Storming of Vicksburg. Paine's greatest of all military spectacles, entitled the "Storming of Vicksburg," will be presented under the management of the University club at the amphitheater at Courtland beach at eight performances, commencing probably September 7. This picture is so much larger than Pompeil, which was on here last August, that the platform and staging will have to be extended from fifty to seventy feet. In fact it is going to crowd things to get the whole twelve acres of scenery set apart at the beach for the spectacle. The artificial lake will have to be enlarged and filled with water, so as to float the gunboats, and especially the great "Arkansas," which is blown into 1,000 pieces. The hombardment of the rosts by the gunboats is said to be one of the most realistic spectacles ever put before the public. To give an idea of the size it may be stated that instead of the one "break" that "Old Vesuvius" had in the destruction of Pompeit there are to be eleven in the "Storming of Workshope" land beach at eight performances, commencthere are to be eleven in the "Storming of Vicksburg. No section of fers such advantages in the way of a mild, equable climate, free from all extremes of heat and cold. No section offers better reurns from the honest labor of the intelligent worker. The new idea of the diversification crops; the raising of all the vegetables known to the market, and fruits in all their variety, bring this fertile section more money acre for acre, when employed in this branch of industry, than any other farming section can show you. The value of having no drouths to dread, no flerce blizzards and cold winters to contend with, is infinitely in favor of this rich portion of our country. When your ground by work and intelligent cultiva tion can be made to pay you from \$150 \$300 per acre, it is well worth your while stop and consider what should keep you from investigating such an Eldorado. 93000000000000000000000009 SOUTH OMAHA NEWS

A great many people in the city seem to be ignorant concerning the object of the coming bond election of the school district of South Omaha. President Cheek was requested to make a full statement of the facts. He said: "In the first place the board is short \$30,000, caused by necessary building and repairs, which compelled the board to from liquor licenses has been about \$35,000 per year, but only \$26,000 will be realized from that source this year, and \$10,000 of this not be used until these cases are settled by intesting parties. This leaves the Board Education without a cent to run hools for the coming year, and as it takes lose to \$50,000 any one can figure the reason for the board asking for \$40,000. This in addition to the \$10,000 license money referred will just about cover the amount required. It must be understood that all money received up to date has gone to the banks to cancel the \$30,000 overlap. This has all been paid except \$5,000, which will be covered by back taxes due the district."

Mr. Cheek further says that, "gome tax-

he 20-mill levy stand, even if the boards do . This is absolutely false. The intention of the board is to arrange the finances of the district so it will be easy on the taxpayers. If the bonds carry the evy will be entirely wiped out. Our county ommissioner, Mr. Sutton, has agreed to hold he levy back until the result of the election s known, and will erase it if the bonds carry, Some criticism has been advanced because numbers of the board did not vote to sub-

nit the \$33,000 proposition."

Mr. Cheek's idea in this was to make the nded indebtedness as low as possible and leave a small levy on the district to cover the difference, but the majority of the members thought the full amount better be asked for and the levy wiped out entirely.

And let us tell you that there are no better shoes made than we carry. We know that. We know it so well that we back up every one of our shoes with our guarantee.,
