While they were together one of the McVeys traded the Yancey boy a pick-knife. It transpired that the knife was taken with a lot of other stuff by the McVeys in one of their Omaha burglaries. The McVeys is were arrested after they reached this city and were held for the Omaha officers. Yancey was taken into custody for the reason that he was in their company on the return from Kansas City and when searched the knife was found in his possession. He had no difficulty in proving how the knife came into his possession and showing that at the time of the burgiary he was at his tome in this city. He was discharged and his since been working at odd jobs. This is the full history of his desperate criminal career up to date.

Next Summer at the Park The park commissioners are already beginning to figure on attractions and amusements for Fairmount park for next year. The motor company has an equal interest in the work of drawing people into the park, and its officers have announced their willing-ness to do all in their power to assist the commissioners. > THE FISH HATCHERY IN IOWA. Senator Allison and Congressman

Henderson Visit the Institution.

MANCHESTER, Ia., Nov. 23 - (Special.)-Senator Allison and Congressman D. B. Henderson of Dubuque paid an official visit to the new United States fish hatchery three miles south of here, and expressed themselves as greatly pleased with what they saw. They are members of the appropriations commit-tees in the senate and house and desired to see for themselves what facilities the govern-ment has here for raising fish. The plant has cost in all up to date about \$27,000 and is located on ground donated for the purpose by the citizens of Manchester. Congress-man Henderson expressed the belief that it is one of the most complete fish hatcheries in the United States, for all of the latest appliances are to be had here. the fish hatchery proper, there are thirty-two small ponds for breeding purposes, that is to say for developing the young fish. In addition to these, there are three large ponds for keeping fish of different varieties from which the spawn is derived for raising the young fish, or breeders, so-called. A well built ice house, a carpenter shop, a storage house to preserve machinery, etc., with very neatly built home for the superinten ent, grounds beautifully laid out, sodded, walks solidly made, are the leading feature that attract the eye upon entering the grounds. The present capacity of the plant is a million and a half of fish per annum. The visitors saw there the spawn of young the visitors saw the trout by the millions for hatching, and one trout by the millions for hatching, and one of the worders of the thing is that they have not one founded for pecuniary profit. The facilities for maintaining an average temperfacilities for maintaining an average temper-ature of fifty degrees during the summer and winter. This is a condition scarcely par-alleled in the United States, and indeed trout seed is sent from other hatcheries to the Manchester hatchery because of the uniform temperature of the water. Three springs are at the service of the government, but only two thus far are utilized, and they supply twice the amount of water now required. C. W. KELLY GRANTED A DIVORCE.

cannot excel them.
Capital is necessary for success in new fields of industry; lowa has capital and lowa capital should be used in developing the latent resources of the far-famed agricultural and dairy state and in building at home," and lowa, with her vast agricultural resources and her own artisans, would supply her own people and the world with finished goods and would indeed become the pride of the transmississippi group of states.

This exposition can be made a source of profit to lowa beyond all computation. The time is now ripe for investments in new lines. There has never before been a time in the history of the country when there was so much idle capital as there is to-day, idle capital means idle laborers, fow should form a worlding ground for these mutual interests. The eachitalist and the laborer can join hands in lowa and develop the natural and latent resources of the state to an extent heretofore undramed of.

Money is necessary to make an exhibit that will do credit to the state, Only \$50.

No woman can look fresh and fair who is suffering from displacement of the womb. It is ridiculous to suppose that such a difficulty can be cured by an artifical support like a pessary. Artificial supports make matters worse, for they take away all the chance

of the ligaments recovering their vigor and tone. Use strengthens; the ligaments have a work to do. If they grow flabby and refuse to hold the womb in place, there is but one remedy, and that is to strengthen their fibres and draw the cords back into their normal condition, thus righting the position of the womb.

Lydia E. Pinkham's Vegetable Compound is designed especially for this purpose, and, taken in connection with her Sanative Wash, applied locally, will tone up the uterine system, strengthening the cords or ligaments which hold up the womb. Any woman who suspects that she has this trouble

-and she will know it by a dragging weight in the lower abdomen, irritability of the bladder and rectum, great fatigue in walking, and leucorrhea-should promptly commence the use of Lydia E. Pinkham's Vegetable Compound. If the case is stubborn, write to Mrs. Pinkham, Lynn., Mass., stating freely all symptoms. You will receive a prompt letter of advice free of charge. All letters are read and answered by women only. The following letter relates to an unusually severe case of displacement of the womb, it is convincing:
"Lydia E. Pinkham's Vegetable Compound and Blood Purifier cured me when the which was cured by the Pinkham remedies. Surely

tors had given me up. I had spent hundreds of dollars searching for a cure, but found little or corelief until I began the Pinkham remedies. I had falling and displacement of the womb so badly that for two years I could not walk neross the floor. I also had pro-

fuse menstruction, kidney, liver, and stomach trouble. The doctors said my case was hopeless. I had taken only four bottles of the Vegetable Compound and one of the Blood Purifier when I felt like a new person. I am now cured, much to the surprise of my friends, for they all gave me up to die. Now many of my lady friends are using Lydia E. Pinkham's Vegetable Compound through my recommendation, and are regaining health. It has also cured my little son of kidney trouble. I would advise every suffering woman in the land to write to Mrs. Pinkham for Bid."-MRS. EMMA PANGBORN, Alanson, Mich.
