Eleven Firemen and Twenty-Six Policemen Dropped from the Rolls.

Expenses to Be Maintained Within the Levy Provided by the Council-Several Old Men Have to Be Dropped.

Until midnight last night the Board of Fire and Police Commissioners labored in executive session to decide on the men who should be dropped from the fire and police departments in order that the expenses might be maintained within the limit of the levy provided by the city council. To prune away the weak timber did not anwwer the purpose and some of the oldest men in the service, who are rated as firstclass men, had to be included in the list. Eleven firemen and twenty-six policemen were finally ordered dropped from the pay

roll, as follows: Firemen-John McGreal, Edward Carr, Nels Emerth, Robert Hicks, Herman Geiske, Matthew Gilbert, George Weeks, Martin Tighe, Charles Mack, Laurence Hughes and

'In accordance with your communication of the 27th inst., I herewith submit a list containing the names of twenty-six members of this department to comply with the tenor of the same. In carrying out your instructions I have been compelled to present the names of a number of officers who have the time of their connection with the department. This forced reduction will greatly ment and it will be utterly impossible to afford the citizens proper protection with made in the appropriation for fifty patrolmen, from which number it will be necessary to take six for the detective department, two jailers, two lockup keepers, two patrol conductors, two drivers, two sanitary officers, two reserve men for emerand night, which number is by far too inadequate to cover the territory that is conthis, together with an unfriendly police judge, leaves the department in a sadly crippled condition, and I trust that if there is an increase of crime, which I am forced to believe there will be, that the citizens and your honorable board will take into the number of patrolmen available to cover the same. I desire also to state that in my judgment it would be an unwise act to make any reduction in the number of detectives now in the service, because of the fact that with a decrease of patrolmen there will be an increase of work for the detective department, which will make it absolutely necessary for the present number to be maintained in that line of work.

"I desire also to call your attention to the fact that during the Transmississippi Exposition this department was called on to furnish officers for protection in and about the grounds, the same being an absolute necessity for the safety of the numerous visiters, and the same condition will exist durrealize that it will be an impossibility for me to make any detail of any kind for the protection of the Greater America Exposi-

I am informed that the laws of Nebraska provide that 25 per cent of all reward moneys. etc., shall be turned into the treasury to be upon investigation I find that Mr. Haze neglected to do so in the above case. Mr. Haze performed no service in connection with the arrest of said purty." The reduction in the fire department means

EVIDENCE AGAINST MITCHELL

Accused Represents that He is an Officer and Thus Secures a Cont on Credit.

W. P. Mitchell who was arrested on the charge of impersonating an officer in attempting to close up a saloon, but was never tried, was before Judge Gordon Tuesday afternoon on the charge of obtaining a \$3 mackintosh coat from K. C. Scott by misrepresentation. Scott test hed that he sold the coat to Mitchell with the understanding that he was employed by the city as a policeman and that he had a month's pay due. He promised to pay for the cost the first of this matter, but committees were appointed the month. Scott stated that Mitchell hung to take charge of the organization and rearound the hotel in the evening, going out port at the next meeting. Many of the others in the east are worthy of especial mention.

The Grand Peace Jubilee concert given by he Men's club at the Hanscom Park Methdist church last evening attracted an audience that taxed the seating capacity of the edifice to its utmost. The entertainment was given to raise funds to make up a deficit in the amount of money necessary to meet the hurch expenses and it proved a success financially as well as musically.

The music was under the direction of W. Stevens, who was assisted by Miss Josephine Thatcher, the accompanist. The feature of this part of the program was the singing of a male chorus of forty voices. The audience was hearty in its applause and the ginemen that the heat inside of a firebox the Crow annexation bill. kers merited the approval their efforts received.

New Deal in Firing Locomotives . SuperintendentCorwin of the Union Stock Yards Railread company has inaugurated something new in the firing of locomotives. The scheme is not particularly new in the his thirty engineers and firemen to his of- surroundings. It is the intention to hold showed the men the difference in results between the right way and the usual method of keeping up steam, and at the conclusion of his remarks he presented to each man a copy of Angus Sinclair's book on "Burning Soft Coal Without Smoke."

Mr. Corwin estimates that each fireman in his employ wastes at least 200 pounds of coal per day and this in the course of a month amounts to six tons. Aside from the additional cost to the company the men thus shovel a great deal more coal than is necessary and this, of course, means additional work. The system of firing proposed will prevent clinkers and will keep a good head of steam up at all times. As a general thing locomotive firemen throw a shovelful of coal into each corner of the fire box and one or two in the center. This cools the fire and for the time prevents the raising of the steam. The following leaf from Mr.

Sinclair's book explains the matter in detail: "There is an Impression among many enis so high that it is always equal to the igniting of anything in the way of fuel thrown in. This is a popular mistake. The keeping up of the igniting temperature dematerial thrown into it. If you have a boiling kettle on a bright fire, you may put in a dipperful of water without much checking the boiling. But if you put in two or three dipperfuls then boiling will cease, and ay for Santiago, where he will join his you must wait until the action of the fire ompany in the Second United States volun- asserts itself on the cooled mass. He will go from here to scatter one or two shovelfuls of coal over in the coal will be instantly distilled and the firebox will receive no chilling, but if you throw in five or six shovelfuls of fresh coal it will cool the whole mass and part of the firebox will descend below the igniting temperature, and the gases, being liberated, will pass away without doing any good. These facts will indicate how it is that firing steadily in small quantities will produce when it is put in on the system of heavy

Opposes a Boxing Tournament. Chief of Police Carroll stated last night hat he understood that an effort was being made to give a boxing and wrestling contest at Koutsky's hall for the benefit of Andrew Dupont. In this connection the chief said that he wanted to serve notice on all the parties concerned that he would not allow anything of the kind. No more prize what purpose, will be allowed to be pulled off in this city. The chief said that h would offer no objections to a wrestling match, but he positively would not permit a boxing match no matter what size gloves were worn by the contestants.

TRIALS OF SALESWOMEN.

Mrs. Pinkham Says Standing Still is One of Woman's Most Trying Tasks.

Have you ever thought why it is that so many women or girls rather walk for an hour than stand still for ten minutes? It is because most women suffer from some derangement of their delicate organism, the discomfort from which is less trying when

they are in motion than when standing. So serious are these troubles and so dangerous to health that the laws in some states compel employers to provide resting places for their female employees.

But no amount of law can regulate the hard tasks of these women. Customers are exacting, and expect the saleslady to be always cheerful and pleasant.
