One of the interesting topics in military circles is the proposition to mobilize national guardsmen once a year for competitive drill, regular army officers to be constituted as judges. The idea is to do away with state militia encampments, create great military divisions embracing several states and once a year have a grand encampment of citizen soldiery. The suggestion is taking like wildfire.

Senator Allison naturally claims part of the credit for the result in Iowa. The new legislature makes the senator's re-election practically secure no matter how the national convention may view his candidacy for the republican presidential nomination. Iowa has as a general rule kept its experienced public men in congress for long periods and Senator Allison is bound to reap the benefit of this policy.

Some people are anticipating another statement from President Cleveland denying Secretary Morton any authority to speak for him on the political situation. There can be no doubt that a very large majority of the Canadian people, if put to the test, would be found ardently loyal to England and there is no reason to expect any great change in the near future. Canada governs herself and is now practically independent, the few restrictions imposed by the imperial government not being of a nature to seriously curtail the rights and privileges of self-government. Pretty much everything that is asked by Canada of the British government is accorded and she is assured the protection of that great nower. Being well treated under all circumstances and subjected to no more restraint than is essential to the colonial relation, a majority of her people are well satisfied with the situation. Still the time will probably come. though it may be yet remote, when the sentiment for independence will predominate and whenever that time arrives the Canadian people will have no difficulty in severing their relations with Great Britain, because they will have the sympathy and support of the United States and of every country in this hemisphere. It is hardly possible, however, that the present generation will witness Canadian independence or even a very serious movement in that

QUICKER INTERNATIONAL TRANSIT. Much interest has been attracted to the project of Mr. Austin Corbin, president of the Long Island railroad and one of the most practical of Americans, for shortening the time of travel between the United States and Great Britain. Although much has been written about a proposed steamship line from the east end of Long Island to the westernmost harbor of England, yet only recently has Mr. Corbin himself confirmed the reports. His article in one of the current reviews shows that he expects to see established within a few years a service that will make the time on the ocean only a little over four days, and will shorten the time of travel between New York and London by

nearly or quite a day. Mr. Corbin's plan is nothing less than a new transatlantic steamship route Sandy Hook, and the slow passage ing of time between the postoffices of New York and London, and a trip of between four and five days across the Corbin first conceived this project some of his friends thought it chimerical, or at least that it involved too many difficulties to make it practicable, but he appears to have solved all the problems connected with it. If the majority of the democrats in Nebraska are in favor of the president's financial policy, then, says Mr. Bryan's organ, these democrats are entitled to represent Nebraska in the democratic national convention. This is an admission as is an admission. If the administration men capture the democratic party machinery then they will be in position to send themselves to the national convention. This, however, is true not only with regard to Nebraska, but also to all the other states. But what difference will it make to the democracy or even to the men in the fight which of the factions succeed in gaining admis sion to a national convention foredoomed to nominate a candidate with no possible chance of election?

The book and magazine posters which were on free exhibition at the public library during the past week have scarcely been appreciated by the Omaha public as their true artistic worth. The attend ance was fair in point of numbers, but it should and would have been much greater had the public a better conception of the art which is worked into these advertising placards. The collecnumber of out-of-town people and negotiations are in progress to take it to Lincoln for exhibition at the opening of the new library building of the State university. By this means the exhibition intended to stimulate art culture in Omaha will have an liftuence beyone the borders of the city.

The new public library presented to Pittsburg by Andrew Carnegie is another instance of carrying into practice what that philanthropic millionaire has long been preaching. Mr. Carnegie has been inculeating the doctrine that the for unes of rich men are acquired by them only in trust for the benefit of the great mass of the people. His idea of the pest execution of this trust is in the founding of libraries, art galleries and other educational institutions with acess to all. Most millionaires will probably accept this conception of their duty to their fellows, but comparatively few of them carry it out.

The republican victories in Maryland and Kentucky last week are by no means the first that the republicans have gained in the south since the reconstruction period. Virginia was under republican rule for some time during the ascendancy of General Mahone Again Tennessee was last year carried for a republican governor and would now be under a republican executive had not the successful candidate been counted out by an unscrupulous partisan legislature.

Senator Lodge has been visiting Spain with the express object of inquiring into the relations of Cuba and the mother country. We shall-doubtless have some learned disquisitions from the Massachusetts senator on this subject on the floor of the senate.

The statement that the banks of this counry lost more than \$25,000,000 in the last ear by defalcation and embezzlement is officiently startling to challenge attention. Not less significant is the further statement that the annual loss from these causes has risen in ten years from \$3,500,000 to \$10,000,-000, the aggregate for the whole period being upwards of \$100,000,000.

Experts attribute this increase not morely to the inadequacy of the methods of bookseping commonly in use in the banks, in proportion to the great expansion of business. The knowledge that an embezzlement is tion to bank employes, and even unusual on the part of bank directors cannot be relied upon to make embezzlement im-

What is true of banks is also true of the accounts of all large establishments, and the real remedy seems to lie, as suggested, in the frequent examination of the books by utside experts. CHICAGO, Nov. 9.—The libel suit of ex-Mayor John P. Hopkins against John R. Tanuer, chairman of the republican state central committee during the campaign of 1894. came up for argument today. The case came up on the demurrer of plaintiff to the pleas filed by the defendant February last, in which he alleged that the circular he sent to the voters of the state charging Mayor Hopkins with levying blackmail for political purposes upon the disreputables of Chicago contained nothing but the truth. In the plea were given the names of many from whom it harged a campaign fund was collected. Atcorney Hamilton argued that the pleas in the ire show that Tanner was justified in sending out the circular upon which the ex-mayor bases his libel suit. He read an additional plea filed on behalf of his client setting up hat the circular was a privileged communicaon upon which libel cannot be based. Hamlton argued that Tanner was not actuated by nalice, but was simply performing his duty as head of the committee. The circular was sent under seal to the parties for whom it was sent under seal to the parties for whom it was prepared and the defendant was not responsible for the fact that it was given publicity in the newspapers.

Eugene Field. I hear Thy voice, dear Lord,
I hear it by the stormy sea,
When winter nights are black and wild,
And when, affright, I call to Thee;
It calms my fears and whispers me,
"Sleep well, my child."

I hear Thy voice, dear Lord, a singing winds and falling snow. The curfew chimes, the midnight bell, Sleep well, my child," it murmurs low; The guardian angels come and go—

I hear Thy voice, dear Lord, Aye, though the singing winds be stilled. Though hushed the tunuit of the deep, My fainting heart with angulsh chilled By Thy assuring tone is thrilled— "Fear not, and sleep!"
