Montana People Will Make the Big Muddy Turn Their Wheels.

DAM FINISHED AT CANYON FERRY

Most Complete of Any Plant on the Continent-Much Lumber Used in the Dam-Power for Manufactures.

HELENA, Mont., Feb. 25 .- (Special.)-Within a few weeks the Missouri river, which has already been harnessed at Canyon Ferry, will be set to work, the big tur-bines will begin to revolve and electrical A telephone company has been organized power generated seventeen miles away will at Eureka, with the following officers: Presipower generated seventeen miles away will ena. The river for several days has been tumbling over the dam, which is now com- Gahin. ment. The four large generators which ment. The four large generators which connecting Ipswich, Bowdle, Rescue, Eureka, will be first installed are now being hauled Leala and other towns with Aberdeen. from Clasell to Canyon Ferry. Half of the total weight of the generators, which are massive in their construction, has been delivered at the power house. The heaviest or delay is anticipated in setting up the machines. The walls of the power house are being constructed and will soon be completed. At present only one-half of what the power house is designed to be will be completed, but the foundation for the complete struc-ture and the wheel wells have been put in The power house is being constructed of grantie and that part of it now being built will be 87½x59 feet. The convertor house is built of iron and is 65x39 feet.

J. T. Fanning of Minnesapolis, consulting engineer, who designed the dam, power house and the hydraulic machinery, has inspected the plant. Mr. Fanning not only designed the plant but he selected the site for the dam and has since occasionally inspected the work, which has been, in a general way, in his charge. Mr. Fanning is well pleased with the details of the dam and the power plant.

HAS A FINE PLANT.

as almost completed. There is every reason to expect the plant will be as well equipped to expect the plant will be as well equipped as any hydraulic and electrical plant in the country with the exception, perhaps, of the \$3,000; incorporators, Charles S. Brow

enclosed spaces exceptionally free from water when working under a head of ten feet with the material excavated as close to the piling as its natural slope would allow without un-

as its interactions along without undermining the sheet piles.

Both above and below the cribbing was driven a row of triple-lap sheet piling, built of 3x12 inch pine plank stilly bolici together driven to a depth of twelve feet below the bed of the river or, when the material was too hard, until the pile was in danger of splitting, or would go no farther ider the blows of a 2,250 pound hammer falling onto an 1,100 pound east follower placed on the head of the pile. All mesonry, where possible, had a similar row of sheet piling driven around its foundation as an extra precaution against a current forming under the structure.

Government investigators at the site placed the flow of the river, at mean low water, at 3,300 cubic feet per second, this amount with a twenty-nine foot wall gives 5,981,250 foot pounds per second or 10.875 horse power. On the east bank of the civer a fill, with a slope of one and one-half by one feet on the wn stream and two to one on the up stream side, was built with a masonry core to the height of the abutment and extended back to the corresponding contour on the hill side This fill is practically an extension of the dam proper, but not designed as a weir Adding the length of the fill, 285 feet to the length, 485 feet, gives a total length from west abutment to east end of 770 feet.

Idaho Stockmen Are Happy. POCATELLO, Idaho, Feb. 25 .- (Special.)-The stockmen of Blaine, Lincoln and counties, the great winter ranges of Idaho, are congratulating themselves

## For Family Use

Perhaps in your family you use but little whisky, but you want that little good-of the best. The United States Government guarantees the Age and Purity of every bottle of

through its Internal Revenue officers at the distilleries, at Frankfort, Ky.

Every bottle of Old Crow and Hermitage is tested. Be sure the Internal Revenue Stamp over the Cork and Capsule is not broken and that it bears the name W. A. GAINES & CO. Be It is a Government Guarantee that goes with this bottling.

ALL DEALERS SELL IT

the percentage of loss is small, smaller than anywhere else in the inter-mountain region. The sheepmen say that this year Idaho wool ought to bring a higher price than that of any of the surrounding states, as the weather in Idaho has not been variable, as in the adjoining states. It has been steadily cold and then milder, with few changes. This will make the wool more uniform and more valuable. more uniform and more valuable.

T RADERS ARE HESITATING

Foreign Complications Affect the Speculative Market.

INDUSTRIAL PRODUCTION REMAINS LARGE

Indications Are, that the Volume of Business This Month is Larger Than in Any Previous Year.

NEW YORK, Feb. 25.-R. G. Dun & Co.'s Weekly Review of Trade will say tomorrow:

Foreign possibilities have much affected

The silk manufacture shows a remark-

able increase during the last six months, having imported raw material far in excess of consumption in any previous year at a rate 120 per cent above the imports in the last census year.

The iron manufacture has more demand The iron manufacture has more demand for products and slightly better prices for Bessemer pig, which has advanced to \$10.40 at Fittsburg, which has advanced to \$10.40 at Fittsburg, with Grey forge unchanged there. Local coke strong at Chicago in spite of some southern weakness, and eastern anthracite rally unchanged, though quotations are a shadle lower. No finished products have changed in price, and all are strong in demand, excepting bar, which a combination has failed to advance. Some large centracts are exported, especially in car and bridge building, ship and structural work, and the demand for sheets is heavy. Minor metals change but little, tin weakening a shade to '14 cents, with the large receipts.

Fallures for the week have been 233 for the United States, against 296 for last year, and 39 in Canada against 50 last year.

WEEKLY CLEARING HOUSE TOTALS

BRADSTREET'S REVIEW OF TRADE.

1. 1. 1 \$ 21,533,463 35.7

Totals.

Volume of the Distributive Trade is the Best of the Year. NEW YORK, Feb. 25.—Bradstreet's to orrow will say:

morrow will say:

While business of a speculative nature has been quick to reflect the increasing strain in political affairs in reduced values and withdrawals or curtailment of activity in some lines, there is little to indicate that the volume of distributive trade has been reduced, and reports to Bradstreet's this week, so far as the latter branch of business is concerned are among the best received this year. With few important exceptions the price situation is one of strength, while the enlarged demand for coarse grains is taken to reflect the turning of attention from higher priced cereals to those of a lower priced character.

Last week's spurt in dry goods at Boston does not seem to have held, but at New York there is considerably more doing in the jobbing trade.

The cotton situation is one of firmness, reflecting alike the curtailment of production, growing out of labor troubles, and the firmness of raw cotton induced by a good export demand. etery at Fort Crook, which was recently export demand. Wool is firm, but the demand has per-

eptibly slackened and there is less doing

ceptibly sinckened and there is less doing in manufactured goods.

The best report as to the distribution of trade made so far this year comes from the central west. Spring trade there is reported earlier than usual. Kansas City, perhaps, the most important market for agricultural implements in the country, reports the demand exceeding all records, and sales limited only by the ability to deliver orders.

The demand for iron and steel at the west still continues large and prices are firm. A feature of Chicago trade has been the placing of an order for 5000 tons of steel rails for a railroad in Alaska. Almost equally good reports come from the north-

steel rails for a railroad in Alaska. Almost equally good reports come from the north-west, where trade is reported either fully equal to or shead of last year.

The south seems to have shared in the improved conditions to a marked extent. Collections are slow, owing to the holding back of cotton.

The word Klondike accurately pictures the situation on the Pacific coast. All eyes seem to be fixed on the outfitting trade, and the transportation or men and supplies to the north.

north.
Exports of wheat, including flour, from this country and Canada during the last week (five days), aggregate 3,722,469 bushels, against 3,532,744 bushels last week, 1,372,216 bushels a year ago, 2,206,773 bushels in 1896, 2,289,038 bushels in 1895 and 2,972,250 bushels

In 1894.
Corn exports amount to 3,692,799 bushels, against 5,056,575 bushels last week, 4,744,838 bushels in this week a year ago, 3,158,318 bushels in 1896 and 847,000 bushels in 1895.
A very large drop in the number of business failures is indicated by reports to Bradstreet's this week, the total numbering only 183, against 299 last week, 258 in the corresponding week of 1897, 271 in 1896, 234 in 1895 and 272 in 1894.
Business failures in the Dominion of Canada this week number 45, against 48 last week, 50 in this week a year ago, 51 in 1896 and 44 in 1895.

and 44 in 1895.

REVIEW OF THE STOCK MARKET. Prices Recover Some from the De pression of Last Week.

NEW YORK, Feb. 25.—Bradstreet's financial review tomorrow will say: Under the influence of the Maine disaste

Under the influence of the Maine disaster the stock market was unsettled at the end of last week. Liquidation continued on Monday, the holiday on the succeeding day creating a desire to curtail speculative engagements. On Wednesday, in the face of heavy buying by London, the market showed increased weakness and liquidation tendencies and continued this course on Thursday, breaking with some violence. The hardening of interest under the withdrawals of money for use in business at the interior and the consequent reduction of the cheap call and time loans, added to the unsettled feeling and the calling in of loans was among the chief disturbing factors. London was again a large buyer at the break, its total purchases in two days being estimated at over 100,000 shares, though this was considered to be mainly speculative and likely to result in selling on the raily which foreign operators believed would ensue. Some foreign interests were purchasers of the specialties. teresis were purchasers of the such activity being present in the bilts, Gas and Rock Island and cities and Kansas & Texas. The was, however, very active in the of the decline and was rewards through the exhaustion of margins and the catching of stop orders. Throughout the week the traction stocks and sugar were especially stendy and ready to yield, indicating that the prices, too, for them had been put to an unduly high level and that their rise had attracted considerable weak leaving.

Humors of all kinds regarding alleged dis everies about the loss of the Maine and the probable effect on our relations will pain had free circulation and the marke lemoralized on Thursday to tak the drop in exchange rates, and the accom-panying possibility that any future rise in interest here would have the effect of at-tracting gold from the other side of the At-

## A STATE OF THE PARTY OF THE PAR SOUTH OMAHA NEWS.

It has been definitely decided by the con-

regation of St. Martin's Episcopul church to remove the present house of worship which is located at Twenty-third and I streets, to the northeast corner of Twentyfourth and J streets. At a meeting of the ongregation held on February 8, Rev. Irving Johnson, the pestor, appointed a committee consisting of W. S. King, L. C. Gibson, James G. Martin, Hiram Hall and J. B. Watkins to secure pledges toward paying a portion of the expense involved by such a step. Tucsday evening the committee reported to a neeting of the congregation and the support pledged was in every way satisfactory, exceeding by a considerable sum the amount really needed. On Thursday evening the committee visited Bishop Worthington and made a report of the work performed and it was then fully decided to make the change. When removed and rebuilt the church will be known as the John S. Miner Memorial church, as Bishop Worthington has agreed to advance to the church the sum of \$5,000 left in trust by John S. Minor for the foundng or establishment of a memorial church With the money given by the hishop the two lots at the corner mentioned will be pur-chased, while the other expenses incidental to the removal and refitting of the church will be borne by these who subscribed to the fund to be raised for the purpose. W. S. King and L. C. Gilson have been appointed a committee to look over the abstract of the land and to close the deal. When a showing is made to Bishop Worthington that the title is clear and everything is ready he will turn over to the church the \$5,000 agreed upon. The two loss will cost \$4,000 and it is estimated that the moving of the church, excavating, plastering, electric lights, water and sewer will cost \$1,900 more. It is the intention now to move the rectory to a place on this new property, but a final decision in this matter has not yet been reached. The grounds about the church will be sodded

In addition to his gift of \$5,000 to St. Mar-tin's church Bishop Worthington has con-sented to give \$200 from the Clarisa Cook fund to aid in building a mission church in the Third ward to be known as St. Clement's mission. A short time ago Rev. Johnson appointed a committee to solicit funda for this purpose and the committee reports having met with much encouragement. Johnson has for some years been conducting a mission in the Third ward, the church being the only one in the ward where the services are conducted in the English language. This mission is in a rented building and the church desires to erect a house of worship of Its own.

In reference to St. Martin's church it is understood that the removal will be made as soon as all necessary arrangements can

Will Aid a Young Artist.

Next Thursday evening the King's Daughters will give a social at the home of Mrs. A. J. Caughey for the purpose of raising funds to give Homer Peyton a course of lessons in art. Young Peyton has a natural talent for drawing and painting and it is thought that if an opportunity is given him to develop his ability he will soon make a record for himself. Last summer this white ribboners young artist designed a pen and ink sketch, which was published in The Bee, and he received at that time many compliments on his work.

Cruel Driver Punished. L. Ward, who is engaged in hauling sand, was arrested by a constable from Justice White's court a day or two ago and charged with cruelty to animals. Roy Snyder was the complainant and he asserted that Ward had a habit of beating his horses with a shovel or piece of iron pipe. Ward paid the costs in the case and after agreeing to dise his practice the complaint was withdrawn.

Death of Mrs. Byrne. Mrs. Mamie Byrne, wife of First Sergeant Byrne of company B. Twenty-second infantry, died at Fort Crook yesterday. The funeral services will be held today, with Rey, Father Fitzgerald, the recently appointed chaplain of the regiment, in charge The burial will be the first in the new com-

German-American Political Club At the last meeting of the German-Ame-Ican Political club a committee, consisting of Judge Christmann and John Friedt, was appointed to assist newcomers in securing their first and second papers. Judge Christ-mann declares that he is willing to help any German in this matter regardless of po-litical affiliations.

Charge Against a Constable. Constable Joseph J. Maly was arrested last evening on a warrant sworn to by Isadore Fischel and H. G. Trumble, who stWOMEN DO NOT TELL THE WHOLE TRUTH.

Modest Women Evade Certain Questions When Asked by a Male Physician, but Write Freely to Mrs. Pinkham.

An eminent physician says that "Women are not truthful, they will lie to their physicians." This statement should be qualified; women do tell the tru'h, but not the whole truth, to a male physician, but this is only in regard to those painful and troublesome disorders pecu-

liar to their sex. There can be no more terrible ordeal to a delicate, sensitive, refined woman than to be obliged to answer certain questions when those questions are asked, even by her family physician. This is especially the case with unmarried women.

This is the reason why thousands and thousands of women are now corresponding with Mrs. Pinkham. To this good woman they can and do give every

symptom, so that she really knows more about the true condition of her patients through her correspondence than the physician who personally questions them. Perfect confidence and candor are at once established between Mrs. Pinkham and her patients.

woman who understands women. If you suffer from any form of trouble peculiar to women, write at once to Mrs. Pinkham, Lynn, Mass., and she will advise you free of charge. And the fact that this great boon which is

received by her prove. Many such grateful letters as the following are constantly pouring in: "I was a sufferer from female weakness for about a year and a half. I have tried doctors and patent medicines, but nothing helped me. I underwent the horrors of local treatment, but received no benefit. My ailment was pronounced ulceration of the womb. I suffered from intense pains in the womb and ovaries, and the backache was dreadful. I had leucorrhea in

memory grew short, and I gave up all hope of ever getting well. Thus I dragged along. At last I wrote to Mrs. Pinkham for advice. Her answer came promptly. I read carefully her letter, and concluded to try Lydia E. Pinkham's

lege that the constable sought to obtain money, from them under false pretenses. The complainants have been running an auction store on N street and ascert that stated that he was a license inspector and would have to have \$10 or the store would be closed. The proprietors declined to part with the money and Maly's arrest followed

One Amazon Sent to Jail. Annie Nelson, a colored woman, was tried n police court yesterday afternoon on a harge of robbing Robert Boogher, a St charge of robbing Robert Boogher, a St. Louis traveling man, of \$25 while he was in her company one night about two weeks ago. Boogher also went by the name of Baxter here. Judge Gordon held that the state's evidence was not strong enough to secure a conviction in the district count and he discharged the woman. The defendant was then sentenced to the county jail for thirty days for lewdness.

These cases are but two of thirty-three similar ones against Amazons, which have been dragging along in police court for many weeks. In nearly all of the cases there have been from three to seven continuances granted, and although all of them should have been disposed of yesterday, the court continued their hearing again until Saturday, March 5, at which time, he announced, he will clean them all up.

Hayband Secures Paramore's Arrest John Powers is under arrest accused lying unloafully with Mrs. W. S. Rose the latter's husband being the complainant He caused the arrest of Powers and the woman once before on a similar charge, but the cases were dismissed in police court because Ross falled to appear against the prisoners Powers and Mrs. Ross left their respective families in Fullerton and came to Camana—the former a wife and five children and the latter her husband and seven children. He caused the arrest of Powers and the
