PACIFIC GETS BACK INTO LINE.

Express Company Recalls Its Notice in Regard to Revenue Tax. The fight between the agricultural implement firms and the express companies is now back to where it started and present indications are that it will not be ended antil the courts decide the controversy one vay or the other. Yesterday Agent Elwell the Pacific Express company received ord from headquarters that the company had receded from its position taken in opposition to all the other express companies and that the former order of the shipper having to bear the cost of the 1-cent stamp to be affixed to all express shipment receipts would be in force again. An officer of one

of the large implement firms on learning vesterday that the Pacific Express company had fallen back in line with the other companies said: "That is just what we exected and it will make us more determined than ever to carry on the fight. When we learned of the action of the Pacific Express mpany in resending its former order and deciding to bear the expense of the tax itself

we realized that the other companies would bring the strongest kind of pressure to bear on it, with the result that the Pacific would year. he whipped back into line. The express companies may and all of them probably will refuse for the present to accede to our demand, which we feel is both just and head. legal, but when they see us shipping our goods by freight right-along instead of by express then we think they will begin to weaken and be ready to compromise. The express companies think we cannot do our

hipping of small articles by freight, but they are mistaken. It will, of course, be an jury.

There was talk yesterday among the implement men of bringing suits against the done in the east, and a meeting of the representatives of the leading firms will held today to discuss the situation and decide what further action to take.

When the sea-lions were performing at he circus one of the bystanders wanted to know if the show-man had borrowed that big fish at Sullivans, the grocer? The show-man didn't know Sullivan, but he enjoyed the joke on the fellow just the same. The man declared he had seen something that looked like it at Sullivan's. It was probably the big June fish he had seen.

LEAD, S. D., July 3 .- (Special.)-Lead has been known as the toughest place in the Black Hills. It has been the headquarters for all the gambling dens and disreputable places of the country, for the reason that nore laboring men are employed here with bigger pay roll than in any other place. Beginning today, every gambling place is to be closed. The business men of the ity have brought the movement about Thousands of dollars have been spent each month in these gambling dens that will now go into other channels of legitimate trade in the city. distances on the surface. The entire district is practically unprospected. A cleanup was made this week in the St. Elmo mine, near Hill City, owned by Captain Marsh of Omaha. The mill has been running nearly four months on a good grade of ore. The cleanup this week was the best yet made at the mill. About thirty-five tons of ore are being treated daily. As soon as a republican a few years ago. In the Fifth the broken formation is passed through, it is thought a much richer grade of ore will be encountered.

> A contract has been signed for the transfer of seventy claims in the Keystone mining district to a Colorado syndicate, of which a Mr. Wemer is the principal figure. The onsideration is reported to be \$250,000, 10, per cent to be paid August 15 and the balnce in six months. The property joins the Holy Terror and the Keystone mines. F. W. Busch, superintendent and general nanager of the Gold Coin Mining company, has arrived in the Hills and will com nence immediately to push development work in the Gold Coin mine, seven miles west of Custer. The present development onsists of a timbered shaft ninety-two feet leep, ore which assays well. Crosscuts are to be run east and west as soon as the water level is reached.

Ten more stamps are to be added to the Holy Terror mill at Keystone, which will double the capacity of the mill. With a ten-stamp mill, this company has sunk a shaft over 600 feet deep, built a large holsting plant, capable of sinking 1,500 feet, and paid regular dividends of \$9,000 a month, besides laying away a large sum for emer gencies.
