FARMERS WILL IRRIGATE.

Artificial Means to Be Used in Getting Mother Earth to Give a Harvest. The poor crops of the past two years have set the farmers in this vicinity thinking that it would be money in their pockets to adopt the plan now in vogue.

Some of the states of the north, already have at hand at the critical moment a vast amount of fruit which has been saved.

Samuel Avery, who has a fruit farm three miles east of Council Bluffs, has an irrigation plant in operation which cost him a little less than \$600. A ten-horse power engine is connected with the pump.

One-half inch pipe water is pumped into a reservoir at the top of a hill, at the rate of 6,000 gallons per hour, and then allowed to trickle back over the hill.

The plant was put in last summer, in order to save a little five-acre patch of raspberries, and it did its work so well that it is probably the best artificial means yet adopted in the near future.

A system of trenches conveys the water from Mosquito creek, underneath the Milwaukee and Rock Island railroad tracks, into the lower reservoir, from which the water is pumped to the top of the hill.

H. G. Graves and his associates are putting in a plant which will have a capacity of about 12,000 gallons of water an hour, and will irrigate about fifty and sixty acres.

The engine is the one formerly used in the irrigation plant in operation which cost him a little less than \$600.

W. S. Keeline is making preparations to do the same thing, and at least half a dozen more are said to be considering the advisability of the scheme.

It is claimed that Mosquito creek, small as it is, furnishes more than enough water for the irrigation of the land.

The farmers are taking time by the forelock and getting in such shape that they can take advantage of the rain god gives them in the shape of water.

CHARITON'S ACTIVE WOMEN.

Help the Needy and Improving Themselves in Literary Societies. CHARITON, Ia., Jan. 26.—(Special).—The Women's Relief corps gave a dinner in the basement of the splendid new court house today for the benefit of the poor and sick people of our city.

The Equal Suffrage society at its meeting on Thursday of next week will discuss "Rights of Women in Iowa."

An effort will be made to organize a branch of the Daughters of the Revolution in Chariton.

Speaking of women's societies, it may not be generally known that this is a great world for cultured women and prosperous women's societies. In addition to a full quota of the best kind of church societies, Chariton has no less than five or six first-class literary clubs composed exclusively of women.

First, there is the History club, organized in 1883. Its active membership is limited, but there are a number of honorary members—ladies who were formerly active members, but who have since retired from the city.

The standard of learning and culture is very high. The club itself is a member of the Federation of Women's Clubs of America, and has held several meetings during the year on three different occasions during the year.

The Clotian club is also a rather prominent organization, about ten years old. Its membership is limited, but it has a somewhat younger women than the standard dames who give dignity to the History club.
