The weakness in futures was principally the result of advices from the Dakstas and Iowa stating that conditions were very fine. September opened 5c lower at 22%c, sold from 2% to 22%c and closed at 22%c. The provision market was generally heavy and the traders listless and indifferent. The opening was at a slight advance in con-sequence of the receipts of hogs amount-ing to only 11,000 head. The weakness of corn and dowaward tendency in wheat had a depressing effect and made itself feit in lower prices for hog products. After open-ing at \$10.90, September pork declined to \$10.75. CATTLE—The receipts of cattle today numbered only fifty-seven loads, as against seventy-one yesterday. The receipts in fact, were the lightest of any day since Saturday of last week. The market was practically bare of fat cattle today. There were no native beeves in the yards and only four of five loads out of the number here were not offered on the mar-ket. One bunch brought \$5.80 and another load \$4. There were really not enough fat steers here to make any test of the mar-ket, but it would be safe to say that the prices paid were not much different from helfers in the yards, fully one-half of the receipts being made up of that kind of cut the. There was a fair demand, and yet buyers were not so anxious as they have been during the past few days, and the trade was a little inclined to drag. At the same time prices were a little lower all around. The less desirable among the of-ferings were fully 5c to 10c lower. Good fleshy feeders were in active de-mand. Speculators were good buyers, and in addition to the demand from that source there were several country buyers in the yards. The market was active and the of-ferings were all taken in good season and at a little better prices. The commonish light stockers did not show any improvement. There are quite a good many in the yards and the demand is rather limited. Repre-sentative sales: COWS. COWS.
