

PLANS FOR ANOTHER BUREAU

**Women Appointed to Look After Social Entertainment of Nooked Guests.**  
**President Wattles on Scope of Work.**  
**Six Women Are Named and the Number Will Be Increased to Ten When the Occasion Demands Such Action.**

The first meeting of the Bureau of Entertainment was held yesterday afternoon in the directors' room at the exposition headquarters. The Bureau of Entertainment is charged with the duty of providing suitable social entertainment for the distinguished people who are expected to favor Omaha and the exposition with their presence. The members of the bureau will be expected to entertain at their homes on state occasions and assist in making the visit of prominent people to Omaha a memorable event.

Those constituting the Bureau of Entertainment at present are: Madeline C. F. Anderson, C. W. Lyman, H. T. Clarke, G. M. Hitchcock, John L. Webster and F. P. Kirkendall. These women assembled in the directors' room, where they were addressed by President Wattles, who explained what the bureau would be expected to do and outlined the plan of organization which he believed best suited to the occasion. The women present were formally appointed by the president as the executive committee of the bureau and were given authority to increase their number to ten. When this number shall have been reached the ten women will organize by electing such officers as they consider necessary, after which they will still further increase their number to fifty, this number to constitute the full bureau.

The matter was talked over informally by the women without any definite action being taken and they adjourned on Tuesday, when a second meeting will be held.

FIREMEN'S TOURNEY EXHIBITION

**Members of the National Association to Omaha to Talk Business.**  
 The executive committee of the National Association of Firemen is in the city for the purpose of consulting with the exposition management regarding the inducements which will be offered for the holding in Omaha during the exposition of a national firemen's tournament. Those constituting the delegation are Fred A. Wynn, president of the Iowa association; E. W. Barkman of Decatur, Ill., secretary of the National association and head of the Illinois association; H. S. Salisbury of Whitewater, Wis., treasurer of the National association; C. Hill Porter of Carleton, Mo., secretary and treasurer of the Southwestern Firemen's association; T. H. Carlisle of Weir City, Kan., president of the Southwestern Firemen's association and chief of the Weir City fire department, and I. E. Alderman of Marion, Ia.

This committee was taken in charge by Major Clarkson of the exposition executive department and escorted to the exposition grounds. Before going to the grounds the committee assembled in the city hall, where they held a meeting. In reply to questions members of the committee stated that before leaving Omaha a meeting will be held to decide whether the tournament should be held in Omaha or be located at some of the other points which are making overtures for the meet. They said that Detroit is making strong efforts to have the tournament held in that city, but the members of the committee agree that the prospects for a large attendance at the tournament would be much better in Omaha than in Detroit, on account of the large number of people who will be in the city attending the exposition. They stated that they expect an attendance of at least 50,000 firemen aside from the large number of people who will be drawn to the city by the tournament. They expect to hang up large purses as prizes in the different classes and the size of the purses will be very largely regulated by the progressive rate receipts.

The committee will meet with President Wattles and Chief Redell, in whose hands the details of arrangements have been put, and will then hold a meeting to decide whether the tournament shall be held in Omaha.

ALLEN ACCEPTS AN INVITATION

**Will Deliver an Address at Opening of the Exposition.**  
 President Wattles returned here yesterday from a brief rest at Hot Springs, Ark., and found among the letters on his desk one from Senator Allen, accepting the invitation to deliver an address on the opening day of the exposition, provided matters were in such shape at that time as would permit him absencing himself from attendance upon the sessions of congress.

A letter from Secretary L. S. Scott of the Western Historical association stated that the association will meet in Omaha July 17-19 and asked that those dates be designated as "Louisiana days" in honor of the association. The president notified the secretary that the request would be complied with.

President Wattles has sent out letters to the governors and exposition vice-presidents of each of the states, asking them to designate days during the exposition to be held in honor of each of these states. Similar letters will be sent to the governors of each of the eastern states, making a like request.

The president is in receipt of replies to letters sent to the adjunct general of each state west of Omaha inviting the militia of each state to camp at Omaha during the summer. These replies are nearly all favorable, but a proviso is inserted that in the event

INFORMATION FOR FARMERS

**What the Agricultural Department Will Exhibit at Omaha.**  
**INCLUDES ALL BRANCHES OF AGRICULTURE**  
**Every Division of the Department Has Its Own Particular Plan Worked Out and the Whole is Arranged.**

WASHINGTON, April 9.—(Special.)—While all Washington is actively interested in the preparations going on for the defense of the United States in its war with Spain, should such a thing come about, the various departments included in the government exhibit are earnestly preparing for the coming Transmississippi Exposition at Omaha. Considerable has been written about the exhibit and also about the Interior department, but little or nothing has yet been printed about the scope and effect of the Agricultural department show. Assistant Secretary Brigham, chairman of the government board, called upon the various chiefs of bureaus of his department last week with the request that they outline the subject matter of the exhibit which they will make under the head of agriculture. As a result a very interesting series of papers have been filed with the assistant secretary, descriptive of the particular exhibit which each bureau is being prepared for transportation to Omaha.

The Agricultural department exhibit will be located in the southwest corner of the government building, and is the largest larger than that occupied at the Nashville exposition. The above system of installation will be followed as far as possible, so that the exhibit may be divided into the following on the main aisle and those displayed on the rear aisle and abutting upon the wall of the building. The two exhibits on the rear aisle will be those of the divisions of entomology and pomology. Back of these across the center aisle, running through the space north and south and occupying alcoves, will be installed the exhibits of the divisions of botany, forestry, vegetable physiology and the office of fiber investigations. The planting installation will be similar to that at Nashville and the exhibits will be placed in the furniture and cases and in the fabric backgrounds. All woodwork will be painted in drop black with an "egg shell" and an old-fashioned "faded" color will be used in the paint and fabrics of interiors. Colonel Brigham is assisted in the details of preparation and installation by Mr. Charles Richard Bush, chief of the material of the Agricultural department will be shipped about the middle of this month.

**DETAILS OF THE EXHIBIT.**  
 The exhibit of fiber investigations will illustrate the flax and hemp industries of the world as far as it has been possible to illustrate the commercial varieties of the different countries. The specimens will be arranged in panels for display on the rear aisle, making a display of forty-four feet in extent and about seven feet high.  
 One of the most important exhibits will be that of the Bureau of Animal Industry, Dr. Salmon, chief of the bureau, is particularly anxious that the object lesson contained in his department will afford an opportunity for the thousands who will visit the exposition to learn something about this ever widening branch of the government. A practical demonstration of the inspection of pork, as conducted by the bureau, and the packing centers of the United States, will be one of the chief features of the exhibit. Several assistants, Messrs. W. S. Wagoner, T. J. Cason, W. E. Potts, and J. W. Bell, will be present at the exposition, where they will be engaged in the examination of pork samples furnished them daily from the Omaha packing houses. There will be made a display of the dipping of sheep for scab. This will include a circular yard and vat attached to the main aisle, and a sheep vat in use at the Union stock yard, Chicago, for the same purpose.  
 In the dairy division there will be shown the composition of milk and its products comprising eight series. A cheese weighing ten pounds and with it a series of glass jars, showing weights and grades and mineral matter, which are the subjects of study. There will also be exhibits of fowls affected with gape worm disease, samples of various breeds of sheep and swine, and pathological specimens in alcohol of diseased organs, both mammals and birds, collected by the scientific investigators of the bureau and illustrating the lesions found in animals affected with various diseases.  
 The display to the west of the division of entomology will be a character of the pestiferous insects and the insects of the prairie and Rocky mountain regions.  
**WEATHER AND WOOD.**  
 Prof. Willis L. Moore, chief of the Weather bureau, is especially anxious that his department give a complete exhibit of itself and has arranged for a display of the various instruments and apparatus used in making meteorological observations, including types of the latest devices for reading and recording the elements, such as wind velocity, wind direction, temperature, rainfall, etc. He will place in position a complete printing press, and also a means of complete printing weather may be prepared by the chief officials in charge. There will be samples of various kinds used in the Weather bureau experiments in the forecasting of the weather. The exhibit will be conducted in charge of expert officials, and every effort will be made to fully and personally explain to all interested visitors the various instruments and their uses.  
 The government forestry exhibit planned for the Omaha exposition will consist of two principal features of which the chief exhibits. The outdoor exhibit will actually consist of forestry planting as actually practiced at agricultural stations in various western and other states. The indoor exhibit will consist of three features, monographs on timber species for the west, a forest botanical display of about 200 or more transmississippi and other tree species, arranged in glass cases so as to reflect wood, foliage, flowers and fruit, together with the geographical range, etc., and a series of relief models illustrating the intimate relation of proper forest management in maintaining the highest efficiency of arable land.  
 Much is expected from the division of entomology and Prof. L. O. Howard, chief entomologist, in a letter to Assistant Secretary Brigham, states that his division will comprise a series of cases illustrating the principal insect pests and their method of work. Especial attention will be paid to the insect affecting the sugar beet, since other exhibits will be made illustrating the various insects which damage farm animals, fruits and fruit trees, corn and the small grains, forest crops and garden vegetables.  
**FRUITS AND FLOWERS.**  
 The division of pomology will be represented by models, paintings, drawings and descriptions of such variety of fruits as are suitable for the western states and northern portion of the United States. The exhibit will be a miscellaneous collection of models which will partially represent the semi-vegetable physiology and pathology will be prepared no special exhibit illustrating its work. An exhibit will be prepared under its direction, however, illustrating the cultivation of mushrooms.  
 The exhibit of the division of chemistry

at the Omaha Exposition will relate solely to the sugar industry. On large screens will be shown enlarged photographs illustrating the buildings and portions of machinery and the best parts of factories now in operation. Many of the pictures show trains of cars arriving at the sugar refineries, sheds stored with thousands of dollars worth of the sugar beet and great quantities of supplies, indicative of large distilleries and refineries. There will also be displayed a historical collection of American beet sugar from 1743 manufacture. Statistical charts, models of typical beets and samples of beets from various parts of the country will conclude an exhibit that cannot but be one of the drawing cards at Omaha this year.

**VOCAL MUSIC FOR THE EXPOSITION.**  
**Local Chorus is Gaining in Numbers and Quality.**  
 The Musical department of the exposition is now getting well under way, and the local chorus is gaining in numbers and in quality. Arrangements are now in progress with regard to the procuring of copies of "Fair Ellen" by Max Bruch, a work for soprano and baritone soloists, and the chorus of "The Chorus" work of this selection is especially strong. It is founded on the story of the relief of Lucknow, and the leading theme being the Scotch melody, "The Campbell's Are Coming."  
 Nothing has yet developed in regard to the chorus book, and if it cannot be had at once, it will be abandoned and another arrangement made for the securing of these choruses. The time is very short for rehearsals and the chorus will be able to do a large amount of work in a short time, so that a varied and extensive repertoire may be looked for.  
 Director Kimball is anxiously waiting for reports from some of the chorus societies with which he has been corresponding. It is thought that a complete list of attractions will soon be given to the public.  
**Editors Coming to Omaha.**  
 NASHVILLE, April 9.—At a meeting of the Tennessee Press association's executive committee here today it was decided that the association would visit the Omaha exposition, leaving here June 22.

SOUTH OMAHA NEWS.

All of the churches will hold special Easter services today and in many an elaborate program will be rendered. The morning program at the First Presbyterian church is as follows: Hymn, "Come Every Pious Heart," congregation scripture lesson, Rev. R. L. Wheeler, D. D.; bass solo, "Easter Bells," J. B. Smith; announcements, Elder M. G. Zerby; consecration of children by baptism, with the session; "Old Easter" hymn; music; reception of Easter offerings; hymn, "Approach, O Sea of Mercy Seat," congregation; solo, Miss Jessie Carpenter; hymn, "Olive's Brown," congregation; benediction.  
 An evening service another program will be rendered, those taking part being Harry McMillan, Clifton H. Cook, J. B. Cason, and Miss Myrtle Wells. The program is "He Could Not Bend to the World," and the chorus choir is composed of Mrs. Nellie G. Sage, director; Mrs. Lucy E. Eads, soprano soloist; Mrs. Myrtle Wells, Miss Edna Curfman, Miss Jessie Carpenter, Miss Nellie Fowler, Miss Martha Smith, Miss Anna M. Fowler, Mrs. Augusta Berry, Miss Mabel C. Harlan, Miss McMillan, O. E. Blew, Gideon Sutherland, Wilbur H. Sprinkle, J. B. Perry Wheeler, Harry Condon, R. B. Montgomery and C. H. Cook will act as ushers.  
 The choir trained by Prof. Brownell will render a program at the First Methodist Episcopal church at 10:30 o'clock this morning. Agnes' church at 10:30 o'clock this morning. Those who have been given places on the program are: Dr. J. McCann, J. F. Gallagher, Dr. W. H. Slabaugh, Dr. W. Mullin, Misses Tylic and Uhl, Miss Theresa O'Toole, Mrs. Carroll, Miss Spottier and Messrs. Wislhire and Gillan.

**Cudaby Plant to Be Enlarged.**  
 Superintendent Cameron of the Cudaby Packing company returned yesterday from a trip to Sioux City, where he inspected the new Cudaby plant, the killing at this plant commencing about May 15.

The interior of the Cudaby office here has been painted and decorated, adding greatly to the appearance of the plant. The intention is to bore down 500 or 1,000 feet, or until a flowing stream is struck. The department will be enlarged with an addition 61,926 feet and four stories high will be made to the soap factory. The plans for this new building are not complete and it is expected that the new building will be building some when the time comes. It is thought that work on this structure can commence in about thirty days. This addition and alterations will be a complete outfit in the soap line, such as fancy toilet soaps, soap powder, chips, etc. A number of other improvements will be made at the Cudaby plant as soon as the price of bricks is reduced.

**Street Improvement Considered.**  
 A determination has been made this week to start a movement which will result in the grading of N street, from Twentieth street east to the Burlington tracks. This project has been gone over a number of times, but has always been abandoned on account of the lack of necessary money. The owners of this property now realize there will be a ready sale for the land in case the street is opened. Those mostly interested are Thomas Hootner, R. T. Maxwell, Richard O'Keefe and E. Stenger. These people have held a meeting and agreed to start the necessary legal proceedings at once. A petition is on file, but as it is an old one new steps must be taken and the city council will be urged to establish a grading district at once. It is estimated that the cost of filling in the holes and paving the street first-class condition will be about \$135 per front foot. With this street opened and paved the city will have a direct thoroughfare to the Thirtieth street boulevard.

**New Cars Go on Today.**  
 In case the weather is fair today, the Omaha Street Railway company will place in service on the Sherman avenue line four new cars today. Commencing today, trips will be made on Sundays hereafter the same as on week days, the first car in the morning leaving here at 6:10. During the day the cars will be run eight minutes apart. Heretofore the cars have been run at intervals and on Sunday and the first train out was not started until after 7 a. m. Business on the line has increased to such an extent that the necessity for the new cars is being realized by the city.

**Photographer Under Arrest.**  
 B. L. Tucker, a photographer at Sixteenth and Locust streets, was arrested last night for shooting with intent to kill at the instance of Harry A. Wilson, a resident of the same neighborhood. Tucker claims that he followed it up with a shot, which he availed by springing behind a telephone pole. Tucker says, however, that he was young much annoyed by Wilson and other men, who have since interfered with him. He claims that he caused the arrest of two of the crowd because he was afraid they were passing several of them last night Tucker was arrested and taken to the police station. He was discharged in order to let him strike him. Others of the crowd were arrested around him and Tucker drew his revolver and discharged it into the crowd. The crowd with which Wilson is associated is unfavorably known to the police.

**Marriage Licenses.**  
 The following marriage licenses were issued yesterday by the county judge:  
 Name and address  
 Guy B. Ira, Lynch, Neb. \$1.50  
 Elsie White, Niobrara, Neb. \$1.50  
 George E. McWilliams, Spokane, Wash. \$1.50  
 Margaret E. Ramsey, Omaha \$1.50  
 Frank Butler, Omaha \$1.50  
 Bertha Jordan, Omaha \$1.50  
 Peter A. Glad, South Omaha \$1.50  
 Sorine J. Dalstrom, South Omaha \$1.50

**Chief Arrested.**  
 John Bush was arrested last night in the act of carrying away a bolt of lace and several pairs of gloves from a store. He was arrested on Friday before the Maine charge, on which occasion he gave the name of Jake Heiler.

MILTON ROGERS & SON.

COR. 14TH AND FARNAM.  
**Majestic Steel and Malleable Iron Ranges.**  
**\$5.00 DOWN AND \$5.00 PER MONTH**  
 Prices are from \$10.00 to \$15.00 less than peddlers ask for Ranges. Buy of an old established home house that guarantees them and will be here to furnish extras or repairs when you want them.

**Reliable and Quick Meal Gasoline and Oil Stoves.**  
 Are warranted the simplest, safest and best. \$2.15 for a 2-burner 1898 Gasoline Stove, warranted.

**Refrigerators The Alaska, The Youkon, The Chilkoot.**  
**Rubber Garden Hose**  
 We keep only the best brands. All grades from 5c foot.  
 An excellent high grade warranted Hose 10c foot. Others, better, to 18c. Lawn Reels, Sprinklers, Sprays and Nozzles.  
**Are the 3 greatest ice savers. 8 walls, movable flues and drain pipe—hardwood—bronze trimmings—all styles and sizes \$4.75 up.**  
**GARDEN TOOLS, SPADES, SHOVELS, RAKES, HOES, LADIES' and CHILDREN'S FLORAL and GARDEN SETS.**

meet with Mrs. Cressy, Twenty-second and I streets, next Thursday afternoon.  
 John S. Foster of Greenwood is here visiting his daughter, Mrs. E. O. Mayfield.  
 Bargains in furniture, carpets and crockery at Stone & Co., 25th and N streets.  
 John Mahoney is in jail, suspected with stealing a number of tools from the Armour plant.

See the celebrated Conover piano, the favorite of Collins Music Store, 24th and K streets.  
 Mrs. W. M. Lee of Dunlap, Ia., is visiting Mr. and Mrs. C. H. Thompson, Twenty-fourth and J streets.

A meeting of the Union Veterans' Republican club will be held at the office of Judge Agnew Monday evening.  
 Stephen Howard, an employee of Swift and Company, accidentally cut one of his fingers while at work yesterday, and the services of a physician were needed to dress the wound.  
 Mrs. Sarah Hurley desires to thank friends and also the members of Rosewood camp, No. 27, Woodmen of the World, for sympathy shown after the death of her husband, Frank Hurley.

At a special meeting of the Sons of Vets held Friday night, quite a number of the members agreed to help in their readiness to go to war in case their services were needed.  
 The following have been elected to serve as committees of management of the Young Men's Christian association for one year: T. C. Marsh, E. D. Wiers, W. B. Wymen, Dr. J. E. Crothers, A. A. Munro, J. M. Wierholm, Dr. W. H. Slabaugh, Dr. W. Mullin, Misses Tylic and Uhl, Miss Theresa O'Toole, Mrs. Carroll, Miss Spottier and Messrs. Wislhire and Gillan.

Notes of the Exposition.

The business men of Houston, Tex. have offered a prize of \$100 for the design that will best represent Houston at the exposition.  
 Applications have been received from the Remington Arms company for an exhibit of firearms, and from the Shaw Piano company of Cleveland, O., for an exhibit of pianos.  
 The Georgia building was commenced yesterday. Dunnam & Thompson have the contract for this building, which is located on the bluff tract west and a little south of the culture building.  
 The Department of Transportation has prepared for the use of exhibitors a pamphlet containing the rules and regulations governing the shipment of exhibits, together with such general information regarding the department as would be of interest to intending exhibitors.  
 Members of the Victoria Diamond Jubilee association and all persons of Canadian birth are invited to the Transmississippi exhibition, sixth floor Paxton block, on Monday night, 8 p. m., for the purpose of perfecting an organization to help entertain British visitors to the exposition this summer.  
 The use of the Auditorium on the exposition grounds for the evenings of June 29 and July 1 and 2 has been granted to the Bureau of Education and Connection with the musical congress. Concerts will be given in the Auditorium as an adjunct of the congress and the orchestra will participate.

**Dr. E. E. Chivers, editor of the Baptist Union of Chicago, visited the exposition grounds yesterday. He was very highly pleased. The doctor, who had visited Nashville, said the Transmississippi exposition far surpasses it, presenting a picture quite as impressive as the Columbian Fair exhibition.**

**Governor Mount of Indiana writes to the Department of Publicity and Promotion that he is endeavoring to secure members of an Indiana Exposition commission, but is meeting with some difficulty in getting people to serve without remuneration. He says, however, that he expects to complete the commission within a short time.**

**The outlook for a New York building on the bluff tract is becoming very bright. The New York commission has an appropriation of \$7,500 and a balance of \$5,000 from the Nashville appropriation. The commission asked Dunnam & Thompson to submit a sketch of a building and this has been furnished. This firm built the New York building at the Nashville exposition.**

**A few seasons ago the commissioner of New Mexico, who will have charge of the exhibit to be made by that territory, has notified the exposition management that he will be in Omaha about April 16 to perfect further details regarding the exhibit. A similar notice has been received from Vice President Shurtluff of Utah, who telegraphed that final arrangements for the Utah exhibit.**

**Indian Commissioner W. A. Jones, who was expected to reach Omaha early during the coming week, has sent word that he will be delayed a little longer by the failure of Congress to pass the Indian bill. His visit was to be for the purpose of selecting a building for the Indian supply depot in Omaha and also to confer with Manager Roseland of the Department of Publicity and Promotion regarding the proposed Indian congress.**

**Logan (Ia.) Nucleus suggests that the people of the Iowa transmississippi exhibition be a business of providing accommodations for visitors to the exposition who desire a convenient residence in the city. It argues that there is an excellent train service between Logan and the exposition grounds, requires but about an hour each way, and urges the people to organize and prepare to go after the business.**

**The general conference of the Reorganized Church of Jesus Christ of Latter Day Saints at Independence, Mo., considered an invitation extended to the church by the exposition management to be represented at the exposition. A resolution that the last Sunday from the members be set aside for offering maintenance of an exhibit at Omaha was defeated, and the matter was referred to the next meeting of the church, who will report their views on the subject to the church.**

**There is too little preaching of the gospel of health. It is the last thing that should be taught to a man-child or woman-child. It is the most important branch of an education.**  
 Without health, a man cannot be a business man and a woman a social flower. When the body of either a man or a woman is properly nourished, the result is the enjoyment of good health. Almost all illness is due to improper or insufficient nourishment. If the stomach is right and the liver is right, the blood will receive its normal supply of the life-giving elements of the food and the body will be properly nourished. Dr. Pierce's Golden Medical Discovery acts directly upon the stomach and liver. It purifies and enriches the blood. It is the great blood-maker, flesh-builder, nerve tonic and restorative. It promotes the natural activity of the entire nutritive organism. It puts an end to the slow starvation that is at the base of many diseases. It does not make flabby flesh or cool liver oil, but muscular tissues. It does not make corpulent people more corpulent but builds up the system to the normal standard.

**"I was run down and prostrated and I felt female weakness and kidney trouble," writes Mrs. Maranda Ramsey, of Smart, Warren Co., Tenn. "My husband and I were a goodly family. My friends thought I would die. I had read of Dr. Pierce's medicine and sent for it. It did me good. It gave me strength and put me back on my feet. I have taken four bottles of Golden Medical Discovery and two of 'Favorite Prescription' and am in better health than I have for years."**

**Constitution is the father of all manner of maladies. If it did not exist or was in all cases promptly relieved, the majority of medical books could be safely destroyed. It is the easiest sickness to recognize and the simplest to cure. Dr. Pierce's Pleasant Pellets cure constipation every time. They cure it promptly, completely and permanently. They are pleasant and do not put you out of spirits. One "Pellet" is a gentle laxative, and two a mild cathartic. Druggists keep nothing else "just as good."**

**There is too little preaching of the gospel of health. It is the last thing that should be taught to a man-child or woman-child. It is the most important branch of an education.**

**Slight Net Advance in Prices from Last Saturday.**  
 NEW YORK, April 9.—The level of prices in the stock market is not widely different from that of last Saturday, but it is above and below the level which it reached on Friday. It has been above it all week, the high level being reached on Wednesday afternoon on the announcement of the postponement of the president's message. The market has sagged since then, but has not fallen to last Saturday's level. The rebound on Wednesday was attributed to a belief that the postponement of the message was designed to further a peaceful solution. The suddenness and violence of the advance was a demonstration of the exceedingly nervous condition of the short interest, which is currently supposed to be still very large. The uneasiness of this element is due to the fact that the several pairs of gloves from a store. He was arrested on Friday before the Maine charge, on which occasion he gave the name of Jake Heiler.

**Weekly Stock Market Review.**  
 The week ending today was a very quiet one, with a slight net advance in prices from last Saturday. The market has sagged since then, but has not fallen to last Saturday's level. The rebound on Wednesday was attributed to a belief that the postponement of the message was designed to further a peaceful solution. The suddenness and violence of the advance was a demonstration of the exceedingly nervous condition of the short interest, which is currently supposed to be still very large. The uneasiness of this element is due to the fact that the several pairs of gloves from a store. He was arrested on Friday before the Maine charge, on which occasion he gave the name of Jake Heiler.
