

PULSE OF WESTERN PROGRESS

Cochiti Ore Growing Richer as the Work of Mining Progresses.

BORING A TUNNEL THROUGH GOLD HILL

Southern Nevada Waiting for Railroad Communication—Irrigated Sections Showing Marvellous Fertility—Scarcest Mines to the Pole—General Western News.

Mr. H. B. Cartwright, a leading business man, returned from a trip through the Cochiti mining district, and in speaking to a reporter on the Denver News said the Crown Point has twenty men at work and is busy shipping out ore.

Mr. Cartwright talked very interestingly of the big tunnel being constructed through Gold Hill at Bland. This tunnel measures seven feet square, and already 265 feet has been completed.

Mr. Cartwright says that there are rumors of great finds up at the Crown Point, and while he does not know as to the truth of these, it seems certain that the quality of the ore found is much higher than heretofore.

It seems probable that a new stamp mill will be established in the near future at Bland, one of the leading men of the camp having recently been to Colorado with the view of securing the equipment for that purpose.

Recent arrivals from the Bradshaw mountains report the discovery of a cliff dwellers' village in one of the most inaccessible canyons of that range, which has never before been seen by white men.

There are three natural terraces along the canyon wall and the dwellings open back from these. Narrow steps in the rock, now almost worn away, seem to indicate that this was the method for ascent and descent.

Several of the houses were explored and a few nights ago while in course of repair for occupancy. The building cost \$1,800 four years ago, and was insured for \$1,000.

The county commissioners of Sully county have refused to accept of the petition of the poor for the Northwestern road. The county is only assisting one family and does not ask any help for that number.

The Walker-Campbell hopyard at Jenkins Point, Lane county, has just turned out 2,300 bushels of potatoes from twenty acres as a second crop.

few people have an idea of its marvelous wealth and the extent of its resources.

OKANOGAN MINES.

"The Okanogan country looks better than at this time last year. The farming region is going up fast, as the increased vote at the recent election attests. The assessed valuation will be doubled next year. I base this statement," says Sheriff Rush in an interview reported in the Spokane Review.

"Miners are bringing fine specimens from the Slate creek district. I have not been there, but some men who have worked for me, and in whom I have the fullest confidence, tell me it is in reality a promising camp. It is free milling ore and considerable quantities are being shipped out.

"The Tacoma Smelting company has been sinking all summer on the Silver Hill, in the Pine creek district, and intends working six men during the winter. The Mount Ellemann Mining and Smelting company is running a 500-foot tunnel on the Silver Hill.

"Concealed is recovering nicely from the effects of the flood. The river has been turned back into its proper channel, the streets and grounds cleaned up, and since the coast season a quiet life is being lived in the town.

"The Tacoma Smelting company has been sinking all summer on the Silver Hill, in the Pine creek district, and intends working six men during the winter. The Mount Ellemann Mining and Smelting company is running a 500-foot tunnel on the Silver Hill.

twenty-four hours. They have an immense body of ore, the vein being 310 feet between walls.

Work is being steadily pushed on the Gladiador, owned by Messrs. Lake & Arnold. This is the making of a good property with but little development.

A good strike has been made on the Uncle Sam lode, the ore carrying a value of \$71 in gold to the ton.

The Siltor King and Queen, situated on North Yankee Hill, and owned by Messrs. Gow, Jones and Holland, is a very promising property, running from fifty-four ounces in silver per ton, and a good per cent of lead.

Another handsome nugget has been taken out of the Osceola placers and brought to this city, says the Salt Lake Tribune. This time the largest piece of gold ever used in 1894.

As was the case with the 9400 nugget, it was discovered in an unexpected manner and in an out-of-the-way section of the gravel floor. These finds are now considerably rare.

A shaft hole has just been completed and work is being rapidly pushed forward on this most promising property.

and has from four inches to a foot of fine smelting ore, carrying gold, silver and lead. Recent assays showed from four to fifty-seven ounces.

A recent mill run from the Cleopatra mine at Elmore, says the Salt Lake Tribune, for 12,567 pounds of ore. This is a gold property which bids fair to revolutionize gold mining at Elmore.

Considerable prospective work and some mining and shipping has been done this year in the Alamo mines, Elmore, Lake county, on the northwest end of the Alamo gold belt.

The Smuggler mine is another gold producer which ships out gold in concentrates, lately of return \$4, and if the value could be had the receipts from San Miguel county would be considerably swelled thereby, says the Telluride Journal.

An assay made from a sample taken from what is known as the contact, in the Arroyo group of claims, and which has been considered valueless, gave a return of \$51 per ton, and is considered a considerable find of this ore already exposed in the property, WYOMING.

The average daily output of the Cambria mines is 1,400 tons.

The roof of a new penitentiary at Rawlins is now ready for the slates.

A bridge to cost about \$3,000 will be built across the Wind river at Merritt's crossing, north of Fort Washakie.

Business accounts named. One county's business amounts to \$500,000 a year. Since January 1, 410 cars of cattle have been shipped.

Laramie papers state that 75,000 tons of California fruit have passed through that city during the winter season.

The Ogallala Cattle company has placed 150 thoroughbred Hereford bulls on their ranch at Hat Creek in Converse county.

A mammoth iron oil tank weighing 14,000 pounds, and measuring 45 feet in diameter, has been received at Casper, for use by the Pennsylvania oil syndicate.

The abandoned McKinney post embraces 21,900 acres, all of which will be sold soon at auction, in compliance with the law governing abandoned military posts.

A large number of valuable mineral, botanical and other specimens belonging to the University of Wyoming were destroyed by the recent burning of a box car at Laramie.

Lander will make a fight this year to secure the State Agricultural college. It will be sent to the University of Wyoming if the move should be determined upon, says the Laramie Boomerang.

One lake, not far from Laramie, went dry two years ago and is now covered with enormous crops of oats. One farmer has raised 900 bushels and another 1,875 bushels. The fear is, however, that the lake will fill up.

the miners in this section of the country have looked to the new Eldorado and staked out claims.

Judge George M. Welly of Colville has received advice from the United States fish commission to effect that he will receive a larger proper season, 10,000 fish for the Deep Creek lakes. The judge will plant his fish, secure a postoffice and open a general merchandise store at the lakes within the next four months.

MISCELLANEOUS. The Alamo mines, Tintic, Utah, paid \$15,000 in dividends last month.

Eight miles of new electric road are to be built at once at Phoenix, Ariz.

The Jerome railroad in Arizona is now completed into camp and all freight trains have been laid off.

A new stamp mill is under contemplation at Bland, N. M., and figures are being made for its erection at an early day.

Trains will be running to Ocaso, below San Luis Obispo, by the first of the year. The grading is now almost finished between the two places.

Montana will furnish about 300,000 head of beef cattle to the eastern market this year, which means from \$3,000,000 to \$10,000,000 in that state. Last year about 170,000 head of beef cattle were shipped.

The Fresno Mining company has filed a suit against the state of California to recover \$400,000, which the plaintiff alleges is due it for damages resulting from the destruction of its water power by the state authorities.

Rich gold ore has been found in Grant county, New Mexico, near the Arizona border, eighteen miles from Duncan, which gives an average of 100 ounces of gold to the ton, and 100 ounces of silver per ton. The average of the ore is about \$600 per ton.

Frank Payson and George Brill, two American prospectors, have discovered an old Spanish gold mine sixty miles northwest of Sierra Mojada, Mex., and from samples of the ore, it is believed the mine is one of fabulous richness, worked a century ago.

Governor Wemyss of Utah received letters from the sheriff and other officials of San Juan county asking for assistance in driving out 500 Ute Indians. These Indians have come over from the Los Pinos agency in Colorado, bringing with them 10,000 sheep and 4,000 cattle.

The Crocker Estate company has closed a contract with an eastern syndicate to plant 2,500 acres of land near a large scale, and to erect a beet sugar factory near Merced to utilize the beets that will be supplied by the Crocker company. The factory is to cost \$100,000.

The St. John Irrigation company of Arizona is constructing a large reservoir on the Little Colorado river. The construction will be completed forty feet to the base, ten feet high, and faced by a rock wall four feet thick. When completed this reservoir will be the largest body of water in Apache country, covering 500 acres and from ten to fifteen feet deep.

Arrangements have been perfected by the ranchers in the vicinity of San Diego for the planting of sugarcane on a large scale, and a company has been organized to handle the product. A tannery is to be erected, to cost \$10,000, and the plant will be extended as rapidly as the supplies permit.

The patrol of Bering sea has not prevented poaching. Lieutenant Commander Drake, United States navy, in command of the Albatross, who came into the port of Sitka September 27, reports that forty vessels were in Bering sea, hunting fur seals during the months of August and September, and that they had taken on an average 1,000 skins each, 72 per cent of which were females. He also stated that 12 per cent of the vessels were American, the others being mostly British.

Those who have the most

have it as a rule, because they save the most. They're more economical. These people buy Pearlina. Proof—in all stores of the better class throughout the land, you'll find the sales of Pearlina in the lead.

Send Peddlers and some unscrupulous grocers will tell you "This is as good as" or "the same as Pearlina." IT'S FALSE—Pearline is never peddled, and if your grocer sends you something in place of Pearlina, honest—send it back.

QUEER PEOPLE

"In this gorgeous-covered book are depicted wonderful things about the Queer People sure to delight the Little People." The Chautauquan. IMAGINE MICE AT SCHOOL STUDYING "How to Dodge the Cat"

THE STRIKING GENIUS OF PALMER COX

as a unique, humorous artist was recognized upon the issue of his first BROWNIES BOOK, but it is more fully displayed in QUEER PEOPLE

A CHANGE

Of air is generally advised by physicians for consumptives, either an ocean voyage or a trip to the mountains. Many, while strong enough to make the journey, cannot afford the expense. In using SLOCUM'S OZONIZED EMULSION

Of Norwegian Cod Liver Oil, with GUAIACOL all the advantages of such a trip are obtained without the discomforts of leaving home. In this emulsion the ozone of the ocean and the antiseptic properties of forest trees are scientifically combined so as to make it extremely palatable; while at the same time it stimulates the appetite, destroys the poisonous bacteria present in the blood and builds up the system.
