

CONDITION OF AGRICULTURE

Business is Fair Considering the Situation in the Country.

HOPES FOR THE FUTURE ARE VERY BRIGHT

Reports From the Country Show a Great Improvement in the Feeling Among the Trade—Values Have a Decidedly Upward Tendency.

The heavy rains which visited all sections of the state during the latter part of the week brought about a marvelous change in the business situation in this city. For a week or more the farmers had been receiving unfavorable reports from other farmers about the continued dry weather. These complaints had steadily grown in volume until country merchants were declaring that rain must come in a few days or everything in the country would be burned out. Under such circumstances it was not surprising that discouragement took hold of merchants in every line of business, retailers as well as jobbers.

The rains worked a great change. The retail merchants who had refused to buy, or had canceled orders already filled, sent in fresh orders for the necessary staples. From all sections of the state reports were coming in the same reports—"It has rained and there is every prospect now that we will have a large crop, besides considerable small grain." The farmers who were considerably discouraged when the rains failed to come, now feeling greatly elated yesterday, and appeared to have recovered in their attitude towards the business situation in this part of the state.

As might be expected, collections are only moderately good, many in the country being anything but plenty.

There is a much better feeling among the hardware men, but so far there has been no material change in the volume of trade. With a continuance of the present good outlook for a crop, jobbers look for a better demand for goods in their line in the near future.

The hardware market is a good deal on the swell just at present, and it is not likely that it will be advanced, or that prices must be advanced, or that prices must be advanced, or that prices must be advanced.

The volume of trade at the present time is not nearly as good as it was going on. The goods are being sold at prices similar to those of last week, but not so much. Country merchants are not placing very much orders, but they are buying cautiously, and as a result, the market is held up.

The dry goods line is dull, and it is not likely that it will be advanced, or that prices must be advanced, or that prices must be advanced.

The volume of trade at the present time is not nearly as good as it was going on. The goods are being sold at prices similar to those of last week, but not so much.

COMMERCIAL AND FINANCIAL

Wheat Opened at One Cent Advance, but Soon Weakened.

CROP DAMAGE IN THE MIDDLE STATES

Reports Received Indicating that Wheat in Illinois, Indiana and Missouri is in the Worst Possible Condition.

CHICAGO, June 1.—Wheat opened an advance of 1/2 cent today, opening today at 86 1/2 cents per bushel, compared with yesterday's final sales, but lost 1/2 cent of it and closed 1/2 cent above Friday's close. Corn fluctuated within a range of 1/4 cent, ending at 33 1/4 cents. Oats are 1/2 cent higher and pork 1/2 cent lower. The most extraordinary weather ever known at this season of the year gave further evidence of its recent eccentricities between the close of the week and the opening of this morning. "Hotter than ever," "drier than face powder," and a continuation of such conditions being predicted for another forty-eight hours at least. News of any description that referring to the varieties of the climate and their damaging effect upon the crop was very little regarded. The "total failure" of the crop was reported again and again from some of the best wheat raising counties of Illinois, Indiana and Missouri. Ohio and Michigan, the reports were only a few degrees less alarming. The market did not more freely respond to the "drier than ever" evidence of its recent eccentricities between the close of the week and the opening of this morning. "Hotter than ever," "drier than face powder," and a continuation of such conditions being predicted for another forty-eight hours at least.

Wheat is in the worst possible condition. Reports received from Illinois, Indiana and Missouri indicate a total failure of the crop in some of the best wheat raising counties. The market is very nervous and prices are volatile. There is a great deal of speculation in the wheat market, and prices are expected to fluctuate considerably.

The volume of trade in the wheat market is not as good as it was during the latter part of the week. There is a great deal of speculation, and prices are expected to fluctuate considerably.
