

CRIMINALS HOLD A CARNIVAL

Thieves and Thugs Create a Reign of Terror.

PROFIT AT THE EXPENSE OF THE CROWDS

Pockets Picked, Houses Looted and Men Robbed While the Ales-Surrounding Parade Passes Along the Streets.

Crooks of all descriptions, particularly pickpockets and burglars, were numbered among the busiest people in this vicinity Thursday afternoon and night. The immense crowds which filled the fair grounds during the day and literally packed the streets in the evening afforded the pickpockets an unlimited opportunity to ply their trade without much danger of detection. The outpouring of the residents of the city into the downtown section to witness the parade left the residential districts practically deserted and the residences without guard. And finally it was found necessary to put practically the entire police force in the heart of the city to handle the crowds during the parade, so that the burglars had the opportunity to themselves and the crowds were so great in the downtown district that the police officers had little opportunity of doing anything else than to keep them out of the way. Looking after pickpockets who might be circulating in them.

NO RESPECTERS OF PERSONS.

Among the victims of the pickpockets was General Charles F. Mearns. His pocketbook, containing \$75 in money, was taken out of his pocket while he was riding downtown Thursday evening in a street car. The theft occurred in check for \$75 and is supposed to have been committed by a couple of men who were crowded on each side of General Mearns. A description of the men has been given to the police. General Mearns was considerably wrought up over the fact that he was made a victim, and when he made a report to the police he stated that he would willingly spend \$200 to secure the capture and the conviction of the thieves.

PICK UP POCKETBOOKS.

Four pocketbooks were found lying under a bunch of weeds on the fair grounds. One of the street car line Thursday night by S. M. Wright of Kennard, who brought them to the police station. One of the books was left. From the papers and the railroad tickets found in them they belonged to parties named J. C. Swann, Thomas Wilson of Springfield, William W. Sweeney of Wilcox, Mo., Dr. H. C. Wheeler of Omaha. In the latter was also found a note given by John F. Lally of this city to the "Pardon Campaign Committee." It contained the name of the donor, the amount, the date and the name of the recipient. It was dated April 19, 1897, and was probably Lally's acknowledgment to the fund for the spring election when he ran for office. From the endorsements on the back but 45 of the amount has been paid, two payments being made in May, one of \$3 and the other of \$2. Five empty pockets were found yesterday morning lying inside the screen door of the book store at 1519 Farnam street. They had been filled, not a scrap of paper being left to indicate to whom they belonged. The pocketbooks were undoubtedly thrown away by thieves that they might not be found as evidences of theft on their persons in case they were arrested.

LATE REPORTS OF ROBBERIES.

Last night additional reports of thefts by pickpockets and pocketknives were received from the police. At 11:30 p. m. a man, who lives on the opposite side of the street, was robbed of a pocketbook containing \$20 while he was walking on the sidewalk. The thief was seen by the man, but he fled. The man reported the robbery to the police, who were busy themselves in arresting everybody who came in the category of being suspicious characters.

TAKE ANY OLD THING.

As J. A. Thayer, a German farmer of York, was viewing the parade he was duped of a large silver watch. He was standing in front of the city hall with his daughter when a negro approached and asked for some information. The girl pointed out the location of the court house when the negro crowded heavily against him. At that moment he snatched the watch and fled. He was followed by the police, but he escaped. He was seen by the police, but he escaped.

THE PACE THAT KILLS!

A distinguished German physician declares this to be the age of Nervousness, and thinks the civilized race is deteriorating under it. Our lunatic asylums are filling up at a frightful rate. Women should be plump and rosy as peaches and emaciated, school children, instead of being plump, active, vigorous, are debilitated, overworked and unhappy; business men are engines of perpetual worry and victims of insomnia; social life is a nerve-destroying whirl of excitement; cities are clamorous with distraction of railroads, traffic, manufacture and all hustling affairs that destroy the peace of mind. Everything is at high pressure. Headlong, mad activity is the law of circumstances.

Dr. Charcot's Kola Nerve Tablets are famous for curing Nervous Diseases where other remedies had failed. They will make you strong and well, try them.

50c per bottle. Write us for testimonials of cures. Beware of cheap imitations. Dr. Charcot's Kola Nerve Tablets are famous for curing Nervous Diseases where other remedies had failed. They will make you strong and well, try them.

PLANS FOR BUILDING

Supervising Architect of Treasury Gives Out Description.

GOVERNMENT STRUCTURE AT EXPOSITION

Classic in Style, the Home of the United States Exhibit Promises to Be One of the Most Attractive on the Grounds.

The following is the official description of the building to be erected on the Trans-Mississippi Exposition grounds by the federal government, the description being given out from the office of the supervising architect of the Treasury department at Washington. The building to be erected by the United States government is to be situated at the west end of the grounds at the head of the lake and has the seat of honor of the whole exhibit, facing, as it does, the main group of buildings. It was designed under the general direction of Charles E. Kemper, acting supervising architect of the Treasury department at Washington, D. C. Edward A. Crane being the draftsman in immediate charge.

The building will be in the classic style, the Ionic order being used. It is to be arranged in three sections, that at the immediate center having a frontage on the lake of 200 feet, a height to top of cornice of 100 feet. It will have a depth of 150 feet. The main entrance facing the center of the lake will be reached by a broad flight of steps and through a colonnade. This entrance along with the entire center section of the building will be very richly treated in color. The entrance is flanked on each side by pavilions capped with a dome. The main building will be towered far above all other buildings on the grounds by the exhibition, its height being 175 feet above the ground, the beautiful effect can be easily judged. The side sections, which are separated from the main portion of the building by colonnades connecting with the Agricultural building on one side and the Theater building on the other, are 148 feet and are 100 feet deep, and have a height of forty-four feet to top of balustrade. This makes the total length of the building 604 feet, the width being 175 feet, and the floor space devoted to the exhibit will approximate 50,000 square feet. The building will be constructed of wood and covered with staff on the outside.

EXPOSITION COMMITTEE MEETS.

English Colonies Asked to Come in with an Exhibit.

The regular weekly meeting of the executive committee of the exposition was held at the Commercial club rooms yesterday afternoon with all the members of the committee present. The session was devoted entirely to the consideration of matters relating to the rule of the committee providing that three members should constitute a quorum, which had been in force during the absence from the city of some of the members, was changed to provide that a quorum should be four members, as the committee is now constituted. Manager Rosewater called attention to the fact that the invitations to the English colonies, Canada, Australia, etc., had been sent through the post office and a number of the State department and the Corresponding secretary of the exposition, and that the invitations would not reach the colonies for a long time. He suggested that a more expeditious method should be adopted in order to extend an invitation to the colonies, especially Canada, to participate in the exposition. This matter was discussed by the committee and it was decided that invitations should be sent direct to the colony authorities in addition to those sent through the regular official channels.
