A critical survey of the local business situ

ation would fail to bring to light any very

important changes within the pass week or

trade has remained about stationary and

new features of imp rtance have not been developed. The jobbing trade of the city

may be said, upon the whole, to be in a very healthy condition and fairly satisfactory in

every respect, with the single exception that

the volume of merchandise moving is not

so large as many would like to see. The

consuming power of the people is still small cwing to the scarcity of money, and while

the present low prices for leading farm prod-

ucts continue there can be little change for

It is also the time of year when a light

trade is to be expected in a good many lines.

With an abundance of garden vegetables and

plenty of fruit in prospect, the country will not buy liberally of such articles as canned goods, dried fruits, etc.

Collections are slow, but no more so than they have been for some time.

CHICAGO STATISTICS.

they have been for some time.

CHICAGO STATISTICS.

Some one has observed that there are three classes of prevaricators—common, every-day liars, liars, and statisticians—an assertion which the average Nebraskan can appreciate after glancing over some figures that are being sent out from Chicago. The sample at hand is in the form of a folder, representing a map of the United States. Within the barders of each state are printed a column of figures showing its standing as compared with other states in the matter of farm products. The map as a whole is very instructive and is designed to show the resources of the territory tributary to Chicago, and will no doubt find a place on the walls of a great many offices in all sections of the country.

The Chicago statistician fails to state the source of his figures, but it is very evident that they were based upon the crop reports of 1894, the year of the drouth in Nebraska, and that is where the misrepresentation as regards this state comes in. While the figures are probably a fair statement as to the situation in that year, they do Nebraska a great injustice, as there is nothing to show but what they are averages covering a number of years. This state is represented as being twenty-third in the list of corn-producing states, when as a matter of fact there were only four states last year that produced more corn than Nebraska, namely, lowa, I linois, Kansas and Missouri. The same misrepresentation occurs throughout the whole list of farm crops.

CORN IN CRIBS.

days. In all departments the volume of

Do Nebraska an Injustice.

CLAIMANTS CONTEST A FICTITIOUS HONOR

The Undiscovered Means of Conveying a Sensible Image or Impression by Telegraph-An In-

terview with Prof. Bell.

(Copyright, 1896, by the Author.) Thereby hangs a moral. But first the tale. It had been some time since I had any news of the progress of Prof. Alexander Graham solution to this intricate problem of the Bell's endeavor to convey a sensible image transmission of images. I make this sugof the progress of Prof. Alexander Graham of impression by means of a telegraph wire, gertion seriously and commend it for conand I called to ask the professor as to his success. I did this, you understand, in all Prof. Bell's experiments along this line and was curious to know whether or not he would tale, but one with a point. be able to do for light waves what he had of a face just as through his telephone be

now does the sound of the human voice. Now Prof. Bell, it happens, is a Scotchman and has one of those healthy, lusty laughs that sound like a gust blown off the banks and braes of Bonnie Doon. Very much have made, and which has not been made to my surprise, my question excited one of | this day. these. When it had subsided Prof. Bell said to me: "I will tell you the history of a famous hoax."

With this the famous electrician said: details of the whole case. You may read it or I will tell it to you, just as you like." I suggested the latter, and this 's the profes-

sor's story: "You know the years along from '80 to '82 were star years in the electrical world. Then great things were being done, new discoveries were being announced almost every day, and others that had been made some little while before were then coming into general use. The telephone had been perfected and was spreading its network over the country was spreading its network over the country, electric light was beginning to supersede gas, telegraphers had found a way to send more than a single message over the same wire simultaneously, and people were talking of the day when the electric motor would run street cars and railroads, and do all sorts of things. Electricity was quite literally in the air.

THE ORIGIN OF THE HOAX. "It was slight wonder that with all the

marvels and miracles to be seen right under one's eyes, many attempts to do absurd things should be made, a great many absurd announcements put forth. To illustrate this, a newspaper paragrapher invented an item Chunk, Pa. or some other prosperous town, had found a way to 'see through a wire,' and had been able by this means to convey the image of a pussy cat and throw the picture on a screen before the delighted audience The paragraph was full of technical electric terms and of proper names, founded, like that of the alleged inventor, Dr. H. E. Lix

copied from one paper to another as the lat-est wonder in electricity.
"Now it happened just at the time that I

est wonder in electricity.

"Now it happened just at the time that I was at work upon a series of investigations looking toward the conveyance of sound by means of rays of light. I had fairly perfected an instrument for th's purpose, when I was compelled to drop my investigations for other work. It seemed to me cations for other work. It seemed to me discovery of some im
a discovery of some im
Catholic churches and convents in Quebec. discovery and I therefore filed a sealed package containing a full description, with illustrations, of my investigations, in the Smithsonian institute. Just why or how I do not know, but the fact of my having filed this package soon came out, and along with the paragraph concerning the wonderful 'Dr. H. E. Lix' and his discovery, went another

EUROPEAN SCIENTISTS CLAIM IT. "After traveling the rounds of the Ameritook their way over to England, and, as at happened, made their appearance together, the one following the other, in an issue o the English scientific publication, Nature. I think that the items must have been slightly garbled and rendered obscure, else the mistake which occurred could hardly have been made, but at any rate in the very next issue of Nature came an indignant letter from Profs. Ayrton and Perry assalling me in the most violent manner. As they had read the items, it was I and at the mythical Dr. 'H. E. Lix' who was claiming the discovery of a means of trans-mitting images by wire. But my glory was not to last long. Profs. Ayrton and Perry made haste to lift from my head my hard arned laurels and place them on their own They, not I, it appeared, were the real dis-

coverers of this marvelous process, and the them belonged the laurel and the crown. "Well as it took a fortnight or more for the English journal to reach this country, I remained in blissful ignorance both of the fact that I had claimed to be such a dis-coverer and that I had been thus ruthlessly shorn of my prize. Meanwhile the war went on. In the very next number of Nature appeared a second letter from another inventor or scientist, whose name do not now recall, claiming that he was the true discoverer, the first to have though of the great and valuable principle for the transmission of images by wire. If Prots Ayrton and Perry had been long before me in the discovery, he, in turn, had been long in the field before Profs. Ayrton and Perry. My memory is a trifle indistinct, but if I recall aright there were several other men of science who appeared to do battle for the credit of this great discovery, all of whom you will understand had hit upon the thing years and years before the man who had

made the last claim. made the last claim.

"Well, in the course of time the matter got out of the scientific journals and into the public press. The London Globe had a long article reviewing the case, which was afterward copied in a Boston paper, with the result that the matter came to the attention of American inventors and with a

like result to that produced in England. AMERICAN CLAIMANTS WRANGLE "In a leading scientific paper in New York Mr. Sawyer, now dead, and a very well known electrician in his day, came forward to say that upon such and such a time he made announcements of the discovery of the principle in question, which discovery it would appear by reference to the files of some paper, was made years be-fore that of Ayrton and Perry, years before any claimant who had up to date ap-

"This seemed to give a final quietus to the

peared in England.

case. But it was not to rest here. Following Mr. Sawyer's letter this scientific jouractual date of the marvelous discovery of a means to transmit images by wire would have soon retired to a period before the flood.

THE FACTS IN THE CASE. "All this you will understand was about VICTOR, Colo., May 30.—Robert J. Lyons, leader of the miners during the strike in facts. First: That I had never up to that

STORY OF A FAMOUS HOAX without, up to the present lime, so far as some unknown without, up to the present lime, so for an I know, achieving any result whatever.

"Nevertheless and in spite or these facts, regularly and about once a year the announcement is made by newspaper friends that my experiments in this direction are complete and that I should soon lay them before the public. Now, I will not say that I have never made any such experiments; in point of fact, I was forcel to take up the subject in sheer self-defense. It was obviously absurd that I should give the newspapers no justification whatever for retterously absurd that I should give the news-papers no justification whatever for reiter-ating the imminence of another great dis-covery which I was to make in the realms of electricity. But I have made no experiments whatever in the last four or five years, what-ever I may have done in the way of think-ing about the matter. Parenthetically, in view of all the discoveries which they have made concerning me. I has second. some scientific investigator the deration.

"But all this aside, the story which I ha related of the famous boax is one which h innocence of heart. I had been reading of always interested me, for beside its person of the claimants to this and that d scove or especially to some invention upon whi for sound waves, and transmit the image snother man has got a patent, whenever hear of the 'true discoverer' of the rays or of the electric light or the telepho story of the host of claimants who arose from me the honors of a discove which I had never even remotely claimed

has been only three weeks in this country. She was brought over here by Michael Cokinski, who was her lover in the old cour Cokinski, who was her lover in the old courtry, and who intended to marry her at the Polish church, the day being fixed for the wedding. Cokinski rented a house on Nort Wyoming street and furnished it to take his bride to as soon as the marriage ceremony was over. During Mary's little time in this country she met Stanley Binoski, a goodlooking young Pole, who was employed at the Cranberry Colliery, and both became fond of each other, a fact that was soon made known to Cokinski. Mary deeired to be released from her engagement, but Cokinski would not listen to it, as he had gone to considerable expense in the matter. A meeting of the rivals was held in Murces saloon, when Kokinski offered to sell his in tended wife to Binoski for \$250. Binoski said that he did not have that amount, but a newspaper paragrapher invented an item to the effect that a Dr. H. E. Lix of Mauch had. The offer was accepted, the money paid and the girl delivered to the purchaser. There was a large crowd present when Binoski and Mary were married,

two of the oldest and most important citizens (helix), upon electrical words.

"It would seem as though any one with Baillairge and Mile. Julie Tessier, each of a gleam of humor would have seen the evident satire of the paragraph. But no, it was taken with perfect seriousness, and was duly gaged to be married. Both were wealthy

CITY OFFICIAL NOTICES.

WABASH RAILWAY.

NOTICE OF THE SITTING OF THE CITY COUNCIL AS A BOARD OF EQUALIZA-TION.

NOTICE OF THE SITTING OF THE CITY.
COUNCIL AS A BOARD OF EQUALIZATION.
To the owners of the lots, parts of lots and real estate abutting on or adjacent to the streets, alleys or avenues herein named or situated in whole or in part within any, of the districts herein specified:
You and each of you, are hereby notified that the city council of the city of Omaha will sit as a Board of Equalization, at committee room A. In the city hall, Omaha, Nebraska, on Friday, the 5th day of June, 1886, from 9 o'clock a. m. to 5 o'clock p. m., for the purpose of considering and equalizing the proposed levy of special taxes and assessments as shown by "Proposed Plans of Assessment" now on file in the office of city clerk, and correcting any errors therein, and of hearing all complaints that the owners of property so to be assessed and taxed may, make; said special taxes and assessments proposed to be levied being necessary to cover the cost of the several improvements duly authorized to be made and now completed, as follows:

To cover the one-half cost of grading the alley north of Dodge street, from Thirty-eighth avenue to Thirty-ninth street, in block 3, Crescent Park, amounting to the sum of \$116.28, which sum it is proposed, by a report duly adopted by the city council, to assess on the real estate on both sides of said alley, pro rata per foot frontage, according to the usual scaling back process, in depth from the alley, as follows:

On north side, to center of block.
On south side, the depth of one lot.
Rate per foot, \$1.8168.
To cover the cost of opening and extending Nineteenth street, from the north line of Hartman's Reserve to Center street, amounting to the usual scaling back process, in depth from the street, as follows:
On east side, to Nineteenth street, from the south line of the S. Hartman's Reserve to Center street, amounting to the sum of \$1,050.14, which sum it is proposed, by a report duly adopted by the city council, to assess on the real estate on both sides of Thirty-sixth street, from Farnam street to t

Rate per foot, 30.46302.
The "usual scaling back process," to which reference is made in this notice, is as follows:
One-third of such pro rata cost upon the

The "usual scaling back process," to which reference is made in this notice, is as folicions:

One-third of such pro rata cost upon the one-sixth part of the whole amount of ground to be assessed first abutting upon the street line along said improvements.
One-fifth of such pro rata cost upon the second one-sixth part of the whole amount of said ground next adjacent.
One-sixth of such pro rata cost upon the third one-sixth part of the whole amount of said ground next adjacent.
And three-tenths of said pro rata cost upon the adjacent or remaining one-half of said ground.
You are further notified that said "Proposed Plans of Assessment" are now subject to the inspection and examination of any of the owners of said lots, parts of lots or pleces of real estate, or the inspection or examination of any other person interested in said proposed assessments, at the office of said city clerk, and that by a report of a committee of said council duly adopted it is proposed that unless for good and sufficient calise it may be otherwise ordered and determined that the cost of said improvements respectively be assessed on the several lots, parts of lots and pleces of real estate as shown by said proposed plans of assessment.
You and each of you are hereby notified to appear before said Board of Equalization at the time and place above specified to make any complaint, statement or objection you desire concerning any of said proposed levice and assessments of special taxes.

day, a sufficient explanation for light recelpts and a featureless market. Less than Years and Its Effect on Building Societies, 500 fresh cattle of all kinds were on sale and H. T. McClung, St. Paul; "The Best Methods they were practically all killing cattle. The condition of the trade could be summed up in a few words—it was a good, strong and active market on everything desirable. There were some big, coarse branded cattle in the yards and they were no more than steady. Every one was in a hurry to get through and the yards were soon cleared. The quality of the cattle was an improvement over yesterday, so that the sales show up much better on paper.

Two loads of pretty good helfers brought \$50, but that was about the extent of the offerings of butchers' stock.

There were no stock cattle of any account and nothing to make any test of the market. The past week has witnessed some dethey were practically all killing cattle. The of Paying Matured Stock," Seymour Dexter

source of his figures, but it is very evolunt from the that that the work that the work that the substant that its where the misrepresentation as regards this state comes in. While the figures are probably a fair statement as to the situation in that year; as partially to show that they are averages covering a number of years. This state is represented as being twenty-third in the list of corn-producing states, when as a substant of the state is represented as being twenty-third in the list of corn-produced more corn than Nebraska, namely, low, Illinois, Kamas and Missouri, In 1853 this state was ahead of Kansas in the yield of corn and in 1852 alone occurs throughout the whole list of farm crops.

CORN IN CRIBS.

All over the corn-growing belt there are scattered orths within which are stored hundreds of thousands of bushles of corn and produced of thousands of bushles of corn and the orthogonal produced of thousands of bushles of corn and cornel to the statement of H. C. Miller, a mount of corn held in that way is probably larger crop of new corn, the cribbers who have their money tied up are by near resting on easy seat. Cribbing corn activation of the produced of the craze, selling their corn of a large crop of new corn, the cribbers who have their money tied up are by near thousands of people in Nebraska, Jowas because Mr. Armour was doing so the crop of the craze, selling their corn activation of the produced that if Mr. Armour has a constraint of the craze, selling their corn and the cribbers, having been afforded by the fluctuations of the craze of the The past week has witnessed some de-ided changes in the matter of values on beef The past week has witnessed some decided changes in the matter of values on beef cattle. The week opened with a good, strong market, but large marketings at all points gave values a downward turn on Tuesday. Again on Wednesday the market was quoted lower, and it was easier on Thursday, the decline for the week amounting to 16@20c. Heavy cattle, especially those on the coarsish order, suffered the most, while handy little cattle experienced the least decline. Friday there was a decided improvement in the market and at the close of the week values are not far from where they were at the opening. The demand for desirable beeves has been good all the week and in excess of the supply, so much so that packers have been forced to ship in cattle from other markets. The only kind of cattle that have not met with ready sale were the big coarse cattle, which have been slow in all markets. Butchers' stock has been active and the offerings have met with prompt sale. Stockers and feeders have been in light supply all the week and the market has not been quite so strong as it was, but still the prices paid have been high as compared with fat cattle. Brown, assisted by the executive committee, are making complete arrangements for the accommodation for the league sessions that I had made a discovery of some imand the entertal mept of the delegates. THE IOWA LAW.

Iowa association managers are comewhat perplexed as to what will be expected of them under the new law requiring them to conform to certain fixed standards, make reporte to the auditor of state and submit to examination. The law is a pretty strong one, and it will require every association organized in the state to change its plan of business. Nearly all will have to reincorporate, and there is scarcely one but has some objectionable or weak feature that will be weeded out. The law goes into effect July 4, and the associations have sixty days after then to comply with it. The law expressly prohibits all manner of wildcat or risky business and brings everything out where the associations will not be allowed to loan money on anything but real estate or stock of the association making the loan. Foreign associations will have to put up \$100,000 in securities with the auditor of state to pro-tect the Iowa stockholders before they will e allowed to do business in Iowa. No asociation will be allowed to do a banking sociation will be allowed to do a banking business, or to receive deposits and pay in-terest thereon. State Auditor C. G. Mc-Carthy is president of the largest building and loan association in the state and be is giving his personal attention to preparing for the enforcement of the law. Charles E Walters, a Council Bluffs banker, has been appointed examiner and is now engaged i

reparing the blanks. ASSOCIATION NOTES. It is quite an ordinary matter in these days for a man or woman who has been foolish enough to pay a high premium in an ssociation to transfer the mortgage soon afterward to some association where pre nium paying is not so much of a burden. The prospective home-owner learns very quickly, as some boards of management know, and many home-seekers prefer the low rate, even if the association with a high

The annual report of the building and load associations by the state auditor of public accounts of Illinois shows that thirty new asfociations were chartered during the year, twenty surrendered charters and two went into the hands of receivers. Seven dred and forty-two are doing business. Seven huncelpts of these during the last year aggregated \$46,305,969,96; miscellaneous disburse ments, \$1,412,045.03; total assets, \$82,639. 258.24: total surplus, or profit, \$17,780,821,24 hundred and twenty-five shares were issued, 60,798 matured, 636,445 withdrawn, 165,343

member, who through perhaps unfortunate circumstances is behind in his payments, shall be allowed to continue in possession of the property is a vexed one among the boards of directors of some co-operative boards of directors of some co-operative building and loan associations. It is the building and loan associations. It is the consensus of opinion among several directors that no hard and fast rule can be laid down in regard to the time of beginning foreclosure proceedings; that each case should be considered independently on its interest the discussion to say that, highly down in regard to the time of beginning several years before the date assigned by the should be considered independently on its latter for his discovery, a young man of merits. These men contended that a little merite. These men contended that a little sentiment can be wisely exercised in some instances, and that the association will be the gainer in the end. On the other hand, officers of not a few associations believe that business methods, pure and simple, should always be the rule; and that the constitution should prescribe certain rules in regard to delings and there whether the discussion died down at this time or not. In all probability it did, for it is clear that had it continued, the tion should prescribe certain rules in recourse, cannot be deviated from.

Liverpool Markets.

Liverpool Ma

5c. The demand on the part of local buyers was good, and the most of the offerings changed hands early. The close was weak owing to a reported heavy decline at eastern markets. Heavy hogs soid largely at \$2.50, and mixed at \$2.55, the bulk of all the hogs selling at \$2.502.55, as against \$2.502.50 yesterday.

The tendency of the market on hogs during the past week has been downward. While the decline has carried the market to the lowest point in the history of the yards, the falling off in values from a week ago was not large. On Monday hogs soid at \$2.5022.12½, but principally at \$2.0022.05. By Wednesday the market had dropped to a point where the bulk of the hogs soid at \$2.5022.25. On Friday there was a slight recovery, but the market fell back again on the list day of the week. The demand has been good, and in spite of the downward tendency of values the market his been active on most days and all arrivals have met with ready sale. Representative sales;

"I do," replied the young man.
"And do you take this man to be yo
wedded hurband?" continued the minister.

Smuggled the Officer Aboard. SAN FRANCISCO, May 30.—When the ship Aryan sailed for New York Thursday, Chief Officer St. Clair, who has

Murdered by an Unknown doubt not, been at work on this problem while walking on a surburban street,

PALL RIVER, Mass., May 30.—The movements in the print cloth murket during the week had rather a depressing effect. The manufacturers were slow to meet the demand for goods at 2 9-16c, and buyers lost in the sarly dealings. Later they substituted 2½c for 2 9-16c in their bidding, and the demand was light. After a day's waiting, a few spot regulars were sold at 2½c, establishing the market once more at rock bottom prices. The sales were light, however, and a moderate demand at 2½c continued, which the manufacutrers did not meet. The prospect for an improvement in prices is not good, owing to the drag of the heavy stock. All the sales of regulars during the week were spots, and most of the goods sold were spots. The market is steady at 2½c, and the demand is quiet, with almost no opportunity to tuy. The stocks of odds fell off a few thousand pieces, and regulars gained accordingly.

Foreign Financial. It was only a little while ago that eggs were about the lowest article in the produce list, but now it is poultry. Old fowls are very low and are slow sale at any price. A good many are coming, while the demand is extremely light. Spring chickens have also declined during the week. Quotations:

EGGS-Choice stock, 8c; slow.

BUTTER—Common to fair, 7@9c; choice to fancy country, 10@12c.

VEAL—Choice fat, 80 to 120 lbs., are quoted at 7@74c; large and coarse, 4@5c.

CHEENS—Domestic brick, 13c; Edam. per doz., \$3.50; club house, 1-lb. Jars, per doz., \$3.50; club house, 1-lb. Jars, per doz., \$3.50; limberger, fancy, per lb., 13c; Roquefort, 1-lb. Jars, per doz., \$3.50; lwins, fancy, 114c.

POULTRY—Live—Hens. 5@514c; cocks, \$54c; spring chickens, 12@13c per lb. for weights running from 14, to 2 lbs., springs, under 1-lb., very duil.

HAY—Upland, 46; midland, 55.59; lowland, 55; rye straw, 14; color makes the price on hay; light bales sell the best; only top grades bring top prices.

HOGS QUIT AT THE WEEK'S LOW POINT

still favorable in weveral particulars. The exhibit does not inchoon the total operations of the week, the withdrawals for Saturday's gold export having been made after the average had been computed. The expansion of loans was \$1,756,000, and although this total is not as large as might have been existed, it probably reflects more mercantile Thriand, as Stock exchange business was almost plagmant. The decline in money rates probably accounts for the expansion in part. The fitterior receipts have been quite large during the week. The deposit total, however, as was the case with other items, does not reflect artural conditions. Taken as a whole, the statement is better than earlier indications. The total receipts of the New York banks are now signify in excess of \$22,000,000, or about half of the amount reported for the corresponding week that year. The total deposits are 800,000 less and boars are \$27,000,000 lower than for the corresponding week in 1895. The banks have gained, about \$12,000,000 in gold during the present month, but still hold \$15,000,000 less than on February & just before they began to turn gold into the streamy for bonds.

CO-OPERATIVE HOME BUILDING.

Preparations for the Annual Meeting of the Netional League.

The fourth annual meeting of the National League of Local Loan and Building associations will be held in Philadelphia, beginning July 22, at 10 a, m. The prospects are for the largest attendance in the history of the league. Very wisely the date of the meeting has been placed in the vaca-tion season. The delegates appointed from the different states will combine business with pleasure, making their attendance upon

represented for the first time. Kentucky, Wisconsin, Maryland and Texas will be in

the work and has several sketches before him which come near his idea.

present date. The question of how long a borrowing

a leader of the miners during the strike in tacts. I can recall, made any exstruction of the Strong mine shaft house, was welcomed back to the camp last night by 2,500 people with a brass band on his return from the penitentiary, a pardon having third and finally, that the discovery of a third and finally, that the discovery of a struction of the Strong mine shaft house, turn from the penitentiary, a pardon having been granted him. Mayor Doyle made a means to do just this thing—to transmit apeech of welcome. The miners, to show images by wire—has not yet been made, their good will, set fire to the celebrated Fort Dean, on Bull Hill, and it was entirely ventors and clever investigators have. I
