

LESSENS CHANCE FOR BRYAN

Secretary of War Punishes the Popocratic Colonel's Rear Tires.

NT ERFERES WITH HOLCOMB'S SCHEME

Telegram Asking the Governor to Furnish Six Hundred and Sixty More Privates Sets Him to Jumping Sideswings.

LINCOLN, May 28.—(Special).—The governor today received a telegram from the secretary of war which has caused much consternation in the ranks of the popocrats whose principal patriotism consists in a scheme to make W. J. Bryan colonel of a full-blown regiment. The telegram was as follows:

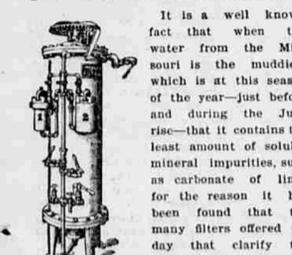

Governor of Nebraska, Lincoln, Nebraska: It is estimated that about 600 enlisted men will be required to fill to the maximum the organizations already in service from your state. It is desired to know how far you will be able to furnish the above number.

R. A. ALGER, Secretary of War. The complaint of the popocratic politicians is that the recruiting of 600 additional men to serve in the two regiments under Colonel Bills and Colonel Brant will take such a proportion of Nebraska's quota under the second call that there will be only a part of a regiment left for Bryan to command, and if he goes to the front with the Nebraska troops he can only hold a commission as a major. After all the political scheming that has been done in this state in connection with the Bryan campaign, it is most alarming. The governor wired back to the secretary of war as follows:

Hon. R. A. Alger, Secretary of War, Washington: Answering telegraphic inquiry, Nebraska will provide an equal number of men assigned to it and in such a manner as your department may prescribe. If you mean to ask my opinion, I would respectfully suggest that in my judgment the maximum strength will prove more efficient and more satisfactory to the officers and men, companies to be kept recruited to present strength. Anticipating the possibility of a second call, a third regiment has been organized under command of W. J. Bryan, which is at your service. It can be ready for muster on a few days' notice.

Outside of Bryan's Regiment. While there is no doubt expressed that Nebraska will be able to furnish the additional men without unnecessary delay, there is a great deal of doubt that any of the patriots belonging to the Bryan crowd will volunteer as privates to help fill out the companies already in the field. One of the captains of the "Third Regiment" has already stated in an open letter that privates existing in the companies of the First and Second regiments will "be made the dogs" of the officers of such companies. This sentiment is being taken up and widely expressed by other officers and men of the Bryan regiment, and it is probable that the 600 men will have to be enlisted from among those who have not seen fit to join the Bryan companies, and that the state has an opportunity to do so. It is evident from the Alger telegram that the men who have during the last two weeks expressed an anxiety to get into the army will have an excellent chance to prove their patriotism by offering themselves for enlistment in two regiments that are now at the front. It is possible, however, that the managers of the new Third Regiment scheme will use all possible efforts to preserve their organization, and will allow outsiders to fill up the companies in the other regiments.

DEATH IN THE WATER

It is a well known fact that when the water from the Missouri is the muddiest which is at this season of the year—just before and during the June rise—that it contains the least amount of soluble mineral impurities, such as carbonate of lime, for the reason it has been found that the many filters offered to-day that claim to clarify the water by means of alum fall far short from doing the work intended for them just at the time when most needed. The WE-FU-GO Filter clarifies the water by a simple, natural process.

We do not use Alum or Sulphate of Alumina.

The great objections to the use of either of these is: First, that in cases where the usual conditions of the water are excessively muddy as they are today, the large amount of alum required to make the water clear leaves a very bad and disagreeable puckering taste. Second, that water so clarified is not fit for the laundry because of the excess of soluble chemicals left in the water, making it very hard and unfit for use.

This filter is so simple and comprehensible that a child of ten years can easily understand, manage and clean it thoroughly in fifteen minutes. The filter is so arranged that all the impurities are carried off through the sewer, thus doing away with the objection found with all other filters. Why should you bathe in the muddy waters of the Missouri? Why should you use it for cooking? Why endanger your health by using it at all in its muddy and impure condition when you have in the WE-FU-GO Filter a clarifier that gives you water as clear and pure as the dew of the morning at a very trifling expense? The important feature of this, the greatest of all filters is that you have pure, clear water in all parts of the house, in the laundry, in the kitchen, in the bath and as much as you want, for there is no limit to the quantity. Go to any faucet in the house and you find this same clear, soft, tasteless water. After you have once used such bright, clear water as the WE-FU-GO Filter furnishes you will wonder how you ever managed to exist without it before.

more, the young democrat who refused to serve as captain of Bryan's company, says tonight that he believes the artillery organization will furnish the archer who will bring the two regiments to their full strength and that he will enlist without any inquiry as to the distribution of commissions. Seeing the turn that affairs have taken Governor Holcomb has repeated the action taken in slaughtering Colonel Bischof to make a place possible for Bryan, and has invited Bischof to occupy a place on his staff in the exposition parade next Wednesday. He desires Bischof to appear in full regiments as colonel in the National Guard. Colonel Bischof has declined the honor. He indicated to the governor that a man who was much of an "all" to go to the front with the troops would also be unable to perform such arduous staff duty.

Secretary of State Porter is suffering severely from some ailment in one of his ears, and a specialist from Omaha has been sent for to consult with the local specialist in the case. Mr. Porter has not noticed the pain a few days ago, shortly after having taken several dives under water at the sanitarium swimming pool, and believes that the water has carried some foreign substance into the ear.

Pillsbury as a Jumper. The breaking of state records in the broad jump, high jump and 100 yard sprinting on the other day has aroused much additional interest in athletics at the university. The feat of Young Pillsbury in clearing a bar five feet eight inches high is now regarded as several inches short of the capabilities of this record-breaking high jumper. A snap shot photograph of Pillsbury taken while he was going over the bar that he cleared the bar fully four inches. Should he be pushed in a contest with his best it is now believed that he can reach the six-foot mark, or even better.

HEADQUARTERS ON THE GROUNDS.

Offices of the Executive Departments to Be Removed Today. All of the offices of the exposition will be removed to the grounds today and business will open Monday morning with all the departments on the grounds except the Department of Publicity and Promotion.

The Department of Ways and Means, including the secretary's office and the Bureau of Admissions, will be located in the Service building. The Transportation and Concessions departments will also have offices in this building, while the Department of Exhibits will retain the offices in the Manufacturers building which have been occupied by the department for the last few weeks. The Service building has not been entirely completed, but it was decided that the headquarters of the various departments must be established on the grounds before the exposition opens and Sunday appeared to be the only time when the moving could be accomplished without the loss of valuable time from a working day.

The Service building is located immediately north of the Administration arch on the west side of Twentieth street. It is about as near the center of the grounds as any spot which might be selected and will be convenient of access from any portion of the three tracts. The offices of President Wattles and General Manager Clarkson will be in the Administration arch.
