STRINGENT MEASURES USED AT BILOXI

Every Possible Effort is Being Put Forth to Prevent the Spread of

government and Mississippi authorities in Springs and Biloxi. Deep interest has neturally been felt here in the outcome of the Occur Springs this morning. Under instructions from the superintendent of the Louisville & Nashville, Dr. Guiteras was put off Mileage and Per Diem-F. Weaver, Lynn, in the woods a couple of miles from Ocean Mass.; J. F. McElroy, Bridgeport, Conn.; E. Springs. It was not long thereafter before the doctor ran up against the quarantine trochs and the distinguished visitor had fully establish his identity before he was permitted to run the line. On his arrival in Ocean Springs Dr. Guiteras went immediocean Springs Dr. Guiteras went innered at the state of t and in answer to an inquiry he said he hoped to be able to wire the result of his examination to Washington this evening. In the meantime a correspondent wired to the city that he had learned from a source that could not be doubted that Dr. Guiteras was satisfied, after his examination, that no yellow fever had existed or did exist in Ocean Springs. The local physicians are not prepared to say what an opinion of Dr. Guiteras, counter to that expressed by the other experts who declared the fever cases they in-vestigated were yellow fever, would have.

CASES AT OCEAN SPRINGS. A thorough canvass of the wards of Ocean Springs completed late this evening shows there have been 748 cases of prevailing fever since July 8. There are now thirty-seven still sick. The total deaths have been nine tificates show the fever was complicated with other diseases. There are believed to have been only two deaths due to yellow jack. At the suggestion of Dr. Gant every house where there had been sickness or there is now, is being fumigated. Dr. Gant says whether the prevailing disease is yellow fever or low malaria it is certainly conta-

and Ocean Springs mail were completed to-day. The railroad managers sent over a mail train today and the pouches will be taken by trains both ways after the bags have After Dr. Guiteras has completed his investigation a quarantine detention station will be opened. Those who are ill will be detained at the station unthey are considered worthy to be given clean bills of health and will then be per-mitted to go to their homes. There are mitted to go to their homes. There are sixty-five residents of New Orleans who are tied up in Ocean Springs anxious to get away

d some fifteen from other points. As indicated by the difficulty Dr. Guiteras had in getting into the Springs, quarantine is being very strictly maintained. Fisher-men and hunters who were out of town when the cordon was established have not been permitted to return. Armed men are posted in every direction and Ocean Springs seems to be determined that no more sickness of any kind shall be imported within its horders. The cases are very rare wherein the gauntlet has been run and generally the guards have made no discrimination as between rich or near the property of the receiver that special ination as between rich or near the second special seems of the receiver that special corders be given concerning the burning of the receiver that special corders be given concerning the burning of the receiver that special corders be given concerning the burning of the receiver that special corders be given concerning the burning of the receiver that special corders be given concerning the burning of the receiver that special corders be given concerning the burning of the receiver that special corders be given concerning the burning of the complaint sets forth and the use of coal in the engines. nation as between rich or poor, white or black. There is a law in Mississippi against the violation of quarantine laws. Usually in yellow fever epidemics however, at usurities law, enforced by the shotgun, obtains, and that is the law which is now in effect about Ocean Springs and Biloxi.

SITUATION AT BILOXI. Biloxi people are not absolutely convinced there is yellow jack at that place. Dr. Harrolson has so pronounced the cases, but when he has completed his investigation at Ocean Springs Dr. Guiteras will be asked to visit Biloxi and determine positively whether Dr. Harrolson has correctly diagnosed the cases. Until a report is made by the hospital expert the Biloxi people declare they will not be satisfied. Whatever the fever is, it has a good effect, for on all hands residents are carrying into effect Mayor Howard's recommendation to put their homes in proper sanitary condition and to abstain from congregating anywhere in crowds. This morning the three patients at Biloxi were doing well and it was thought they would recover. Their homes have been completely isolated and thoroughly disin-

Some 750 people were brought to New Orleans by the morning trains from the coast. There were very few passengers on the evening trains and both Pass Christian and Bay St. Louis have been depopulated so far as summer visitors are concerned. All were discentinued today and through trains will do whatever local business is necessary while a special is always at the disposal of officials who are interested in stamping out the fever at Biloxi and Ocean Springs. The Louisville & Nashville officials believe that the federal and state officials will soon wipe

Baton Rouge, the state capital, is the latest town to declare quarantine. Business men who had shipments to make to the state capitol this evening learned that orders had peen issued not to let the New Orleans trains stop there and the express people had been further instructed that they would not be permitted to toss packages as the train went flying through Baton Rouge. Even the afterpapers were tabooed and the publishers notified that their papers could not be delivered at the capital.

REVISE THE FRENCH CONSTITUTION Attempt to Modify Office of President of the Republic

LONDON, Sept. 9 .- The Daily Chronicle's Paris corespondent says that a startling attempt to revise the French constitution is contemplated. The national assembly is to be convoked at Versailles to consider a plan for the modification of the office of the president of the republic.

The Chronicle in an editorial says: "If the foregoing is verified, it is evident that an attempt will be made to take advantage of the visit of M. The temperature yesterday was a few degrees cooler than on the day before, but the As Many More Are Injured, Most of Them difference was not appreciated by the public, for a fierce wind blew from the south all day and what the thermometer lacked in indications of heat was more than made up by the general discomfort of the wind. Uncle Sam's weather prophets have rallied for au-other attack and again say that there will be cooler weather with showers for today.
