Two Pretty Functions at the Bartman Res idence-Hallowe'en Very Largely Observed-Interesting Doings Among the Swells.

Now that the cotillion sesson is shortly to be inaugurated, it may not be out of place to

every age, taste and home.

The favors may be mere trifles, a vinalgrette, for instance, or costly gifts-a bouquet holding a jewel in its heart. The figures for the german, however, are more figures for the german, however, are more the Misses Hawley, Miss Nash, Miss Turner, difficult to arrange than are the gifts. The Misse Kennedy. one who invents a new figure is usually regarded as a benefactor to the world-the world of dancers.

The bell figure is an amusing one, which can be gotten up without any previous arrangement beyond providing a small hand

on which some cavaller takes his seat, bell in band. This he rings at intervals, till some lady comes up to invite him to dance. One youth, whose natience was tried by being the bell too long a time, finally settled the matter by seizing the bell with both hands and clanging away with such force in self defense half a dozen young women rushed up to urge their hands upon im. Another man, whose years permitted is pleasantry, had hardly sounded the call fore a bevy of girls, at a sign from the der, crowded around, presenting an em-

The most effective or striking figure should always be reserved for the concluding one. The spow fall figure is very suitable for this purpose, indeed, for obvious reasons, it must come at the end of the evening.

The mariner's compass is a charming figire, somewhat similar to the ever popular day pole. To a high pole is attached the of a large compass made of painted cardboard, to which are tied eight or thirtytwo long variegated ribbons, on each of which is inscribed one of the thirty-two points of the compass. This card is soon surrounded by cavaliers wearing as a badge a miniature compass held with a colored rosette; behind this ring a second one is formed by the young women, who each eatch hold of a ribbon, at the end of which is attached some pretty trifle as a gift. They then turn around, but in an opposite direction to the men, until suddenly, at a word from the leader, the double circle is broken, when the players divide in couples every one showing a different shade; then waltz.

A word about favors. Sachet bags, bonbonnieres, powder puffs, fans, whips, to-bacco pouches in fancy shades, ribbons strung with silver bells, these are dainty procured without too great expense Long shepherds' crooks of pure silver, band screens of lace and ivory, beautiful fans of long ostrich plumes with handles of carved mother of pearl, cut glass vases are also very charming as gifts, but as Mrs. Car-lyle's maid would say, "very expensive."

Mr. Clement Chase is likely to become internationally celebrated for having first thought of a "Trilby" night, and putting into execution, the last number of Harper's Weekly having this to say upon the matter:

A novel and decidedly interesting literary and musical entertainment was given on October 17 at Omaha. It was called "An Evening with Trilby." The participants were all gentlemen. The subjects of the papers read were: "The Story of Trilby." "Du Maurier, His Life and Work." "The French of Trilby." "The identity of the Artists in Trilby." "Trilby's Voice and Method." "Trilby as a Hypnotic Subject." "Could Trilby Be Successfully Dramatized?" After each paper there was Trilby music, which included "Ben Bolt." "Au Chair de la Lune." "Malbrouck's s'en va-t-en Guerre" and other songs and instrumental pieces. At the end of the program comes the inquiry, "What small we 'ave the pleasure of drinkin' after that werry nice 'armony?" and then the page turns over to the farewell couplet—
"A little warmth, a little light Weekly having this to say upon the matter

ad then the page turns over to the state of couplet—
"A little warmth, a little light
"Of love's bestowing—and so, good-night."
It is a pretty far cry from Paris to Omaha, but Trilby's voice seems to have carried that distance without the least trouble. It is worth remarking that these Omaha gentlemen made seven "papers" about her without finding it necessary to discuss her marals.

Two Most Charming Functions. For the Misses Welch of St. Paul Mrs. Christian Hartman and Miss Hartman gave, Wednesday afternoon, a reception that was reminiscent of the swell functions of last season. It was really the first afterneon reception of the season, the first opportunity many of the guests had to meet old riends since their return from mountain, ake and shore, and the result was, as might en expected, a crush during the hour-affair. There are few homes more perfectly appointed for the giving of a large ne another most delightfully, there are deep window seats and all those other elegances that tend to make the ideal home, and on Wednesday these rooms were exquisitely decorated in red, American beauties being placed everywhere, the library, in particular, being rich with the beautiful blooms, a center table in this room being almost covered by the handsomest cluster of these flowers of the second of the evening was spent in a most enjoyable manner, and, as a matter of fact, was enjoyable until the first hour of Chicago for the occasion. Pretty Church Wedding.

There have been quite a number of weddings this autumn, but one of the prettiest was that of Miss Nannie Anderson and Mr. William E. Rhoades, Tuesday evening, October 30, Beth Eden Baptist church being the cene of the happy event.

The audience room of the church never looked more beautiful. With an abundance of spreading palms, ferns and chrysanthemums, the place was made one of enchant-ment and reminded one of some old southern money as an institution, while discussing the ment and reminded one of some old southern garden. The Golden Buck Club.

Mr. and Mrs. F. E. Van Brunt of 2510 Poppleton avenue very handsomely entertained the members of this club on Hallowe'en. The usual typical spread of the club was temporarily dispensed with, and viands quite appropriate to the occasion The house was handsomely decorated with various agricultural products that are commonly indispensable on such occasions. The evening until 11 o'clock was spent in various enjoyable methods suitable to the company and entirely without formality. At 11 o'clock a most bountful supper was served of the New England character, and after supper, after a series of toasts were appropriately responded to, Mr. R. C. Baughman, in a very felicitous speech, tendered his resignation as presi-Mr. Baughman said that "he was constrained to give up the weighty cares of office on account of the club requiring from him what was almost beyond his capacity and further, that applications from friends to join the club had been so many and as he had been obliged to decline account of the fear that they could not suc cessfully pass the initiation, he felt that he was no longer equal to the burden of In responding to this Dr. Dickinson cited the case of the Greek phile Diogenes, looking about the streets of Athens in noon time with a lantern, who upon boling questioned for his strange actions I am looking to find, and I doubt if I can, the marvel of mankind, a man." The doctor said that in searching for a president of the club that the man had be found, a man of weight, of the proper height, depth and capacity, and further it was shown that he was willing to surrender the honors of office. something unusual for an office holder, and which was evidence that he was a "man" in eye y respect. In seconding the motion for the nomination of Mr. Van Brunt he stated that "he had watched the sarnest endeavors of Mr. Van Brunt to make himself worthy of the office of president and had at times marveled at his patience and had admired his sacrifices, and that he took pleasure in seconding his motion because if he had not proved himself capable that he was at least making a strenuous effort to be worthy of the office." Mr. Van Brunt, in accepting

carnations and ribbons of the same members were willing to depart for their own homes, which they did with many regrets and with pleasant anticipations of the next meeting of the club, which will be in two weeks.

Monetary Science of the Unity Club. The economic section of the Unity club held its first meeting for the year Friday evening, the subject for consideration being each as they left for home. 'Primitive Money." Mrs. Ella B. Perrine read a carefully prepared and instructive paper on "Emergence From the Barter Stage and What it Signifies;" Prof. H. P. Lewis gave a fucid exposition of "The Nature and Functions of Money as Illustrated by its Origin," while "Early Systems of Currency" were treated at length by Rev. N. M. Mann. The discussion following the papers was participated in by Messrs. Kil-patrick, Wallacs, Gould, Stebbins, Newman, and others. At the opening of the meeting the director of the section, Mr. Charles S. Lobingier, outlined its purpose and prospective work in part as follows:

of the Economic section of this club. Our course last year consisted of a study of the history of Political Economy, with the aim of learning something of its leading principles, by understanding how and when and through whom they first came to be form Having thus in our initial year's work obtained a general view of the field to which this section is devoted, a course in one of its special departments ought to follow. Of all these specialties, monetary science appears to be the most fitting sequel to a general course in Economics, Monetary problems form the oldest, broadest and near-est subject in political economy today. We are but following the historical order dis-closed in the development of economipale green chiffen, accordion pleated, with science as a whole, when we pass from study of its general principles to the specia This, too, was the orde subject of money. observed by the pioneers in the select Aristotle, who is probably entitled to called the first political economist, in addigave special attention to money, and his ideas regarding its nature and functions singularly clear and modern. So wrapt were the guests first fruits of the renewed interest in economic studies, which accompanied the generality with expressions of regret and signs of revival of learning at the close of the Mid nomic studies, which accompanied the general revival of learning at the close of the Middie Ages, was the treatise of Nicholas Oresme on money, and though written in the die Ages, was the Miss fourteenth century, it anticipated much of lexan-the best thought of the nineteenth. In Hai- England, long before the appearance of the "Wealth of Nations." numerous treatises on maney had been published, and one of the most important principles of the science-the so-called Gresham's law-had been clearly stated, earlier even than the age of Elizabeth Money, too, is the most cosmopolitan of conomic subjects. It commands today the widest interest in every civilized country, and its pre-eminence as a world problem is attested by the assembling of three international monetary conferences within less than a generation. Finally the practical imporance of the subject is probably exceded by no other of which Political Economy treats. Differing upon almost every other point cor men are substantially agreed that policy founded upon correct ideas regarding consy is e sential to the welfare, both of oe individual and of society. These are

some of the reasons for the adoption of our present course of study.

The methods of conducting our work will not differ much from those of last year, more important monetary topics will treated in papers to be read before the club and the order in which these will be pre-sented is itself designed to be historical, so

Y. M. C. A. Membership Roll. There has been a steady increase in the nembership of the Young Men's Christian association, and now it has the largest number of members yet secured. On October 31 the roll stood 1.384, besides a very considerable number of applications on file waiting payment. There were sixty-two expirations on November 1, but this number has been pretty nearly made up by the issuance of twenty-six tickets in the past three days. On account of the evening course of instruction it is expected that a larger increase yet will be noted this month. Lively interest is being shown in the gymnasium, especially by business and professional men who are plan-ning to be in a business men's class at 11:30 a. m. and 5:15 p. m. After election this class will crowd the floor. The Young Men's Christian association education exhibit has attracted grand attention to the classes, and will result in increased enrollment and larger development of classes

Art Loan Exhibit.

The art exhibit in the public library building is fast drawing to a close. The time has been extended another week, in order te give those who have been engrossed in political and other affairs an opportunity to enjoy this rare treat, and also to give to the Western Art association that substantial support which they are entitled to in their efforts to foster and encourage a greater love and ap-preciation of fine art in Omaha.

It is not at all complimentary to the citizens of this city to say, what is only too true that thus far they have failed to give to this splendid-exhibit that recognition and aupport that its merits fully warrant, and it is to be hoped that the coming week will show a marked increase in the atendance. The gallery will be open daily from 9 a. m. to 10 p. m., and on Sundays from 1 to 6 p. m.

Had a Serious Time of It. While in Chicago, Mr. Charles L. Kahler, prominent shoe merchant of Des Moines, Iowa, had quite a serious time of it. He took such a severe cold that he could hardly talk or navigate, but the prompt use of Chamberaln's Cough Remedy cured him of his cold so quickly that others at the hotel who had bad colds followed his example, and half a dozen persons ordered it from the nearest drug store. They were prefuse in their thanks to Mr. Kahler for telling them how to bad cold so quickly. For sale by druggists.

RHEUMATIC TWINGES

Dr. Humphrey's statement last week that Dr. Humphrey's statement last week that Rheumatism is caused by Uric Acid in the blood occasioned much discussion, the popular theory having been that cold, dampness and intemperate living were the causes instead of only aggravating the symptoms. The idea that the imperfect action of the kidneys was the real cause and that the use of No. 15 opened the clogged ducts, permylitted the secretions to pass off, relief and comfort following as a natural result, was so reasonable that sufferers selzed it with avidity and many a twinge of Rheumatism, Sciatica and Lumbaga was escaped by the use of HUMPHREY'S SPECIFIC NO. 15.

109-110 Bee Building. REMOVED FROM KARBACH BLOCK. Sideboarding in'94.

To sideboard or not to sideboard—that is the question today with hundreds of hesitating and longing purchasers.

Here, for example, is an illustration of what we are trying to make clear. We are selling this Sideboard for 20 per cent less than we could manufacture it today. Such figures cannot long continue. The furniture depression is over; reasonable prices must soon be revived. In the meantime, however, there are great values here for the money. Notice some novel features of these new fall goods. The upper shelf has a raised center section, following the curve of the mirror beneath.

This is one of the seventy-five styles of Sideboards we are showing.
