Dr. Treynor called up a matter that the delegates from the Third ward had been instructed to present to the convention. It was in the form of a resolution which declared;

Resolved. That the chairman of the city central committee he selected by the chair-men of the several ward precincts, at a meeting to be called for that purpose, im-mediately after the annual March elections. There was some disposition to criticioe the resolution for the teason that it took the selection of the city central committee-man from the convention and gave it to a few men. Advocates of the measure pointed out the fact that it was bad policy to "trade horses in the middle of a stream." and that it was bad to displace the commit-teeman who had worked up the campaign for the previous year, for he was always the most competent to manage it to the end and would be successful where a new man would e handicapped by his unfamiliarity with the vork and the situation. The convention saw

the force of the argument and adopted the resolution.
The men nominated last night are particularly well qualified for the positions to which they aspire. Mr. Sayles has been a resident of the city for nearly a quarter of a century. For many years he has been em-ployed at the transfer as ticket agent. He is clean, bright and vigorous. The accident happened about the middle of the afternoon, and was due to the care-lessness of the men and the disregard of the orders of Mr. Wickham. Since the river has been frozen over Contractor Wickham has been using the ice bridge for his teams engased in hauling the slag from the smelling works for use on the Lower Broadway paving. The unloaded wagons have been cross-ing on the ice and using the motor bridge when laden with the heavy material. Contractor Wickliam took every precaution to insure the safety of the men and teams, and went to the expense of constructing a piling bridge over a portion of the channel. The teams have passed over this bridge and the ice more than 1,000 times. At the first of the week the ice began to show evidences of The republicans of Council Bluffs have weakness and Wickham issued an order for at the approaching city election on the first face of the ice. THE RESERVE OF THE PARTY OF THE The hearing of the case brought by Mary McGuire of Denver to recover \$150 loaned to Peter Lenagh, city garbage master, occupied portion of the time of Justice Agnew yes-

The deposition goes on to assert that Miss McGuire lived in Omaha for five years, she leaving here in July, 1896. She first met Lenagh in Roslyn, N. Y., seven years ago and at one time was engaged to be married to him. Upon two occasions she leaned him money, once saying high his head till in

Miss McGuire further asserts that Lenagh has never paid back the amount loaned or any portion of it. In 1895 she made a demand for the money through Rev. Mr. Mc Devitt, and Lenagh promised the priest that he would pay the amount. Again in June, 1896, she made a demand and was promised a settlement August 1, but it was never made. Example in Cattle Feeding.

M. A. Danforth, a prominent merchant and cattle feeder of Elencoe, Ia., was a visitor at the stock yards yesterday, and in a conersation asserted that the cattle feeder was taking less risk as well as investing less money in buying high-priced feeders with orn cheap than in buying cheap feeders with corn dear. In substantiating his assertion Mr. Danforth takes an example as follows: One feeder, 1,000 pounds at \$4.25, costs \$42.50 This steer is fed 100 bushels of corn, at \$ cents a bushel, cost \$9, making a total of \$51.50. On the other hand a steer weighing .000 younds at \$3.25 would cost \$32.50. Feed ushel and the cost of the feed is \$30, making a total investment of \$62.50. Further, it is asserted that the outlay, labor and transportation being the same in both cases, the getting ready for market is in favor of the high priced feeder with cheap corn, and if marketed at the same price will not the farmer the most money, although not the highest price per bushel for his corn. Coninging, Mr. Danforth asserted that a farme ould afford to haul 30-cent corn to market while he cannot do so at present prices. If his time and labor are worth anything. Through the medium of feeding live stock the farmer can obtain a satisfactory price for his corn, even though feeders are high, as they usually are at this market.

Thirty-Three Per Cent Basis Accepted Without a Murmur by Its Former Opponents ... Anti - Fusion Bill is Passed.

DES MOINES, Feb. 18 .- (Special Telegram.)-The house and senate ways and evening to consider the basis of valuation of property under the new revenue law. The senate committee had decided on 331/4 per cent and the house on 100 per cent. The present valuation is about 20 per cent of real values. It was expected the meetwould only serve to accentuate the differences between the two committees, but the event proved the points. They urged that a valuation of 100 per cent would make it impossible to find moneys and credits, which even now almost escape taxation, while under the 3212 cent. The senate had concluded that the 100 per cent plan would increase the already incequitable burden borne by real estate.
