with the report. It is expected that the commissioners will now take up the subject of the Philippines. N. C. Phillips, appellant, against W. B. The American commmissioners have given this subject much attention, but so far it has never appeared before the joint commission save in the shape of one spasmodic effort made by the Spaniards at the very beginning of the sessions to have the United States abandon Manila as a precedent to further negotiations on the subject of the Philippines.

The American commissioners, among other things, have been looking into the subject of the Philippine debt, about which there is much ignorance at this end of the line. It is unlikely that the same rule will be applied to that debt as was insisted upon relative to the Cuban debt. In other words, if the United States annexes the Philippines, which seems now to be the logical outcome of the situation, it might be reasonably contended that at least so much of the debt as represented monies expended for the improvement of the island should pass to the United States with the title. The situation is regarded as materially different from that in Cuba, where the United States gains nothing substantial, for, with the annexation of the Philippines, we should acquire a territory almost as large as the British isles, with a population of more than 8,000,000 people. It will be for the American commissioners to arrange the details of the transfer of the Philippines to the United pines shall be arranged by the peace com missioners.
