Chamber of Deputies. PARIS, Jan. 19 .- In the Chamber of Deputies today M. Paschal Grousset, radical socialist, introduced the question of submarine boats with which vessels he said successful experiments had been conducted at Toulon. a revolution in naval tactics. He further declared that a syndicate of iron manufacturers had for twelve years past resisted the construction of submarine boats, and Blaine, Pratt, Kan. had tried to prevent the success of experiments in those vessels. Therefore he moved the appointment of a committee to look into the matter. The minister of marine, M. Lockroy, opposed M. Grousset's motion on the ground that a committee of the Chamber of Deputies would be incompetent to deal with the question, which, he added, was in

charge of specialists. The trial of the Gustave Zede, he said, had shown that it possessed the required capabilities, not only for firing torpedoes under water, but for navigability under water. France, the marine minister said, was the only power in possession of a practical submarine boat.

The chamber rejected the motion for urgency by a vote of 357 to 121.

TUBING LAID IN WALLS AND UNDER FLOOR

Run from Private Room to One in Which Exhibitions of His Motor Were Given\_Scientists Conduct Investigation.

PHILADELPHIA, Jan. 19.-The Press to-

day publishes an article covering, with

illustrations, over a page in space, giving the details of an investigation made by that paper of the dismantled workshop of the late John W. Keeley, which investigation, the Press contends, clearly proves the mysterious Keeley motor to have been a delusion and deception and that its alleged mysterious forces were the result of trickery. In the investigation, which has been going on for over a week, the flooring of the workshop was taken up and a brick partition wall was removed. The Press was assisted in the work by Prof. Carl Herring, a consulting engineer of experience; Prof. Arthur W. Goodspeed, assistant professor of physics of the University of Pennsylvania; Prof. Witmer, professor of experimental psychology at the University of Pennsylvxania, and Dr. M. G. Miller, who has not special training in exploration and research in the way of mound digging and accordingly superintended all the digging operations. Clarence B. Moore, son of Mrs. Bloomfield Moore, was an interested specia-

The statements in the article, which are substantiated by signed statements of the above named scientists, are to the effect that tubing was found concealed in the brickwork and under the floor of the laboratory. This, it is asserted, laid bare the possibilities of deception, as the tubing is of the kind calculated to sound high pressure and could have been used in connection with the great steel sphere found last week in the laboratory which the experts intimate was used as a reservoir for compressed air or compressed gases and the tubing could thus form an agency for the forces that moved the motor in the exhibition room. The contention of Mr. Keeley and his friends for many years has been that no tubing of any kind was needed to work this machine. The views of Mr. Herring and Mr. Goodspeed are that the presence of the tubing and sphere indicates the use of normal forces and possible deception on itse part of Keeley. In this view Prof. Moore concurs and Prof. Witmer feels that the possibility mission to Europe and America, starting of trickery confirms the diagnosis that most pyschologists make as to the delusive character of the Keeley mystery.

Two Letters to Mrs. Pinkham.

Mrs. John Williams, Englishtown, N. J., writes: "DEAR MRS. PINKHAM:-I cannot begin to tell you how I suffered before taking your remedies. I was so weak that I could hardly walk across the floor without falling. I had womb trouble and such a bearing-down feeling; also suffered with my back and limbs, pain in womb, inflammation of the bladder, piles and indigestion. Before I had taken one bottle of Lydia E. Pinkham's Vegetable Compound I felt a great deal better, and after taking two and onehalf bottles and half a box of your Liver Pills I was cured. If more would

take your medicine they would not have to suffer so much." Mrs. JOSEPH PETERSON, 513 East St.,

Warren, Pa., writes: "DEAR MRS. PINKHAM -I have suffered with womb trouble over fifteen years. I had inflammation, enlargement and displacement of the womb. I had the backache constantly, also headache, and was so dizzy. I had heart trouble, it seemed as though my heart was in my throat at times choking me. I could not walk around and I could not lie down, for then my heart would beat so fast I would feel as though I was smothering. I had to sit up in bed nights in order to breathe. I was so weak I could not do any-

"I have now taken several bot tles of Lydia E. Pinkham's Vegetable Compound, and used three packages of Sanative Wash, and can say I am perfectly cured. I do not think I could have lived long if Mrs. Pinkham's medicine had not helped me.'
