FROM THE FARTHER WEST

EARLY SPANISH

First Settlement in New Mexico Nearly Three Hundred Years Ago.

DBSERVATION

OF THE

Preparations Being Made for a Celebration Where the Spaniards Planted a Colony_Wanderings of the Colonists.

SANTA FE, N. M., April 10.-(Special.)-The celebration of the three hundredth anniversary of the first Spanish settlement in New Mexico is engaging the attention of the people of the territory at the present time. It will commemorate a historical event about which not very much is commonly known. The 13th day of July, 1598, saw the beginning of the permanent occupation by the early Spanish conquistadores, when, under the noble and chivalrous Onate, the little Spanish army of invasion, together with some number of colonist families, reached the point in New Mexico now designated on the vailroad maps as Chamita. The weary company had marched from where is now El Paso, first to Las Cruces, thence north; to Socorro, suffering privations innumerable, and hoping at each stopping place to realize their dreams of an ideal place at which to establish a permanent colony. The little army was not on a campaign of conquest and was treated in a frienly spirit by the natives. Food, of which they were in continua) meed, was nearly always offered when by chance they came upon the Indian pueblos scattered through the region and other proffers of succor were received, which showed the friendly and peaceable disposition of the natives.

WANDERING COLONY.

Leaving Socorro, the band wandered northhoping always to realize their dream of a perfect site in this land of sunshine for their little colony. Finally they came to th confluence of the noble Rio Grande and the winding, silvery Rio Chama. Here was the ideal place, the elysium of which they had dreamed. Faint hearts grew stout again and spirits buoyant as they viewed the splendid possibilities before them. It was an inspir-ing sight, as, standing on the banks of the broad Rio Grande, with the waters which were to render fertile the plains about them rushing and trembling in its course, with the green fields belonging to the Indian vil-lage on the opposite bank, and with every

promise of future peace and abundance was the 13th day of July, 1598, h marked the arrival of those bravehearted ploneers at this beautiful spot, end it was this day that began the real settlement of New Mexico by the descendants of the chivalry of old Castile and Aragon. No time was lost by the colonists in establish-ing themselves in this new and promising land and on the day of their arrival ground was broken for homes and above all for the little church in which to celebrate their thanksgiving. Freely did the gentle Pueblo across the beautiful river give aid and food, the bonds of friendship between Castillan and Indian being thus cemented strongly. SETTLEMENT BEGUN.

In two weeks the church was completed and, though not pretentious, it was the first Christian house of worship dedicated in this western country.

The completion of the church proved the The completion of the church proved the strongest anchorage of the struggling colony to the spot, now denominated San Gabriel, and a grand celebration was prepared, to which the Indians from all the pueblos were invited. The feature of the celebration was a mock battle between Christians and Moors, the forms of the celebration was the former, of course, gaining a glorious vic-tory. Games were indulged in for a week, every incident of the festival being intended to gain the good will of the natives. The colonists so far succeeded that the Franciscan futhers induced numbers of the Indiana abandon their religion for that of the Christians and today the natives of the pueblo of San Juan still preserve the recollections and teachings of the first padres at

Thus was the first Spanish colony in New Mexico established and it is that incident which the people of the territory are endeavoring to commemorate.

It is the intention to have a one-day fes-

tival, or at most two days, crowded full of interesting events, the day, of course, to fall on July 13, 1898. The Historical society, of which ex-Gov-

ernor Prince is the head, and the Pioneer society of New Mexico, have committees

The railroads have elready signified their Intention of allowing an especially low rate from points in New Mexico and Colorado. Ample provision will be made for the accommodation of a large number of visitors, both at Chamita (San Gabriel) and at San Juan, cross the river, and there is no doubt that the occasion will prove pleasant and profit-

MRS. FREMONT WINS HER CASE. Futile Attempt of a Boston Man to

Get a Judgment. LOS ANGELES, Cal., April 10 .- (Special.)-The interesting case of Lorenz Jones of Boston against Jessie Benton Fremont, the widow of General Fremont, the "Pa hinder," which has been in the courts for the last four years, was brought to a close last week by Judge Wellborn ordering a decree in the circuit court for the defendant. The suit con-cerned ce:tain property at Black Point, San Francisco, which was taken from Mrs. Fremont by the government. From the amount which she is to receive in compensation Jones asserted his right to be paid a debt owed him by General Fremont. The suit was brought on the basis of a decision of the fiftieth congress that Mrs. Fremoat was en-titled to compensation for the taking from her by the government of her property and the passige of an act acknowledging the debt Fremont's former ownership property and sending the matter to the United States court of claims for the adjustment of the amount which should be paid to her. the decision of which has not yet been

against the general for a debt of many years' standing, in which the latter had conferred cause he alleged that the title to the Black of the coming award to Mrs. Fremont. property had been put in her name by General Fremont in order to defraud his cred was a confessed creditor, and should have his claim paid.

A Fight with Thieves. SANTA FE, N. M., April 10 .- (Special.)-Cattle rustling continues to be common in this part of the southwest, but very often

the thieves get caught in a trap. One day

FACE

oily, mothy skin, itching, scaly scalp, dry, thin, and falling hair, and baby blemishes prevented by Curicura Soap, the most effective skin purifying and beautifying soap in the world, as well as purest and sweetest for toilet, bath, and nursery.

COLONY last week a lot of cattle, numbering about sixty head, were driven into Cervillos, and an effort was made to sell them. Suspicion with flying pieces of machinery, and had a was aroused that the men who had the cat-tle were not the rightful owners and an investigation disclosed the fact that the cattie had been stolen from Seven Rivers, over in Eddy county. A deputy sheriff was notified, and in company with a constable started out on the hunt for the thieves, who were four in number, coming up to them about a mile out of Cerrillos. A lively shooting match was indulged in on both sides, the engagement finally resulting in the capture of one of the rustlers. A posse is scouring the country for the other three men.

UNIQUE ARIZONA MINING CAMP.

Obedient Gold Diggers Who Neither Smoke, Drink Nor Swenr.

Eighteen miles from Tombstone, Arizona, s a mining camp unique in all the west, where whisky and tobacco never intrude, where oaths are unknown and where the population keeps the Sabbath with all the strict ness of a Scotch village. The miners hold morning and evening prayer and the argument of spiritual points furnishes the only recreation for sturdy men, such men as in other camps find their pleasures at the gam-bling table or in red liquor. Yet it is their choice, says the Cincinnati Inquirer, and few have been the backsliders in the years the community has known an organized ex-

The camp is, in every sense, a co-operative one. It gains its livelihood and takes its name from the Copper Glance mine, a gold property of real value. All the men do their share in the extraction or reduction of the rich ore and all are increasing in the world's goods at a rapid rate.

As is usual in such communities, the camp has a recognized leader. His name is Samuel Donnelly. He is stoutly built, in height about five feet seven inches, of what might be termed benevolent presence, a full beard leargely concealing a rather weak face. He is the camp's arbiter, judge and ruler. His nfluence on his two score of followers is remarkable and, though cur ously eriotic, seems generally directed toward absolute justice on a code modeled on the teachings of the apostles of old. His generosity is evident from the fact that he freely divides with the community the wealth derived from working the mine, of which he is the principal

The first scandal attaching to Copper Glance camp came from a man who had deserted the fold and had joined at Bisbee the great majority of carnal minded. He told a tory of incidental immorality on the part of Donnelly. The deserter's wife, it appeared, had refused to follow him, remaining, with her several children, with the prophet. Den-nelly's duties are correctional as well as al-monitory. Thus it was he was hauled before the district court at Tembstone, charged with castigating, with a buggy whip, an 11-months-old babe, in which the devil was supposed to have found temporary lodg-He was also charged in the same complaint with aggravated assault, in having ducked a small boy for a trivial misdeed, such ducking having been attended with cirumstances of unusual cruelty. Donnelly made a speech in court. It was a rambling statement of his peculiar views of religion. He had been a member of the Salvation Army, he said, but in later years had preferred to carve for himself just the particuferred to carve for himself just the particu-lar kind of spiritual meat needed by his system. The jury found him guilty, though the charge of whipping was illy sustained and the mother of the boy stated the duck-ing was with her full approval. The case is now on appeal before the teritorial supreme court at Phoenix and a decision is expected within a few days.

SOUTH DAKOTA NEWS.

Spring Elections. CHAMBERLAIN, S. D., April 10 .- (Special.)-Nearly all the South Dakota cities and towns will hold their annual elections on the 19th inst. Party tickets will be placed in the field in comparatively few of them. In a number of towns the saloon license question will be voted on, proper petitions having been filed asking for an expression of the voters on the question of license or no

Sold at Sheriff's Sale DEADWOOD, S. D., April 10.-(Special.)-At sheriff's sale yesterday, the Oro Cache mining property was sold to satisfy judgment to J. H. Carstaire of New York, the ment to J. H. Carstaire of New York, the price bid being \$95,747.83. The buyer is trustee for a Philadelphia syndicate. The property is valuable and joins with the Highland Chief in Spruce gulch.

Contracts Awarded. CHAMBERLAIN, S. D., April 10 .- (Special.)-J. W. Warnshuis of this city has been awarded the contract for the construction of water and sewerage systems, including an artesian well, at the Chamberlain government Indian school. His bid was \$5,000, the exact amount of the appropriation by congress for the purpose.

Diamond Drills in the Mines. BUTTE, Mont., April 10.-(Special.)-The question as to what depth the copper mines of Butte will hold out has long been discussed, but not until recently have efforts been made to ascertain just how deep the ore bodies go. Some time ago the Araconda company began prospecting with a diamond drill from the bottom of the Anaconda mine, which is 1,600 feet in depth. The drill is now down 600 feet, which is 2,200 feet from the surface. The core brought up from a depth of 2,200 feet was fine glance copper and would run 80 per cent. The core is about two inches in diameter and is taken out in sections about two feet in length.

Boston and Montana company has also used diamond drills with a great deal of sucess, and copper ore has been brought up from a depth of 2,000 feet. It is the intention of the Boston and Montana company to sink drills on its properties to a depth o 3,000 feet.

The prospectors who have been operating the diamond dril's near Armington, although handicapped by a heavy snowstorm, succeeded last week in striking coal. Prospectors who have been working in the coulee, driving turnels in the coulee. friving tunnels into the hillside, have moved further down the stream and are now driving two new tunnels. They are in abou fifty feet and have five and one-half feet of coal, which improves in quality as they ad-

Gold from the Sandbars.

BUTTE, Mont., April 10 .- (Special.)-A machine has just been completed for testing the sandbars of the Missouri river. The contrivance is about eight feet long by three feet in width and consists of a sloping screen with holes a quarter of an inch in diameter upon which the gravel is shoveled. The screen receives an end movement by means of a double throw crankshaft. At the same time an attachment at one end of the shaft runs an ordinary wooden pump, which throws the water upon the gravel. Under the screen are the carpets for collecting the gold and the black sand, so arranged that the waste product will be conveyed over as great a surface as possible before being dis-charged at the lower end. The machine is operated by one man at the crank, while another shovels gravel upon the screen. For several seasons the bars along the Missouri have been prospected, the results being very promising. Gold in considerable quantities was found in nearly every in-stance, men making from \$2 to \$4 per day with the crudest methods. It is generally conceded that some means of handling the sand cheaply and extensively is all that is required to make much money out of the

Justice in New Mexico. ALBUQUERQUE, N. M., April 10 .- (Special.)-The term of district court just closed here broke the record for convictions, of the twenty-three persons tried on indictments twenty-two being found guilty and receiving

Montana News Notes. A traction dredge has just been shipped from Butte for use at Bear Mountain. George B. Fry of Dupuyer has sold a pateastern parties for \$10,000.

miraculous escape.

The Madison county poor house now stands at the head of old Alger guich in Montana, from which \$100,000,000 in gold has been taken by placer mining. Thomas Cruse, a cattleman with a ranch ear Belgrade, has recently made large pur-

chares of cattle in Nevada and he has just bronded a herd of 2,000. A prominent rancher who lives in the Mill creek country, east of Anaconda, has com-plained of the presence of a large band of rees and asks their removal. The annual meeting of the Montana State

Stock Growers' association, which opens at Miles City April 19, promises, in some respects, to be the most important in its his-The third body recovered from the Hale

house fire at Butte was that of Martin Rocney, and it was intact save that a foot was broken off. To all appearances he died A large force of men will soon be at work on the Big Horn tunnel at Glendale. From the fact that there are a number of springs

inside the tunnel which keep the roadbed in an unsafe condition, the interior for its entire length of 1,068 feet is to be concreted. Wyoming News Notes.

The Kemmerer Camera made its appearance April 1, with Charles P. Diehl as The Casper Derrick has changed hands

Persons who have recently visited the Grand Encompment district report the camp as booming and the town growing. This season will see the shearing at Fort Steele of 125,000 sheep, with a mutton ship-ment next fall of at least 30,000 head.

The Woman's Suffrage association of Massachusetts has asked Judge Jesse Knight to furnish a history of the suffrage move ment in Wyoming. The Wyoming Land, Coal and Iron com-pany has purchased of Isaac Fieldhouse the

hematite iron ore deposits in the Sminoe mining district north of Rawlins. The Wyoming State Board of Land Comnissioners last week leased 25,000 acres of school and state lands to ranchmen of the date for a period of five years, at from 2½ to

cents an sere per annum, James Conly, sentenced at Evanston for four years for burglary, made an attack upon Guard Lasher at the renitentiary at Rawlins and but for the assistance of two other convicts the latter would have been killed.

Work on the test oil well of the Wyo ming Valley Oil company at Douglas is being continued. A quantity of oil has come up with every sand pumping during the last two days' drilling, indicating that the oil deposit is not far distant.

AT THE HOTELS.

"The Black Hills are producing more gold every year and offer great advantages to men who are willing to put in honest effort as they would in other lines of work," said C. S. Mattes of Keystone, S. D. "Men who expect to develop paying properties in six months or a year will be disappointed, but men who have the pluck to stay with the work stand a good chance to succeed. It is foolish for people to invest in mining prop-erties which they have never seen and be-cause so many persons have been swindled in this way there seems to be a prevalent idea that no mining properties pay. If a man has any desire to go into the gold mining business he should take no man's word for what certain claims are, but should go to them personally and take ore which he knows came from the claims in question and have it as-sayed. This idea of taking an expert's word for the richness of mines is hazardous and should not be relied upon. A tenderfoot's opinion on a claim is just as good as an ex-pert's for all there is to be known is how rich the oce is which is dug out.

"Keystone is proving to be quite an extensive mining camp. The four chief mines are Keyetone, Blamark and Bla The town is fifty-nine miles from Deadwood, and so far there is no railroad in the camp. Much of the ore is free milling and is prepared in Keystone for shipment to the nint, but the arsenical pyrites and gold that is in a chemical state in the ore have to be scut to some smelter. A great deal of the South Dakota ore comes to Omaha and some goes to Kansas City and Aurora.

"Most of the ore in the Black Hills runs in vertical veins and crops out so it is easier o locate it than it is where the veins cun flat and can not be detected from the surface One great advantage of vertical veins is that they yield ore from the time the work begins and thus coable a man without much capital to sink holes and start a shaft. When the ore near the top of the ground is not a pay-ing quality, it is a pretty sure sign that it is no richer further down and a great deal of unnecessary expense is avoided. Every year new finds are made in the Black Hills and if a man wents to hunt for gold I know no better place for him to go."

MILITARY MATTERS

A new roster of the Department of the Missouri has just been issued from the headquarters in Omaha, which shows that the forces under the command of General Coppinger consist of thirty troops of cavalry and forty companies of infantry. Besides these there are six regimental headquarters and bands in the department. The cavalry consists of six troops each of the First, Second, Third, Sixth and Ninth regiments, while the quota of infantry is made up of eight companies each of the following regi-ments: Tenth, Eleventh, Tweifth, Twenth eth and Twenty-second regiments. At the time of the creating of the Department of the Missouri mention was made of the per-sonal and department staff serving at head-quarters. The general staff officers serving in the department are: Quartermaster's de partment-Lieutenant Colonel Gilbert C Smith, St. Louis, Mo.; Major Charles A. Booth, St. Louis; Captain Samuel R. Jones, assistant quartermaster, Omaha; Captain John T. Knight, assistant quartermaster, Jofferson barracks, Mo.: Captain Alfred M. Palmer, assistant quartermaster, Fort Leav-enworth, Kan.: Captain John Baxter, jr., assistant quartermaster, Fort Riley, Kan. Subsistence department—Colonel W. H. Nash, purchasing commissary, St. Louis, Mo.; Captain A. L. Smith, purchasing com-missary, Kansas City, Mo.; Captain J. H. Duval, assistant to the purchasing commis-sary, St. Louis, Mo. The medical department is in charge of twenty surgeons rank-ing from first lieutenant up to Colonel. Two paymasters are stationed in the department. Major W. H. Hamner heing located in Omeha and Major John P. Baker at St. Louis, Mo. The engineer corps is composed of eight officers, located at St. Louis, Sloux City, Keokuk and Little Rock. Major John A. Kress is in charge of the ordnance department, with station at Jefferson barracks. Six chaplains are provided, they being located at Forts Crook, Reno, Sill, Riley, Leaven day. The opening chorus was "Ring, Ye worth and Robinson. The posts in the department have been assigned to the middle partment have been assigned to the middle and congregation. After a prayer by Rev. Mr. MacAyeal, "Jesus Shall Reign" was sung and then followed a responsive reeding and paymasters are stationed in the department. cral and Major Francis Moore, Fifth cavalry,

acting inspector general. enlarge the duties of the Board of Ordnance and Fortification by a return to the original scope of that body. The act of 1888 provided that the board have charge of varied subjects, such as torpedoes, means of submarine defense, purchase of steel for high power guns, completion and test of guns, small arms, projectiles and other war material The work of this board was changed in 1890 and many of the duties were transferred to the corps of engineer and ordnance departboard follow the program as originally laid down. General Miles has recommended that he board be reorganized by having on its membership the chief of engineers and the chief of ordnance and the detail of an artillery officer as recorder.

Major George A. Armes, retired, will not down and the War department officials have under consideration the trial by courtmartial of the major. This is the rges made by the major against Lieutenant W. P. Duvall. The charges were inves-tigated and it is understood that the nature the report of the investigating officer justifies a proceeding against Major Armes.

General Greely, chief signal officer of the avmy, has completed plans for placing Fort Washington, Sheridan Point, Indian Head and Fort Myer in communication by means of telegraph and telephone. A cable will be laid across the river at Indian Head and the necessary land lines established. Plans for connecting a number of the forts in Massachusetts have been completed and the work of establishing the line is under way.

Bugle Notes. The posts at Whipple Barracks, Ariz., and Fort Missoula, Mont., have been abandoned. First Lieutenant E. A. Edwards, Twentyifth infantry, has been promoted to a cap-

LOCAL BREVITIES.

The city improvement committee of the Woman's club will meet today at 4 p. m. at the club parlors. All members are requested to be present.

The functal of Miss Lulu B. Livingstor wes held yesterday from the home of her mother, 843 South Nineteenth street. It was conducted by the Order of the Eastern Star. The official of the Willow Springs distillery from whom a swindler obtained \$264 under the representation that he was a large cus-tomer of the house from Duncan, Neb., was W. F. Fahs, instead of E. Johnson, as was reported at the police station.

Paul Gregg, who was recently seriously injured by an accident at the Nineteenth street power house, is reported to be con siderably better. The child is being cared for at his home, 2205 Webster street, and his recovery is thought to be assured.

Yesterday the new open cars of the Street Railway company were given a triel on the Sherman avenue and Hanscom park lines.

mineral resources of the great west are fittingly represented in the Transmississipp Exposition. Dr. Day is chief of the Mining bureau of the United States Geological survey and has direct charge of the compilation of the mineral statistics which form such an important factor in the business of this-Records in the adjutant general's departwho have mining interests. His position in the government service not only gives him a knowledge of the resources of a given sec-tion and of where the best varieties of each

mineral are to be found, but it also give him an influence with the mine owners which makes them very desirious of complying with any reasonable request he may make. It is, therefore, practically assured that his visit among the mines of the mineral producing west will result in a mining exhibit which will

will surpass anything in that line ever at-tempted in any section of the country. Dr. Day's idea of a mining exhibit is not to have the huge Mining building filled with minerals of various kinds, dumped in heaps with a view of realizing as much advertising benefit to the owner as possible, but he proposes, and says he will have, an exhibit in which the classification will be such that he exhibit will be an education in geology and the applied sciences. The various ex-hibits will be arranged in such a way that the raw material and the location in which it is found will be shown, followed by the imerous processes, in order, through which

the raw material passes in order to produce With this idea in view the commissioner will visit the several mining districts to inspect the material that is being collected for shipment to Omaha. This inspection will probably result, in many cases, in a request for the eliminaton of some material deemed undesirable and the substitution of other material to make the exhibit more com-

One governing desire on the part of Dr Day is to make the exhibit of gems a prominent feature of the mineral exhibit. For this purpose he will endeavor to have displayed collection of the beautiful tur found in New Mexico. A section will be devoted to the idaho opals, which equal in beauty and value those of Hungary and Queensland. The beautiful blue sapphires which have lately been found in Montana will be added to the fine collection of lighter shades which is available for exhibition. Diamonds found in Wisconsin and the ebautiful topaz found in Utah and Colorado, some of it of a heaviful place shades. some of it of a beautiful plnk shade, will add variety to the beautiful tints of the gen section. A number of the magnificent quartz crystals recently found in California will bably appear in the collection and there will be garnets from New Mexico and Alaska

and a new semi-precious stone from Utahvariscite. stolen from the curb at Sixteenth and Callifornia streets. Yesterday the wheel was placed in charge of a patrolman on Cuming street by a young man, who said that he had borrowed it from an acquaintance and was now unable to locate him. It was identified by Bouquet, and was found to have been considerably dumaged by rough usage. The name of the conscience-stricken young man was obtained when he gave up the wheel, but the police have been unable to locate of the conscience of the conscience of the building made of having a tall shaft in the form of a Corinthian column in the In the gold section there will be nuggets which he hopes to realize before his return from this trip, that of having a tall shaft in the form of a Corinthian column in the center of the building made of pure silver.

TO CURE COLD IN ONE DAY Take Laxative Bromo Quintne Tablets. Ali druggists refund the money if it fails to cure. 25c. The genuine has L. B. Q. on each tablet.

John Slobodny's Hand Hurt. streets, yesterday afternoon between the proprietor and two discharged employes than pleased with the result.

Our stock of pictures-framed and unframed-never was more complete than now-never before have we shown such a variety of subjects in oil, water colors, etchings, photogravures, etc.-many new and beautiful pieces that will make handsome additions to any home-in mouldings we show all the new colorings and effects, nothing has changed as much as picture frame moulding. While we were obliged to buy almost an entire new stock, we have kept the prices right down-where they have proved so popular. We like visitors.

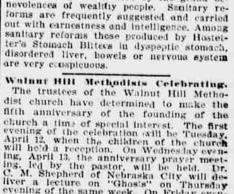

A. HOSPE,

Maybe the powers can dictate terms to Spain-but they can't dictate terms to your Uncle Samuel-anyhow they can't set a price on the shoes we sell-nobody can put as low a price on shoes as wewhere else can you get a man's shoe for \$3-that is, a man's shoe that a dealer will warrant? We know the kind of material these shoes are made of and we know their equal has never been produced for the money-these come in the bulldog, wide and narrow coin toeslight or heavy soles-just such a shoe as gives all around satisfaction.

Great Benevolences.

In the large cities of the United States the

condition of the metropolitan poor is con-

stantly being ameliorated by the grand be-

fifth anniversary of the founding of the church a time of special interest. The first evening of the celebration will be Tuesday, April 12, when the children of the church will held a reception. On Wednesday evening, April 13, the anniversary prayer meeting, led by the pastor, will be held. Dr. C. M. Shepherd of Nebraska City will deliver a lecture on "Ghosis" on Thursday evening of the same week. On Friday evening there will be a lecture by Dr. Jesse Bowman Young of St. Louis on "Echoes from Round Top." Saturday evening is to be given to a reception under the auspices of the Ladies' Aid society, and Sunday, April 17, will be devoted to two sermons by Dr. Jesse Bowman Young, a love feast led by Rev. C. W. Miller and the regular Sunday school, Epworth league and Junior league meetings. No admission is to be charged to any of the exercises, and the public will be heartily welcomed.

Sidney as a Division Station In a letter to Robert Oberfelder of Sidney. Neb., General Manager Edward Dickinson of the Union Pacific says: "The question of the Union Pacific says; "The question of doing away with Sidney as a district terminal is one that has not yet been considered by our people. We should want to look into the matter very carefully and known beyond a doubt that such a step was entirely practicable and in the direction of economical operation without sperificing more than would be gained. In other words it is a question requiring a great deal of thought and study, one which we have not had an opportunity to look into up to this time. You may rest assured that it is not the desire or intention of the present owners or management of the Union

ent owners or management of the Union Pacific to do anything of the kind unless such a move should be found after careful consideration to be advisable from the various standpoints and essential to the best interests of the railroad company." Lafayette Post Battallon.

Seth Cole is in receipt of a letter from his old commander, Colonel Daniel F. Butterfield, who is writing to members of the famous Butterfield battalion on the sub-ject of the threatened war. Colonel Butter-field is now commander of Lafayette post, No. 140, Grand Army of the Republic, De-partment of New York. It is the desire of the post to raise and equip a battalion to be known as Lafayette battalion. The mem-bers of the past piedge themselves to sucbers of the past pledge themselves to sup-port and look after the families of volun-teers in the battalion. Colonel Butterfield requests the members of his old regiment to assist in the work by enlisting men and sending them forward to him.

Chamberlain's Cough Remedy is recommended only for the few discuses for which experience has proven it to be especially adapted and superior to any other. No other remedy will cure a cough or cold so quickly. No other is so certain a preventive and cure for croup. No other affords so much relief in cases of whooping cough. No other is held in higher esteem by those who A disturbance occurred in the saloon of have used it and know its real worth and P. Slobodny, Thirteenth and Howard merits. Give it a trial when in need of such
