 per \$1,000 premium; bank, \$1,50 per \$1,000 premium.

CHICAGO, July 9.—Clearings, \$14,283,000. New York exchange, steady at 50c premium. Foreign exchange, dull. Sterling exchange, actual, \$4.57448.89.

WASHINGTON, July 9.—The net cash balance in the trensury at the close of business today was \$121,503,322, of which \$64,241,466 was gold reserve. This is an increase in the cash balance since June 27 of nearly \$7,509,000 and an increase in the gold reserve since June 25 of nearly \$2,250,000. The treasury officials are greatly encouraged at the seeming cessation of the gold export movement and the great increase in internal revenue receipts, and are very confident these conditions, added to the probable early passage of the new tariff bill, will result in a large increase of the cash balance and the gold reserve.

STOCKS AND BONDS.

President's Proclamation Causes a Better Feeling on 'Change.

NEW YORK, July 9.—The early dealings on the Stock exchange were weak under the influence of a heavy tone for American securities in London, coupled with sales for foreign account. The depression in domestic securities abroad was due to an impression that gained ground there, due to the president's proclamation that the strike had reached proportions which seriously threatened the peace of the country. The bears took advantage of the situation to make a general attack on the market, which was specially pronounced in Chicago Gas. This property was particularly sensitive in view of the disturbed state of affairs in Chicago, and there was talk to the effect that investments in that city were tinged with an element of insecurity by reason of the turbulent character of its laboring classes. Chicago Gas, under free selling, broke 2% per cent, Pullman, 3 per cent; Denver & Rio Grande, % per cent; St. Paul & Omaha preferred, 11/2 per cent; Rock Island and Baltimore & Ohio, each 1 per cent.

After midday the beneficial effect of the president's proclamation became apparent in the advices from Chicago, which recorded the increased movement of trains. This checked the decline, causing the shorts to cover and induced the buying back of stocks parted with during the morning. Confi-dence was being restored in the resources of the government with a quick recovery in speculative values. During the after-noon prices were rallied steadily with occasional reaction, due to the efforts of the bears to stem the tide which had set in strongly. Chicago Gas made the greatest recovery, selling up 2½ per cent, and Rock Island 1 per cent. Sugar was quotably strong and avanced 3½ per cent, with a final reaction of ½ per cent, making a gain of % per cent on the day. St. Paul moved up 1 per cent. Burlington lost % per cent and advanced % per cent. Missouri Pacific, in which the decline was % per cent, moved up % per cent, with a final loss of ½ per cent. Pullman was bid up to 154 at the close, a gain of 2 per cent from the low point of the morning. The final dealings were quite strong in tone, and with some very few exceptions in which fractional reactions were made the market closed with an upward tendency to prices, in many cases at an advance on Saturday's close. In a majority of cases, however, the early losses were not fully recovered and the list of declines is larger, the losses ranging from 14 to 31/2 per

ket was generally weak all day. The Evening Post's London cablegram says: All the stock markets were flat today on the Chicago troubles. Americans opened flat, St. Paul and Northern Pacific leading in the decline, but railied slightly at the close on the proclamation of President Cleveland. Failures are expected at the actilement which begins tomorrow, but nothing really serious. The continental demand for gold is increas-

ing.
The Evening Post says: Early dispatches reported London as frightened at the president's proclamation, believing it to indicate a desperate situation. But there is not the slightest probability that such an interpretation was seriously placed on the document in London or any other place. There were

sales of shares for Europe in the early market, but they were fullerly insignificant in volume and had no influence whatever on

local sentiment.

The following were the closing quotations on the leading stocks on the New York ex-

TEXAS CATTLE.

Omaha Secures More Favorable Rates on

Southwest Shipments. Fort Worth Live Stock Journal: Our readers are no doubt familiar with the continued effort put forth by the management of the Union Stock Yards company of South Omaha to have that market thrown open to Texas cattle on equitable railroad rates. It affords us considerable pleasure to be able to state that their efforts have at last been crowned by partial success. Cattle from all Texas common points to South Omaha take the same rate as to St. Louis. From points south and west of Fort Worth where the St. Louis rate is less than 6 cents per 100 pounds over Kansas City, cattle to South Omaha will take a 5-cent rate higher than to Kansas City. This rate is not as low as the Omaha people would like to have been able to quote to Texas shippers, they believing that the railroad companies would have subserved the best interests of the cattlemen in Texas as well as their own by opening all the market centers to our cattle at a basis of rates, and that Omaha's geographical location should have caused her to be placed in the southern group of markets, would have given the same rates to Omaha as to other markets from Texas in that direction. The representative of South Omaha called on us this week and feels confident that his market will bear him out in the assertion that although the railways compel the Texas shippers to pay an additional rate to reach that market with their cattle over Kansas City, the prices to be obtained at Omaha will not only pay the differential, but considerable in excess when compared with prices obtained at other markets. The con-tention is being made that Omaha receives a large per cent of the cattle from the north and northwest ranges, more than they can While it is true that Omaha is the favor-

ite market in the north, yet all cattlemen familiar with what is required to make a complete market know that Omaha needs southwest cattle to fill her requirements, and these contentions are only made to delay the diverting of some of the Texas business to Omaha in the fear that as soon as the Texas cattleman learns that he has been compelled to take, from lack of opposition, low prices for so long a time unnecessarily, they will be compelled to raise their prices to meet the new competition. The following figures will show what Omaha did with her receipts of cattle during the year of 1893: Out of a receipt of 852,642 cattle, 554,104 were slaughtered at Omaha and over 200,000 were purchased at Omaha and sent into the country

to feed, showing a sale of 96 per cent of the receipts of 1893 at Omaha. It is also claimed as an advantage that one of the principal buyers of Omaha, the Cudahy Packing company, are exclusively Omaha men, having no branch houses in other cities. The representative claims as a further advantage for his market that the quality of beeves received there average much better than at other markets, and this alone would give the market a general better tone. Rates from points in the Im-

Receipts for Yesterday More Than Double the First Day of Last Week.

TRADE MUCH IMPROVED IN ALL BRANCHES

Cattle Sell from Steady to Ten Cents Higher, While Hogs Go Up Twenty to Twenty-Five Cents at a Single Jump.

MONDAY July 9. The week opened with the receipts more than double what they were on Monday of last week, the count for the day being 4,700 cattle and 4,200 hogs.

The market on cattle was well supplied, there being 204 loads all told, which included twenty-four loads billed direct to the packers. On Monday of last week there were only 1,200 cattle in the yards.

There was a good demand for light dressed beef steers, which were wanted by the packers to go with the heavy cattle that have been in quite large supply of late. Anything in this line that took the fancy of the buyer brought about 10c more than on Saturday. The heavy cattle did not share in the advance and the market on such could hardly be quoted more than steady and not overly active at that. The market closed firm on all grades and by midday there was very little left in the yards unsold.

As has been the rule for a while back, the supply of butchers' stock was light, and what little desirable stock was to be had brought good strong prices. The buyers were not long in cleaning up the offerings.

The market on stockers and feeders was if anything easier. There were quite a good many cattle in the yards of that description, but owing apparently to the railroad troubles country buyers are afraid to come in, and with the demand from the country largely cut off the trading is limited in a great

CALL TO COMMON TO SERVED TO A CONTROL OF THE PROPERTY OF THE P

SAILED ON HER TRIAL TRIP. Provincial Elections Favor the Government -A Blow at Vancouver. VICTORIA, B. C., July 9 .- The results of election of the legislature for the province of British Columbia to serve the next four years show that out of a total of thirty-three members Vancouver island returns fourteen government supporters. On the lower mainland eight seats went to the opposition, but from the upper mainland the government will get a safe working majority. The campaign was one of unusual bitterness, arising out of the agitation

of last year for a separation of the main-land from the island of Vancouver, upon which the capital city, Victoria, is situated.
The mainland town of Vancouver, terminus of the Canadian Pacific railroad, being ambitious to become the capital and thus diminish the political, as it has the commercial, importance of Victoria, violenti, protested when the government voted \$75,00 for a new legislative building now in course of construction here, and this was made one of the principal issues in mainland

Another argument used with great effec on the mainland was that the return of the present government would mean such further aid as would secure the construction of the British Pacific railway, a great trans-continental scheme to rival the Canadian Pacific and have its terminus at Victoria, and, by bridging Seymour narrows, run from Vancouver island across the rich northern district of the province. These sectional issues made the fight one between the island and the lower mainland, and the island has won.

PRUSSIA'S MAIDEN VOYAGE.

Latest Addition to the Hamburg-American

Fleet Arrives at New York. NEW YORK, July 9.-The steamer Prussia, the latest addition to the Hamburg-American fleet, arrived here yesterday from Hamburg via Havre on her maiden voyage, bringing thirty-eight cabin passengers. She was built at the yard of Harland & Wolff at Belfast, builders of the White Star line. Her gross tonnage is 5,937. Registered onnage 4,368; has four pole-masts and one funnel. She has twin screws and two sets of triple expansion engines, and is fixed with all modern improvements and appliances. She is built expressly for the freight and steerage passenger trade, having accome dations for over 2,000 steerage passenger and can carry 5,000 tons of cargo dead weight. She steams 13½ knots, with a coal consumption of seventy tons per day.

Her sister ship, the Persia, which was also built at the same yard, will arrive here within the next three weeks. Captain Karlowi, formerly with the White line, is commander of the Prussia. Three steamers of like construction are being built by the Hamburg-American company at a German shipping point, and will probably be placed in commission toward the end of

the present year. SAILED ON HER MAIDEN FOYAGE.

Crulser Minneapolis Leaves Port for the Official Test of Her Speed. PHILADELPHIA, July 9.-The cruise Minneapolis sailed for Boston from Cramp's shippard at 3 o'clock this morning on her fficial trial trip. She will lay to off quarantine to have her compasses adjusted, and Tuesday morning she will be under way for the testing course. Thursday she will make a preliminary run over the course, which is between Cape Ann and Cape Porpoise. To meet the requirement of four hours run under forced draft, the course must be twice sailed. This will not be done until Saturday. The contract for the building of the Minneapolis was signed August 31, 1891. lated price being \$2,690,000. The ship is guaranteed to accomplish a speed of twenty-one knots an hour, and for each quarter knot over this developed in the official trial. he government will pay a premium of \$50,-

the unconstitutionality of that law seems to have been premature. Elmer Frank, clerk of the United States circuit court, stated yesterday that he did not look for a decision for many weeks. Judge Brewer is now on his summer vacation in Vermont. The papers in the case were sent to him during the middle of last week, so that he has hardly had them in his possession more than two or three days at the outside. In fact, they had hardly reached him when the report that he had decided the case ob-tained currency. Mr. Frank believes it is hardly probable that Judge Brewer would decide a case of so much importance before he had made a careful study of the evidence and the numerous points of law raised by the attorneys on either side. Still, there is yet a probability that the decision may

reached sooner than many people ex-A cooling ride-to Courtland Beach.
