MANDERSON ADDRESSES THE MEETING

Urges the Necessity of Reciprocity, Declaring that with Millers it is the Golden Rule of Trade,

The regular annual meeting of the Ne braska State Millers' association was begun yesterday afternoon in the parlors of the Commercial club, with a fair attendance of delegates. The program arranged was nearly completed and the association hopes to finish Its deliberations and adjourn by noon today in order to take in the State fair this after-

Previous to the formal opening of the convention the delegates gathered about noon in the pariors of the Commercial club by invitation. There they were invited to partake of a luncheon, which was provided by the Bemis Omaha Bag company. At the conclusion of the dinner the program that begun while the delegates were still seated about the tables. President N. B. Hendall

Mayor Moores made a brief address, in which he extended a hearty and full wel-come to the visitors. In the course of his remarks he commented upon the 40,000,000-bushel wheat crop of the state this year, selling in the markets of the world on an equality with that of every other country and state. In the absence of S. S. Hadle of Cedar Rapids, President Kendali responded briefly for the association.

MANDERSON ON RECIPROCITY General Charles F. Manderson delivered an extended address on "The American Miller and Reciprocity." - He explained the principle of reciprocity, speaking of it as the golden rule of trade. He asserted that there was no other industry that was concerned in the maintenance of the principle more than the milling trade. In support of this statement he cited census statistics to show the magnitude of the trade. In 1890 alone \$573,971,000 was paid out in labor and material. But even despite the size of the industry, the speaker maintained that it would be twice as great a better market were offered. This could created under reciprocity treatics with Blake other countries. In support of this position General Manderson quoted figures to show that after the reciprocity clause had been put into the McKinley tariff bill in 1891 the flour G. Eubanks. Wilson tariff bill in 1894. In the year after Marsh, A. J. Johnson.
the latter law went into effect the export Seventh Ward-J. W. Logan. H. Barnes trade was 4,000,000 barrels less than the year before. This meant a less of \$16,000,000 and a trade sufficient to keep 133 mills with a ple, Dr. C. F. Clark.
daily capacity of 100 barrels each was destroyed, General Manderson in conclusion predicted that in view of these facts, which
could be duplicated in other industries, the
F. Erickson. American people would not again depart from a protective and reciprocity policy,

S. Wright Butler had as his topic "The Dusties," and delivered a characteristic address, in which he dwelt upon the impor-tance of the miller. He held the millers in regard for two reasons—first, because the human race depended on them from the time that each individual left his or her mother's arms, secondly, because the millers were in a great measure responsible for the elevation womanhood, in that they had appropriated trade at which in olden times, according to the bible, women only worked, GETTING DOWN TO BUSINESS.

At the conclusion of the addresses an adjournment was taken to the parlors, where the business session of the association was opened by President Kendall, who also de-livered an address. In this he stated that the growth of the association during the year had been moderate, but solid. He dwelt upon the condition of the milling trade in the state and spoke upon the prospect of fu-ture development. He stated that a larger port trade could be built up if satisfactory freight rates could be secured and if the miller contented himself with small profits. good exhibits be made at the coming Trans-

The minutes of the preceding meeting were read and Secretary O. C. Holmes and Treas-urer A. L. Johnson of Crete read their annual reports. Reports of committees were

President Kendall of Lincoln, chairman of the committee on railroad rates, reported progress. He said that a request has been made of the principal railroad companies to adjust the rates in the state, but the latter have as yet failed to meet to consider the matter. The millers maintain that flour can be shipped into Nebraska at a lower rate than the state millers can secure in shipping about or out of the state. This is tending to limit trade to the immediate vicinity of mills and has made export trade impossible. It is contended that with a rate, pro rated according to that given to the millers of other states into Nebraska, the Nebraska milling trade can be greatly increased. The report was accepted and the committee was con-

tinued in service. The committee on fishways and irrigation as relates to water power reported through Chairman D. M. Deane of Seward that little progress had been made as yet to remedy the complaint which the committee was ap-pointed to investigate, namely, that irriga-tion is depriving mill owners of water power y drawing away the water. Chairman O. C. Holmes of the committee

on exhibit at the Tansmississippi Exposition announced that application had been made to the Nebraska commission for space. A further report is to be received today. TRADE PAPERS READ.

The following papers were then read "Advantages and Benefits of Joining the Ne-braska Miliers' Association," by C. L. Mellenz of Wahoo; "The Way to Make a

NO SLEEP FOR THREE MONTHS

Mr. Wm. Handschu of 56th St., Cotton Alley, Pittsburg, Pa., expresses himself as follows regarding the new remedy for that common and obstinate disease, piles: "take pleasure in stating that I was so af flicted with piles that for three months I got no regular sleep; I becme completely prostrated, the doctors did me no good; my brother told me of the new remedy for piles, the Pyramid Pile Cure; I purchased from my druggist three 50 cent bottles and they completely cured me. I am once more at my work and but for this excellent medicine I should be on my back. I take great pleasure in writing this letter because so

many people are sufferers from this trouble who like myself did not know where to look for a permanent, reliable, safe cure.

Experience with the Pyramid Pile Cure in the past three years has demonstrated to the medical profession, as well as to thousands of sufferers from piles, that it is the safest and most effectual cure ever offered to the public, containing no opiates or poisons of any kind, painless and con-venient to handle and being sold by drug-gists at 50 cents and \$1 per box, is within the reach of every sufferer.

Very frequently two or three boxes have made a complete cure of chronic cases that had not yielded to other remedies for years. There is scarcely a disease more aggra-vating and obstinate to cure than the various forms of piles and it is a common prac-tice to use ointments, salves and similar preparations containing dangerous poisons to remove the trouble. The Pyramid has superceded all of these ineffectual remedies

REGARDING AN INDIAN CONGRESS

Regarding the Matter. Considerable interest is being manifested in the proposed plan of securing an India: congress for Omaha during exposition year. Senator Allen took the matter up some time ago and Secretary Bliss of the Department of the Interior Yesterday Manager Rose water of the Department of Publicity and romotion of the exposition received the

following letter from Senator Allen, sent to

him by Secretary Bliss; "WASHINGTON, Sept. 16, 1897.—Hon. William V. Allen, Madison, Neb.: Sir-I am in receipt of your letter of the 11th inst., sugresting the establishment by the Indian of fice of an 'Indian wigwam,' at which to kee, representative Indians of the various tribes a the United States at the forthcoming Transmississippi and International Exposi-tion, to be held in Omaha in 1898. I have referred the matter to the commissioner of Indian affairs with the request that he will furnish me with an approximate estimate of the cost of the preparation and main tenance of an exhibit by his office such as is outlined in your communication. I have also forwarded a copy of your communication to Prof. Frank W. Clarke, who is the representative of this department upon the United States board of control at said expections for proper as to the prescriptive. position, for report as to the practicability of carrying into effect the exhibit in ques

tion. Upon receipt of these reports I advise you further in the matter. "The plan, as advanced by you, would be a direct means of educating the people of the advancement made by the Indian under the system adopted by the government, and I concur with you in your opinion that it is well worthy of such reasonable expenditure as congress may authorize to carry the same into effect. Very truly yours, "C. N. BLISS, Secretary."

Next Session to Be Held at Hasting:

in December. Among the things brought to Omaha by the State fair was the quarterly meeting of the State Executive committee of the Young A Men's Christian association. The meeting was held last night and proved to be a very pleasant one. Excellent reports of the work throughout the state were made, showing marked progress in the college field and good work done by the railroad association. Secretary Willis reported a healthful condition of affairs among the city and town or-ganizations. The committee received the hearty invitation extended by Hastings and voted unanimously to hold the next conven-tion there. December 9 to 12, inclusive. The following committees were appointed: On Pregram-Secretary Willis chairman; Dr. H. B. Ward, Lincoln; Dr. E. A. Wier,

On Advertising—Charles Kelsey, Hastings, chairman; W. S. Curtis and Dr. W. O. Henry, After the business meeting the committee funched at the Young Men's Christian asso-

clation lunch room and thoroughly enjoyed the good things and the toasts that followed. TWO BAD MEN ARE PLACED IN JAIL.

\$20 bill was wrapped on the outside, but in fact it was made up of only \$1 and \$2 bills and contained but \$181.

The two men have been working a petty larceny scheme on the shoe dealers of the ity, but are believed to have been successful in only one instance. One of the men dickers for a pair of shors and the other walks out with one of the pairs that are offered for trial. T. B. Nordis lost a pair of shoes in this way. The same plan was tried in Bowman's and in A. D. Morse's shoe stores without success.
