THE DEMAGOGY OF A FENCE.

There are political fences just as there are fences for pickpockets, burglars and thieves. The fence that conceals stolen property is a harbor of refuge for professional crooks...

The attitude of the Omaha World-Herald toward the recent prosecution and conviction of ex-Treasurer Joseph S. Bartley affords a striking illustration of the demagoguery of the political fence...

Every wolf in sheep's clothing exposed by The Bee has invariably found sympathy and support from this political fence. When the legislature impeached the state house officials all the ingenuity that the World-Herald could muster was employed to create the impression that the penitentiary gang were the victims of malicious persecution...

All railroad newsboys are supplied with enough Bees to accommodate every passenger who wants to read a newspaper. Insist upon having The Bee. If you cannot get a Bee on a train from the news agent, please report the fact, stating the train and railroad, to the Circulation Department of The Bee. The Bee is for sale on all trains.

INSIST ON HAVING THE BEE. PARTIES LEAVING FOR THE SUMMER. Parties leaving the city for the summer should have The Bee sent to them regularly by notifying The Bee business office in person or by mail. The rates will be changed as often as desired.

Calvary howling is not the kind of patriotism that the people appreciate. Among other lines of improving trade the Florida filibustering business seems to be picking up perceptibly.

The railroads seem to be working the threatened rate war racket for all the free advertising they can get. Weyer ought to have learned from experience that Cuba is hardly the ideal summer resort a Spaniard would choose.

The telegraph and cable companies would not object to having some European jubilee occasion happen every day of the year. It will be Senator Hanna or a democrat as Ohio's representative in the next United States senate, with the odds long on Mr. Hanna.

Hon. J. Sterling Morton ought to be glad and proud that Arbor day escaped the late general slaughter of legal holidays in Colorado. It is to be noted that only poperaotic papers are dealing in the fictions about the impending disruption of President McKinley's cabinet.

At the jubilee celebration in London the Americans, as usual, seem to be distancing all competitors in lavish expenditure of money. The conviction of Bartley ought to go a long way in re-establishing confidence in Nebraska and strengthening the state's credit abroad.

Some of the southern senators are anxious to have cotton ties on the free list. But they prefer to steer clear of hemp ties altogether. The American eagle is taking deep, long breaths these days preparatory to emitting an ear-splitting patriotic shriek on the Fourth of July.

It is expected that the intercollegiate races of this week will immensely stimulate the interest of the people of the United States in educational pursuits. The reorganization of the police force under a vigilant and experienced chief is still one of the reforms Omaha looks for in the dim and distant future.

Ex-confederates who continue to proclaim that they have no apology for the past should remember that they have not been asked to make any—at least not recently. The latest device of the railroads to prevent scamping of excursion tickets is known as the clock ticket. A man traveling on a clock ticket must be sure to make good time.

The British postal telegraph office must have used during the past week more special royal telegraph blanks for the transmission of the queen's message than for the whole year preceding. The Bonneau case long ago attained a prominent place in the history of church contentions and the end is not yet. The findings seem to be still good for several trips back and forth across the Atlantic ocean.

There is no reason why the appeal of the Bartley case to the supreme court should be allowed to drag on indefinitely. One example of prompt justice has more effect as the preventive of further crime than a dozen examples of long-drawn-out punishment.

THE OMAHA DAILY BEE: THURSDAY, JUNE 24, 1897.

Every man, woman and child who has the interests of the exposition at heart should use the utmost endeavor to secure as many national conventions as possible for Omaha during the summer of 1898. No effort is too feeble to be neglected, and any chance exertion may be the last straw which will break the back of opposition.

There is some pretty vigorous anti-trust legislation on the statute books, both state and national. If those laws were energetically enforced by the law officers and reinforced by the courts it might not be necessary for congress to spend time on the trust problem for a little while at least.

Brook Chapman has the consolation of playing the martyr for all seven of the recalcitrant sugar investigation witnesses. It was his fortune—good or bad—to catch the only pertinent question that was asked of any one during the whole senatorial inquiry.

Compare The Bee's cable dispatches descriptive of the queen's jubilee with those of its would-be rivals and see which is the greatest and the best newspaper in the transmississippi region. If ex-Treasurer Bartley could be persuaded to exhibit the L. O. U's, which constitute the \$500,000 deficit in the state treasury he would create quite a sensation.

Helping the Seneca's Gateway. No sooner has the alrship departed from public view than K.ley's motor lobs so suddenly. The Seneca's hole mystery should be again due in the near future.

As Good as Dead. A paper published in Mexico says that there are no polities in that country, and that as a result everybody is prosperous and happy. A nation without politics is apt to be more so dead, but long as it does not know it, what's the odds?

Canadian Retaliation. The latest bill of the re-annexationists in the dominion House of Commons forbids an alien to hold or acquire any timber lands or mining lands or to cut timber on public lands or to be a director in a mining company. If Canada really does not want American capital invested in her industries we can use it on this side.

Pinching Mosher's Hackers. Ex-Banker Mosher of Lincoln, Neb., is living in fine style in Chicago while the stockholders of the bank he once owned are being driven into his pockets to make good the losses of the depositors. In accordance with the new policy adopted by the controller of the bank, the Mosher hacks are to be liquidated.

Chasing Mythical Claims. The annual report made that certain Americans who believe themselves to be descendants of Sir Francis Drake have formed an association for the purpose of presenting a claim to some wholly unowned territory in Louisiana. It is clear that some thirty persons have not formed an association to do anything of the kind.

What Greece Must Pay. Five million pounds Turkish, or, in round numbers, \$18,000,000, is said to be the ultimate price to be paid for the island of Crete. In view of the condition of her finances it is difficult to understand how even that sum is to come from; but the Greek government is endeavoring to do the things, particularly the disgraceful attitude of the powers, throughout the whole affair, Greece will get off very cheaply if she has to receive nothing more than \$18,000,000.

Annexation and Complication. The treaty for the annexation of Hawaii provides that when the islands are ceded to our shores, there shall be no retrocession of territory to the Hawaiian people. Here is the beginning of countless inconsistencies and complications which will follow the ratification of the annexation Hawaii would be a part of the territory of the United States, and yet a large element of our population—for all the Hawaiian people would then be our population—would not be permitted to go from one part of our territory to another. No restrictions, however, are to be placed upon the movement of our citizens into Hawaii, the Japanese, the Portuguese, the Kanakas and the lepers.

Mexico Toots Its Horn. There are, happily, no politics in Mexico to write about. Partisanship lies dead; factions are dumb; the people are all patriotic, and are addressing themselves to improving their fortunes. Nobody talks politics because, luckily, Mexico has none to speak of. A businesslike administration is attending to the needs of the people, and the good of Mexico and all of Mexico. General Diaz takes an impartial interest in the affairs of the whole country. He has said he will do his best to bring about the good of Mexico of the future. We all wish that in might, for it will be his great monument, a modernized, prosperous and contented nation.

There being no office-seeking on a huge scale here, no tinkering of tariffs, no up-starting of local politics, newspaper men have a look for something to write about. Public improvements, new charters, the growth of the gold and silver mining industry, the new industrial and the new energy of waterfalls to distant points and other profitable and comfortable things. We do not have to occupy space every day with the news of the death of some man, the president's mission yesterday urging his "claims" to the mission to Belgium, or the consular partnership at Yokohama. Thank heaven, the president of Mexico has something more useful and important to do.

Deserting The Democrats. Populists of Maine Take the Middle-of-the-Road. Another proof of the instability of political alliances is furnished by the fact that the populists of Maine are deserting the Democrats and running into the middle-of-the-road camp with Tom Watson. This action of the populist organization of one state is a measure foreseen and approved by the action of some populist representatives. On the point of deserting the Democrats has come to a test in congress the republican party has had the aid and support of the populists. It is not to be expected, therefore, that the populists will desert the Democrats in the last campaign. The action of these men has made it extremely doubtful if, in the event of victory, the Democrats will have been able to keep the pledges made to the people.

In the face of the sacrifices made by the populists in the last week has received a considerable number of requests for small notes in unusually large quantities. This inquiry was entirely unexpected and it is confidently regarded by treasury officials as an indication of improving business conditions. At least once a year the treasury needs department is flooded with requests for small notes which are needed for the movement of their crops. Rarely, however, has the inquiry been earlier than the 15th of the month of July, and therefore it is assumed that the call for notes of small denominations is not in anticipation of the movement. It has become a general rule, however, particularly in the south, that treasury officials ascribe it to renewed activity in general business.

Calhoun Offered a Place. WASHINGTON, June 23.—W. J. Calhoun of Danville, Ill., late commissioner to Cuba, has been offered the office of controller of the revenue for the district of Columbia. He will probably accept.

Confessions. WASHINGTON, June 23.—The senate today confirmed W. W. Montague as postmaster at San Francisco and Philip Gallacher as commissioner for the district of Alaska.

PROTEST MADE IN EARNEST

Japan Has Decided Objections to Annexation of Hawaii.

QUESTION DEMANDS CAREFUL HANDLING Foreign Relations Committee Will Not Report on Treaty at This Session of Congress. Committee Proceedings Secret.

WASHINGTON, June 22.—The Hawaiian annexation treaty formed the principal topic of consideration by the senate committee on foreign relations at its brief session today. The treaty and accompanying papers were read and referred to a subcommittee consisting of Senators Davis, Foraker and Morgan, with instructions to investigate the entire question and report to the full committee. The papers read included the protest made by Japan against the annexation. The document did not call out much comment, but all that was said was of a character to indicate that the members of the committee did not regard it as likely to lead to serious complications, though requiring the most respectful consideration. The subcommittee will consider all the complications likely to grow out of annexation, including those referring to the trade relations of the islands. This will involve a study of all of Hawaii's treaties with other countries. The inquiry needs a full and careful consideration, and no effort will be made by the full committee to take the subject up until the subcommittee has had time to report on all the details. The realization of this fact has led the members of the committee to conclude that it is improbable that the committee as a whole will be able to report on the subject during the present session. The complexity of the committee is believed to be eight for ratification and three against it. There is a possibility that the number of those for it may be increased to nine.

The protest from Japan in connection with the Hawaiian treaty, which was received by the senate committee on foreign affairs today, is considered in a more serious light than was at first made apparent, and the committee took exceptional precautions to read the protest to the senate. The protest was received as almost an ultimatum on Japan's part to the effect that the treaty must not be perfected. It is not a protest against the ratification of the treaty, but against the document, and against the document itself, or rather against the transaction as being imposed to Japan's interests. The specific reason alleged for the protest is that the communication of the agreement between Hawaii and the United States would have the effect of destroying the trade relations of the North Pacific and nullify treaty rights.

PROTEST VERY DEFINITE. The protest is in such definite terms and is directed so squarely at the transaction as to cause the committee to feel that the entire matter should be handled with the utmost care and consideration. It is not a matter which complications of a serious nature can be avoided. While there is no disposition on the part of a majority of the committee to invest in the treaty, the friendly relations which have always existed between Japan and the United States call for great care and consideration in proceeding with the matter. Hence the appointment of the subcommittee to consider all the details, the decision to keep the proceedings secret, and the decision to report on the matter during the present session of congress.

With reference to this latter point it may be stated as extremely probable that the matter will be held in abeyance by the committee until congress convenes in regular session next December, for the double purpose of permitting the committee to make a more complete study of the matter and to permit the executive to exert its best efforts through the use of diplomacy to persuade Japan of the unwisdom of the protest. It is believed that the committee will not be able to report during the present session of congress.

With reference to this latter point it may be stated as extremely probable that the matter will be held in abeyance by the committee until congress convenes in regular session next December, for the double purpose of permitting the committee to make a more complete study of the matter and to permit the executive to exert its best efforts through the use of diplomacy to persuade Japan of the unwisdom of the protest. It is believed that the committee will not be able to report during the present session of congress.

It is believed that the committee will not be able to report during the present session of congress.

THE POSTAL CONGRESS.

Practical Character of the Work Accomplished. The universal postal congress, which has just closed its session in Washington, is believed, the most widely inclusive body ever assembled in the history of the world, now has received the adhesion of all civilized nations; for of the three outside at the beginning of the recent session of the congress, only one, the United States, had not given its adhesion, while the other two, China and the Orange Free State, announced their purpose to conform to its regulations as soon as practicable.

This assembly, although so extraordinary in its representative character, has done its work in a quiet and business-like way, doubtless attracting less public attention than some similar bodies do not thoroughly international and far less able to enforce their conclusions in all parts of the earth. The conservative character of the congress has been indicated by the small number of proposals of many radical and far-reaching changes suggested before it convened. On the other hand, its record of accomplished work is sufficient to justify the coming together of delegates from all parts of the world, and its work has been of a practical character with reference to mercantile uses.

It is provided wisely that the Postal Union congress shall meet only once in six years, and that the burden and cost of attendance shall be borne by the member countries, less one-fourth of the cost of the general assembly, which is to be held in the country of the host.

PROTECTION BY BOUNTY. The export bounty on sugar, which has been a subject of much discussion in the senate committee on foreign relations, is believed to be a measure which will be adopted by congress in the near future.

PERSONAL AND OTHERWISE. The unveiling of a statue to Marquette in the city of Chicago, which has been a subject of much discussion in the senate committee on foreign relations, is believed to be a measure which will be adopted by congress in the near future.

ROYAL MAIL SERVICE. The royal mail service, which has been a subject of much discussion in the senate committee on foreign relations, is believed to be a measure which will be adopted by congress in the near future.
