Joint Committie of City Council and Commercial Club Desires Radical Reform.

WANT GALLIGAN DISCHARGED

REORGANIZATION OF FIRE DEPARTMENT

Sentiment of Insurance Companies Expressed with Great Effect-Feeble Water Pressure Augmented by Weak Fire Department Management.

The special committee composed of members of the city council and the Commercial club which has been engaged in investigating the deficiency in water pressure and other fire fighting facilities concluded its deliberations at the council chamber last night and decided on a report which will recommend a radical reform. It will recommend the retirement of Chief Galligan, preparatory to a thorough reorganization of the fire department and the addition of new men and ap paratus.

The only witness examined last night was Captain H. E. Palmer, who was supposed to represent the insurance companies. He was asked to tell what he knew about the big fires that have occured in the city during the past few years. He testified at length as to the circumstances of the Omaha Hard ware company fire, where he said the firemen were fifteen minutes getting a stream on the building. Then they were unable to get a stream above the second story. At the time of the fire in the Omaha Republican building there was an absolute lack of wate: pressure and the building was destroyed by fire that could have been easily quinched if there had been a sufficient pressure.

At the Farnam Street theater firs the fire-men were from five to eight minutes in getting a stream on the fire. It was alleged that if the firemen had got into the building at the start the blaze could have been con-

fined to the stage. The Morse-Coe fire was a shining example of bad management and insufficient water

INSURANCE COMPANIES FEARFUL. The witness then went on to declare that the leading insurance companies had constantly shown a disposition to withdraw their business from Omaha. For three years the losses paid in Omaha had amounted to twice as much as the premiums. The companies had complained both of the insufficient wate pressure and of bad management on the part of the fire department. They cited the fact that other cities of the size of Omaha had twice as large fire departments and expended twice as much in maintaining. Unless some radical action was taken fully 50 per cent of the insurance business would be with-During this time rates had been advanced fully 40 per cent and this was a direct burden on the men who owned prop-erty. The companies had agreed that if a reform was inaugurated those which had withdrawn their business would return and the last reduction in rates would be with drawn. The charge had also been made that there was a lack of discipline in the fire department and that the chief was not fit for active service on account of bad health.

When asked what the insurance companies would require the witness said that they would be satisfied if three new engines were purchased, together with a sufficient amoun of hose and enough men to work them. They also want a larger malu on Douglas street and some additional hydrauts in the business district. They also want a man imported and placed at the head of the department who is familiar with fire fighting in big

cities and with modern appliances. South Omaha cut an important figure in the matter according to the witness. The companies depended on assistance from the

this extent. There had been a continual tendency on the part of the companies to reduce their lines, and where agents were formerly free to write a line of \$15,000, they were now restricted to \$5,000 or less. witness admitted that some of the increased huzards might be charged to the increase in the extent of electric wiring in buildings. Three or four years ago there was little or no lighting by electricity in business buildings. There were probably a dozen risks in the city on which the risks had been advanced on account of alleged defects in wiring.

eral and called upon the guests to feel that they were in a Methodist class meeting and either ask questions or make short speeches, as no set toast had been prepared. Rev. Mr. O'Dell said that if he had not been a Applies he would undoubtedly have been a member of the Salvation army, which brought out a chorus of 'hear! hear!" from the English members of the army. He spoke of his deep interest in the work the Salvation army was doing and how he had in-spected its method while in Europe, and especiality in London, Manchester, Birming-ham and other towns of England. Mr. H. T. Clarke Father surprised his friends by telling how near he came to being a Salvationist and would have been if occasion demanded his presence on the streets that the Salvation army might be accorded the same privileges as were granted minstrel bands and soap venders. This was in the early days of the Salvation army's advent

into Omaha and the city council endeavored to put a stop to its marching on Into the streets.

NEW AND HANDSOME.

A High Class Cafe Which Has Just Been

Opened. At last Omaha has obtained a first-class restaurant, fitted up elegantly, so located and conducted that gentlemen may take their wives or lady friends to dine or lunch at any time of day or after the opera, and be assured of being served with the best that

can be procured in any market. Mr. Henry Scharf, who has so successfully conducted the Schlitz restaurant for the past year and earned the gratitude of the male members of Omaha's population by his ability as a caterer, has just opened the "Scharf Cafe. for ladies and gentlemen. It is located in the new Schlitz building, on Six-teenth street, very convenient to Boyd's opera house, as well as the business center. The room itself is most inviting. The floor in richly tiled and the paneled walls and cell-ing finished with white and gold in the relief work, with soft blue centers in the wall paneling, and delicate cream that in the celling to harmonize with the slightly darker hus of the floor tiling. Numerous elegant electroliers adorn the walls and ceiling, and

n the whole no handsomer little resort is o be found in any western city. A glance at the menu card discloses a most extensive range of oysters, game, meats and other dishes prepared in all the various styles of gustatory preferences that modern culinary art and science has perfected. The

rices are very reasonable. Mr. Scharf's experience and managerial ability are such as to insure him the greater part of the best trade of the city when the full merit of "The Scharf" becomes known.

That's a mystery. Take (Payne) and work out the two missing words. Cut it out and bring it to the Nebraska, stating your height, weight and appetite, whether married or willing to be, and in return the first successful answer will receive first prize, "a guess on how soon the canal will be built." Each answer must be accompanied by eleventeen cents worth of Columbian stamps.

Little folks' clothes are-nearly everywhere-sold on the same ridiculous guessing plan. Guess it is worth so much more, because the patterns are desirable, or perhaps Mrs. So and So's boy wears one of 'em, and the demand might increase.

We don't trouble ourselves about what others do, but what we do. No guessing here, Small boys' suits are here well represented. Large collection of patterns and styles, perhaps not the prettiest in the land, according to some queer tastes, but they're the best from the best houses in the country. Can't do any better unless we could communicate with planet Mars.

There is no guess work about our prices either-the only guessing we are at is how many new patrons each suit will make. Our prices are a motto, "cheaper bought cheaper sold."

For Two Dollars We are able to furnish you as good a suit as anyone at \$3.50. This week in particular. Got a hold of a tremendous lot of children's clothes lately, when our buyer was ransacking the markets for second purchases.

For Three Seventy-Five That is our price this week for a score of new designs and styles. They're cheap at \$5.00 and reasonable at \$6.00. They're of cassimere, worsted, tweed, cheviot-well prepared to challenge the requirement of a real good boy.

For Two-an'a-Quarter A line of boys' cape overcoats and ulsters of excellent material, sizes up to 13 years, is another good thing for this week. They're worth \$4.00. The rest, as to make and fit, we leave this to your judgment.

This is children's week. Loo k after the little one's wardrobe-and if you need some clothes, look around town and wind up at our place. Economy demands such a shopping.

On and after Sunlay, November 4., the Chicago, Milwaukee & St. Paul "electric lighted limited" will leave Omaha at 6 p. m., arriving in Chicago at 9 a. m. Remember this

OPINION OF THE COMMITTEE.

After hearing Captain Palmer's testimony members of the committee went into executive session to agree upon a report. They were closeted for a little over an hour and then, it was stated, that they had substantially agreed upon a report which would probably be unanimous. The report will be drawn up at a meeting to be held at Mr. Montgomery's office at 11 o'clock today, and will probably be presented to the city council this evening. It will find in substance that there is a lack of water pressure and that the present system should be reinforced by larger mains and additional hydrants in the business portion of the city. It will also declare that there is a lack of efficiency in the fire department both in regard to num-bers, apparatus and discipline. The purchase of at least three new steamers of the most powerful make will be recommended. together with additional hose and a material addition to the present force. It will ask that a new chief be employed at once, who must be an expert, who has a thorough metropolitan experience and is familiar with the best methods. The new chief will be expected to effect a thorough reorganization of the department.

Ask for More Engines.

At the meeting of the fire and police commissioners last night Commissioner Strickler introduced a resolution requesting the mayor and city council to authorize the purchase of three first class steam fire engines and 5,000 feet of hose, and to also provide funds for the maintenance and equipment of the same. After a short discussion the resolution was adopted.
