almost impossible wagon road, what is needed
is a government appropriation whereit almost impossible wagon road, what is needed is a government appropriation wherewith to so widen and improve the present trail over the divide as to make it practicable for pack mules. With a double train of these animals, the supplies necessary for a population four times that at present peopling the Yukon could be packed in during the open season and with a track and push cams at the White Horse rapids portage the delivery of the goods and provisions at Forty-Mile creek and other camps would be far more certain than by attempting to make the mouth of the river the regular contains a great deal of information in rethe mouth of the river the regular

"There would be little use of river steam-"There would be little use of river steamboats on the chain of three lakes which form the headquarters of the Yukon, for the rapids commence a short distance down the river after leaving the lakes. What is needed is a towboat and barges. The latter may be handled from the shore by lines, and swung in at the portage, even as the miners work their bateaus in the present descent of the river. Helow the rapids freight could be placed aboard a steamer."

WYOMING RESORCES. WYOMING RESORCES.

Several important discoveries have been made in the Hartville region in the past few weeks which will add largely to the varied and wonderful resources of that camp, says the Cheyenne Sun-Leader. A vein of asbestos has recently been found and located within a mile and a half of Fairbank. The vein opens at the surface at least a foot wide and increases in width as development work progresses. It can be traced a long distance, and there seems to be no question as to the amount and value of the ore. as to the amount and value or the ore. Specimens already mined from the surface show a beautiful, threaded fibre of true minindestructible by fire. Mr. Charles Freder-ick of Whalen valley has just begun to uncover a deposit of manganese ores a few miles north of the famous Good Fortune and Blue Bird iron mines. This is one of the most valuable discoveries ever made in the district, and if the body of ore proves to be as extensive as appearances now indicate, will excite interest all over the country wherever iron and steel operations are carried on. The work on this claim has just begun. The ore is black and is found in nodules and bunches in a clay and sandy deposit. But little manganese can be found in this country, most of it being imported from Germany. It is an absolutely necessary element in the production of Bessemer and steel, and will be at once utilized in the tron industries of Hartville and the whole from industries of Hartville and the whole party driving the tunnel remarks: "The Rocky mountain region. Messrs. Stein and rock is the richest struck in this camp, and I Louk, who reside in Whalen valley, have re- have worked in some very rich ore here." Louk, who reside in Whalen valley, have re-cently made a most unique discovery near The prevailing opinion is that the owners their ranch of a rock formation called "tri-of the Dubois lode have one of the best in It is a soft white stone of fine grain. resembling chalk, and is used in various manufactures for cleansing, bleaching, polishing, etc., as well as in the production of scaps. axle grease and other compounds. The chip dump alone is worth \$20 per ton, while here

pure, native state. Some wonderful marble quarries have been untarthed at Fairbank. A large portion of the strata stands upright and splits naturally into slabs of varying thicknesses with straight, smooth cleavage, so that it can be easily mined and worked. The marble is fine grained and takes a handsome polish. In addition to pink and white shades, it is also found in purple and black colors.

an immense deposit is found which can be easily cut into large blocks and used in its

LEADVILLE PROGRESS. Last week the Leadville Herald-Democrat issued an elaborate Ice Palace and Crystal Carnival number, in which the mining statistics of the camp appear. The following table gives the total production from the Leadville district of ore during 1895. Net tons of ore produced, 394,710; ounces of gold produced, 100,449,29; ounces of silver produced, 13,530,773; pounds of lead produced, 62,471,670; pounds of copper produced, 4,584,-906; pounds of zine produced, 128,500. The total value of this is \$13,318,774, which is an increase of over \$5,000,000 over 1894.

The grand total of Leadville's output since 1879 is \$209,768,222. From official statements the labor of the camp is as follows: Miners, 2,716; smelter hands, 800; ore haulers and teamsters, 300; total, 3,816; increase over

Among the properties mentioned as having come to the front as producers during 1895 are the Pacado, Belgium, Mahala, Bohn. Northern and Coronado. The Mahala property was one of the greatest producers during 1894, but the slopes of ore gave out early in the year, and the management has been enders from the planters for so many teams 1894, but the slopes of ore gave out early in the year, and the management has been engaged in prospect work ever since at the 900-foot level. Early in November at a depth of 1,000 feet, they encountered an immense body of galena ore, which has opened up an entirely new and virgin territory. This rich strike has enabled the Mahala to produce since November 2,500 tons of high grade over the prospective buyers describing as exactly as possible the kind of animals wanted. These orders are sent to the brother at North Yakima, who puts them on the books of the firm, and when he sees a horse which will fill any of the orders, he buys it and keeps it until enough others are secured to make a shipment. The entirely new and virgin territory. This rich strike has enabled the Mahala to produce since November 2,500 tons of high grade ore, and the probabilities are that it will continue its production for an indefinite period.

A complete history of the famous Belgium property, owned and operated by Postmarter J. S. Stotesbury, is given for the first time.

play of New Year's cards.

stances. In the latter part of August in-dications of a very rich ore body were dis-covered, during October and November this regular thing." ore body rapidly increased in size, and at the first of the year Mr. Stotesbury finds his

STRUCK OIL. Summerland has made a big stride forward. A flowing well, the first in the region, has been struck by Solomon Kalser of Santa Maria, who came on the ground only a few weeks since, says a Santa Barbara the building of a wagon road over the Chil- dispatch to the San Francisco Call, to sink coot pass that the 'traveler may drive over fifty wells on lots purchased by the company to the navigable waters of the Yukon in five which he represents. At a depth of 212 feet

while there is no feat of mountain roadmaking that modern engineering cannot conquer, the building of a wagon road from the headwaters of the Chilcoot riv r over the divide to the head of Lake Lebarge would be an undertaking only equalled by the Canadian Pacific's work on certain sections of its road runding along the France by engine power. The new well in which such important results have been achieved is situated on the bluff near the railroad, in the direction of Ortega station. It is in the near vicinity of many pumped wells. It is probable that this discovery will lead prospectors in that direction, and that the ground around Ortega will soon be covered.

contains a great deal of information in re-gard to the mining section of the state, says a Pierre special to the Minneapolis Tribune. He presents a detailed statement of the condition of each of the various mines with a description of the formation in each, northeastern Nebraska is to the effect that the Chicago, St. Paul, Minneapolis & Omaha railroad will be extended from Hartington to

with a description of the formation in each, and suggests improvements in mining methods which would, in his estimation, add largely to the gold production in that section. In conclusion he says:

"It will be noticed there are 1,703 men employed this year, as against 1,280 last year, and it will also be noticed that this increase is shown by, first, the increase in number of men employed by the older in number of men employed by the older and larger companies, and, second, by the new properties opened up and placed on a paying basis. The cause is not obscure. The increased facilities for transporting the ore and the increased smelting capacity both contribute to make it so.

both contribute to make it so.

"As will be shown later the gold production for this district, barely beginning to be developed, is nearly \$5,000,000 for the year, an increase of \$1,500,000 over 1894. Many new properties, producing a high grade of refractory ore in paying quantities, have been found and opened up and regularly worked."

The report ends with a statement showing the gold production of the various mines in tons of product and value of the same, and places the estimate of gold production for the next year at \$7,000,000, which estimate is based on the number of new mines opened and the increased capacity of the mills and smelters. mills and smelters.

DUBOIS' GOLD CAMP.

the district, and it will undoubtedly develop into a paying mine.

Around camp the prospects are bright for Dubois being one of the busiest and best paying camps of the state. Many old prospects in creasing and the factory is hard pushed to fill orders. The banking firm of Tewksbury & Pingrey at Lester has passed into the hands of an assignee. Its statement shows loans and discounts amounting to \$63,090, deposits \$15,090, liabilities \$45,090 and clear real estate valued at \$8,090. The assignee believes that every creditor will be paid in full. The Christmas celebration at Lahrville terminated in almost a tragedy. The church was crowded and to add to the interest of the entertainment an imitation log cabin had been built on the platform. During the ex-ercises it caught fire and was entirely con-sumed, together with several hundred dollars' worth of presents. Twenty-five chil-dren behind the cabin were unable to es-cape and had to be rescued through a rear

THE DAKOTAS.

A state immigration convention has been called to meet at Mitchell January 15 and 16. Secretary Bushnell of the South Dakota Dairymen's association has nearly completed the program for the annual meeting, which will be held in Huron, January 21 to 23. State Mine Inspector Sampson, in his annual report to the governor, places the gold output for South Dakota at \$3,500,000 for week. The lines were six miles apart and 170 men participated. The drive resulted in the killing of thirteen wolves, twenty-nine jack 1894, \$5,000,000 for 1895, and estimates the

cutput for 1896 at \$7,000,000. An additional telegraph line has been ex-tended from Norfolk to Verdigre, giving the towns along the Creighton branch direct The sheepmen of Clark county, South Dakota, are considerably alarmed over the ap-pearance of scab in many of the flocks, and are petitioning the county commissioners for the appointment of an inspector. The oldest son of Perry Freel held a half pound of powder in his hands. The powder was accidentally ignited and the boy's hands were badly burned before the blaze could be out in the powder.

An immense flow of water was struck in the new artesian well of the Chamberlain Electric Light company. It had been in-tended to clear away an obstruction at the bottom casing with dynamite, but the well unexpectedly cleared itself, and since then the flow has been stradily increasing, with a certainty that it will be one of the best artesian wells in the northwest.

of Agriculture will be held at Lincoln Jan-uary 21. At this meeting there will be exhibited samples of this year's crop of Dr. W. P. Wimmer has just returned from Montana with 8,000 sheep, which he will cross to his range on Lance creek as soon as the ice is safe to make the venture. He was accompanied on his trip by other par-ties, who purchased 2,000 head, the whole ties, who purchased 2,000 head, the whole herd being shipped by rail to Bismarck and driven across country from there, the herd being separated at Forest City. The price paid for the sheep was \$2 per head, and it was necessary to work along about 150 miles of the Yellowstone river to secure the number of sheep they desired.

It is given out that the Homestake Mining company, which has been operating at the head of Gold Run, near Deadwood, has determined to build four mills of 250 stamps each, to be located on Whitewood creek, just above the city. The plans for these mills Lane county. They were out hunting when

August Schneider and William Kumm, two Cuming county farmers who recently went to Mississippi to enjoy the life pictured by the eloquent advertisements, have returned to stay. They say they would not exchange eighty acres of Cuming county soil for 2,000 acres of Mississippi land. stake and associated mines, and two others, the Caledonia and Desmet, are undergoing re-pairs and will be started soon. The developments made on these mines during the past seventeen years prove that the ore supply is practically inexhaustible. The vein, or depractically inexhaustible. The vein, or de-posit, is 600 feet in width and at a depth of 940 feet grows richer and shows no sign of 'pinching' out.

COLORADO. The 140 hunters who went out after rab-bits at Lamar succeeded in shooting only Mineral hill, the eruptive portion of the landers.

Cripple Creek district, is showing ore worth A very fine strike of rich sylvanite ore has been made in La Belle. The strike was made in the bottom of the shaft, which is

160 feet deep. In Cripple Creek district Joseph Frank has added a new shipper to the list in the Rigi, on the east slope of Battle mountain.

Returns from a carload shipment went at the rate of \$80 a ton. or \$10 and costs for brutally assaulting his rippled 11-year-old brother.

Mr. R. Dauglas has recently discovered a free gold vein on the head of Sand creek, in Carbon county, which yields, mill run, \$28 per ton in gold. Mr. Douglas will at once

erect a mill on his new property.

The stockmen of Saratoga, Carbon county, are considering the feasibility of forming a stock association, claiming the association now in existence and paid by the state does not properly protect their interests. The coal has been exhausted in No.

mine at Rock Springs and the mine shut down. This will not affect the output of coal from Rock Springs, however, as other mines, now idle, will be started up. The Granger Ditch company will construct a large ditch in the Pass creek country in Sheridan county, in the spring. The surveys

have already been made and work will com-mence as soon as the weather will allow. The Messrs, Dodge, who have been pro pecting in the Big Laramie placers, exhibited in Laramie a few days since a gold button worth \$4.65, which was extracted from three yards of dirt. They claim that there is plenty of ground on the Big Laramie that

will go to \$2 per yard. The Albany Placer company has just com pleted 2,000 feet of bedrock sluices and is ready to operate on a large scale as soon as spring opens. While cutting these as spring opens. While cutting these sluices, they crossed the old channel of Douglas creek. The channel is forty feet wide and shows very rich in placer gold. Charles A. Crysler, vice president of the Rocky Range Gold company, has just re-turned from Independence mountain, says the Laramie Republican, where he located about 6,000 geres of placer ground. The water rights have been secured and work will begin in a few days. The Rocky Range Gold company is a Chicago corporation, with ample means, and there is no doubt of the active prosecution of the development work.

Independence mountain, near North Park, on the line of Colorado and Wyoming, is soon to be the scene of gold placer mining on a large scale. This district has long been known as a rich placer field, but the lack of sufficient water at hand has pre-vented gold seekers of limited means from working the ground. A Denver syndicate has recently purchased and located a large gold bearing tract and will bring water from a mountain lake in the vicinity. Gold is found at the very top of the mountain and all along its sides to the foot hills, the dirt running from 25 cents to \$5 per cubic

OREGON.

Fort Orford has just completed the con-struction of a school house. The funds were raised by popular subscription. Almost every available spot of gold-bearing black sand along the Curry county beach will be worked during the present winter. A new railroad bridge is being built across

Hood river. It is about seventy-five feet below the old bridge, and takes a sharp curve out of the road at that point. The farmers of Wallowa have placed on the market this fall about 4,000 head of hogs,

which, at the prevailing low prices, have realized the owners about \$15,000. J. W. Redford, while on Willow creek re-

each, to be located on Whitewood creek, just above the city. The plans for these mills have just been submitted to the directors at the company's office, in San Francisco, and have been accepted. There are now four large stamp mills in operation on the Homestake and associated mines, and two others.

A wood war is on in The Dalles, which promises to be a brisk one. Through com-petition of local dealers, the price of wood has be a reduced to a lower figure than for previous winters, and for this the consumer is glad. An unusually large amount of wood has been brought up the river during the fall, and the beach is covered now with good supply. WASHINGTON.

The town of Auburn-that used to

known as Slaughter—in the Stuck valley, is soon to have a pottery factory. The last assay of ore from the Marie mine, on the Elokomin, in Wahkiakum county, is said to run \$22 to the ton.

A cannery at North River packed 16,000 cases this season, nearly all of which have been shipped. The cannery at South Bend put up 6,200 cases. At Tekoa the other day Indian Agent Bubl

paid to the Coeur d'Alene Indians \$16,000, making \$40 for each of the 400 red men. Most of the money is being spent in Tekos. The Port Berkeley Mill company now has about 20,000,000 feet of logs at Kamlichie. Four train loads a day are being dumped daily at this point, averaging about 80,000 feet each. This logging camp employs about 250 men. A telephone line will be extended from Granite Falls to Robe, on the Everett & Monte Cristo railroad, to keep in close touch with the section men, as there is a long

stretch of railroad there without an agent or telegraph station. The town of Palouse has adopted an dinance providing as follows: "That the treasurer's salary be \$300 per annum; clerk \$100; attorney and health officer, each \$1; superintendent of water works, \$480." The salary of the marshal was left to the next

The Old Dominion mine, in Stevens county, about seven miles northeast of Colville, was discovered in 1883 by W. D. Kearney and Albert Benoist. It was worked by them and their associates up to 1892, they having extracted mineral to the amount of \$50,000, all of which came from within seventy-five feet of the surface. The ore was sulphide and chloride silver, averaging in value 350 ounces to the ton.

Circular letters received by agents of the Central Washington road at Almira, Wil-bur and Coulee City contain the information that an area of cheaper coal has been inaugurated along that line. It is said that Roslyn coal has been selling at those points for \$9 per ton. The Central Washington agents have been notified that hereafter they will receive and handle coal and retail it to the people at \$6 per ton, a reduc-tion of \$3 per ton.

The creosote plant at Ballone, through which the piling at that place was treated with creosote, is to be removed to San Fran

A personal nots for \$10 recently came to light in Arizona on which the interest was \$340. The rate was \$1.25 a week. Fortunately the note was outlawed. During the past fall there have been killed

on the Frazer range, near Pyramid Lake, in Nevada, 400 head of horses. Their hides, talls and manes are disposed of at the rate of \$2 per animal, and the carcass is left to

Pifty-four new gold mining companies were organized in California since the beginning of the year. It is believed that every one of these organizations was incorporated for the bona fide object of working gold mining properties.

The rumors that the Mormons intended depart from Mesa City, Ariz, have at 116 S. 15th St. last been set at rest by preparations now being made for the erection in that town of a \$30,000 tabernacle for the use of com-

An old man from Oregon recently hung out a sign at Dunsmuir, Cal., which was a curiosity. When the sun shone on his sign from one direction it showed "Attorney at Law," from another direction it showed "Physician." It had been painted over.

A San Francisco laborer is being treated for two tarantula bites on the second finger of his left hand. He bought a dozen bananas and was peeling one of them when a taran-tula dropped out of the bunch and fell on a baby. In brushing the tarantula off the child baby. In brushing the tar he had his finger bitten.

Twelve Santa Rosa wine growers have formally transferred 598,000 gallons of dry red and white wine to the California Wine Makers corporation. This wine will remain valley.

The Agricultural college trustees will at a coordance with their usual plan. The produces make a selection of lands to fill the donation provided by congress of 90,000 acres for the use and maintenance of the Agricultural college trustees will have to wait for this sale before ducting any returns.

Governor McConnell of Idaho has parel a paper of interest, which will tend to attract immigration to Idsho. It shows to attract immigration to Idsho, it shows the progress of the state since its admission into the union in 1890. Then the population was 80,000 and the assessable property \$25,750,000. The assessed valuation ran up to \$33,431,891 in 1893, and in 1895 is \$29,312,210. The present population of the state is given at 125,000.

Jim Cash, one of the richest and most influential Indians on the Umatilia reser-vation, has begun a suit for divorce against his wife, on the ground that she hideously and grotesquely painted her face, thereby disgracing and humiliating him in the eyes of his family. Not many years ago Cash frequently visited town bedaubed with red requestly visited town bedaubed with red and green paint and clothed in a decelete blanket, fastened at the waist with a bit of baling rope. Mrs. Cash will oppose the suit on the ground that her husband fre-quently drew odious comparisons between her beauty and that of white women of his acquaintages, and it was because of these acquaintance, and it was because of these taunts that she endeavored to render herself more attractive.

We are not surprised that people will not take a new cough remedy when they know the value of Dr. Bull's Cough Syrup.

### UNEXPLORED ONTARIO.

ast Region Known as the Hinterland Awaiting Development. Of Out ario's aera, estimated at 200,000

quare miles, 100,000 square miles are in an unknown region, only the edges of which have been explored. This is the territory known as the Hinterland of Ontario, say the Winnipeg Free Press. It lies between Lakes Huron and Superior to the south and the Albany river and St. James bay to the north. In this vast area is the Height of Land, which separates waters flowing to Hudson bay from the streams emptying into the St. Lawrence and the lakes. of the height is what is called the Hudson bay slope, consisting of about 80,000 square miles. This slope may be described as un-The height of land is not a ridge of hills,

The height of land is not a ridge of hillip, but is a level plateau some 1,200 or 1,300 feet above the rea. "The scenary," says a surveyor's report, "though diversified by hundreds of rivers and streams and thousands of lakes and innumerable crags and hills of rock, is certainly lacking in that aphility and byteness of view which only nobility and largeness of view which only the presence of lofty mountains can be-stow." Of the rivers flwiong north from this slope the Albany is the most import ant, being about 475 miles long and nav igable during the season of high water for 259 miles. Of the short slope south of the Height of Land, in which are situated the settlements of North Bay, Sturgeon Falls and Sudbury, there is definite and general knowledge, but the whole territory sloping north remains unexplored. The Hinderland is Ontario's reserve. Much

valuable timber in this region is destroyed by fires that sweep south of the watershed. Pine, spruce, tsmarack, poplar and cedar are varieties of wood existing in abundance south of the Hudson bay slope. Here, too, are valuable minerals, but the treasures hidden in the region north of the plateau and the resources of the plane itself await the searching of some intrepid explorer. This year further investigations are to be made in both Labrador and the Hinterland. Meanwhile no adventurous spirit need resign itself to obscure inactivity, nor ambitious traveler sigh because there are not new countries to traverse. The Hinterland will reward the eager discoverer, and when he has exhausted that territory the region of the great northwest remain unsurveyed.

Acts at once, never fails, One Minute Cough Cure. A remedy for asthma and that fever ish condition which accompanies a severa-cold. The only harmless remedy that produces immediate results.

War Policy.

ORIGIN OF JINGO. and anxieties can be relieved to a cer tainty by using How it Came to Apply to Advocate of

The origin of the word "jingo" is interest ing at this time when one is confronted with It so oft n. At the time of the close of the Russo-Turkish war, which, as all readers of history know, terminated so disastrously for the Turks, and caused a feeling of apprehension in England that the Russians were bent on taking Constantinople and the ulti-mate dismemberment of the Turkish empire a change which could not be tolerated, the public feeling found expression in England upon the stage in pantomimes and in th music halls by numerous patriotic songs. One of these was as follows:

"The dogs of war are loose and the rugged Russian Hear,
Full bent on blood and robbery has crawled out of his lair.
It seems a thrashing now and then will never help to tame
That brute, and so he's out upon the same

old game. The Lion did his best to give him some excuse To crawl back to his den again-all efforts were no use.

He hungered for his victim, he's pleased when blood is shed;

But let us hope his sins may all recoil on his own head."

Chorus;
"We don't want to fight, but, by jingo, if We don't want to light, but, by jingo, if
We've got the men, we've got the ships,
we've got the money too.
We fought the Bear before and while we're
Britons true
The Russians shall not have Constantinople."

The song became most popular and was heard on every street corner, from every organ grinder, and was whistled by every bootblack. Shortly after this the election campaign began in which Gladstone, the head

of the liberals, attacked the tory party, then led by the carl of Beaconsfield, who was in power. The tory foreign policy was ridiculed, and they were stigmatized by the liberals as "the party of bloodshed, glory and these" Jingo.' From the time of this election compaign.

which resulted in the defeat of the tories and the accession of the "peace party," Glad-stone's 1880 administration, the word "jingo" has been used to denote an individual or section of a party ready to rush, without mature consideration, into all the horrors of war.
