It frequently happens that persons report cases of destitution when they know nothing about the needs or circumstances of a family. Only a few days are people in Albeight. though President Burt has refused to confirm or deny the reports, they are now comtrustworthy.

It the plane now under consideration are of convenient size with waiting rooms, baggage rooms, express offices, dining room and other accommodations will be built on a tract of ground east of Tenth street and between Marcy and Leavenworth streets in time to Pacific during the coming exposition.

The proposed structure will not be built of stone and brick, or in any way designed for a permanent affair. With the unsettled con-dition of the terminal question here, it is argued, the Union Pacific does not at present care to start in on the erection of a large station that could not possibly be completed In time for the exposition, but prefers to at once begin the erection of a passenger sta-tion that may be finished by the time the exposition gates are thrown open to the pub-lic. Such a station, suitable to accommedate the lacoming travel, could be erected within ninety days, and if started on March 1 could be ready for occupancy by June 1. INTEREST OF THE ROADS.

Representatives of the Union Pacific have recently been looking over the ground just the Hawalian islande. east of Tenth street and the north side of the main tracks of the company, and prop-erty holders in that section of the city feel quite confident that the company is condiscring the feasibility of building there at once. Chief Engineer Berry of the company has been over the ground, and has also taken the Union Pacific wants a station of its own for use during the exposition year Should the Union Pacific decide to build a station on the north side of the present tracks it is practically certain that the Northwestern would go with the Union Pacific. The Rock Island and the Milwaukee railroads also have contracts with the Union Pacific, by which they are dependent on the Union Pacific for terminal facilities, whether they would go with the Union Pacific in such a depot is a mosted question. It is a well known fact that the Bur-lington officials have earnestly endeavored to get the officials of the Rock Island and the Milwaukee sufficiently interested in the Burlington's new passenger station here to bring those two lines into the new struc-ture. But, so far as is known, nothing in that

SHEDS WILL DISAPPEAR. Briefly, the status of the case is this: The Briefly, the status of the case is this.

Burlington's new station is rapidly nearing completion. Nearly all the walls are up as high as they will be built and much of the Square Opera company of Boston, and which square Opera company of Boston, and which Interior work is done. It now looks as played in that city for 102 consecutive weeks though the structure would be complete by to enormous business. April 15, as called for by the contract with the builder. When this station is completed the present sheds to the east of the new building will be torn away. There will then be but one passenger station and that, as well as the ground it occupies, owned by one railroad. None of the other lines have as yet made arrangements to enter this station. From those who are most familiar with the policy of President Burt it is learned that the Union Pacific will never agree to enter the Burlington depot, but will build a tember of Normandy." Wednesday evening, "The Chimes of Normandy." porary passenger station for the Union Pacific and the lines dependent upon it for terminal facilities in Omaha, to be occupied until such time as the lines are able to unite on some plan for the erection of a grand union depot at Ninth and Farnam streets

Speaking to The Bee of the matter a prominent railroader recently said: "To my mind there is no doubt but that President Burt will decide to build a depot separate from that of the Burlington. There are but two horns to the dilemma; one is to enter the Burlington depot and the other is to build a separate depot. I think you may expect to hear something announced on the matter within the next thirty days, or possibly

Important Conferences. It has been a long time since so many important conferences of leading railroad officials have been held at one time as are schet fled for this week in Chicago. One of these is the meeting of presidents of western lines to consider the best solution of the fast train proposition. President Burt of the Union Pacific will attend this meeting, and it is said will oppose any attempt to have the new fast trains taken out of service or to allow differential rates to the Rock Island and the Santa Fe. Another one of the meetings is a confer-

Within four hours the ditches for mile around were overflowing with oil. Dams were constructed in order that the product might be estimated, but these were overflowed and swept away as rapidly as constructed. Some persons living in the vicin-ity, alarmed at the spectacle, packed their bousehold goods and fled. A pumping station a mile distant was compelled to ex-tinguish its fires on account of the gas, and all other fires within the district were put out. It was a literal flood of oil, the estimated production for the first twenty-four

dozen times. How could be have missed it?

In more ways than one, the world has suffered for want of light. The body of man has been a darkened house in which selence has grouped for the cause of abortened lives. She has stumbled upon some traths and some half-truths. She has questioned dead met, but they have told no tales.

"The statement may astonish live stock growers, but nevertheless Mexico is almost without cattle," said J. M. Bernard of Waro, Tex., last night, "This is due to the tremendous demand for Mexicon beef that began almost exactly two years ago and has resulted in cutting down to very small numbers of germs furnished as almost cuba from 5,000 to 6,000 head of cattle a month. That is why the Cuban rebellion has lined the projects of the Mexicon specific and bandages.

Even today there is more or less error in medicine. That is to say, certain drugs are known to produce certain results. But no one can tell the reason. From time immemoral physicians have carefully excluded the air from wounds. They did not know why exposure to the air should be had for lacerated tissues, but the discovery that the air contains uncountable and unthinkable numbers of germs furnished a substantial reason for plasters and bandages.

Cure benefited me from the time I began using it, and after I had taken five or aix bottles I was entirely free from all my pains, and have been in perfect health ever since. I counct say too much for Warner's Safe Cure, as I believe it gave me the perfect whe air from wounds. Preumonia Prevented.

The greatest danger of a cold or an attack grippe is of its resulting in pa lmost everyone, and especially those who weak lungs. No one need fear that cold will result in passumoina when Chamberlain's Cough Remedy is used. It counteracts any tendency toward pneumonia and will cure a cold in less time than any During the epidemics of la grippe a few years ago, many thousands o nottles of it were used, and in not one single nstance did any case result in pneumonia so far as we could learn.

Case Against Mullen. Police Judge Gordon heard the evidence in the case against M. Mullen, charged with

maintaining a disorderly house, yesterday afternoon. Arguments were made and the court took the case under advisement until today. Upon the decision will depend the fate of the cases against the twenty-four men and women who were arrested in the raid of Mullen's place, as inmates of a disorderly house. If Mullen should be discharged the other prosecutions will end.

The city prescutor flied another information against Mullen yesterday, in which he is charged with selling liquor without a city license. He pleaded not gulfry to the charge and this case will come up for trial probably today. maintaining a disorderly house, yesterday probably today.
